1. Welcome to Online Banking Enterprise™

First National Bank introduces Online Banking Enterprise™, an electronic banking solution for clients who require full control of their business banking. FNB has developed Online Banking Enterprise™ with your business needs in mind.

Online Banking User and Access Permissions.

- Nominate one or more Administrators to manage your profile. The Administrator/s create and maintain users' permissions.
- Permit from one to nine authorisers to authorise financial transactions.
- Assign employees' permission to capture and / or authorise transactions. Administrators define the roles of any of your employees by granting them specific view, capture and authorising permissions.
- Set financial limits. The administrator/s can authorise and determine the maximum amounts that your capturers and authorisers can manage.
- Reset passwords. The administrator/s or appointed user/s can authorise and reset the user passwords of your employees.

Payments and Transfer Functionality

- Make payments such as salary and wage payments where all recipients, irrespective of where they bank, receive funds on the same day.
- Perform once-off payments.
- Import of payments and transfers from line of business systems in ACB file format or an Excel (.CSV) spreadsheet.
- Import recipients from line of business systems in ACB file format or an Excel (.CSV) spreadsheet.
- Transfer between all own FNB accounts linked to your profile.
- Manage recipient details by using folders whereby recipients are stored in logical groupings e.g. Payments folder or Creditors folder etc.
- A range of service types such as real-time, same-day, 1-day and 2-day services to process payments.
- Make cross-border payments between South Africa, Namibia, Swaziland and Lesotho.
- Submit requests to stop cheques.
- Submit future-dated payments and transfers up to 365 days in advance.
- De-authorise post-dated payments and transfers.
- Pay your tax returns once your details have been set up on SARS eFiling.
- Receive sms and email notifications of batches processed successfully / unsuccessfully, as well as batches awaiting authorisation.
- Autobump facility that automatically allows for your Payments to be adjusted (autobumped) to the next business day if you miss the payment cut-off time.

Collections

- Collect funds from pre-defined recipients.
- Perform once-off collections.
- Import of collections from line of business systems in ACB file format or an Excel (.CSV) spreadsheet.
- Import recipients from line of business systems in ACB file format or an Excel (.CSV) spreadsheet.

- Manage recipient details by using folders whereby recipients are stored in logical groupings e.g. Debtors folder etc.
- A range of service types such as real-time, same-day, 1-day, 2-day and NAEDO services to process collections.
- Submit future-dated collections up to 365 days in advance.
- De-authorise post-dated collections.
- Generate and schedule exports of reports.

Transaction History and Statements

- Transaction history available for up to 180 days. Increasing the archive period from 60 days will have cost implications.
- Transaction History has quick search and advanced search options.
- View cheque images.
- Transaction History can be viewed, printed, downloaded or exported (email).
- Current, interim and archived statements can be viewed, printed, downloaded or exported (via email, FTP).
- Statements can be downloaded in multiple formats including ASCII, CSV, Oracle Financial, Pastel, PDF, Quicken, SAP MultiCash, Swift MT940 and Rich Text.
- Scheduled exports can be created to automatically receive transaction history and statement data at a scheduled time at a scheduled frequency.

Cash Management

- Current Account-based electronic banking system that manages and optimises your working capital balances.
- Suitable for clients with multiple accounts and/or legal entities that wish to manage balances and/or interest across those accounts or entities. Online Banking Enterprise™ caters for:
    - Balance Consolidation.
    - Balance and Interest Set-off.
    - Target Balancing.
    - Interest Distribution.
- Various Cash Management reports available in different formats

Hierarchies

- Arrange your Online Banking Enterprise™ profile into a hierarchical structure, with a Group at the top level and Sub Groups on multiple levels below that.
- Facilitates the grouping of separate companies owned by the same holding company, separate divisions, regions etc. into a structure.
- The Administrators at Group level have access to the entire structure.
- Transfers can be made between all accounts linked to the structure.

3rd Party Investment Manager

- Create and Maintain 3rd Party Client profiles
- Open Investment (Notice, Call and Fixed) Accounts on behalf of 3rd Party Clients
- Perform various Instructions on the 3rd Party Clients Investment Accounts (Notice to withdraw, maturity withdrawal and reinvestment)
- Perform Financial Transactions (Fund, Transfers, Payments) on Investment Accounts
- Close Investment Accounts
- View and extract the required Statements and Reports on the Trust and Investment Accounts

eWallet Pro

- Payments to individuals without bank accounts and can be paid into a debit card with a PIN, both of which are issued by the user.
- Can also be sent to the recipient's cellular phone number.
- Dependent on the recipient having valid RSA cellular phone number or Debit Card issued by the client.
- Caters for OnceOff or repeat payments to the recipient's cell number or debit card.

Telephonic Assistance

Call **087 575 0000** for assistance with **Online Banking Enterprise™**.

Operating Hours:

Monday to Friday - 8:00 to 17:00
Saturday - 8:00 to 12:00
Closed on all Public holidays and Sundays

Call **0860 103 208** for **Online Corporate Assistance**.

Call **087 575 9994** for **Fraud Prevention Centre**.

1.1 System Navigation and Common Functions

All Users of Online Banking Enterprise ™ will only be shown the tabs, sub-tabs, buttons, actions, files and functionality they have been given access to. If a tab, sub-tab, button, action or file is not visible, then it means that you do not have permission to see or use it.

Tabs and Sub-Tabs

After logging on to the system, you will navigate through the system by using the tabs on the top of the screen. All functionally is grouped into tabs.

Where a function within a tab has a number of options, those options are grouped together in sub-tabs to ensure that all functionality is easily accessible within a single page.

Menu Options

Each tab and sub-tab has its own menu of functionality.

Menu Option

Clicking on the Menu on the left of the page will display the options that are applicable to the page and tab that you are on.
Items displayed in the orange section are functions specific to the page that you are currently on.

Extended Menu Lists

When the Menu is active, an Extended Menu List will provide quick access to functionality within that tab / sub-tab as well as to other commonly used functions on Online Banking.

Page Buttons

The buttons that you need to click on to proceed with an action are called action buttons.

There are four types of action buttons:

1. Table Actions
2. Easy Buttons
3. Quick Links
4. Page Actions

Table Actions

Table Actions are the actions that you can perform on the current page. Eg. Search, Add, Print and Download.

Table Actions are situated below the tab / sub-tabs on the top right of the page.

Easy Buttons

Easy Buttons are **shortcuts** to the most common functions that can be performed for the selected item; e.g. Based on the account type, the Easy Buttons for an account record would be Transfer, Pay and Statement whereas the Easy Buttons for a Secondary User record would be Maintain and Delete.

Clicking on an Easy Button for a specific item will take you directly to the capture page for the selected transaction type.

Easy Buttons are displayed on the far right of each record line.

Quick Links

Quick Links are **account specific** menu options.

Quick Links are displayed at the end of each record line.

Page Actions

Page Actions are triggers to perform a step within a process, e.g. Edit, Submit, Cancel, Confirm.

Page Actions are situated at the bottom right of a transactional page.

Common Functionality

Number of Records to Display

The number of records displayed on a page can be amended by selecting the desired number from the drop down menu. The selections are in increments of 10.

The minimum is 10 records per page with a maximum of 150 records per page.

Paging Options

Use the **Previous** or **Next** options at the bottom of the record table to page sequentially through a list of records.

If you have multiple pages of records you can move directly to a specific page by entering the **Previous Page Number** and then clicking on **Next.**

Hyperlink Navigation

By clicking on any information that is underlined you can view additional information about that item e.g. clicking on the Available Balance for an account will redirect you to the Transaction History for that account.

Sorting Function

The columns of information in a record table can be sorted by clicking on a hyperlinked column header.
Clicking on the column header a second time will reverse the sorting order.

The Default Sort Order is as follows:

- Order for alphabetical items = A –Z
- Order for dates = earliest to latest
- Order for numbers = smallest to largest

Search Table Action

The Search Table Action enables you to search across columns and multiple pages of records by entering any part of the description that you are looking for. You need to enter a minimum of two alphanumeric characters in the Search field.

Account Switchers

If you are performing an account specific transaction you can use the Account Switcher functionality to switch between accounts. Simply click on the arrow to select a different account from the drop down menu.

For non-financial transactions such as Account Settings, the Account Switcher is situated on the top left of the workspace.

For financial transactions such as a Payment, the Account Switcher is situated at the bottom of the page and also displays the Available Limit for the selected account.

1.2 Pre - Login Functions

The login function is used to log into the system. You will need a **User ID** and **Password** to access the system.

Forgotten Password Help

Forgot password

This function is used if you have forgotten your password, or you entered it incorrectly three times and your Profile has been blocked.

Forgot User ID

This function is used if you have forgotten your User Name.

Forgot Password as an Administrator

This function is used when an Administrator has been de-activated (as a result of entering an incorrect password three times) or if you're an Administrator and you have lost your login password and your Digital Certificate.

Please note that this facility is only available weekdays during branch operation hours.

Verify Payments

The Verify Payments functionality can be utilised by anyone outside of login to verify an electronic payment received from an FNB client.

The recipient must enter all the fields in the Verify Payments field, exactly as they appear on the payment notification.

Note. All the fields are case sensitive.

After clicking on Verify a message will be displayed, confirming whether the payment notification is legitimate or not. Should you not be sure of the legitimacy of the payment notification, please call Digital Banking Support on **087 575 0000**.

1.3 Online Banking Enterprise™ Security

Protect your online transacting environment by understanding how the threats created by fraudsters occur. Once you understand these threats, you can make informed decisions on how to defend yourself against these and protect your business with the security options contained in Online Banking Enterprise™ for your use.

Be aware of the various types of scams and fraud in circulation

Visit our Security Centre on the FNB Home page to get the latest information on the various types of scams that are being circulated by fraudsters to try and mislead clients.

We also offer a detail guide to our Business clients on our Online Banking Enterprise™ News page. Download the Online Banking Enterprise™ Security Guide and make use of the detailed information on threats as well as information on how you can defend yourself against these threats.

Be cautious in your everyday transacting

- Always have up to date anti-virus and anti-spy-ware software on your devices and perform regular scans.

Use adequate protection, we also offer Trend Micro - a FREE anti-malware program that provides you with multi-device protection from the threats of viruses, malware, being phished as well as preventing spyware from stealing your banking login details.

The Trend Micro software can be downloaded from our website by selecting Contact Us + Tools > Security Software > Trend Micro or by logging into Online Banking Enterprise™ and selecting the Download Trend Micro link available on our News page. Before you start the download, ensure that you have the necessary Admin rights to your PC or ask your IT support team to assist you with the download.

- Ensure that all your PCs are kept up to date in terms of security patches and updates supplied by the relevant software vendors. It is best to configure all products to do automatic security updates where possible.

We recommend that you always use the latest Software, Browsers and/or Apps on all your PC's and Smartphone devices to ensure that you get the benefits of all our latest functionality as well as the most up-to-date online security.

  - To update the required Software and Browser versions on your PC, simply go to the FNB Home page, click on the Register button (just before the Online Login details) and click on Software downloads.
  - To update your FNB Banking App on your Smartphone devices, simply download the latest version of the FNB Banking App via the various App stores.

- Do not open emails from people or addresses that you don't recognise. Opening spam mails may load malware onto your computer, which can track personal information and passwords. Rather delete any suspicious emails immediately.

- It is a good security practice to update your computer software but do this via the automatic options your software provides and not via a link in an email.

FNB will never send you a letter or email requesting you to complete your personal details by selecting a link in an email. Never reveal your username or password to anyone and always log onto our website directly by typing in the web address in your browser.

Stay secure by adopting the multi-layered security approach

At FNB we ensure that you can bank on us when it comes to delivering intelligent, secure and sophisticated real-time solutions to enhance your transactional activities.

We offer multiple web and mobile security features and controls that can be adapted to suit your needs. The security layers available include both compulsory and voluntary options.

A multi-layered approach allows you to adopt the security features and controls around your own specific business security needs.

We have highlighted a few of these security layers:	
Two Factor Authentication	Authentication credentials includes your username and password in addition to: • Smart inContact for Business - Approval with a PIN on our Banking App - our recommended choice for ease of use and total flexibility OR • SMS and eMail Passcodes - if you do not have a Smartphone or use a Windows Smartphone Smart inContact for Business is our recommended two factor authentication mechanism which uses smart technology via our Banking App to authenticate you securely. A Notification to authenticate the Login session, will be delivered to your authorised User's linked and paired FNB Banking App. The notification will prompt the User to Authorise the session or to Report Fraud immediately.
Authorisation	The authorisation function provides you with a tangible control to enforce segregation of duties between capturers and authorisers in addition to allowing the set-up of dual/multiple authorisations on payments, transfers or collections. This security feature includes an additional authentication to approve certain transactions, thereby enhancing the security on your accounts. The use of either Smart InContact for Business - approval with a PIN number on our Banking App or using the email and SMS Passcodes, will further enhance this security layer by ensuring you are not vulnerable to malware threats or phishing. Smart inContact for Business is recommended to authorise your

	Online Banking Enterprise™ transacting. A Notification to authorise all transactions, will be delivered to your authorised User's linked and paired FNB Banking App. The notification will prompt the User to Authorise the transaction or to Report Fraud immediately.
Manage User Access	Administrators create and authorise user access permissions. This includes the ability to reset user passwords. This function can also be allocated to other users if required. Within the controls to manage users, we offer: • Day and Time Security Settings - allows you to limit User's access to specific days and times. • Dual Authorisation on all forms of Payments - a recommended minimum control. • Dual/Multiple Administrator - all digital site settings require at least two appointed persons to create or maintain these, eliminating the risks of only one person being in control of this. • Segregation of permissions based on user responsibility - Viewers, Capturers, Authorisers. • User permissions can be allocated at account level - only allow access where it is needed. • Transacting Limits - options available for Users and for Recipients. • Recipient Folders - control who is paid and categorise your recipients for ease of use. • Verify Account Owner - verify the ownership of a recipient's account before making a payment to it.
Encryption - 128 Bit Secure Socket Layer Encryption	We use Transport Layer Security (TLS) and Secure Sockets Layer (SSL), which are cryptographic protocols that are designed to provide communication security over the Internet between us and your organisation.
Limits per User	All users can be allocated transacting limits for the accounts to which they have access.
Verify Account Owner	Prevent fraud by using Verify Account Owner to ensure that the recipient you are paying is in fact the account owner. This service also allows you to verify if the cellphone number and email address held by you, is the same as what their bank holds.
Notifications on Authorisations	Notifications can be enabled to notify users via email or SMS that batches are ready to be authorised, or whether they have been processed.
Event Logs	User activity is logged on OBE™ and can be viewed by the Administrator or authorised users at any time.
Trend Micro™	A free software program that can assist in protecting against phishing and

	prevents spyware from stealing banking login details.

1.3.1 Smart inContact for Business

Smart inContact for Business is our two-factor authentication and authorisation solution, to keep you secure whether in the office or out and about, doing what your business needs you to do.

Authenticate and authorise your transacting using the Banking App.

Why Choose Smart inContact for Business?

- Full two factor authentication on login and at all authorisation points.
- Access Online Banking Enterprise™ from any PC or Browser you want.
- Eliminates the risks linked to SIM Swap fraud and mitigates the risks introduced by malware - until this is detected and removed by your installed anti-virus and anti-malware solutions.
- Zero Data costs to use our Banking App ***

***** This excludes the initial Banking App download and viewing of videos on FNB Assist.**

How does Smart inContact for Business Work?

Authentication at Login

When you login on Online Banking Enterprise™ from a PC that you don't normally use, or you login from the same PC but you use another Browser, you will be required to confirm your login request by entering your unique PIN number on the Push notification delivered via the Banking App.

Once authenticated, you will be presented with an onscreen message which will allow you to select to Verify your PC and Browser as a trusted application to access and view web pages.

- If you select 'Yes', you will be able to continue as per normal and will not be required to perform the additional authentication the next time you logon into Online Banking Enterprise™ using the PC and Browser you have verified.

  This means that you have the flexibility to Verify additional Browsers and PC's that you may use for your banking from time to time.

or

- If you select 'No' or every time you logon into Online Banking Enterprise™ from a new browser or PC, you will be prompted to authenticate your login session by entering your unique PIN number on the Push notification delivered via the Banking App.

How to Authenticate a new Browser and/or PC:

Step 1	Step 2	Step 3
Login to your chosen browser with your unique user name and password.	A push notification will be delivered to your linked App and you will be prompted to authenticate yourself using the message sent to your Smartphone. Enter your unique 4-digit PIN to access your banking.	Select 'Yes' to Verify the browser and continue as per normal. You will not be required to perform the additional authentication the next time you logon into Online Banking Enterprise™ using the PC and Browser you have verified.

Capturers who do not have a Smartphone will receive a One Time PIN via SMS to authenticate their user login.

Authorising your Financial and Non-Financial Transactions

Step 1	Step 2	Step 3
Request Authorisation on your PC.	A push notification will be delivered to your linked App and you will have the option to authorise the transaction or to Report Fraud.	To Authorise, enter your unique 4-digit PIN to access your banking.

If you elect to Report Fraud, as you did not initiate the transaction, you will be connected to our Fraud Contact Center on 087 575 9444 for expert assistance.

Security on the Banking App

Secure Signing

- FNB Banking App makes use of X.509 digital certificate technology.
- FNB Banking App's digital certificates are stored in secure hardware on the phone that cannot be tampered with or broken into.

Instruction Signing

- All transactions need to be authorised within OBE™.
- On the Payment Authorisation flow, you have the ability to report fraud immediately if the transaction request was not initiated by your company.

Secure Software and Communication

- Unique pairing with user’s phone eliminates the risks associated with SimSwapping.
- FNB Banking App security has mechanisms that prevent other apps gaining access to it and from people trying to intercept or reverse engineer it.

- Leading security experts evaluate and test the security on a frequent basis and feedback has always been outstanding.

Built on Great Security and Scrutinised by Vendors

- Apple's and Android's operating systems allow a lot of functionality, yet are built on solid security foundations that do not allow one App to access another Apps contents without proper authorisation (if not bypassed by the user).
- Both vendors have processes in place to scrutinize and evaluate apps for their various stores. Adding an additional layer of assurance.

Download the latest version of the FNB Banking App for Smartphones from the App store and link your profile, using your Online Banking Enterprise™ username.

If you do not have the FNB Banking App:	**If you already have the FNB Banking App installed for your personal banking profile:**
• Download the Banking App from your app store and launch the app • Select '**Set up my banking app**' • Select '**I have Online Banking**' • Enter your nick name (optional) and select **'Continue'** • Select **'Finish'** to complete the linking process on the app	• Launch the app and select the menu • Select '**Switch user**' and then **'Link another user"** • Enter your business profile username and select **'Continue'** • Change your nick name (optional) and select **'Continue'** • Select **'Finish'** to complete the linking process on the app

The Smart inContact for Business set up does not form part of OBE™ on a Phone but is complementary to it. The reason for this is that some clients may want the ability to transact on the go, and others may only want their authorisers to have a mechanism to authorise.

If you want to allocate permission for your users to use the FNB Banking App for smartphones, and do their business banking securely from anywhere and at any time, the Administrator(s) must enable 'Mobile Banking' under the User Permissions.

Once the permissions have been allocated, users will be able to perform the following functions from their Smartphones via the FNB Banking App:

- View Balances and Transaction History
- Make Payments
- Do Collections
- Perform Transfers
- Authorise and Reject Financial and Non-Financial Transactions

How to enable the Mobile Banking

1. Click on the Profiles Tab.
2. Select the Maintain button directly from the User Dashboard or click on Menu for more options and select Maintain.
3. Select the user you want to maintain by clicking on the user name hyperlink.

4. Click on the User Permissions sub tab and select the Mobile Banking Enabled check box.
5. Click on Authorise to proceed with the authorisation process. If there are multiple Authorisers, the second Authoriser needs to follow the authorisation process.

Delink a Device

1. Select the Profiles tab.
2. Select the Users with Linked Devices option from the User Dashboard.
3. A list of all the Users with Linked Devices will be displayed on the screen.
4. Click on the Delink button next to the user whose device you want to delink.
5. Tick the check box net to the relevant user name and click on Confirm.
6. A confirmation screen confirms that the device has been successfully delinked.
7. Click on Finish.

1.3.2 Authentication and Authorisation using Passcodes

Authenticate and authorise your transacting using the sms and email Passcodes.

Why choose Passcodes?

- You don't use a Smartphone or use a Windows Smartphone.
- Flexibility to use any PC or Browser to access Online Banking Enterprise™.
- Two factor authentication on login and at all authentication and authorisation points with passcode delivery through SMS and Email.

Authentication at Login

When you login on Online Banking Enterprise™ from a PC that you don't normally use, or you login from the same PC but you use another Browser, you will be required to confirm this request by entering the two Passcodes codes that is sent to you via a separate SMS and Email.

Once authenticated, you will be presented with an onscreen message which will allow you to select to Verify your PC and Browser as a trusted application to access and view web pages.

- If you select 'Yes', you will be able to continue as per normal and will not be required to perform the additional authentication the next time you logon into Online Banking Enterprise™ using the PC and Browser you have verified. This means that you have the flexibility to Verify additional Browsers and PC's that you may use for your banking from time to time.

or

- If you select 'No' or every time you logon into Online Banking Enterprise™ from a new browser or PC, you will be prompted to authenticate your login session using the security Passcodes received via SMS and Email.

How to Authenticate a new Browser and/or PC:

Step 1	Step 2	Step 3
Login to your chosen browser with your unique username and password.	Confirm this request by entering the two Passcodes codes that is sent to you via a	Select 'Yes' to Verify the browser and continue as per normal.

	separate SMS and Email.	You will not be required to perform the additional authentication the next time you logon into Online Banking Enterprise™ using the PC and Browser you have verified.

Authorising your Financial and Non-Financial Transactions

Step 1	Step 2	Step 3
Request Authorisation on your PC.	Passcodes will be sent to you via SMS and Email.	Enter these passcodes on the system to Authorise your Transactions.

Important Note!

Please ensure that your personal details are captured correctly on your User profile; i.e. ID/Passport number, cell phone number and email address.

Your details can be checked by accessing the Profiles tab > My Profile. If your details need to be updated, please arrange for this to happen via your system Administrator.

If you are the Site Administrator, please check that the details for all of your users are correct and update them where required.

As the Site Administrator/s you can do this by following the simple steps below:

1. Select the Profiles Tab
2. Select the Maintain button directly from the User Dashboard or click on the Menu for more options and then select Maintain.
3. Select the user you want to maintain by clicking on the User Name hyperlink.
4. The Personal Details can be edited as required.
5. Authorise the changes you made for the User.

If you are an Administrator, and your details are incorrect, please contact your Digital Portfolio Manager or contact Digital Banking Support on 087 575 0000 for assistance.

1.3.3 Username and Login password

We use a strict user name and password policy to ensure that we securely identify and authenticate a user before allowing them access to their Online Banking Enterprise™ profile.

The Username is unique to every User; each User must be given their own Username. The login password is for the personal use of each User and should not be disclosed to any other User, as it is the key to accessing the Online Banking system.

The Username and Password are both case sensitive.

Username Rules:

- Username must be a minimum of 8 characters and a maximum of 30 characters long.
- Username can contain a mixture of upper and lower case letters, and may include a special character (eg. @) and/or one numeric (eg. 0 to 9).

Login Password

The system will allow users to select, if they want, to Hide or Show their password details whilst typing and will automatically check the validity of the information as they enter their password details.

Password Rules:

Passwords must be a minimum of 7 characters and a maximum of 30 characters

Passwords must contain at least 3 of the following:

- A lowercase letter (a-z)
- An uppercase letter (A-Z)
- A number (1-9)
- A special character (!@#$&)

Passwords may NOT:

- Be the same as the Username
- Be the same as the previous 3 passwords

Password Expiry

The Administrator/s can select the number of days for which a Login password will be valid on the Site Profile Settings.

The password change interval function is set to **Never Expire** as default but can be changed by the Administrator to suit your security needs.

The available options are as follows:

- Never (default value)
- 30 days
- 60 days
- 90 days

Please ensure that each User is made aware of these requirements.

Temporary Password Expiry

The Administrator/s can select the number of hours for which a temporary Login password will be valid on the Site Profile Settings.

The temporary password change interval function is set to 24 hours as default but can be changed by the Administrator to suit your security needs.

The available options are as follows:

- 24 hours (default value)
- 2 hours
- 6 hours
- 12 hours

Please ensure that each User is made aware of these requirements.

1.3.4 Security Settings

An additional control on access is using our date, time and/or IP Address settings options, in order to limit how and where users can access their Online Banking Enterprise™ profiles.

Date, Time and IP Address settings are not enforced by the Bank but it is recommended that Administrators load these additional security layers for all users accessing Online Banking Enterprise™.

- Date and Time settings – This allows you to select the days and time frames when your users may access your banking profile. Options to limit this to business days and times, options on weekend access as well as public holidays are possible.

- IP Address settings - IP Lockdown on PC's will limit the network from which your users can access Online Banking Enterprise in additional to which PC they can access this form. We offer options for IP Address or for an IP range to be set.

The **Time** restriction allows you to manage user access by time and days. For example, you can restrict user access on public holidays, weekends or between certain hours.
If Time is selected you need to select whether the user is allowed to access on Public holidays, the Accessible days and the Accessible times.

The **Accessible days** determine which days Online Banking Enterprise™ can be accessed. If the client selects to access Online Banking Enterprise™ on public holidays, then public holiday access will be granted even if it does not fall on a day which was selected within Accessible days, similarly if public holidays was not selected and it falls on an Accessible day which was selected, access should not be granted.

The **Accessible time** for RSA is based on GMT +2 hours, however this can differ for the African Subsidiaries and the accessible time will depend on the country that they are logging into. The accessible time can either be 24 hours or with a defined Start and End time. Start and End time increments of 1 hour will be used. An example of a Start and End time would be as follows: “08:00 – 17:00”.

The **IP Address** restriction allows you to manage user access by either a specific IP Address or for a range. If range is required, use an ‘x’ instead of a number between 0 and 255. Administrators can load up to 5 different IP addresses for each user.

How to Maintain a User's Security Settings

Use this function to make changes to an existing user's details.

1. Select the **Profiles** tab.
2. Select the **Maintain** button directly from the **User Dashboard** or click on **Menu** for more options and select **Maintain**.
3. Select the user you want to maintain by clicking on the user name hyperlink.
4. Select the **Security Settings** sub tab.

Select the required additional settings by ticking the relevant Time and IP Address buttons. When an option is selected, additional capture fields will be presented. Depending which setting you selected, you need to select the required times, and/or enter the IP Address details.

Note! You can add up to 5 IP Addresses for a user.

5. Click on **Save & Exit** to save the User with a status of Work in Progress and return to the Profiles Landing page or Click on **Authorise** to authorise the User.

How to find the IP Address on my PC

When you connect to the internet, either via your internet service provider or your office LAN connection, you are assigned an IP address. This address identifies your computer from the other computers on the internet. Your IP address can be either static, meaning it never changes, or dynamic, meaning each time you connect online you are assigned a new address for that session. Check with your internet service provider or network administrator to find out if your computer uses static or dynamic IP addressing.

Some corporate users or companies with large networks may need to load the company's proxy IP address. Please contact your IT support department for assistance. If the proxy IP address is used it is important to note that this will restrict access to all users behind that proxy which is typically the whole company network.

The commands below will show you the IP address of your computer.

Windows 2000, XP:

1. Start/Run:
2. Enter in the command: cmd
3. At the command prompt enter in: ipconfig

Vista, Windows 7:

1. Go to the command prompt by select the Windows logo and in the search box entering:cmd
2. From the command prompt enter in the command: ipconfig

Mac OS X:

1. Click on the Mac logo on the top left of the screen.
2. Open System Preferences
3. Under Internet and Network, click 'Network'
4. Select which adapter, such as AirPort or Ethernet.
5. Select TCP/IP and you'll see your IP address.

1.3.5 Hash Totals and Batch Duplicate Checks

Hash Totals

A Hash Total is an additional optional security layer that can be used as a method of verifying the accuracy of data. It is based on a total made up of unique entries that the system calculates and a set of rules (algorithm). In addition to the Hash Total validation on File import, you may also select to perform a Batch Duplication check.

How does Hash Totals work?

Your line of business application calculates the Hash Total value for the Payment or Collection file and populates it in the correct field as per the file specification. When you import your file into Online Banking Enterprise™, our system will calculate the Hash Total value and evaluate it against the Hash Total value in your file.

If these values do not match, then the file will fail and not import into Online Banking Enterprise™. Enabling this functionality helps prevent unauthorised editing of payments and collection import files.

Important Notes:

- The Administrator(s) must enable the Hash Total functionality via the Profile Site Settings.
- The Administrators must enable these settings for each entity if they have a hierarchy structure. The Settings are only related to the Entity that was selected and not to other Entities in the Hierarchy.
- Hash Total Validation is only done on Entities for which it is enabled.
- Hash Total Validation is done on both Bankserv (ACB) and CSV file imports.
- All Payments and Collections files must be single contra batch files when using Bankserv (ACB) file imports.
- The Hash Total Information of a batch is used for comparison if the batch status is not Work In Progress.
- The Hash Total Error Message is displayed on the Print Preview page is only shown if the Entity is enabled for Hash Total use.

How is a Hash Total Calculated?

For ACB files:

- Add the 11 digits of the **To Account Numbers** (recipient) and the **Non-Standard Account Number** (First 11 digits only from the right) of each standard transaction record.
- Once the total sum of the accounts in point 1 has been determined, add the 11 digits **From Account Number** only **once** to the total of point 1.
- Use the **last 12 digits** (Right justified) of the Total of point 1 and 2. E.g. 12345**678987654321.** These last 12 digits from the right will be used to populate the User Trailer Record. **Place the digits in record 92 from position 73 to 84**.

For CSV files:

- Add the digits of the **Recipient Account Numbers** (column B) of each transaction record in the CSV file.
- Once the total sum of the accounts in point 1 has been determined, add the 11-digit **Own Account Number** (Column A3) only **once** to the total of point 1.
- Use the **last 12 digits** (Right justified) of the Total of point 1 and 2. E.g. 12345**678987654321.** These last 12 digits from the right will be used to populate the

Hash Total field. **Place the digits in the Hash Total Field (Column B3) in the CSV spreadsheet.**

Batch Duplication Checks

The Perform Duplicate Batch Check function can be selected with or without selecting to use Hash Total Validation on File Import (data integrity check on imported batches) functionality. The Batch Duplication function limits the risk of duplicating batches (imported or captured) on Online Banking Enterprise™ by warning you that the file being imported is a duplicate of a file already loaded into Online Banking Enterprise™ or of batch transactions that are captured on Online Banking Enterprise™.

This function will check and confirm when the same Batch Name and/or Batch Content (Homing Account Numbers, References and Amounts) is detected for a Recipient on a captured or imported batch that already exists within another batch on Online Banking Enterprise™ and will action depending on the option selected for Action on the Duplicate.

The following Action options can be selected from the drop-down list:

1. **Continue with Batch -** If you select the "**Continue with Batch**" option – The system will NOT warn you if it detects any duplicated details and allow you to submit batches as normal.
2. **Warn User -** If you select the **Warn User** option – The system will detect that you are submitting the same Batch Name and/or Batch Content (Homing Account Numbers, References and Amounts) for a Recipient which already exists on another captured or imported batch on Online Banking Enterprise™ and will allow you to Cancel or Submit the batch.
3. **Prevent Submission of the Batch -** If you select the **Prevent Submission of the Batch** option – The system will detect that you are submitting the same Batch Name and/or Batch Content (Homing Account Numbers, References and Amounts) for a Recipient which already exists on another captured or imported batch on Online Banking Enterprise™ and will not allow you to proceed with the submission of the batch.

Hash Total Duplication Checks

This functionality verifies that the hash total for a batch being processed is unique and does not correspond to hash total information from another batch that was successfully captured previously.

- Hash Total Duplication is only done on Entities for which Perform Batch Duplicate Check is set to Yes and who have set their profile to Warn On or to prevent submission of duplicate batches.
- Hash Total Duplication checking is done on batches for both Payments and Collections.
- In the event that a batch is rejected, its Hash Total Information is removed from the Hash Total List to prevent it being used to evaluate other batches against.
- Batches will only have their Hash Total Information Logged and duplication checking done against past Hash Total Information if the Batch was captured or imported when the Perform Batch Duplicate Check setting was set to Yes for the Entity. Batches captured or imported when the functionality was switched off will not have Hash Total information stored and no duplication checking will be done.
- The Hash Total used for Batch Duplication checking is stored together with the Batch Name and Date of Submission and is kept in accordance with the entity's Payments and Collections

Retention days settings even if the user deletes the batch. It is not removed if the Entity is deactivated for Hash Total Use.

How to enable the Hash Totals and Duplicate Batch checks on your Online Banking Enterprise™ profile.

The Administrator(s) must enable the Hash Total functionality and choose if they want to perform Duplicate batch checks via Profiles < Site Settings **<** Hash Totals **<** Perform Batch Duplicate Check.

MD5 and SHA1 Hash Algorithms

We use MD5 and SHA1, secure Hash Algorithms developed by the National Institutes of Standards and Technology (NIST) and other government and private parties.

Please note that these Hash Total checks work independently to the Hash Totals and the Duplicate Batch Check functionality enabled via your Site settings. These Hash totals are automatically displayed on all Transfer, Payment and/or Collections files imported on Online Banking Enterprise™.

These Hash Algorithms essentially act as a "file check" function to help facilitate secure digital transactions on your private network.

How does it work?

If you are using hash string generating software to calculate the hash values for your Transfer, Payment and/or Collections files generated via your Line of Business systems, you can compare these with the hash strings we display on Online Banking Enterprise™ at the time of your file import. If they match, you know the data has not been tampered with.

1.3.6 Trend Micro™ Anti-Virus + Security

Trend Micro™ Antivirus + Security will give you the essential security and privacy defence you need to bank safely online via your PC, Tablet and/or Smartphone device.

The Trend Micro™ Antivirus + Security software can be downloaded from our website by selecting Contact Us + Tools > Security Software > Trend Micro™ or by logging into Online Banking Enterprise™ and selecting the Download Trend Micro link available on our News page.

Once you have downloaded the software, you will be issued a unique Key which you can then use to protect up to three of your devices.

How can Trend Micro™Antivirus + Security help you?

- It protects you against viruses and ransomware
- It blocks all dangerous websites
- It guards you against identity theft
- It allows you to protect up to three devices, including your PC, Tablet and Smartphone

1.3.7 Administrators

The importance of ensuring you have secure and robust controls over your Digital Banking profile is essential. This starts with the importance of making the best choices for your business when appointing the Administrator/s of your banking profile.

Recommendations to Administer your Online Banking Enterprise™ profile

Alignment to your business recommended audit, risk and mandate permissions with the bank should be used as a guide when making this decision. The decision should be balanced with the practical operational needs of your day to day operations.

There are inherent risks linked to fraud that are found to be more prevalent when singular levels of authority are allocated to Administrators or the number of authorisers on transactions.

We recommend that if there are multiple decision makers within your business that you appoint at least two Administrators to control the appointment of users. This ensures that permissions allocated are always checked to align to the business requirements and that this important function is not left in the control of a single Administrator.

Operational efficiency suggests the appointment of at least 3 Administrators which will then allow you the flexibility and control without being constrained to key person dependency.

Understanding the role of the Administrator and their responsibilities will make this important decision a simple one.

The Administrators Role

Online Banking Enterprise™ Administrators determine how your online transacting is set-up on every level, and is split into two distinctive levels:

- Site Profile
- User permissions

This is the foundation level of security.

The appointment of more than one administrator will mean no one person can change these important controls without the knowledge and agreement of another administrator.

Site Profile Administration

The Administrator/s is responsible for creating and maintaining the parameters under which your company will operate in the digital world.

These include:

- Number of Authorisations required for transacting - single (1 authoriser) or dual (2 authorisers). We recommend use of 2 authorisations on all forms of Payments as a minimum control.

- Payments - Folder or Once-off
- eFiling Payments
- Collections
- Transfers
- Recipient account detail to folders – the cornerstone of your payment security
- email Statements – ensuring your company's financial information remains confidential
- Password Expiry Periods – we recommend changing every 30 days
- Allowing users to Maintain Imported Transfer and Payment Batches
- Allowing Duplicate Payment Batch Names
- Notifying Capturers of Rejected Payment Batches with Reasons
- Setting of Data Retention Periods. The readily accessible data period for Transaction History, Statements, Payment and Transfer batch detail ranges from 40 to 180 days dependant on the functionality offered in each of these. Access to information easily, can significantly enhance how you use your banking for minimal cost.
- Site Profile Details
- Business Contact Details
- Billing details to a Single Nominated or Multiple Accounts

Set Up and Maintenance of User Permissions

The Administrator(s) can appoint person or persons nominated by the company to perform certain functions on behalf of the them and having certain powers including but not limited to use, administrate the facility and to appoint Administrators or Authorisers or * Super-Authorisers (if applicable) or Users.

This includes:

- permission to view specific accounts
- transacting on payments, transfers, collections and recipients
- deciding on transacting limits
- deciding on the times users can access the systems and how they access ie – which devices
- deciding on who can reset passwords

User roles explained:

- view only
- view and/or capture only
- view and/or capture and authorise
- view and/or * authorise only

The administrators are also required to ensure that the users details are correct.

User information contains important details for the user such as cell phone number, ID number and email address.

We use the user's cell phone and/or email address displaying on the **Profiles tab > My Profile** screen to send their security pass codes to.

Use of the correct ID number is essential, so that proper verification and authentication of the user can also take place. The controls on the input and capture of this information are the responsibility of the Site Administrator/s and need to be updated should users details change.

The Administrator/s you can do this by following the simple steps below:

1. Select the Profiles Tab
2. Select the Maintain button directly from the User Dashboard or click on Menu for more options and select Maintain.
3. Select the user you want to maintain by clicking on the User Name hyperlink.
4. The Personal Details can be edited as required.
5. Authorise the changes you made for the User.

Equally important is to ensure that users that are no longer in the employ of your company are deleted from the online banking profile. It is an inherent risk to pass the login credentials of a past employee to a new User.

1.3.8 Segregation of Duties

Online Banking Enterprise™ caters for numerous permissions which allows for adequate segregation of duties. You could ensure that certain users only have capture permissions and others only have authorisation permissions or setup permissions in such a way to ensure that certain accounts are not seen by users which should not have access to those accounts.

1.3.9 Dual Authorisation

Up to 9 authorisations can be applied to authorise transactions. We recommend a minimum of two authorisers is set-up to ensure transaction security.

1.3.10 A & B Signatories

The concept of A&B signatories is intended to provide a multi-level authorisation structure.

All authorisers are categorised and grouped as either a 'A' or 'B' level authoriser and the system requires that least one 'A' level authoriser must be involved in the authorisation of Email Statements, Transfers, Payments, OnceOff Payments, Folders, Collections, OnceOff Collections and CashMan Instructions.

In order to use the A&B signatories multi-level authorisation structure via Online Banking Enterprise™, it needs to be activated on FNB's back office systems. Once the formalities have been completed and the A&B Signatory module has been opened by FNB's back office team, the system will require that at least one 'A' level authoriser must be involved in the authorisation of transactions.

All authorisers on the Online Banking Enterprise™ profile must be categorised and grouped as either a 'A' or 'B' level by the Administrator(s).

- The Administrator(s) can assign the authorisation levels for each user via the Profiles Tab < User Profiles < Maintain User < Rights < Authoriser Level

Please note that in addition to assigning the authorisation rights to the various users, the Administrators must also determine and assign the required number of authorisation required for authorising Email Statements, Transfers, Payments, OnceOff Payments, Folders, Collections, OnceOff Collections and CashMan Instructions.

- The Administrator(s) can assign the Number of Authorisers for the Site via the Profiles Tab < Site Profile < Maintain Site < Number of Authorisers

Important Notes:

- If the Number of Authorisations is set to1, the system will Fully authorise the Instruction once any one 'A' level authoriser with the required permissions have authorised the Instruction.
- If the Number of Authorisations is set to 2, the system will fully authorise the Instruction once one 'A' and one 'B' level authoriser with the required permissions have authorised the Instruction or once two 'A' level authoriser with the required permissions have authorised the Instruction. If two 'B' level authorisers together attempt to authorise the instruction, the second authoriser will receive the following error message: " At Least One Signatory Of Level A is Required."

1.3.11 Super Authoriser

A Super Authoriser is a user who has been given the authority by your company to authorise financial transactions on his/her own, irrespective of the of the number of authorisations that have been assigned for the various financial transactions on via Profiles Tab > Site Settings.

A super Authoriser needs to be activated on FNB's back office systems and once the formalities have been completed and Super Authoriser rights have been assigned by FNB's back office team, the user will have the sole power to fully authorise all financial transactions such as Transfers, Payments and Collections.

Please note that although the Super Authoriser has the ability to authorise financial transactions on their own, they do not have the power to authorise any User Permissions and Site Profile Administration changes. These changes must be facilitated by the assigned Administrator(s).

1.3.12 The Event Log

The Event Log function allows you to search for an event, using the search criteria. An event is any function that is available on the system e.g. password reset, transfer added. A list of all Users ID’s that have created that event is displayed; with the date and time it was logged.

1.3.13 Limits on Online Banking Enterprise™

These are the various limits options available on Online Banking Enterprise ™.

Recipient Limits (Folders)

These are limits loaded per recipient loaded in your Folder - The Payment/Collection limit field allows you to choose the highest amount that can ever be paid to this recipient at one time.

If you tick the unlimited check box, an unlimited amount can be paid to the recipient or collected from the recipient.

You can limit the amount per payment/collection by entering an amount in the set limit field.

User - Account Permission

These are batch limits for Once Off Payments/Collections they are loaded and maintained by the Administrator and allocated per User and per Account on the Account permissions screen.

Select the unlimited option to allow the user to authorise Once Off and eFiling payments/collections batches for any amount from this account.

Select the set limit per item option to set a limit for which a Once Off or eFiling payment /Collection can be authorised.

Enter the maximum amount which can be authorised.

User - Daily Limits

These are daily account authorisation limits for payments, collections and transfers, they are loaded and maintained by the Administrators and allocated per user on the limits screen.

Select the unlimited option to allow the user to capture/authorise Once Off payments, Payments, Transfers, Collections and Once Off Collections for any amount. Select the set limit option to set the maximum amount for Once Off payments, Payments, Transfers, Collections and Once Off Collection can be captured/authorised. Enter the maximum amount which can be captured.

User - Folder Limits

These are batch limits for Folder Payments/Collections and they are loaded and maintained by the Administrator and allocated per User on the Limits screen.

Select the unlimited option to allow the user to authorise payments/collections for any amount.

Select the set limit option to set the maximum amount for which payment/collection can be authorised.

Enter the maximum amount which can be authorised.

1.3.14 Online Settlement Limits

Online Settlement Limits is a facility offered by the bank to allow clients to transact i.e. carry out payments, collections and transfers against an approved line of credit (limit).

Settlement limits needs to be maintained per client as the banks credit risk exposure is based on its clients, as borrowing entities and not on the products or accounts they use.

Online Settlement Limits does not allow for any excesses, any transactions that exceed the limit available will automatically reject and the client will have to arrange for an increase in the limit before the payments, collections or transfers can be submitted again.

Permanent limits roll up within the structure. Scheduled limits apply only to the specified entity or account and subsequent levels below. Only 1 Permanent Limit can be loaded per entity.

Permanent Limits will apply only on a Business Day limit process, which excludes Public Holidays. Should a transaction be released for execution on a public holiday the execution date will be bumped to the next business day and the corresponding limit applied.

A permanent limit must be applied before a scheduled or temporary limit can be loaded. The gross settlement limit is the combination of permanent, scheduled and temporary limits.

There are several different Settlement Limit statuses:

- **Status A**

  Transactions are processed against the settlement limit amount only and the available balance is ignored by the transaction.

  All Collections must be loaded on Status A.

- **Status B**

  Lesser of Settlement Limit OR Available Balance

  Transactions are processed against the lesser of the settlement limit or the available balance (not one and then the other).

  Transactions reduce both the settlement limit and the available balance concurrently.

  It is used when the customer wants to reduce his exposure i.e. a security measure against anyone within the customer's organisation paying out too much. The logic being "never pay more than is available but if there is more available than the ceiling specified by the limit then only allow payments up to that ceiling limit.

- **Status C**

  Transactions are processed against available balance only.

- **Status D**

  Transactions are processed against the greater of the settlement limit or the available balance. (not one and then the other). It is used when the customer is comfortable with paying out more than he has in available balance.

  For Status B and D, transaction will reduce both the limit and the available balance so there is not double exposure i.e. using up the limit and then using the available balance.

- **Status E**

  Transactions are processed against the available balance and if there is a shortfall it will then process against a limit. The settlement limit will only reduce if the transaction exceeds the available balance and cover the shortfall of the transaction.

Important Notes:

- Online Settlement Limits does not allow for any excesses, any transactions that exceed the limit available will automatically reject and the client will have to arrange for an increase in the limit before the payments, collections or transfers can be submitted again.
- Settlement Limit changes have to go through a Credit Risk Management process for credit risk authorisation.

- The payment limit applies irrespective of the type of payment being requested i.e. If a user is set to use Settlement Limits (OSL switch is Yes) ALL payments (including eFiling) must access the payments limits.

- The collection limit applies irrespective of the type of collection being requested i.e. If a user is set to use Settlement Limits (OSL switch is Yes) ALL collections (including NAEDO) must access the collection limits.

View Limit availability

1. Click on the relevant tab, i.e. **Payments**, **Collections** or **Transfers**.
2. Select the **Settlement Limits** sub tab.
3. Select the Entity you want to view by clicking on the entity name hyperlink.
4. Select the item you want to view by clicking on the **Limit** or **Account Number** hyperlink.
5. The Limit type, Authorised Limit, available Limit and percentage utilised is displayed.

Future Dated Limits Utilisation

1. Click on the relevant tab, i.e. **Payments, Collections** or **Transfers**.
2. Select the **Settlement Limits** sub tab.
3. Select the Entity you want to view by clicking on the entity name hyperlink.
4. Select the item you want to view by clicking on the Limit or Account Number hyperlink.
5. The Limit type, Authorised Limit, available Limit and percentage utilised is displayed.
6. Select **Future Dated Batches** in the action bar.
7. You are able to Print, Download or Export the information displayed.

1.3.15 Hierarchies on Online Banking Enterprise™

This function allows you to arrange your Online Banking Enterprise™ profile into a Hierarchy, with a Group at the top level and Sub Groups on multiple levels below that.

This will enable you to structure your Online Banking into groupings of separate companies owned by the same holding company, separate divisions, regions etc.

Single-level Hierarchy

A Hierarchy that has only one Entity, the Group Entity is known as a single-level Hierarchy.

The Group will automatically be created when registered on Online Banking for the first time. Other Entities can then be linked to the Group or the Group can be linked to another Entity as a Sub Group to form a Multi-level Hierarchy.

Multi-level Hierarchy

A Hierarchy that has more than one Entity is known as a multi-level Hierarchy, in other words, this Hierarchy consists of a Group and one or more Sub Groups.

Types of Users in a Hierarchy

A Hierarchy has different types of Users which are broken down as:

- Group Administrator(s)
- Site Administrator(s)
- User(s)

Group Administrator

The Group Administrator(s) control the Hierarchy. They advise FNB Online how the Hierarchy must be structured, how Sub Groups are to be linked and which Accounts, Modules, CCN's and User Codes are to be linked to which Entities.

They also create and assign the Site Administrators and based on the Group Profile Settings, they have the ability to link Users to Sub Groups below them. Any Hierarchy must have at least one Group Administrator.

You can have an unlimited number of Group Administrators, however a maximum of 2 can authorise any site profile maintenance and user changes on the group.

Site Administrator

The Site Administrator(s) can only be created and managed by the Group Administrators. Site Administrators are assigned at Sub Group level and they control the Entity they are linked to, as well as the Sub Groups below that Entity.

Should a Sub Group have no Site Administrator, the Site Administrator's permissions will automatically roll up to the Site or Group Administrator of the Entity above that Sub Group.

You can have an unlimited number of Site Administrators, however a maximum of 2 can authorise any site profile maintenance and user changes on the sub group.

Enterprise User

This is any User that is not a Group or Site Administrator. A User can be assigned the various permissions by either a Group or Site Administrator, including Authoriser permissions.

You can have an unlimited number of Users.

1.3.16 Notifications

This functionality allows each user to select to receive a sms and/or e-mail notification for the following:

- Batches requiring authorisation.
- The success/failure of processed batches (Payments, Transfers and Collections batches).
- Reminder notification 2 days prior to processing for future dated batches (to ensure the availability of funds).

1.3.17 InContact Pro

Use this function to receive notification (by means of instant SMS or email messages) of activity on your FNB accounts. This enables you to always be aware of your financial transactions as they happen.

1. Select the **Profiles** tab.
2. Select **Business Details**.
3. Click on **Menu** for more options and select **inContact Pro**.
4. Select the preferred delivery method, via **SMS** or **email** or **both** and complete the relevant Details input boxes.
5. Select your **message preferences**, i.e. either 24 hours a day or Daytime hours only (07h00 - 20h00) and enter the transaction amount. **Note. Amount must be between 100.01 and 99999999999.99.**
6. Click on **Continue**.
7. Select the **Terms and Conditions** check box.
8. Click on **Confirm**.
9. A **confirmation page** will be displayed.
10. Click on **Authorise** to proceed with the authorisation process.
11. Once completed, an authorisation **result page** will be displayed.
12. Click on **Finish**.

This functionality is currently only available to South African administrators who have at least one Commercial account linked to their Online Banking Enterprise™ profile.

1.3.18 Fraud Prevention Centre

Our Fraud Prevention Centre gives you the ability to keep updated in regard to the current online threat environment and how to guard against these. The information ranges from how to protect your computer to tips for safe banking. The Fraud Prevention link is located on the top of the screen next to the Login section on the FNB home page.

Fraud Team Contact Details

Telephone Number: **087 575 9994**
Email: risk.online@fnb.co.za

1.4 Account Name Descriptions

Account Product Codes and descriptions:

- **DDA** – **Demand Deposit Account** – a Day-to-Day Transactional Account e.g. Cheque / Savings/ Rewards Account
- **TOA** – **Investment Account/ Notice Deposit Account** – a 32 Day Interest Plus or Flexi Fixed Account
- **CDA** – **Investment Account/ Term Deposit Account** – a Fixed Deposit Account
- **ZPL/ ZFN** – **Petrol/ Credit Card** – a Petrol or Credit Card
- **PLSRC** – **Personal Loans** – a Loan Account
- **WES** – **Wesbank** – a Wesbank Account
- **CFC** – **Forex Account** - a Forex Account

Your Administrator(s) may change the Account Name for each account number displaying on your Accounts main page.

1. Select the **Profiles** tab.
2. Select the **Entity** to which the account is linked that you want either to be hidden or shown by selecting the entity name in the drop down list on the User Dashboard screen.
3. Select the **Site Settings** button on the right.
4. Select **Account Maintenance** sub tab.
5. The **Account name** can now be edited.
6. Click on **Save & Exit** if you want to save the captured information and return to the Site Profile/Hierarchy landing page. Click on **Authorise** to authorise the changes made on the Account Maintenance screen. In the case of multiple Administrators, both Administrators need to authorise changes when maintaining accounts or Click on **Cancel** to omit any changes made on the Account Maintenance screen.

2. Profiles Tab

The Profiles tab allows an Administrator to capture their own settings, the settings for all other Users, as well as for the site in general. The Profiles tab will only appear when an Administrator or a Password Administrator is logged onto the system. A Password Administrator will only be allowed to reset passwords for other Users.

Administrator/s are required to set up and maintain User permissions and to set system parameters. The administrators will set up each user and define their levels of access to accounts, payment limits, ability to digitally sign a transaction, and the resetting of passwords.

The Bank strongly recommends the appointment of more than one Administrator particularly because of the unlimited powers a single Administrator has on the system, as opposed to the limited powers Administrators in a multiple Administrator setting enjoy.

In a single Administrator setting, the one Administrator has the ultimate power to authorise any kind of transaction he/she chooses and does not need anyone else's authorisation to perform these transactions.

Whereas, in a multiple Administrator set-up, one Administrator alone cannot authorise transactions. He/She needs the authorisation of the other Administrator/s to do so, and this restriction, among others, limits the inherent risks of frauds and thefts that are prevalent in a single Administrator set-up.

The User Dashboard

The User Dashboard provides the Administrator(s) with easy access to set permissions by Users, Accounts or Folders.

Set Permissions by Users

Use this function to quickly setup permissions for all the users linked on your Online Banking Profile.

You can select one of the following groupings and then use the easy action buttons on the screen to View, Maintain, Authorise or Reset the User's permissions:

- Total Users
- Total Administrators
- Disabled users
- Re-enrolled Users
- Work In Progress
- Partially Authorised
- Users with no permission

Set Permissions by Account

Use this function to quickly setup Account permissions for all the users linked on your Online Banking Profile.

You can select one of the following account groupings, then select the required account number and allocate the required account permissions for all the users who require access to the relevant account number at the same time:

- Total Visible Accounts
- Total Hidden Accounts
- Accounts I have permission to
- Account with no permissions set

Set Permissions by folders

Use this function to quickly setup Folder permissions for all the users linked on your Online Banking Profile.

You can select one of the following folder groupings and then maintain the folder permissions and limits for all your users who require access to the relevant Folder at the same time:

- Total folders
- Folders With No permissions Set

The Administrator(s) can also select the following easy action buttons available on the dashboard to quickly access the following user maintenance functions:

- **+Add** - Use this function to create new users either with their own specific permissions or by copying the permissions from another user.
- **Maintain** - Use this function to make changes to an existing user's details.
- **Delete** - Use this function to delete one or more users.
- **Reset Password** - Use this function to Reset Passwords for users, but not for other Administrators.

View My Profile

If you are not an Administrator or a Password Administrator, you will have access to a **My Profile** tab, instead of a Profiles tab.

The My Profile tab will allow you to view your own profile as well as change certain personal details and preferences as described in the step by step guide as per the View My Profile option below.

1. Select the **Profiles** tab.
2. The **My Profile** page will be displayed.
3. You can change certain information on the **My Profile** sub tab. The **Account Permissions**, **Folder Permissions** and **User Permissions** sub tabs are for viewing only. **The Security Settings sub tab will allow you to view your Manage User Access settings or to change your Login password.**
4. Click on **Cancel** to return to the Profiles landing page or click on **Update** to save any changes made on the My Profile sub tab.

If any personal details displaying on the screen is incorrect please consult your Administrator to correct these immediately.

2.1 Create New Users

Use this function to create new users either with their own specific permissions or by copying the permissions from another user.

1. Select the Profiles tab.
2. Select the Add button directly from the User Dashboard.

Personal Details

3. Enter the Personal Details of the new user.

Important Information:

- User information contains important details for the user such as cell phone number, ID number and email address.
- We use the user's cell phone and/or email address displaying on the Profiles tab > Personal Details screen to send their security pass codes (required when they reset their passwords or re-issue their certificates).
- Use of the correct ID number is essential, so that proper verification and authentication of the user can also take place.
- The controls on the input and capture of this information are the responsibility of the Site Administrator/s and need to be updated should users details change.

User Name

- The new User will use the User ID to access the system.
- The Username is unique to every User; each User must be given their own Username.

Username Rules:

- Username must be a minimum of 8 characters and a maximum of 30 characters long.
- Username can contain a mixture of upper and lower case letters, and may include a special character (eg. @) and/or one numeric (eg. 0 to 9).

Login Password

The login password is for the personal use of each User and should not be disclosed to any other User, as it is the key to accessing the Online Banking system.

- Enter the default Password that will only be used the first time that a User logs in. The system will prompt the User to personalise the password.
- The system will allow users to select, if they want, to Hide or Show their password details whilst typing and will automatically check the validity of the information as they enter their password details.

Login Password Rules:

Passwords must be a minimum of 7 characters and a maximum of 30 characters

Passwords must contain at least 3 of the following:

- A lowercase letter (a-z)

- An uppercase letter (A-Z)
- A number (1-9)
- A special character (!@#$&)

Passwords may NOT:

- Be the same as the Username

Note. The system will expire the temporary password using the site profile setting for expiring temporary passwords, e.g. if the temporary password expiry is set to 24 hours on Site Profile, the system will expire the user's new temporary password after 24 hours.

If you want to create a new, secondary user by copying another user's permissions, please select the existing user you want to copy from before clicking on Continue.

Account Permissions

4. Click on the Account Permissions tab and select the required permission for the users for the following modules as required.

- **Non-Financials**
- **Transfers**
- **Payments**
- **Collections**
- **Once-Off and PayPal**
- **Global Payments and Receipts**
- **Global Transfers**

Select the check box next to any or all of the options that the User must have permission to perform for this account. Click on Next to move between the various financial and non-financial modules.

Daily Authorisation Limits

These are daily account authorisation limits.

- Select the unlimited option to allow the user to capture/authorise any amount from this account; or
- Select the set limit option to set the maximum amount and enter the maximum amount which can be captured/authorised by the user.

Authorisation Limit per Item

These are batch authorisation limits per account.

- Select the unlimited option to allow the user to capture/authorise any amount from this account; or
- Select the set limit option to set the maximum amount and enter the maximum amount which can be captured/authorised by the user.

Once all the Account Permissions have been completed, you can click on the Recipient Permissions tab and edited as required.

Recipient Permissions

5. Click on the Recipient Permissions tab and select the required permission for the users for the following modules as required.

- **Payment Folders**
- **Collection Folders**
- **eWallet Pro**

Select the check box next to any or all of the options that the User must have permission to perform for the relevant folder(s).

Authorisation Limit per Batch

These are the batch limits for each Payments/Collections Folder.

- Select the unlimited option to allow the user to capture/authorise any amount from this folder; or
- Select the set limit option to set the maximum amount and enter the maximum amount which can be captured/authorised by the user.

Once all the Recipient Permissions have been completed, you can click on the Security Settings tab and edited as required.

Security Settings

6. Click on the Security settings tab and capture the following security information for the user.

- **Time and IP Settings**

Time and IP Settings

Select the required additional settings by ticking the relevant Time and IP Address buttons.

When an option is selected, additional capture fields will be presented. Depending which setting you selected, you need to select the required times, and/or enter the IP Address details.

Note! You can add up to 5 IP Addresses for a user.

Once all the Security Settings have been completed, you can click on the User Permissions tab and edited as required.

User Permissions

7. Select the check box next to any or all of the following options:

- **User Enabled (**The User enabled check box is ticked by default.)
- **Administrator**
- **Security Mechanism**
- **Reset Passwords**
- **Search recipients across batches**
- **View Event Logs**

- **Rights to view: Instant Payroll, Online Billing, Limit utilisation, Future dated Batches**
- **3PIM tier Structures**

Once all the Security Settings have been completed, you can click on the Liquidity Management Permissions tab and edited as required.

Liquidity Management Permissions

8. Select the required check box(es) next to any or all of the Cash Management functions.

Cash Management permissions are set per CCN and are not linked to existing Account Permissions for User(s) on Online Banking Enterprise ™.

9. Once all the Permissions have been completed for the user, click on Save & Exit to save the User with a status of Work in Progress or click on Authorise to authorise the User.

Note:

- The new User will use the User ID to access the system. The temporary password is a default password that will only be used the first time that a User logs into the system. The system will prompt the User to personalise the password. The temporary password will expire in terms of the expiry period stored on the Site Profile settings, e.g. if the temporary password expiry is set to 24 hours on Site Profile, the system will expire the user's new temporary password after 24 hours.

2.2 Maintain a User

Use this function to make changes to an existing user's details.

1. Select the **Profiles** tab.
2. Select the **Maintain** button directly from the **User Dashboard** or click on **Menu** for more options and select **Maintain**.
3. Select the user you want to maintain by clicking on the user name hyperlink.

User Profile Settings

The **Personal Details** for the User can be edited as required.

Account Permissions

Click on the **Account Permissions** tab and edit the information for the following modules as required.

- **Non-Financials**
- **Transfers**
- **Payments**
- **Collections**
- **Once-Off and PayPal**
- **Global Payments and Receipts**
- **Global Transfers**

Select the check box next to any or all of the options that the User must have permission to perform for this account.

Daily Authorisation Limits

These are daily account authorisation limits.

- Select the **unlimited** option to allow the user to capture/authorise any amount from this account; or
- Select the **set limit** option to set the maximum amount and enter the maximum amount which can be captured/authorised by the user**.**

Authorisation Limit per Item

These are batch authorisation limits per account.

- Select the **unlimited** option to allow the user to capture/authorise any amount from this account; or
- Select the **set limit** option to set the maximum amount and enter the maximum amount which can be captured/authorised by the user**.**

Click on **Next** to move between the various financial and non-financial modules and to specify the relevant Capture/Authorise Account permissions and/or limits required for the relevant user.

Once all the Account Permissions have been completed, you can click on the **Recipient Permissions** tab and edited as required.

Recipient Permissions

Click on the **Recipient Permissions** tab and edit the information for the following modules as required.

- **Payment Folders**
- **Collection Folders**
- **eWallet Pro**

Select the check box next to any or all of the options that the User must have permission to perform for the relevant folder(s).

Authorisation Limit per Batch

These are the batch limits for each Payments/Collections Folder.

- Select the **unlimited** option to allow the user to capture/authorise any amount from this folder; or
- Select the **set limit** option to set the maximum amount and enter the maximum amount which can be captured/authorised by the user**.**

Once all the Recipient Permissions have been completed, you can click on the **Security Settings** tab and edited as required.

Security Settings

The **Security settings** tab allows you to edit the following information as required.

- **Linked Devices**
- **Time and IP Settings**

Linked Devices

A list of all Linked Devices will be displayed for the relevant user.

You can select the Delink button next to the device name if you want to delink the device from the user's profile.

Time and IP Settings

Note! You can add up to 5 IP Addresses for a user.

Once all the Security Settings have been completed, you can click on the **User Permissions** tab and edited as required.

User Permissions

If you need to change any of the User permissions, select the check box next to any or all of the options that the User must have permission to perform for the relevant permissions.

- **User Enabled (**The User enabled check box is ticked by default.)
- **Administrator**
- **Security Mechanism**
- **Reset Passwords**
- **Search recipients across batches**
- **View Event Logs**
- **Rights to view: Instant Payroll, Online Billing, Limit utilisation, Future dated Batches**
- **3PIM tier Structures**

Once all the Security Settings have been completed, you can click on the **Liquidity Management Permissions** tab and edited as required.

Liquidity Management Permissions

Separate permissions must be given for Cash Management functions.

Cash Management permissions are set per CCN and are not linked to existing Account Permissions for User(s) on Online Banking Enterprise ™.

4. Once all the **Permissions** have been completed for the user, click on **Save & Exit** to save the User with a status of Work in Progress or click on **Authorise** to authorise the User.

2.3 Delete User or Changes

Use this function to delete a User or Changes that have been made to a User.

2.3.1 Delete User

Use this function to delete a user.

1. Select the **Profiles** tab.
2. Select the **Delete button** directly from the **User Dashboard** or click on **Menu** for more options and select **Delete**.
3. Select one or more users you want to delete by clicking on the check box next to the user name. If you want to delete all the users, click on the Select All check box and click on **Delete**.
4. The system will display a confirmation message.
5. Click on **Delete** to confirm the deletion, or **Cancel** to stop the deletion.

Notes:

- An Administrator can delete a User or changes that have been made to a User.
- A User with a status of Partially Authorised cannot be deleted.
- The system will not allow an Administrator to be deleted if the client is a Single Administrator site.

2.3.1 Delete User Changes

Use this function to delete changes made to users profiles.

1. Select the **Profiles** tab.
2. Click on the **More Menu** on the left and select **Delete User Changes**.
3. Select one or more users you want to delete changes for by clicking on the check box next to the user name and click on **Delete Changes**.
4. The system will display a confirmation message.
5. Click on **Delete Changes** to confirm the deletion, or **Cancel** to stop the deletion.

An Administrator can delete a User or changes that have been made to a User.

Changes that have been made to a User can only be deleted if the status of the User is not Partially Authorised or Authorised.

2.4 Reset a User's Login Password

Use this function to Reset Passwords for users, but not for other Administrators.

1. Select the **Profiles** tab.
2. Select the **Reset Password button** directly from the **Profiles Dashboard** or click on **Menu** for more options and select **Reset Password**.
3. Select the user you want to reset login password for by clicking on the user name hyperlink.
4. Enter the **new temporary password** in accordance with the password rules and then **confirm the password**.

Note. The system will expire the temporary password using the site profile setting for expiring temporary passwords, e.g. if the temporary password expiry is set to 24 hours on Site Profile, the system will expire the user's new temporary password after 24 hours.

5. Enter your **Authorising User password** (Login password).
6. Click on **Update**.

Note: The Reset Password function allows an Administrator or Password Administrator to reset passwords for other Users, but not for other Administrators.

Login Password Rules:

Passwords must be a minimum of 7 characters and a maximum of 30 characters

Passwords must contain at least 3 of the following:

- A lowercase letter (a-z)
- An uppercase letter (A-Z)
- A number (1-9)
- A special character (!@#$&)

Passwords may NOT:

- Be the same as the Username
- Be the same as the previous 3 passwords

2.5 Export User Permissions

Use this function to export users' permissions to a .csv file arranged either By User or By Account in the selected Entity. It enables the Administrator to export users' permissions, modify them offline and then import the modified permissions back into Online Banking Enterprise™.

2.5.1 Export User Permissions files by User

Use this function to export users' permissions to a .csv file arranged By User in the selected Entity. It enables the Administrator to export users' permissions, modify them offline and then import the modified permissions back into Online Banking Enterprise™.

1. Select the **Profiles** tab.
2. Click on **Menu** for more options and select **Export Permissions by User**.
3. Select one or more users you want to export by clicking the tick box next to the user names.
4. Click on **Export**.
5. Check your inbox for the download.

Only an Administrator has permission to export users and only those users that the Administrator has access to will be exported. Users with all statuses with the exception of Delete Requested will be exported. Users can not be exported across Entities. Thus only users in the same Entity may be exported in the same file. If the user does not have permissions to a particular account, the account will still appear as it is possible to assign permissions to a user at a later stage.

If the export file is larger than 16384 lines then the number of users to be exported needs to be reduced.

In a file with more than one user, it is possible that a particular user might fail but the others would still be successful.

Cash Management will not be displayed as only the CashMan structure that the user has permission to would be displayed and this functionality would be too limited for the intended use of the files.

Information and File Types on the .CSV Spreadsheet:

All fields of the .csv file are Y (Yes)/N (No) fields with the exception of Limit fields which are populated with a U for Unlimited or a numeric value. Decimals are ignored. i.e. 100000 for Daily Authorisation Limit would mean a limit of R 100,000.00

Country Dialling Codes
The country dialling code will default to the user's country code if the user has not specified otherwise.

2.5.2 Export User Permissions files by Account

Use this function to export users' permissions by Account to a .csv file. It enables the Administrator to export users' permissions, modify them offline and then import the modified permissions back into Online Banking Enterprise™.

1. Select the **Profiles** tab.
2. Click on **Menu** for more options and select **Export Permissions by Account**.
3. Select one or more accounts you want to export by clicking the checkbox next to the account names.
4. Click on **Export**.
5. Check your inbox for the download.

Only an Administrator has permission to export accounts and only those accounts that the Administrator has access to will be exported.

If the export file is larger than 16384 lines, then the number of accounts to be exported needs to be reduced.

Cash Management will not be displayed as only the CashMan structure that the user has permission to would be displayed and this functionality would be too limited for the intended use of the files.

Information and File Types on the .CSV Spreadsheet:

All fields of the .csv file are Y (Yes)/N (No) fields with the exception of Limit fields which are populated with a U for Unlimited or a numeric value. Decimals are ignored. i.e. 100000 for Daily Authorisation Limit would mean a limit of R 100,000.00

Country Dialling Codes
The country dialling code will default to the user's country code if the user has not specified otherwise.

2.6 Import User Permissions

Use this function to import modified user permissions into Online Banking Enterprise™ from a file, thus negating the need to make the changes manually, while being online.

1. Select the **Profiles** tab.
2. Click on **Menu** for more options and select **Import User**.
3. Click on **Browse** to locate the file you want to import.
4. Once you have selected the file you want to import, click on **Continue**.
5. Click on **Finish**.
6. Check your **inbox** in order to download the results file. The results file will highlight the successful and unsuccessful items.

Note: The import users .csv file can only be used from an exported user file, i.e. a user cannot create a .csv file or download a template from the help file.

Information and File Types on the .CSV Spreadsheet:

All fields of the .csv file are Y (Yes)/N (No) fields with the exception of Limit fields which are populated with a U for Unlimited or a numeric value. Decimals are ignored. i.e. 100000 for Daily Authorisation Limit would mean a limit of R 100,000.00

Country Dialing Codes
The country dialing code will default to the user's country code if the user has not specified otherwise.

Notes:

- If a section of the file import fails it won't prevent the completion of the file. Thus if 400 users are to be updated in the import file and user 250 has an error, then only user 250 will not have his profile updated. If one of the permissions being set for a user fails, then all permissions for this user will fail. A results file, sent to the local inbox, will be generated as part of the process highlighting the successful and unsuccessful items.
- If a user appears more than once in an import file, then the instance that was imported last will be the one that has its permissions implemented upon authorisation.

The States of a User Import Result can be:

Invalid User – In the event that this user is not found in the entity.
Invalid User Detail – In the event that the user detail is invalid (all the fields in the file must be populated and must be in the correct format)
Successful – If the user personal detail update was successful.

In order for the new permissions to take effect the users have to be authorised by the required number of authorisers as per the Profile Administration setting. This function does not cater for the creation of new users, only the updating of existing users' permissions.

2.7 Authorise Users

Use this function to authorise new Users allowing them access to the system.

1. Select the **Profiles** tab.
2. Click on **Menu** for more options and select **Authorise User**.
3. Select one or more users that you want to authorise by clicking in the check box next to the user names.
4. Click on **Authorise** to proceed with the authorisation process.
5. Once completed, an authorisation **result page** will be displayed.
6. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

2.8 Site Settings

Use this function to view and Maintain Site details for your Online Banking Enterprise™ profile.

Maintain a Site Profile

1. Select the **Profiles** tab.
2. Select **Site Settings** button directly from the **User Dashboard**. **Note!** If you have a **Multilevel Hierarchy**, first select the entity you would like to view or maintain from the drop down list and then select the **Site Settings** button.
3. Make the changes as required.
4. Click on the **Save & Exit** button to save the Site Profile and go to the Authorise Instructions page or click on the **Authorise** button to authorise the changes that you have made.

Certain fields will only be displayed if you have applied for the relevant module to be activated on your profile, these modules include the Collections, Settlement Limits and CashMan functionality.

Password Expiry

Use this function to select the number of days for which a Login password will be valid.

The password change interval function is set to **Never Expi**re as default but can be changed by the Administrator to suit your security needs.

The available options are as follows:

- Never (default value)
- 30 days
- 60 days
- 90 days

Please ensure that each User is made aware of these requirements.

Temporary Password Expiry

Use this function to select the number of hours for which a temporary Login password will be valid. The temporary password change interval function is set to 24 hours as default but can be changed by the Administrator to suit your security needs.

The available options are as follows:

- 24 hours (default value)
- 2 hours
- 6 hours
- 12 hours

Please ensure that each User is made aware of these requirements.

Preferences - Keep import file order

A vital part of the Recipient import process, requires that the authorisers check the imported details by cross referencing the recipient information from the original import file against the recipients imported and displaying on Online Banking.

To make this quick and easy for the authorisers, the administrators may select this option to keep the order of the imported list in the same order of the import file. If this option is not selected, imported recipients will display in alphabetical order.

Site Permissions

You need to select the respective checkbox(es) to allow the following Site Permissions:

Note! If you do not want to allow one or more of the following site permission(s), the respective checkbox setting must be unchecked.

Allow modification of imported Payments/Collections/Transfers

Use this function to allow changes to be made to payments, collections and transfers which has been imported from a CSV or Bankserv (ACB) off-line file.

Allow modification of imported Bulk Staff Account Instruction

Use this function to allow changes to be made to a file which has been imported from an off-line file, such as a CSV file. The Bulk Staff Account Instruction is only displayed if you have applied for this functionality.

Allow duplicate Payment/Transfer/Collection Names

Use this function to allow Users to re-use the same payment, transfer or collection name. When creating NAEDO collections, the allow duplicate name check field will be ignored as NAEDO collections check for duplicates.

Notify Capturer of Rejected Payments/Collections

Use this function to allow the system to generate and send a 'notification' to the user that submitted the batch for processing, advising the user that the batch has been rejected by the authoriser.

The system will then send the 'notification' to the email address and SMS details as set-up on the capturers details on the My Profile screen.

FTP Settings

This functionality allows you to receive your Scheduled Statements, Payment Preview, Collection Preview and Load and Unpaid reports via Secure File Transfer Program (SFTP) as an alternative to the delivery via E-mail or Online Banking Enterprise ™ Inbox.

SFTP is an interactive file transfer program which performs all operations over an encrypted secure channel.

Your reports will be delivered in such a way that your Line of Business application can access the reports without human interaction.

Reports

The following reports can be accessed directly from the Online SFTP Server:

- Payment Preview (simple)
- Payment Preview (detailed)
- Collection Preview (simple)
- Collection Preview (detailed)
- Unpaid and Redirects
- Redirects
- Unpaids
- NAEDO response files
- Statements and Interim Statements

The option to link SFTP addresses to specific reports is only displayed if the SFTP address has already been captured by FNB for the entity.

In order to understand how to implement SFTP, please contact Digital Banking Support on 087 575 000 and they will ensure your Online Portfolio Manager contacts you to discuss this option.

Hash Totals

The Hash Total functions as a data integrity check that allows both the Bank and the user to ensure that the data in the file being uploaded is indeed based on the data used to create the file.

In addition, the Batch Duplication function limits the risk of duplicate batch execution on Online Banking Enterprise™ by warning the user that the file being imported is a duplicate of a file already loaded into Online Banking Enterprise™ or of batch transactions that are captured on Online Banking Enterprise™. The following options can be selected from the drop-down list:

- Prevent Submission of the Batch,
- Warn User
- Continue with Batch.

Refer to the **Profiles tab** section in this user guide to read more about **Hash Totals**.

Number of Authorisers

Use this function to select the Number of Authorisers who will have to authorise the changes made to Delivery of Statements, Transfers, Payments, Once-Off Payments / eFiling, Folders, Collections, Once-Off Collections, CashMan and Staff Accounts.

Profile Administration - This function displays the number of Administrator(s) required to authorise any site profile maintenance and user changes.

Note! Read more about Administrators in the Security Section of this User Guide.

Specify authorisers by account - Use this function to specify the number of authorisations required for a specific account(s), this setting will override the number of authorisations specified for the entity.

Billing Information

Use this function to maintain the Billing Account Option and the Account for Charges.

- If you want to have all bank charges debited to the account, you have selected- select the **Single Billing Account** option.
- If you want to have subscription fees debited to the account, you have selected and transaction fees debited to the account from which the transaction took place - select the **Multiple Billing Account** option.

Select the **Account for charges** – this is the account which will be debited for use of the system.

- If you have selected the **Single Billing Account** option, this includes monthly subscription charges and transaction fees.
- If you have selected the **Multiple Billing Account** option, this account will be debited with only the monthly subscription charges. Transaction fees will be charged to the account used for the transaction.

Business Contact Details

Use this function to maintain the Contact Person's contact details.

Retention Days

Use this function to select the number of days for which you want to store information on the system i.e. 60, 90, 120, 150 or 180 days, for Transaction History, Statements, Transfers, Payments, Once-Off Payments, Collections, Once-Off Collections.

- The system will start building the data history in accordance with your new Retention days' settings from the time your Administrator(s) activates and fully authorises the request.

Increasing the Data Retention period will have cost implications. For information on pricing for this service, please refer to the pricing guide or pricing letter.

Note! The retention days for Statements is a non- editable field as this has to be applied for.

2.9 Visible Accounts

Use this function to Show or Hide the accounts on your Online Banking Enterprise™ profile.

1. Select the **Profiles** tab.
2. Select the **Entity** to which the account is linked that you want either to be hidden or shown by selecting the entity name in the drop down list on the User Dashboard screen.
3. Select the **Site Settings** button on the right.
4. Select the **Visible Accounts** sub tab.
5. Select **Show or Hide** for each account. **Note: When an account is set to Hide, Online Banking Enterprise™ will no longer display the account. However, if this is the nominated Billing account, this will still be seen by an Administrator in the Site Profile on Online Banking Enterprise™.**
6. Click on **Save** if you want to save the changes or click on **Cancel** if you don't want to save your captured information, click on **Save & Exit** if you want to save the captured information and return to the landing page.

or

1. Select the **Profiles** tab.
2. Select the **Hierarchy & Instructions** sub tab.
3. Click on **Menu** for more options and select **Visible Accounts**.
4. Select the **Entity** to which the account is linked that you want either to be hidden or shown by selecting the entity name.
5. Select **Show or Hide** for each account. **Note: When an account is set to Hide, Online Banking Enterprise™ will no longer display the account. However, if this is the nominated Billing account, this will still be seen by an Administrator in the Site Profile on Online Banking Enterprise™.**
6. Click on **Save** if you want to save the changes or click on **Cancel** if you don't want to save your captured information, click on **Save & Exit** if you want to save the captured information and return to the landing page.

All changes made to the list of Accessible Accounts must be authorised by the required number of Administrators as defined in the **Site Profile** settings.

2.10 Assign Accounts

Use this function to assign newly opened accounts to the required Entity.

1. Select the **Profiles** tab.
2. Select the **Entity** to which the account is linked that you want either to be hidden or shown by selecting the entity name in the drop down list on the User Dashboard screen.
3. Select the **Site Settings** button on the right.
4. Select the **Assign Accounts** sub tab.
5. Click in the check box next to the **account(s)** that must be linked to the Group or Sub Groups.
6. Select the **Sub Group** where the accounts must be linked to.
7. Click on **Cancel** if you don't want to save your captured information, click on **Save & Exit** if you want to save the captured information and return to the landing page. Click on **Authorise** to authorise the changes.

or

1. Select the **Profiles** tab.
2. Select the **Hierarchy & Instructions** sub tab.
3. Click on **Menu** for more options and select **Assign Accounts**.
4. Click in the check box next to the **account(s)** that must be linked to the Group or Sub Groups.
5. Select the **Sub Group** where the accounts must be linked to.
6. Click on **Cancel** if you don't want to save your captured information, click on **Save & Exit** if you want to save the captured information and return to the landing page. Click on **Authorise** to authorise the changes.

This will allow the Administrator the functionality to assign newly opened accounts to the required Entity.

When new accounts have been added to your profile a message will be displayed after successful login to advise that there is a new account that needs to be assigned to the Entity.

2.11 Override Authorisers

Use this function to override authorisers on an account.

1. Select the **Profiles** tab.
2. Select the **Entity** to which the account is linked that you want either to be hidden or shown by selecting the entity name in the drop down list on the User Dashboard screen.
3. Select the **Site Settings** button on the right.
4. Select the **Override Authorisers** sub tab.
5. Change the number of Authorisers required for Folders, Payments, OnceOff payments, Collections and OnceOff Collections for each account.
6. Click on **Cancel** if you don't want to save your captured information, click on **Save & Exit** if you want to save the captured information and return to the landing page or click on **Authorise** to authorise the changes.

or

1. Select the **Profiles** tab.
2. Select the **Hierarchy & Instructions** sub tab.
3. Click on **Menu** for more options and select **Override Authorisers**.
4. Change the number of Authorisers required for Folders, Payments, OnceOff payments, Collections and OnceOff Collections for each account.
5. Click on **Cancel** if you don't want to save your captured information, click on **Save & Exit** if you want to save the captured information and return to the landing page or click on **Authorise** to authorise the changes.

This function is available to Administrators.

2.12 Account Maintenance

Use this function to change details of the Account Nickname, Notification Sender Name details and to change the number of Authorisers required for Folders, Payments, OnceOff payments, Collections and OnceOff Collections for each account number.

1. Select the **Profiles** tab.
2. Select the **Entity** to which the account is linked that you want either to be hidden or shown by selecting the entity name in the drop down list on the User Dashboard screen.
3. Select the **Site Settings** button on the right.
4. Select **Account Maintenance** sub tab.
5. The **Account name**, **Sender name** for Payment Notification and the number of Authorisers required for Folders, Payments, OnceOff payments, Collections and OnceOff Collections can now be edited. **Note:** The Sender name refers to how you would like the name of your company to be shown on the Payment Notification.
6. Click on **Save & Exit** if you want to save the captured information and return to the Site Profile/Hierarchy landing page. Click on **Authorise** to authorise the changes made on the Account Maintenance screen. In the case of multiple Administrators, both Administrators need to authorise changes when maintaining accounts or Click on **Cancel** to omit any changes made on the Account Maintenance screen.

or

1. Select the **Profiles** tab.
2. Select the **Hierarchy & Instructions** sub tab.
3. Click on **Menu** for more options and select **Account Maintenance**.
4. The **Account name**, **Sender name** for Payment Notification and the number of Authorisers required for Folders, Payments, OnceOff payments, Collections and OnceOff Collections can now be edited. **Note:** The Sender name refers to how you would like the name of your company to be shown on the Payment Notification.
5. Click on **Save & Exit** if you want to save the captured information and return to the Site Profile/Hierarchy landing page. Click on **Authorise** to authorise the changes made on the Account Maintenance screen. In the case of multiple Administrators, both Administrators need to authorise changes when maintaining accounts or Click on **Cancel** to omit any changes made on the Account Maintenance screen.

The Account Maintenance function is available to Administrators.

2.13 Electronic Subscriptions

Use this function to set up an sms and/or e-mail based subscription service which provides you with valuable financial and/or transactional information on your account/s to help you to better manage your accounts.

My Balance Alert

Use this function to send daily, weekly or monthly alerts via email and/or SMS that reflect the balance on your account. Alerts are sent just after 07h00 on the day you specify.

1. Select the **Profiles** tab.
2. Click on **Menu** for more options and select **Balance Alert**.
3. The Balance Alert capture page will be displayed.
4. Complete the required **Balance Alert Details**; email address, cellphone number and frequency of alerts.
5. Select which **Accounts** you would like to receive alerts for and by which method, email and/or sms.
6. You will be required to read and accept the **Terms and Conditions** of the Balance Alert messaging service before you can continue.
7. Click on **Update** to continue.
8. The details of your request will be displayed. Check that this information is correct and, if necessary, click **Edit** to make any amendments or click on **Confirm**.
9. Click on **Authorise** to proceed with the authorisation process.
10. Once completed, an authorisation **result page** will be displayed.
11. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

Electronic Subscriptions are subject to a monthly subscription fee per account. See the pricing guide for more information.

My Limit Alert

Use this function to set up sms and/or email alerts that will notify you if your account balance has reached the limit specified by you.

1. Select the **Profiles** tab.
2. Click on **Menu** for more options and select **My Limit Alert**.

1. The Limit Alert capture page will be displayed.
2. Complete the required **Limit Alert Details**; email address, cellphone number and frequency of alerts.
3. Select which **accounts** you would like to receive alerts for and by which method, email and/or sms.
4. Enter the **Limit Amount** for each of the selected accounts.
5. You will be required to read and accept the **Terms and Conditions** of the Limit Alert messaging service before you can continue.

6. Click on **Update** to continue.
7. The details of your request will be displayed. Check that this information is correct and, if necessary, click **Edit** to make any amendments or click on **Confirm**.
8. Click on **Authorise** to proceed with the authorisation process.
9. Once completed, an authorisation **result page** will be displayed.
10. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

Electronic Subscriptions are subject to a monthly subscription fee per account. See the pricing guide for more information.

2.14 Bank from your Smart Device

2.14.1 FNB Banking App for Tablets

Banking on your Tablet gives you the freedom of mobility to manage your business's financial needs with dual authorisation and dual administration capabilities, without compromising your business's security.

Simply open a Browser of choice via your Tablet, type the FNB URL in the address field and log in using your Online Banking Enterprise™ Username and Password to access and use the system exactly as you do on your PC.

You are able to access Online Banking Enterprise™ securely using any Tablet device through your choice of browser on a Tablet.

When you login on Online Banking Enterprise™ from a Tablet that you don't normally use, or you login from the same Tablet but you use another Browser,you will be required to confirm your login request using either your unique PIN number (for Smart InContact for Business) or the security Passcodes received via SMS and Email (for Passcodes).

Once authenticated, you will be presented with an onscreen message which will allow you to select to Verify your Tablet and Browser as a trusted application to access and view web pages.

- If you select 'Yes' , you will be able to continue as per normal and will not be required to perform the additional authentication the next time you logon into Online Banking Enterprise™ using the Tablet and Browser you have verified.

- If you select 'No' or every time you logon into Online Banking Enterprise™ from a new Browser, or Tablet, you will be prompted to authenticate your login session using either your unique PIN number (for Smart InContact for Business) or the security Passcodes received via SMS and Email (for Passcodes).

2.14.2 FNB Banking App for Smartphones

Mobile Business Banking has never been easier.

The Online Banking Enterprise™ on your Smartphone App allows you to:

- Authorise
- Make Payments
- View Account Balances
- Make Transfers
- View Transaction History
- Do Collections

Ask your Administrator to enable the Mobile Banking permissions on your profile:

1. Click on the Profiles Tab.
2. Select the Maintain button directly from the User Dashboard or click on Menu for more options and select Maintain.
3. Select the user you want to maintain by clicking on the user name hyperlink.
4. Click on the User Permissions sub tab and select the Mobile Banking Enabled check box.
5. Click on Authorise to proceed with the authorisation process. If there are multiple Authorisers, the second Authoriser needs to follow the authorisation process.

2.16 Authorised Representatives

This functionality will allow the Online Administrator(s) to create, maintain or delete an Authorised Representative and the Mandates associated with these relationships on Online Banking Enterprise™.

An Authorise Representative acts on behalf of your business, as per instruction from you, the board or majority of the shareholders.

The following Authorised Representative Mandate permissions can be assigned to an Individual and/or Business entity to act on your Business's behalf:

- SAR – Sole/Independent Authorised Representative
- CAR – Authorised Representative with Sole/Independent General Powers
- GAD - Authorised Representative with Joint General Powers
- BSA – Business to Business Administrator

View the assigned Authorised Representatives

1. Select the **Profiles** tab, click on the **Relationships** sub tab.
2. Click on the **Authorised Representatives** icon.
3. A list of all your existing mandates will be displayed on the page.
4. Click on the **Mandate Name hyperlink** to view the details of the mandate.

Add a new Authorised Representative

1. Select the **Profiles** tab, click on the **Relationships** sub tab.
2. Click on the **Authorised Representatives** icon.
3. A list of all your existing mandates will be displayed on the page.
4. Click on the **+Add** easy action button to add a new **Individual** or **Business Representative** who can act on your/your business's behalf.
4. Select the **Individual/Business** icon on the screen.
5. Answer the 4 related **questions**.
6. Based on the 4 **answers** selected for the questions, the system will automatically recommend the **type** of **Authorised Representative** role required for the individual.
7. Click on **Continue** to proceed to the next screen. If there are already an authorised representatives linked to the profile you will have the option to select whether you would want an **existing** or **new** Authorised Representative for the role.
   - If you select **Existing,** then a list of existing authorised representative will display. Select the applicable representative/s for the role
   - If you select **New** then you will be required to complete the following details for the new Nominated Authorised Representative: **Title**, **Name**, **Surname** and **ID Type** and **ID/Passport number.**
8. Click on **Continue**.

The person/business whom the permission is being assigned to will be verified.

- If the user's details are found on our system and it is an **exact match**, the system will allow you to continue updating further information for the user.

- If our system detects a **duplicate match**, where the ID number matches more than one profile linked on our system. Click on **Continue** to assign the permissions or click on **Edit** to change the details or click on **Cancel** to end the process.
- If our system **detects the ID number but the surname does not match**. Click on **Continue** to assign the permissions or click on **Edit** to change the details or click on “Cancel” to end the process.
- If our system **finds no details** for the user, it will prompt you to complete some additional information. Click on **Continue** to proceed with adding the permissions or click on **Edit** to change the details or click on **Cancel** to end the process.

9. After completing all the relevant fields click on **Continue** to complete the process.
10. A confirmation page will be displayed with the details of your new mandate. If in order, click on **Accept**.
11. Click on **Finish**.

The details of the existing and the new mandate will be displayed. If these changes are accepted the new mandate needs to be generated.

Please note that the Mandates must be signed by all parties and returned to FNB within 48 hours in order to make the new relationship effective. The Mandates can be returned to and FNB Branch/ Business Banker/ Uploaded on Online Banking Enterprise™.

Once completed the Mandate can be generated under the Pending option.

12. Select the **Pending** grouping option.
13. A list of all pending mandates will be displayed on the page.
14. Click on the **Generate Mandate**.
15. Select the **Delivery Method**: **Email** or **Inbox** and click on **Generate**.

Once generated, please have all the Authorised Parties sign the Mandate and Upload the new signed Mandate.

16. Once signed, select the **Profiles** tab, click on the **Relationships** sub tab.
17. Click on the **Authorised Representatives** icon.
18. Select the **Pending** grouping option.
19. A list of all pending mandates will be displayed on the page.
20. Click on the **Upload** button next to the relevant **Pending Mandate Instruction**.
21. Select the applicable document and click on **Upload**.

The maximum file size is 4MB.

Once your documents have been successfully uploaded, your request will be forwarded to our relevant FNB team for fulfilment. Fulfilment should take place within 2 business days.

The request will no longer reflect under the Pending viewing option.

Once Fulfilment is completed the existing mandate will be replaced with the new one.

Maintain an existing Authorised Representative

1. Select the **Profiles** tab, click on the **Relationships** sub tab.
2. Click on the **Authorised Representatives** icon.
3. A list of all your existing mandates will be displayed on the page.

4. Click on the **Maintain** button next to the Authorised Representative you want to maintain.
5. Once you have made the changes a new mandate will be generated.

The new mandate needs to be downloaded, signed by the relevant signatories and uploaded.

Once your documents have been successfully uploaded, your request will be forwarded to our the relevant FNB team for fulfilment. Fulfilment should take place within 2 business days.

Note: An Authorised Representative will still have full access until the fulfilment on the new mandate is completed.

Delete an existing Authorised Representative

1. Select the **Profiles** tab, click on the **Relationships** sub tab.
2. Click on the **Authorised Representatives** icon.
3. A list of all your existing mandates will be displayed on the page.
4. Click on the **Delete** button next to the Authorised Representative you want to delete.
5. A **confirmation screen** will appear to confirm that you want to delete this Authorised Representative.

- If the representative that was deleted is the primary contact person, you will need to nominate a new primary contact person from your other representatives, or you will need to create a new primary contact person.
- If the representative that was deleted was the Online Banking Administrator, you will need to nominate a new Online Banking Administrator from your other Authorised Representatives, or you will need to create a new Online Banking Administrator.

6. Once you have made the changes a new mandate will be generated.

The new mandate needs to be downloaded, signed by the relevant signatories and uploaded.

Once your documents have been successfully uploaded, your request will be forwarded to our the relevant FNB team for fulfilment. Fulfilment should take place within 2 business days.

Note: An Authorised Representative will still have full access until the fulfilment on the new mandate is completed.

2.17 Related Parties

This functionality allows the Administrator of a Business Banking and Commercial profile to View, Create, Maintain and Delete any KYC Related Parties linked to the business entity via Online Banking Enterprise™.

A Related Party refers to people and organisations that have a KYC relationship with a business. This relationship, depending on the business, may be a shareholder relationship, a trustee relationship, etc.

Related Parties are required for reporting and KYC purposes as well as for information purposes with the Company Intellectual Property Commission (CIPC).

The Administrator(s) will be able to view a list of profiles which have already been linked as Related Parties on their business profile by selecting the following step actions:

1. Select the **Profiles** tab.
2. Select the **Related Parties** sub tab.
3. A list of all the existing Entities and their Relationships will be displayed. **Note**: If you have more than one Entity linked to your Online Banking Enterprise™ profile, please select the Entity Name hyperlink to view the linked Related Parties.

Add a Related Party

Use this function to Add a new Related Party to the Business Entity.

1. Select the **Profiles** tab, click on the **Relationships** sub tab.
2. Click on the **Related Parties** icon.
3. A list of all the existing Entities and their Relationships will be displayed. **Note**: If you have more than one Entity linked to your Online Banking Enterprise™ profile, please select the Entity Name hyperlink to view the linked Related Parties.
4. Select the **+Add** action button on the right.

Note: When adding a Related Party, you can choose to add from a list of existing CIPC registered users. This information is taken directly from the CIPC database. CIPC is a body where certain companies are required to register in accordance with the Companies Act. For more information, please visit www.copc.co.za

5. Select **Add** next to the Related Party you want to add.

    - If the user you want to add does not exist on CIPC or the information is incorrect, select the **Individual** or **Non-individual** hyperlink and **add** the information manually by choosing to add the required information for the **Individual** or **Non-Individual** Related Party type and click on **Continue**.

6. Assign the Relationship by selecting the **Relationship Type** from the dropdown list and click on **Continue**.
7. A confirmation page is displayed.
8. Click on **Save & Exit** if you want to save the captured information or click on **Edit** to make any changes to the Information displaying on the page or click on **Authorise** to authorise the changes made or click on **Cancel** to omit any changes made.

In the case of multiple Administrators, both Administrators need to authorise the request.

9. Click on **Upload Docs** to upload the required KYC Related Party documentation needed to complete your application. You can click on the **Document Guide** hyperlink to obtain more information about the documentation required to complete your application.

Once a Related Party has been added, you will receive confirmation that your request will be forwarded to our Customer Resolution Centre for fulfilment. A FNB Consultant will contact you to complete any other documentation required prior to adding the Related Party.

Should you have any further queries please do not hesitate to contact us on 087 575 9479.

Maintain a Related Party

Use this function to Maintain a Related Party for a Business Entity.

1. Select the **Profiles** tab, click on the **Relationships** sub tab.
2. Click on the **Related Parties** icon.
3. A list of all the existing Entities and their Relationships will be displayed. **Note**: If you have more than one Entity linked to your Online Banking Enterprise™ profile, please select the Entity Name hyperlink to view the linked Related Parties.
4. Click on the **Maintain** button next to the Related Party you want to change.
5. Amend and complete any additional information required for the changes made to the Related Party.
6. Click on **Continue**.
7. Click on **Save & Exit** if you want to save the captured information or click on **Edit** to make any changes to the Information displaying on the page or click on **Authorise** to authorise the changes made or click on **Cancel** to omit any changes made.

In the case of multiple Administrators, both Administrators need to authorise the request.

8. Click on **Upload Docs** to upload the required KYC Related Party documentation needed to complete your application. You can click on the **Document Guide** hyperlink to obtain more information about the documentation required to complete your application.

Once a Related Party has been changed, you will receive confirmation that your request will be forwarded to our Customer Resolution Centre for fulfilment. A FNB Consultant will contact you to complete any other documentation required prior to adding the Related Party.

Should you have any further queries please do not hesitate to contact us on 087 575 9479.

Delete a Related Party

Use this function to Delete a Related Party for a Business Entity.

1. Select the **Profiles** tab, click on the **Relationships** sub tab.
2. Click on the **Related Parties** icon.
3. A list of all the existing Entities and their Relationships will be displayed. **Note**: If you have more than one Entity linked to your Online Banking Enterprise™ profile, please select the Entity Name hyperlink to view the linked Related Parties.
4. Click on the **Delete** button next to the Related Party you want to delete.
5. **Confirm** the request to delete the Related Party.

You will receive confirmation that your request will be forwarded to our Customer Resolution Centre for fulfilment. The person who has been deleted as a Related Party will receive a sms once they have been deleted from the system.

Should you have any further queries please do not hesitate to contact us on 087 575 9479.

2.18 KYC Documents

The Financial Intelligence Centre Act, Act 38 of 2001 (FICA) requires all banks in South Africa to go through a “Know Your Customer” process. We have to adhere to legislative requirements for Know Your Customer - KYC with regards to our duty to identify and to keep records for our clients.

If you have any documents outstanding, you will be notified via email/SMS or a phone call from a FNB representative. Your Administrator(s) have the ability to submit and upload any outstanding KYC documents for the business and/or Related Parties via Online Banking Enterprise™.

Upload Business KYC Documents

1. Select the **Profiles** tab.
2. Click on the **Business Details** sub tab and select the entity from the dropdown.
3. The Business Documents option will display. Click on **Upload** to view the outstanding KYC documents. **Note!** The Upload option will reflect whether the client has outstanding KYC documents or not.
4. KYC documents can be uploaded for the **Business** and any **Related Parties.** The outstanding KYC documents for the Business will reflect under the **My Business** viewing option. If there are no outstanding KYC documents there will be no documents listed here.
5. Click on **Attach** next to the document type to upload the document. **Please note that all the outstanding documents need to be uploaded at once.**
6. The documents listed in the dropdown are specific to the document type which was selected. Select the applicable document from the dropdown and click on **Upload**.

Once your documents have been successfully uploaded, your request will be forwarded to our Customer Resolution Centre for fulfilment. The KYC Fulfilment centre will verify your documents within 72 hours. Once the documents have been successfully verified, it will no longer reflect under the applicable viewing option.

Should you have any further queries please contact the KYC Fulfilment Centre on 087 33 55 405 or send us an email: ekycdocs@fnb.co.za

Upload Related Party KYC Documents

1. Select the **Profiles** tab.
1. Click on the **Business Details** sub tab and select the entity from the dropdown.
2. The Business Documents option will display. Click on **Upload** to view the outstanding KYC documents. **Note!** The Upload option will reflect whether the client has outstanding KYC documents or not.
3. KYC documents can be uploaded for the **Business** and any **Related Parties.** The outstanding KYC documents for the Related Parties will reflect under the **Related Parties** viewing option. To view if there are any outstanding KYC documents for a

Related party click on **View.** If there are no outstanding KYC documents there will be no documents listed here.

4. Click on **Attach** next to the document type to upload the document.
5. The documents listed in the dropdown are specific to the document type which was selected. Select the applicable document from the dropdown and click on **Upload**.

Once your documents have been successfully uploaded, your request will be forwarded to our Customer Resolution Centre for fulfilment. The KYC Fulfilment centre will verify your documents within 72 hours. Once the documents have been successfully verified, it will no longer reflect under the applicable viewing option.

Should you have any further queries please contact the KYC Fulfilment Centre on 087 33 55 405 or send us an email: ekycdocs@fnb.co.za

3. My Bank Accounts Tab

The My Bank Accounts landing page lists all the accounts that have been linked to your Online Banking Enterprise ™ profile (and to which you have been given access). The account number, current balance as well as the available balance are displayed for each account.

There are several action buttons available on the right side of the main screen which you can use to easily access the **Search, Download** and **Print** functions.

You can also use the easy action buttons available on the landing page to quickly access some of the most used account related functions. When using the easy buttons for a specific item you will be taken directly to the capture page for the selected transaction type.

The Menu on the left of the page will display the options that are applicable to the page and specific to your Account permissions.

When the Menu is active, an Extended Menu List will be displayed in grey. This list provides quick access to functionality within that tab / sub-tab as well as to other commonly used functions on Online Banking Enterprise™.

In order to meet the Payment Card Industry (PCI) requirements, all card numbers presented on Online Banking Enterprise™ will be masked; the full number will not be displayed.

The ATM, Credit Card and Credit Card Account numbers will be masked from the 7th to 12th digits.

Example: Credit Card – 4901 15** **** 1234
ATMCard – 4790 56** **** 1234
Credit Card Account Number - 4901 15** ****6000

3.1 Account Settings

Use this functionality to view details of your account, order new business cards, replace lost or damaged business card, maintain business cards limits, view detailed balance, transaction history and statements.

3.1.1 View and Update Account Settings

Use this functionality to view and update details of your account.

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Account Settings**.
3. Select the account you want to view by clicking on the account name hyperlink.
4. The **Settings sub-tab** will be displayed with the details of your account.
5. You can view and update the Account Settings.

The Account Maintenance function is available to Administrators.

3.1.2 Change your Account Type

Use this functionality to change your Account Type

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Account Settings**.
3. Select the account you want to change by clicking on the account name hyperlink.
4. The **Settings sub-tab** will be displayed with the details of your account.
5. Select the **Change Account type hyperlink** next to the Account type details.
6. Select the **Account Type** you want to change to by clicking on the relevant button.
7. Click on **Authorise** to proceed with the authorisation process.
8. Once completed, an authorisation **result page** will be displayed.
9. Click on **Finish**.

Notes on Changing your Account Type:

- This functionality is currently only available to South African administrators who have at least one Commercial account linked to their Online Banking Enterprise™ profile.
- Please note that if you change your account type, your account features and pricing may also change. Please refer to our pricing guide. Also, please note that any account fees and charges that are currently pending will ultimately be debited against your account.
- The Change account type functionality will only be available during business hours and will not be available on Sundays, Public Holidays and Between 21h00 - 07h00 (Monday to Saturday).

Types of account:

10. A **confirmation page** will be displayed with the details entered as per previous page.
11. Click on **Authorise** to proceed with the authorisation process.
12. Once completed, an authorisation **result page** will be displayed.
13. Click on **Finish**.

Card Limit Maintenance

Use this function to maintain Business Card limits.

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Account Settings**.
3. Select the account you want to change by clicking on the account name hyperlink.

4. Click on the **Cards** sub tab.
5. Under the **Limit header column**, select the **Update hyperlink** of the cardholder whom you would like to maintain.
6. Complete the **Card Holder Details** section.
7. Enter the required **Local** and **International Limits.**
8. Click on **Continue**.
9. A **confirmation page** will be displayed with the details entered as per previous page.
10. Click on **Authorise** to proceed with the authorisation process.
11. Once completed, an authorisation **result page** will be displayed.
12. Click on **Finish**.

Cancel a Business Card

Use this function to cancel Business Cards.

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Account Settings**.
3. Select the account you want to change by clicking on the account name hyperlink.
4. Click on the **Cards** sub tab.
5. Click on **Menu** for more options and select **Cancel Card**.
6. A list of all cards will be displayed. Select the cancellation reason from the **Reason** drop box:

    - Card has been stolen
    - Card has been lost
    - Card is damaged
    - Cancel this card (authority remains)
    - Cancel this card and authority for all cards & Cell-Phone Banking. **Note. If you select to Cancel this card and authority for all cards & Cellphone Banking, the cardholder's access with all debit cards together with Cellphone Banking (if also a registered Cell Phone Banking user) will be removed immediately. Note that any other permissions you have given to this person will need to be cancelled separately if you choose to do so.**

7. Click on **Continue**.
8. A **confirmation page** will be displayed with the details entered as per previous page.
9. Click on **Authorise** to proceed with the authorisation process.
10. Once completed, an authorisation **result page** will be displayed.
11. Click on **Finish**.

3.1.4 Investment Accounts

Use the Investment Maintenance function to view, add or update interest, maturity, withdrawal and closure instructions on your qualifying Business Investment accounts.

The following options are available on Online Banking Enterprise™:

- View Pending Instructions
- Withdraw Instructions
- Close Account Instructions
- Manage Interest
- Reinvest Instructions

The Investment Account Maintenance functionality will only be available to users with the relevant account permissions on the Qualifying Business Investment Account linked to the Online Banking Enterprise™ profile.

The Administrators must allocate the required Account permissions and transacting limits for the Investment Accounts applicable for their Users:

- Account Permissions > Non Financials (View Transaction and Statement History)
- Account Permissions > Non Financials (View Balances)

If the user has been allocated permission to perform Investment Maintenance, the Administrators will also need to allocate the relevant Transfer and Payment permissions as well as the authorisation Limits required for these transactions:

- Account Permissions > Transfers (Capture and/or Authorise)
- Account Permissions > Payments (Capture and/or Authorise)
- Account Permissions > Once Off (Capture and/or Authorise)

Authorisation Limits:

- Select the unlimited option to allow the user to capture/authorise Transfers, Payments and Once Off Payments for any amount.
- Select the set limit option to set the maximum amount for Transfers, Payments and Once Off Payments that can be captured/authorised.

The Administrator(s) you can do this by following the simple steps below:

1. Select the Profiles Tab
2. Select the Maintain button directly from the User Dashboard or click on Menu for more options and select Maintain.
3. Select the user you want to maintain by clicking on the User Name hyperlink.
4. The Account Permissions can be edited as required.
5. Authorise the changes you made for the User.

View Pending Instructions

Use this function to view all the existing instructions which have been made to your Investment Accounts but not yet been paid, as well as instructions that require authorisation.

- Click on the **Authorise** button to authorise the Pending Request. Once completed, an authorisation **result page** will be displayed. Click on **Finish**. **Note**: If there are multiple

Authorisers, all Authorisers must complete the authorisation process. Once the request has been authorised, the request will no longer reflect under the Pending viewing option.

- Click on the **Delete** button to delete the Pending Request. A **Pending Request** can only be deleted from the **Pending Request** screen when the status is **Work in Progress**. If the request is in a status of **Authorisation Requested** or **Partially Authorised** the request must be rejected in order to be maintained.

- Click on the **Maintain** button to amend the Pending Request. Once you have mended the instruction, it must be resubmitted for authorisation. **Note**: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

Withdraw Instruction

Use this function to Add, Maintain or Delete a Withdraw instruction on an Investment Account.

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Account Settings**.
3. Select the account you want to change by clicking on the account name hyperlink.
4. The **Settings sub-tab** will be displayed with the details of your account.
5. Click on the **Manage Account** button and select the **Withdraw** icon.
6. Complete the **Withdraw Instruction** by selecting the required **Withdrawal Date**, **Withdrawal Amount** and the **Account number** you want the money to be paid to.

    - **Linked Account** – Select the account you would like to transfers the funds into
    - **Other Account** – Complete the Recipients Bank details you would like to make the Payment into.

7. Click on **Continue**.
8. A **confirmation page** will be displayed with the details entered as per previous page. Click on **Confirm** to continue.
9. Click on **Authorise** to proceed with the authorisation process.
10. Once completed, an authorisation **result page** will be displayed.
11. Click on **Finish**.

The status of the payment will change from **Authorisation Requested** to **Partially Authorised** or **Fully Authorised** depending on the **Number of Authorisers** required for **Transfers (Linked Account)** or **Payments (Other Account)**.

If there are multiple Authorisers, all Authorisers must complete the authorisation process and the status must be **Fully Authorised**.

Notes:

- The withdrawal date is the date that you would like the money to be paid to you.
- Funds transferred to your account will reflect on the specified withdrawal date.
- If the date selected is before the Notice or Maturity date, there may be a withdrawal fee that applies.

Closure instructions

Use this function to Close an Investment Account.

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Account Settings**.
3. Select the account you want to change by clicking on the account name hyperlink.
4. The **Settings sub-tab** will be displayed with the details of your account.
5. Click on the **Manage Account** button and select the **Close Account** icon.
6. **Complete the required information** by selecting the required **Closure Date**, and the **Account number** you want the money to be paid to.

    - **Linked Account** – Select the account you would like to transfers the funds into
    - **Other Account** – Complete the Recipients Bank details you would like to make the Payment into.

7. Click on **Continue**.
8. A **confirmation page** will be displayed with the details entered as per previous page. Click on **Confirm**.
9. Click on **Authorise** to proceed with the authorisation process.
10. Once completed, an authorisation **result page** will be displayed.
11. Click on **Finish**.

The status of the payment will change from **Authorisation Requested** to **Partially Authorised** or **Fully Authorised** depending on the **Number of Authorisers** required for **Transfers (Linked Account)** or **Payments (Other Account)**.

If there are multiple Authorisers, all Authorisers must complete the authorisation process and the status must be **Fully Authorised**.

Notes:

- Funds transferred to your account will reflect on the specified closure date.
- If the date selected is before the Notice or Maturity date, there may be a withdrawal fee that applies.

Manage Interest Instructions

Use this function to view and manage the Interest Instruction (redirect, reinvest or withdraw) on an Investment Account.

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Account Settings**.
3. Select the account you want to change by clicking on the account name hyperlink.
4. The **Settings sub-tab** will be displayed with the details of your account.
5. Click on the **Manage Account** button and select the **Manage Interest** icon.
6. The **Interest Instruction** will be displayed on the screen,
7. Click on **Maintain** and confirm what you would like to do with your Interest:

    - Withdraw
    - Redirect

- Reinvest

If you would like to Withdraw your Interest

- Select **Withdraw** and enter the **Withdrawal Amount** and the **Account number** you want the interest to be paid to:
    - **Linked Account** – Select the account you would like to transfers the funds into
    - **Other Account** – Complete the Recipients Bank details you would like to make the Payment into.

If you would like to Redirect your Interest

- Select **Redirect** and enter the Interest **Frequency** and the **Account number** you want the interest to be paid to:
    - **Linked Account** – Select the account you would like to transfers the funds into
    - **Other Account** – Complete the Recipients Bank details you would like to make the Payment into.

If you would like to Reinvest your Interest

- Select **Reinvest** and enter the Interest **Frequency**.

8. Click on **Continue**.
9. A **confirmation page** will be displayed with the details entered as per previous page. Click on **Confirm** to continue.
10. Click on **Authorise** to proceed with the authorisation process.
11. Once completed, an authorisation **result page** will be displayed.
12. Click on **Finish**.

The status of the payment will change from **Authorisation Requested** to **Partially Authorised** or **Fully Authorised** depending on the **Number of Authorisers** required for **Transfers (Linked Account)** or **Payments (Other Account)**.

If there are multiple Authorisers, all Authorisers must complete the authorisation process and the status must be **Fully Authorised**.

Note. Interest paid to your account will only reflect on the Interest Payment date as specified.

Reinvest Instructions

Use this function to view, add or maintain the Maturity Instruction on an Investment Account.

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Account Settings**.
3. Select the account you want to change by clicking on the account name hyperlink.
4. The **Settings sub-tab** will be displayed with the details of your account.
5. Click on the **Manage Account** button and select the **Reinvest** icon.
6. **Complete the required information** by selecting the **Reinvestment Term**.

7. Click on **Continue**.
12. A **confirmation page** will be displayed with the details entered as per previous page. Click on **Confirm**.
13. Click on **Authorise** to proceed with the authorisation process.
14. Once completed, an authorisation **result page** will be displayed.
15. Click on **Finish**.

The status of the payment will change from **Authorisation Requested** to **Partially Authorised** or **Fully Authorised** depending on the **Number of Authorisers** required for **Transfers (Linked Account)** or **Payments (Other Account)**.

If there are multiple Authorisers, all Authorisers must complete the authorisation process and the status must be **Fully Authorised**.

3.2 Detailed Balance

Use this functionality to view a detailed account balance for an account.

1. Click on the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Detailed Balance**.
3. Select an account by clicking on the account Name hyperlink.

or

Simply click on the **Quick links** button next to the Account you want to view, then select **Detailed Balance**.

This can be printed or downloaded in a PDF format.

3.3 Transaction History

Use this function to view a summary of information about your transactions on your account with their resultant balances as they are processed. You can view up to 180 days' worth of transaction history, this is based on the number of retention days set up as per your Site Profile Settings, the default setting is 60 days.

Important Note! Transactions displaying on your Transaction History are not final and should not be used for reconciliation purposes; Please use the various Statement options available for reconciliation purposes to obtain your final statement data for a defined period.

1. Click on the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Transaction History**.
3. Select an account by clicking on the account Name hyperlink.

or

Simply click on the **Quick links** button next to the Account you want to view, then select **Transaction History**.

This can be printed or downloaded in a PDF, CSV, QIF, OFC and OFX format.

To increase number of days for which you want to store information on the Transaction History, please ask your Administrator(s) to extend the default settings from 60 to 90, 120, 150 or 180 days via Profiles tab > Site Settings > Retention Days.

Note! You can access additional history on your credit card by selecting the **More** button provided at the bottom of your transaction history.

It is possible to retrieve additional information on transactional accounts by clicking on the **Amount** hyperlink. There is a cost associated with viewing additional information.

The following Detailed Transaction Information can be viewed:

- Transaction Details
- Transaction Description
- Customer Service Information

You can retrieve **Images** of the front and back of the requested **cheques** by clicking on the **Description** hyperlink. To **save** a copy of the images, right click on each image, select **Save Picture As** and follow the instructions. There are costs associated with viewing images.

Quick Search

Use this function to perform a quick search, utilise any of the date options available from the drop-down lists in the By Date field: Today, Yesterday, Last 7 days, Last 15 days, Last 30 days, Last 60 days

1. Click on the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Transaction History**.
3. Select an account by clicking on the account Name hyperlink.
4. Click on **Menu** for more options and select **Transaction Search**.
5. Select the **Quick** button.

6. Click on the **dropdown list** next to Quick Search and select e.g. **Today, Yesterday, Last 7,15, 30 or 60 days** and click on **Go**.
7. Click on **Search**.
8. The search facility will return a maximum of 60 day's history or a maximum of 2100 transactions.

This can be printed or downloaded in a PDF format.

Depending on your site settings you can use Custom or Advanced Search for transactions that have been made within the last 180 days.

Custom Transaction Search

Use this function to search for a specific transaction by any of the following criteria: Debits, Credits, From date, To Date, From Amount, To Amount, By Transaction Reference, From Cheque Number and To Cheque Number.

1. Click on the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Transaction History**.
3. Select an account by clicking on the account Name hyperlink.
4. Click on **Menu** for more options and select **Transaction Search**.
5. Select the **Custom** button.
6. Select any of the following criteria: **Debits, Credits, From date, To Date, From Amount, To Amount, By Transaction Reference, From Cheque Number and To Cheque Number.**
7. Click on **Search**.

The information can be Exported in CSV format to your e-mail.

Depending on your site settings you can use Custom or Advanced Search for transactions that have been made within the last 180 days.

Advanced Transaction Search

Use this function search across the description and reference fields on your Transaction History. You are able to Search across multiple accounts, Search ranges for dates, Search ranges for amounts, Search by transaction reference, Search by cheque range, Search by debit or credit transactions, Search by categorisation.

1. **C**lick on the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Transaction History**.
3. Select an account by clicking on the account Name hyperlink.
4. Click on **Menu** for more options and select **Transaction Search**.
5. Select the **Advanced** button.
6. Select any of the following criteria: Search across multiple accounts, Search ranges for dates, Search ranges for amounts, Search by transaction reference, Search by cheque range, Search by debit or credit transactions, Search by categorisation.
7. Click on **Search**.

The information can be exported to your e-mail.

Depending on your site settings you can use Custom or Advanced Search for transactions that have been made within the last 180 days.

3.4 Email Statements

Use this function to have your current (paper) statements e-mailed directly to you.

You can specify up to 3 email addresses to which the bank statement must be sent as well as specify in which format/s you want to receive the statement i.e. PDF or PDF and CSV.

Statements are only created on Business Days (based on country rules).

If the Statement Cycle Date occurs on a non-processing day i.e. a Sunday or Public Holiday, then the statement will be generated one business day prior to the normal statement cycle date.

Users will only be able to Capture Email Statements and Authorise Email Statements if they have been given the permission by the Administrator.

If no statement data is available when the export is created, an email is sent to the client with the following text: “Dear client, please note that at the time of export no new statement data was available. Therefore, no statement has been created.” This applies to all exports, scheduled and real time.

Note:

- If you choose this option, it will replace your current (paper) statements; you cannot have a combination of delivery functions.
- If you currently receive cheque vouchers via post and you choose to subscribe to receive statements via email, your current statement delivery option will apply one more time. Thereafter you will receive your statements via email only and you will be able to view electronic copies of your cheque vouchers via Transaction History.
- If you don’t currently receive cheque vouchers via post, you will receive your first email statement as from the next statement cycle. Your previous delivery options will be cancelled.

Administrators registered who have **a qualifying Business account/s linked to their Online Banking Enterprise™** profile will have an additional option on the maintenance capture page to specify a Statement Cycle.

The Statement Cycle setting allows you to specify the delivery frequency of an email statement. It includes whether the statement must contain all the transactions that have occurred on a specific account, within the last day/ week/ month.

The statement will be delivered in accordance with the statement cycle selected.

Please note that this only applies to qualifying Business Accounts.

The following options will be listed in the drop down list:

- Do Not Change
- Daily
- Weekly – Ending on Saturday
- Monthly – Date Account Opened
- Monthly – Last Day of the Month

Note: Business Accounts cannot be unsubscribed from Email Statements.

3.5.1 Modify eMail Statements

Use this function to set up an Email Statements for each account you have selected.

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Maintain Statements**.
3. Select the account you want to be e-mailed to you by clicking in the checkbox next to one or more account names and click on **Maintain**.
4. A new page is displayed, once you have read the **disclaimer**. Accept it by clicking in the check box click on **Continue**.
5. Enter the **Request Name** for the statement. Under the account name enter the **Primary Email Address. Enter the CC Address 1** and **CC Address2** if you want the statement to be e-mailed to more than 1 person.
6. Click in the check box next to **Apply the above settings to all my accounts**, if you want all the selected accounts to be e-mailed to the same e-mail addresses.
7. Select the **Format** i.e. **PDF** or **PDF and CSV.**
8. Click on **Save & Exit**. Click on **Save** to save your changes. Click on **Cancel** if you don't want to save your changes, click on **Submit** to submit the request to an authoriser or click on **Authorise** if you are an authoriser and want to authorise the request.

Once a User has subscribed to the Email Statements option, but has not yet authorised the request(s), these will automatically be displayed under Pending Request.

The Pending Request function allows a User with the permissions to Authorise, Modify, Delete, Reject or Submit a request.

3.5.2 Pending Requests

Use this function to Authorise, Modify, Delete, Reject, Submit instructions.

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Pending Request**.
3. A new page will display all the captured requests including the **Status** of the request.

- Click on the **Authorise** button to authorise the Pending Request. Once completed, an authorisation **result page** will be displayed. Click on **Finish**. **Note**: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

- Click on the **Delete** button to delete the Pending Request. Select the request you want to delete by clicking in the checkbox next to the account name and click on **Delete**. A **Pending Request** can only be deleted from the **Pending Request** screen when the status is **Work in Progress**. If the request is in a status of **Authorisation Requested** or **Partially Authorised** the request must be rejected in order to be maintained.

- Click on the **Reject** button to reject the Pending Request. Select the request you want to reject by clicking in the checkbox next to the account name and click on **Reject**. A **Pending Request** can only be rejected from the **Pending Request** screen when the status is **Authorisation Requested** or **Partially Authorised.**

- Click on **Submit** to submit the Pending Request. Select the request you want to submit by clicking in the checkbox next to the account name and click on **Submit**. The status will automatically change to **Authorisation Requested**.

3.5.3 Unsubscribe for email Statements

Use this function to unsubscribe from the email Email Statements service if you no longer wish to receive statements via e-mail.

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Maintain Statements**.
3. Select the account you want to be e-mailed to you by clicking in the checkbox next to one or more account names and click on Unsubscribe .
4. Click on **Submit** to submit the request to an authoriser or click on **Authorise** if you are an authoriser and want to authorise the request.

If you unsubscribe from email statements, your statements will be sent via post to the postal address on your branch profile. Should you wish to receive your cheques by post or if your postal address has since changed, please visit an FNB branch or contact Digital Banking Support.

3.5.4 Email Statements - Request History

Use this function to view all the requests to change Email Statements settings for the last 150 days.

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Maintain Statements**.
3. All the Email Statement requests are displayed, together with the Date of when the request was captured and the **Status** of the request. Clicking on the Name will display the Account, Primary Email Address, CC Address 1, CC Address 2, Format, Status and the Authorisation Audit Trail.

You can delete a request by clicking on the radio button next to it and clicking on the Delete button on the action bar.

3.5.5 Email Statements - Search

Use this function to search for a request to Unsubscribe or Modify the Email Statements request.

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Search**.
3. Enter the **Email Address** and/or select the **Format** from the drop down list.
4. Click on **Search**.
5. The results will display all the accounts to where the Email Statement option has been setup.

3.5 Statements

Use this function to obtain information for Interim Statements and Recreated Statements.

3.5.1 Interim Statements

Use this function to view all the transactions that have gone through the account since the last statement date, i.e. all the current transactions.

1. Click on the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Interim Statement**.
3. Select an account by clicking on the account Name hyperlink.
4. The Interim Statement displays the Interim Statement Date and the Opening Balance.

This can be printed or downloaded in a PDF format.

If the information exceeds 2100 transactions, the information cannot be viewed online and the **Export** function will have to be used.

How to Export your Interim Statement Information.

1. Click on **Export** to export the information via Email.
2. Enter the **Email Address, Email Subject** and select **Format 1, Format 2 or Format 3** from the dropdown list.
3. Select if you would like the information to be sent in an **Email per format** or **A Single Email for all Formats**. **Note:** If you select A Single Email for all Formats, you will receive 3 e-mails in the 3 different formats.
5. Click on **Finish** or click on **Cancel** should you not want the information exported.

In instances where you have issued cheques, users are able to view and **download the front and back images of the cheque(s)** by clicking on the hyperlink of the **cheque Description.** A windows message is displayed advising that there is a cost associated to this service. Click on OK if you are happy to pay for the service and to continue or Cancel to stop the process.

3.5.2 Recreated Statements

Use this function to view recreated statement information for a specific account.

A recreated statement contains all statemented data for a defined period. Therefore, this will contain the same transactional data as the actual legal statement for the same period.

Disclaimer:

- The recreated statements provided are NOT final statements and should not be construed as final statements.
- The recreated statements are for the Clients sole use and not for the use of third parties. Should you require final statements, these can be obtained via Online Banking Enterprise ™ or from any branch.
- The Bank will not be held liable for any loss or claim that you may incur as a result of providing a third party with a copy of the recreated statement.

- The Bank cannot bear the responsibility as to what or what not the recreated statements may or may not be used for.

Recreated statements can be exported in the following formats:

- FNB Data Statement (Stmt 3)
- CSV
- PDF
- Microsoft Money (OFX)
- Microsoft Money (OFC)
- Quicken (QIF)
- Rich Text (RTF)
- SAP
- Swift MT940
- Oracle Financials
- Pastel
- Text
- Multicash

Note. If you previously used our PC CAMS solution, the following file formats are still available for you to use provided you have requested the activation of these formats through your Online Account Manager:

- CAMS CM 558 (CSV)
- CAMS CM 558 (ASCII)
- CAMS Statement by Cheque and Amount (CSV)
- CAMS Statement by Cheque and amount (ASCII)
- CAMS Statement by Date and Number (CSV)
- CAMS Statement by Date and Number (ASCII)
- CAMS Mainframe Export (ASCII) Multicash

Note. If no statement data is available, you will still receive an email but no statement will be provided.

1. Click on the **My Bank Accounts** tab.
2. Click on the **More Menu Option** on the left and select **Recreated Statements**.
3. Select an account by clicking on the account Name hyperlink.
4. Once you have read and understood the **disclaimer**, click in the check box and click on **Continue**.

The latest (most current) recreated statement is displayed.

Search Recreated Statements

1. Click on **Menu** for more options and select **Search**.
2. Select the required date rage by clicking on the available "**From**" and "**To**" statement date fields.
3. Click on **Search**.

Export Recreated Statements

1. Click on **Menu** for more options and select **Export**.
2. Complete the required **Export Destination and Format Details** to **export** the statement information to a specific email address in the required statement format options.

3. The Recreated Statement will include the **Statement Date, Opening Balance, Closing Balance, Debits, Credits** and total **Number of Debit** and **Credit Transactions for the period selected in the search or export.**

Notes:

- You can view up to 15 statements on the screen. If you want to view more than 15 statements, please select the Export button and the Statement will be sent to the specified destination in the specified format.
- If the information exceeds 2250 transactions, the information cannot be viewed online and the Export function will have to be used.

3.5.3 Statement History

You are able to download historical statements in a PDF format.

For your convenience, we offer the following two options for you to choose from:

- Unverified Statement – A PDF version without a bank stamp
- Verified Statement – A PDF version with a bank stamp

The Verified Statement option (with a bank stamp) is ideal for any official use where you are required to provide someone with your legal bank statements. Verified bank statements carries a bank stamp and has an additional reference which allows a third party to verify the authenticity of these bank statements by following a few easy steps via our FNB or RMB home page.

PDF statements are considered a legal statement due to the following main points:

- The statement is produced with the FNB branding.
- It contains the single legal entity information (First National Bank - a division of FirstRand Bank Limited. An Authorised Financial Services and Credit Provider (NCRCP20).)
- It displays our VAT vendor number.
- It is for a defined period and has a statement number.

You can search the archive for specific statement/s you would like to receive and can access statements going back to January 2004 but your search date criteria can only be entered across a 24-month period.

The latest twelve statements can be downloaded for free; a fee will be charged to download older statements.

1. Click on the **My Bank Account**s tab.
2. Click on **Menu** for more options, select **Statement History** and select an account by clicking on the **Account Name hyperlink**.
3. A new page is displayed, listing all available statements for the selected **Account Number**.

    - To email your statement: Select the **check box(es)** next to the Statement Date (s) you want, select whether you want a verified statement with a bank stamp, enter the **Email Address** and click on **Continue**.
    - To download your statement: Click on the **Download button** next to the Statement date you want and click on **Continue.** A new screen will be

displayed with the option of selecting whether you want a pdf statement without a bank stamp or a verified statement with a bank stamp, click on your choice on **Continue**.

4. Click in the check box next to this option to acknowledge that you understand the **terms and conditions** and costs of this service.
5. Click on **Confirm** to continue or **Cancel** if you do not want to request an Archived Statement.

Depending on the delivery details selected, you can download the statement or if you selected the email option, the statement will be emailed within 15 minutes in a PDF format.

Verifying a Bank Stamped Statement

The recipient/third party that you send a verified bank statement (with a bank stamp) will be able to verify the details online via our FNB home page by following the step actions listed below:

1. Go to the **FNB home page**.
2. Click on the **Contact Us + Tools** tab.
3. Select **'Verify Statements'**
4. Enter the required details as they appear on the Bank Statement (with a bank stamp) on the screen and click on **Verify**.

The respective bank statement will be displayed. The bank statement handed to the third-party must match the image of the bank statement which displays on the FNB website exactly.

3.6 eZiStatements

Use this function to quickly and easily access all recent statements.

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **eZiStatement**.
3. Select an **Account number** for your Statement request from the drop down list provided.
4. Select the delivery option by clicking either the **email** or **download** radio button.
5. Select the required statement option from the drop down list.
6. Enter your email address details and click on **Submit**.

3.7 Scheduled Exports

Use this function to setup scheduled exports of Transaction History, Statements and Interim Statements for a specific account. In this way, you do not need to login to Online Banking to view this information.

You have the option to **create new exports** for:

- Transaction History
- Statements
- Interim Statements

To view the details of a specific scheduled export, click on the **Export Name** hyper-link.

Scheduled Exports are created at user level. No authorisation is required as only exports for accounts to which the user has permission are allowed.

If no statement data is available when the export is created, an email is sent to the client with the following text: “Dear client, please note that at the time of export no new statement data was available. Therefore, no statement has been created.” This applies to all exports, scheduled and real time.

To maintain an export, click on **Menu** for more options, click on **Maintain** and select the scheduled export you want to maintain by selecting the check box(es) next to the scheduled export name.
Note: It is possible to edit the format and email address.

To delete an export, click on **Menu** for more options, click on **Delete** and select the scheduled export you want to delete by selecting the check box(es) next to the scheduled export name.

3.7.1 Create a Transaction History Scheduled Export

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Scheduled Exports**.
3. Click on **Add+** easy action button.
4. Click on **Transaction History** and select the **Account** for which you want to schedule the export.
5. Click on **Continue**.
6. Complete the required **Scheduled Export Details** and **Destination Details**.
7. Click on **Save & Exit** to complete and save the export process and return to the Accounts landing page.

3.7.2 Create a Statement Scheduled Export

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Scheduled Exports**.
3. Click on **Add+** easy action button.
4. Click on **Statements** and select the **Statement Frequency** e.g. Monthly, Weekly or Daily.

Note: All the accounts in the same selected Frequency are displayed. Click in the check box next to the account that you want to setup a scheduled export for and click on Continue.

5. Select the **Account(s)** for which you want to schedule the export and click on **Continue**. You are able to select **multiple** or **All accounts**.
6. Complete the required **Scheduled Export Details** and **Destination Details**.
7. Enter the **Export Name**, select the **Export Frequency**.
8. If you make use of SFTP, please click in the respective check box to select whether you would like this Scheduled Export to be sent via **SFTP only** or via **Email only**.
9. Enter the **Email Address**, **Email Subject** and select **Format 1, Format 2** or **Format 3** from the dropdown list.
10. Select if you would like the information to be sent in an **Email per format** or **A Single Email for all Formats**. We suggest selecting the An E-mail per format option, as certain service providers do not permit e-mails that exceed 2MB size.
11. Click on **Save & Exit** to save your changes or click on **Cancel** should you not want the information exported.

Note.

- Statements that are on a Monthly cycle cannot be setup to be e-mailed on a weekly or daily basis.
- Statements that are on a Weekly cycle cannot be setup to be e-mailed on a daily basis.

Statements scheduled to be exported will be received by 07h00 on the Date/Day selected.

3.7.3 Create an Interim Statement Scheduled Export

1. Select the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Scheduled Exports**.
3. Click on **Add+** easy action button.
4. Click on **Interim Statements** and select the **Account(s)** that you want to setup a scheduled export.

Note. You are able to select multiple or All accounts.

5. Click on **Continue**.
6. Enter the **Export Name**, select the **Export Frequency**.
7. Select the **Date/Day** and **Time**.
8. Enter the **Email Address, Email Subject** and select **Format 1, Format 2 or Format 3** from the dropdown list.
9. Select if you would like the information to be sent in an **Email per format** or **A Single Email for all Formats.** We suggest selecting the An E-mail per format option, as certain service providers do not permit e-mails that exceed 2MB size.
10. Click on **Save & Exit** to save your changes or click on Cancel should you not want the information exported.

Note:

- When selecting Every 15 minutes and Hourly, the Date/Day and Time are automatically non editable fields.
- The 15 minute scheduled exports will be sent every 15 minutes between 05h00 and 22h00.
- The 15 minute scheduled export option is only available on interim statements and not transaction history.

3.8 Bank Table

Use this functionality to download the latest bank table (TSM900) in ASCII format.

1. Click on the **My Bank Accounts**, **Payments** or **Collections** tab.
2. Click on **Menu** for more options and select **Download Bank Table**.
3. A dialog box will open and request if you would like to **open** or **download** the file.
4. If you select **open**, it will automatically display the list.
5. If you select **save**, it will save it in an ASCII zipped file to your selected destination.

The Bank Table is a complete branch listing for all banks provided by BankServ.

The Bank Table provides the latest list of branches and account rules which allows you to build functionality in your Line of Business to do validations.

3.9 Transaction Codes

Use this functionality to download a file which contains all transaction codes (including obsolete codes) that appear on your Bank statements.

1. Click on the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Transaction Code Download**.
3. A dialog box will open and request if you would like to **open** or **download** the file.
4. If you select **Open**, it will automatically display the list.
5. If you select **Save**, it will save it in a .CSV zipped file to your selected destination.

The Transaction Code file contains all transaction codes (including obsolete codes) that appear on your Bank statements.
You can capture or import these transaction codes into your Line of Business to assist with statement reconciliation.

When importing your Bank statements into your Line of Business, you can post the transactions based on the transaction codes from the table and statement accordingly.

3.10 Consolidated Account

The consolidated account note will only be displayed if the logged on user has access to at least one cash managed account.

Ninety days' worth of data is available online.

Late transactions will be carried over to the following day.

Please note that the balances on the Cash Management Accounts do not show the consolidated position or the actual amount owed to the Bank or vice versa. The actual amount owed is reflected in the Single Balance. To view your consolidated position and Single Balance, please view or access your Consolidated Account.

Single Legal Entities and Multiple Legal Entities (not on Full Set-Off)

- The daily movement on all cash managed accounts contributes to the consolidated position of the entity.
- There will be one entry per cash managed account per day on the consolidated account.
- The entry will show the movement on that account from the previous day, not the current balance.

Multiple Legal Entities (Full set-off)

- The daily movement on all cash managed accounts contributes to the consolidated position of each entity.
- There will be one entry per cash managed account per day on the consolidated account.
- The entry will show the movement on that account from the previous day, not the current balance.
- Sub entities will have one additional transaction per day showing the sweep to or from the holding company.
- The sweep will zero their consolidated account.
- The sub entity's cash position is therefore zero every night.
- The holding company's statement will show transactions for their own accounts.
- In addition, there will be one entry per sub legal entity showing that entity's contribution to the cash position of the group.
- The balance shown on the holding company's consolidated account is the correct cash position for the entire group.

1. Click on the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Consolidated Account**.
3. Select an account by clicking on the account Name hyperlink.
4. The statement displayed is the Consolidated Account Statement for the current month and it shows the consolidated position of the accounts in accordance with the terms of your facility.

This can be printed or downloaded in a PDF format.

3.11 Apply Online

This functionality allows you to apply for a new business account or to open additional business accounts for your existing business.

1. Click on the **My Bank Accounts** tab.
2. Click on **Menu** for more options and select **Apply New Accounts** from the Extended Menu list.
3. Click **Yes** to confirm that you want to end your Online Banking Enterprise™ session and enter the **FNB Sales** website.
4. Follow the easy prompts and complete the **application** online.

This functionality is currently only available to Single Administrators.

3.12 Stop Cheque

This functionality allows you to stop a cheque.

Note: As per the Payments Association of South Africa (PASA), w.e.f. 01 May 2020, no cheques with a value greater than R50,000.00 may be issued or accepted. Cheques can not be split to circumvent this limit. Please utilise a digital form of payment as an alternative.

1. Select the **My Bank Accounts or Payments** tab.
2. Click on **Menu** for more options and select **Stop Cheque**.
3. Select the **Account** that you would like to place the stop cheque by clicking on the account name hyperlink.
4. Click on **Menu** for more options and select **Add Stop Cheque**.

    - If it is a **Single Cheque**, click in the Single Cheque button and type in the cheque number. From the dropdown list, select the reason for cancelling the cheque e.g. lost/stolen, issued in error, cancelled, other.
    - If you are stopping **Multiple Cheques**, click in the Stop Multiple Cheques button and type in the range of cheque numbers in the From and To fields. From the dropdown list, select the reason for cancelling the cheques e.g. lost/stolen, issued in error, cancelled, other.

5. Click on **Stop Cheque**.
6. A new page will display the details of the cancel cheque/s instruction.
7. Check that you want to cancel the cheque/s shown and click on the **Confirm** button.
8. The status of the cancellation will be displayed.
9. Click on the **Finish** button to complete the process.

Notes:

- Should you use this facility to stop a cheque that has been presented for payment, the cheque cannot be stopped, even though successful confirmation is displayed.
- The Bank is not liable for any losses sustained due to incorrect information supplied or if the cheque has already been paid.
- Guaranteed cheques will not be stopped by the bank provided that the amount on the cheque does not exceed the guarantee amount and the drawer had adhered to the guarantee conditions.
- Should you require confirmation that your stop cheque instruction was successful or have any further queries, please contact your branch.

3.13 Managing Debit Orders

Use this function to **manage the debit orders** on your Cheque Account.

A debit order is an instruction from you to a third party (e.g. company/service provider) to allow that third party to collect a fixed/variable payment from your bank account on a specified date and frequency.

The third party can not process a debit order (collect money from your bank account) without you providing consent; this can be done in writing, telephonically or via completion of an electronic mandate (agreement).

The following functionality is available on the My Debit Orders sub-tab:

- View Debit Orders
- Search Debit Orders
- Stop a Debit Order
- Dispute (Reverse) a Debit Order
- View Stopped Debit Order History

View Debit Orders

Use this function to view a list of the active debit orders on a cheque account.

View Debit Orders

1. Click on the **My Bank Accounts** tab and, if it isn't already selected, click on the **My Accounts** sub-tab.
2. The accounts linked to your profile will be displayed.
3. Click on the **Account Name** to select the respective account.
4. The **Account Settings** for the selected account will be displayed.
5. Click on the **My Debit Orders** sub-tab.
6. A list of the **active debit orders** on this account will be displayed.

Search Debit Orders

Use this function to search for a specific debit order.

You can search by:

- Amount
- Description
- Date

How to Search Debit Orders

1. Click on the **My Bank Accounts** tab and, if it isn't already selected, click on the **My Accounts** sub-tab.
2. The accounts linked to your profile will be displayed.
3. Click on the **Account Name** to select the respective account.
4. The **Account Settings** for the selected account will be displayed.
5. Click on the **My Debit Orders** sub-tab.
6. A list of the **active debit orders** on this account will be displayed.
7. Click on the **Search** table action.
8. Select the preferred **Search By** option from the drop-down menu.
9. Enter **at least three characters** in the search parameter fields, text or numbers, depending on the search option that you selected.
10. Click on **Search**.
11. The **results** of your search will be displayed.

Stop a Debit Order

Use this function to add and manage Stop Payments on a debit order.

A Stop Payment is an instruction given by you to your bank to not honour the future payment of a debit order; i.e. to stop a specified debit order from being processed against your account.

You can stop a debit order for a specific amount or for an amount range.

You can stop a debit against your account for the following reasons:

- You did not authorise the debit order, this could be due to an act of fraud.
- The debit order is in contravention of your authority, i.e. either the amount or date is incorrect.
- You have previously instructed the third party (e.g. company/service provider) to cancel the debit order.

Important Information about Stop Debit Order Instructions	
	• You must create a stop payment for a debit order a **minimum** of **five business days prior** to the processing date. • Please note that if the debit order was **not stopped** at least 5 working days before it was scheduled to go off your account it might still be processed. In that case, your request to stop a debit order will be **effective** from the **following month**. • The **Bank is not liable** for any losses incurred due to incorrect information supplied or if the debit order has already been paid. • Stopping a debit order will only block future transactions for a 12-month period. It is **your responsibility** to contact the **service provider** to arrange for the debit order to be stopped permanently.

Add a Stop Debit Order Instruction

1. Click on the **My Bank Accounts** tab and, if it isn't already selected, click on the **My Accounts** sub-tab.
2. The accounts linked to your profile will be displayed.
3. Click on the **Account Name** to select the respective account.
4. The **Account Settings** for the selected account will be displayed.
5. Click on the **My Debit Orders** sub-tab.
6. A list of the **active debit orders** on this account will be displayed.
7. Click on the **Stop** easy button for the respective debit order.
8. The **Stop a Debit Order** capture page will be displayed.
9. Select the **Reason** for requesting the Debit Order to be stopped from the drop-down menu.
10. Click on **Stop**.
11. A **confirmation page** will be displayed.
12. You will be required to read and accept the **Terms and Conditions** before you can continue.
13. Check that this information is correct and, if necessary, click **Edit** to make any amendments.
14. Click on **Confirm**.
15. A **results page** will display the status of your request.
16. Click on **Finish** to complete the process
17. You will be presented with the option to **Dispute** (Reverse) the debit order; click **Yes** or **No**. If you select **Yes**, you will be directed to the **Dispute Debit Order** process.

View Stopped Debit Orders History

Use this function to view a history of the Stop Debit Order instructions including Disputes that you have loaded against an account in the past six months.

You can also use this function to download an automatically populated instruction which you can send to the respective service provider.

The following information is displayed for a Stop Debit Order instruction:

- Instruction Date
  - Date on which the Stop Debit Order instruction was initiated
- Description
  - Name/Description of the service provider as it appears on your bank statement
- Amount
  - Value of the debit order, this can be a specific amount or a range.
- Instruction PDF:
  - For your ease of use; you can Download a pre-populated instruction to the respective service provider to stop the debit order.

View Stop Debit Order Instructions

1. Click on the **My Bank Accounts** tab and, if it isn't already selected, click on the **My Accounts** sub-tab.
2. The accounts linked to your profile will be displayed.
3. Click on the **Account Name** to select the respective account.
4. The **Account Settings** for the selected account will be displayed.
5. Click on the **My Debit Orders** sub-tab.
6. A list of the **active debit orders** on this account will be displayed.
7. Click on the **History** view.
8. A list of the debit orders that you have stopped online will be displayed.
9. Click on the **Download** easy button of the respective debit order to download a pre-populated instruction to the relevant service provider.

Dispute a Debit Order

Use this function to dispute a debit order that has taken place on your account. If the dispute is successful, the amount will be reversed back into your account.

You can dispute a debit against your account for the following reasons:

- You did not authorise the debit order, this could be due to an act of fraud.
- The debit order is in contravention of your authority, i.e. the amount or date is incorrect.
- You have previously instructed the third party (e.g. company/service provider) to cancel the debit order.
- A third party (e.g. company/service provider) has collected a debit order in a manner you did not authorise (e.g. the collection amount has been split or several debit orders have been consolidated).
- The debit order was previously stopped with the Bank by loading a stop payment.

Important Information about Disputing a Debit Order	
	• If the debit order was processed **within the last 40 days**, the funds will be **reversed immediately**. • If the debit order was processed **more than 40 days ago**, the bank will be required to **investigate** the dispute. This process may take more than **30 days** and reversal of the debit order is **not guaranteed**. • You can not dispute the same debit order more than once. • For enquiries regarding a logged dispute for a debit order that is older than 40 days, please contact your banker. Alternatively, please contact the number on the back of your cheque card.

Dispute a Debit Order

1. Click on the **My Bank Accounts** tab and, if it isn't already selected, click on the **My Accounts** sub-tab.
2. The accounts linked to your profile will be displayed.
3. Click on the **Account Name** to select the respective account.
4. The **Account Settings** for the selected account will be displayed.
5. Click on the **My Debit Orders** sub-tab.
6. A list of the **active debit orders** on this account will be displayed.
7. Click on the **Dispute** easy button for the respective debit order.
8. The **Dispute a Debit Order** capture page will be displayed.
9. Select the **Reason for Dispute** from the dropdown menu; only the Dispute Reasons relevant to the respective DebiCheck Mandate will be available for selection.
10. Click on **Dispute**.
11. A **confirmation page** will be displayed.
12. You will be required to read and accept the **Terms and Conditions** before you can continue.
13. Check that this information is correct and, if necessary, click **Edit** to make any amendments.
14. Click on **Confirm**.
15. A **results page** will display the status of your request.
16. Click on **Finish** to complete the process.
17. You will be presented with the option to put a stop payment on the debit order; click **Yes** or **No**. If you select **Yes**, you will be directed to the **Stop Debit Order** process.

View Disputed Debit Orders History

Use this function to view a history of the Debit Orders that you have Disputed on this account in the past six months.

The following information is displayed for a Disputed Debit Order instruction:

- Instruction Date
  - Date on which the Dispute Debit Order instruction was initiated
- Description
  - Name/Description of the service provider as it appears on your bank statement
- Amount
  - Value of the debit order, this can be a specific amount or a range.
- Status:
  - The status of your Dispute is displayed.
    - Dispute Successful
      - A Dispute on a debit order that was processed less than 40 days ago will be reversed immediately and the status will reflect as Dispute Successful.
    - In Progress
      - A Dispute on a debit order that was processed more than 40 days ago needs to be investigated and the settlement process, successful or unsuccessful, may take more than 30 days. During this time the status will reflect as In Progress.

View Disputed Debit Order Instructions

1. Click on the **My Bank Accounts** tab and, if it isn't already selected, click on the **My Accounts** sub-tab.
2. The accounts linked to your profile will be displayed.
3. Click on the **Account Name** to select the respective account.
4. The **Account Settings** for the selected account will be displayed.
5. Click on the **My Debit Orders** sub-tab.
6. A list of the **active debit orders** on this account will be displayed.
7. Click on the **Disputed** view.
8. A list of the debit orders that you have disputed online will be displayed.
9. Click on the View easy button of a Dispute that is In Progress to view the details of the respective debit order.

3.14 Bank Letters

Account Confirmation Letters

Use this function to generate an Account Confirmation Letter if you need to present a Bank Stamped Letter confirming your Transactional account details to third parties or you are communicating changes of your bank account details to debtors.

The recipient/third party that you send a system generated letter to will be able to verify the authenticity of these letters via our FNB Home page.

To generate an Account Confirmation Letter, please follow the step guidelines listed below:

1. Select the **My Bank Accounts** tab.
2. Select the account you want to generate a letter for by clicking on the **account name hyperlink**.
3. The **Settings sub-tab** will be displayed with the details of your account.
4. Click on the **Generate** button next to the **Account Confirmation Letter** option.
5. A new page will display with the details for the account number you selected, enter the **Delivery Details**: **Email** or **Download** and confirm the **Charge Account** number that should be used for the charges.
6. Click on Continue.
7. A **confirmation page** will be displayed with the details entered as per previous page.
8. Click on **Confirm** to continue.
9. Click on **Finish**.

Depending on the delivery details selected, you can download the Account Confirmation Letter or send this to an email address for easy access.

Account Confirmation Letters will be valid for 2 months. If you already have a valid letter, you may select the 'Use existing' icon to generate a copy of the existing valid letter.

The recipient/third party that you send a system generated letter to will be able to verify the details online via our FNB home page by following the step actions listed below:

5. Go to the **FNB home page**
6. Click on the **'Contact Us + Tools'** tab
7. Select **'Verify Account Confirmation Letters'**
8. Enter the required details as they appear on the Verify Account Confirmation Letter on the screen and click on **Verify**.

For your convenience, you may also navigate to the Account Confirmation Letters functionality via Account settings by the following step guidelines below:

- Select the **My Bank Accounts** tab, click on the **More** button next to the Account you want to generate a letter for and select the Account Confirmation Letter option.

Note: You can generate Account Confirmation letters, provided that you have been granted the necessary Account viewing permissions on your profile for the relevant Transactional Account.

VISA Application Letters

Use this function to generate a VISA Application Letter.

VISA Application Letters may be required to confirm the relevant travel and banking details. For example, if you are travelling to a foreign country and need to apply for a Visa or if you are sponsoring a trip for your employees

1. Select the **My Bank Accounts** tab.
2. Select the account you want to generate a letter for by clicking on the **account name hyperlink**.
3. The **Settings** sub-tab will be displayed with the details of your account.
4. Click on the **Generate** button next to the VISA Application Letter option.
5. A new page will display with the details for the account number you selected, enter the **Delivery Details**: **Email** or **Download** and confirm the Charge Account number that should be used for the charges.
6. Click on **Continue**.
7. A confirmation page will be displayed with the details entered as per previous page.
8. Click on **Confirm** to continue.
9. Click on **Finish**.

Depending on the delivery details selected, you can download the VISA Letter or send this to an email address for easy access.

VISA Letters will be valid for 2 months. If you already have a valid letter, you may select the 'Use existing' icon to generate a copy of the existing valid letter.

The recipient/third party that you send a system generated letter to will be able to verify the details online via our FNB home page by following the step actions listed below:

1. Go to the **FNB home page**
2. Click on the **'Contact Us + Tools'** tab
3. Select **'Verify Account Confirmation Letters'**
4. Enter the required details as they appear on the Verify Account Confirmation Letter on the screen and click on **Verify**.

For your convenience, you may also navigate to the VISA Letters functionality via Account settings by the following step guidelines below:

- Select the **My Bank Accounts** tab, click on the **More** button next to the Account you want to generate a letter for and select the VISA Application Letter option.

Note: You can generate VISA letters, provided that you have been granted the necessary Account viewing permissions on your profile for the relevant Transactional Account.

3.15 Tax Certificates

Use this function to Download or Email the Tax Certificates for the accounts linked to your profile.

The Tax Certificate search is done at client level and not at account level which means that there is no need to select a specific account; the search will be conducted across your entire profile and all results will be displayed.

In the case where accounts are linked for other entities – the entity who owns those accounts will need to email and/or download the tax certificates via their own profiles if they have profiles – or alternatively contact your branch or Relationship Manager for assistance.

Tax certificates are stored for a 5-year period.

Download a Tax Certificate

1. Click on the **My Bank Accounts** tab.
2. Select any one of your main entity's accounts by clicking on the **Account Name hyperlink**.
3. Click on the **Menu** and select the **Tax Certificates** option.
4. Click in the **Download** button next to the certificate that you would like to download.
5. You can choose to **Open** the file, **Save** it or **Cancel** the download.

Email Tax Certificate(s)

1. Click on the **My Bank Accounts** tab.
2. Select any one of your main entity's accounts by clicking on the **Account Name hyperlink**.
3. Click on the **Menu** and select the **Tax Certificates** option.
4. Click in the **check box** of the certificate/s that you would like to **Email** and enter the **Email Address** that you would like the certificate/s to be sent to and
5. Click on **Submit**.
6. Check that this information is correct and, if necessary, click **Edit** to make any amendments.
7. Click on **Confirm**.
8. A **results page** will display the status of your request.
9. Click on **Finish** to complete the process.

4. Transfers Tab

The Transfers tab is used to make transfers between the accounts on your profile.

- If you have a single level hierarchy, you have the option to transfer the accounts linked on your Online Banking Enterprise™ profile.
- If you have a multiple level hierarchy, you have the option to transfer between your Entity's own accounts (Within Entity) and transfer across Entities within a Hierarchy (Across Entity).

The Transfers landing page will list all the existing transfers that have been made on the system. Depending on your site settings you can view transfers that have been made within the last 180 days.

To increase the Data Retention days on your Online Banking Enterprise™ profile - The number of days for which you want to store information for Transfers, please ask your Administrator(s) to extend the default settings to 90, 120, 150 or 180 days via Profiles tab > Site Settings > Retention Days.

Future Dated Transfers

Transfers can be dated up to 12 months in the future. Funds must be available in the account on the execution date in order for transfers to be processed successfully.

Sequential Reference Numbers

Sequential transaction numbers are allocated for all successful and unsuccessful transfers processed via Online Banking Enterprise™.

Sequential numbers will be:

- per account
- displayed on the ‘From Reference’ and ‘To Reference’ fields on Bank Statements
- 9 digits long, example: FNB OB TRF 000000001

4.1 Add Transfers

Use this function to create a transfer between your FNB accounts. If you have a single level hierarchy, you have the option to transfer the accounts linked on your Online Banking Enterprise™ profile. If you have a multiple level hierarchy, you have the option to transfer between your Entity's own accounts (**Within Entity**) and transfer across Entities within a Hierarchy (**Across Entity**).

Refer to the Hierarchy section in this guide to learn more about Hierarchies.

4.1.1 Create a Transfer

Use this function to create a transfer between your FNB accounts.

Create Transfer - Single Level Hierarchy

1. Select the **Transfers** tab.
2. Select the **+Add** action button on the right and select **Create Transfer**.
3. Type the **Transfer Name** in the name field.
4. Select the **Date** on which you want the transfers to be processed. Transfers can be dated up to 12 months in the future.
5. Select a **From** and **To** account. The list of **accounts** in the drop down is restricted to those that you have permission to capture from.
6. Enter a **My** and **Their** reference in the reference fields for each transfer.
7. Enter the **amount** of each transfer.
8. Click on **Save & Exit** to save the information and return to the Transfers landing page. The transfer will be saved in a 'Work in Progress' status. Alternatively, you can click on **Authorise** to authorise the transfer, or select the **Submit** button if you want to change the transfer to a status of 'Authorisation Requested'.

Note: Funds must be available in the account on the execution date in order for transfers to be processed successfully.

Create Transfer - Within Entity - Multiple Level Hierarchy

1. Select the **Transfers** tab.

1. Select the **+Add** action button on the right and select **Within Entity** or click on **Menu** for more options and select **Add Transfer Within Entity**.
2. Type the **Transfer Name** in the name field.
3. Select the **Date** on which you want the transfers to be processed. Transfers can be dated up to 12 months in the future.
4. Select a **From** and **To** account. The list of **accounts** in the drop down is restricted to those that you have permission to capture from.
5. Enter a **My** and **Their** reference in the reference fields for each transfer.
6. Enter the **amount** of each transfer.
7. Click on **Save & Exit** to save the information and return to the Transfers landing page. The transfer will be saved in a 'Work in Progress' status. Alternatively, you

can click on **Authorise** to authorise the transfer, or select the **Submit** button if you want to change the transfer to a status of 'Authorisation Requested'.

Note: Funds must be available in the account on the execution date in order for transfers to be processed successfully.

Create Transfer - Across Entities - Multiple Level Hierarchy

1. Select the **Transfers** tab.
2. Click on **Menu** for more options and select **Add Transfer Across Entity**.
3. Type the **Transfer Name** in the name field.
4. Select the **Date** on which you want the transfers to be processed. Transfers can be dated up to 12 months in the future.
5. Select a **From** account. The list of **accounts** in the drop down is restricted to those that you have permission to capture from.
6. Enter the **To** account details.
7. Enter a **My** and **Their** reference in the reference fields for each transfer.
8. Enter the **amount** of each transfer.
9. Click on **Save & Exit** to save the information and return to the Transfers landing page. The transfer will be saved in a 'Work in Progress' status. Alternatively, you can click on **Authorise** to authorise the transfer, or select the **Submit** button if you want to change the transfer to a status of 'Authorisation Requested'.

Note: Funds must be available in the account on the execution date in order for transfers to be processed successfully.

4.1.2 Copy a Transfer

Use this function to copy the details of an existing transfer.

1. Select the **Transfers** tab.
2. Click on **Menu** for more options and select **Copy Transfer**.
3. Select a transfer to copy by clicking on the Transfer Name hyperlink.
4. Type the **Transfer Name** in the name field.
5. Select the **Date** on which you want the transfers to be processed. Transfers can be dated up to 12 months in the future.
6. Change any information if required in any of the fields displayed below. Clicking on **Clear** clears all amount fields and new amounts can be entered.
7. Click on **Save & Exit** to save the information and return to the Transfers landing page. The transfer will be saved in a 'Work in Progress' status. Alternatively, you can click on **Authorise** to authorise the transfer, or select the **Submit** button if you want to change the transfer to a status of 'Authorisation Requested'.

Note: Funds must be available in the account on the execution date in order for transfers to be processed successfully.

4.1.3 Import a Transfer File

Use this function to import a transfer file which has been created off-line. You can create an off-line file (.csv) using the spreadsheet provided or use a BankServ ACB (.txt) file.

1. Select the **Transfers** tab.
2. Click on **Menu** for more options and select **Import Transfer**.
3. Type the **Transfer Name** in the name field.
4. Select the **File Format** from the drop down list. The options are Excel (.CSV) or BankServ (ACB).
5. You have the option to **Ignore Invalid Items** in the file by checking the check box. **Note.** If you check the Ignore Invalid Items check box. The transfer batch will be created containing only valid items. If you do not check the Ignore Invalid Items check box. A transfer batch will NOT be created if there are any invalid items in the import file.
6. The **File Location** field requires you to locate the file that you want to import. If you know where the file is located, you can type the file path into the File Path field, or click on **Browse** to locate it.
7. Select the required option to receive your import results file, select the **Online Banking Inbox** button to receive your result file via your **Online Banking Inbox** or alternatively select the **Email** button to receive the results file via email. If you selected email, then complete the relevant address fields.
8. Select the **Format** from the dropdown and click on **Continue**.
9. Click on **Finish** to return to the Transfer landing page or click on **Import Again** to return to the Capture Import Transfer Details screen.
10. Check the **Import Results Report**.

You have the ability to import a file that may contain single or multiple Instructions, such as

- Single or multiple accounts.
- Single or multiple dates.

Batches will be split according to the execution date even if there are multiple accounts. Thus a batch with multiple accounts and multiple execution dates will only create instructions based on the execution dates.

You can download the Bankserv Transfer File Format and/or the FNB Online Offline Transfer Capture Spreadsheet from the Online Banking Help.

4.2 Maintain a Transfer

Use this function to make changes to an existing transfer that has not yet been processed.

1. Select the **Transfers** tab.
2. Select the **Maintain** easy action button next to the Transfer you want to maintain or click on **Menu** for more options, select **Maintain Transfer** and select the Transfer by clicking on the Transfer Name hyperlink.
3. **Change any information** in any of the fields that are displayed on the screen.
4. Click on **Save & Exit** to save the information and return to the Transfers landing page. The transfer will be saved in a 'Work in Progress' status. Alternatively, you can click on **Authorise** to authorise the transfer, or select the **Submit** button if you want to change the transfer to a status of 'Authorisation Requested'.

Only transfers with a "Work in Progress" and "Authorisation Requested" status can be maintained.

4.3 Delete a Transfer

Use this function to delete transfers.

1. Select the **Transfers** tab.
2. Select the **tick box** next to one or more Transfers you want to delete and click on the **Delete** button or click on **Menu** for more options, select **Delete Transfers** and select the **Delete** easy action button next to a specific transfer you want to delete.
3. The system will return a message asking you to **confirm** that you want to delete the Transfer, click on **Delete**.

The Delete transfer button will only be present if you have permission to capture transfers for an account.

4.4 Search for a Transfer

Use this function to search for a recipient according to the criteria you have entered.

1. Select the **Transfers** tab.
2. Select the **Search** action button on the right of the page.
3. Enter any search criteria related to the Transfers you are searching for.
4. The search results will be displayed based on the criteria you have entered.

4.5 Transfer Instructions

Use this function to Submit, Authorise, Reject, De-authorise and Reprocess Transfers.

4.5.1 Submit a Transfer

Use this function to submit a transfer for authorisation by a User with the necessary authorisation permissions. Users that have capture permission, but no authorisation permission will use the Submit option.

1. Select the **Transfers** tab.
2. Select the **Submit** easy button next to the transfer **Name** that you want to submit for authorisation.
3. The status of the transfer will change from Work in Progress to Authorisation Requested.

The transfer is now ready to be **authorised**; or

1. Select the **Transfers** tab.
2. Click on **Menu** for more options, select the **Submit Transfer** Instruction and select the Transfer that you want to submit for authorisation by clicking on the Transfer name hyperlink.
3. The status of the transfer will change from Work in Progress to Authorisation Requested.

4.5.2 Authorise a Transfer

Use this function to authorise transfers which have been created or amended.

1. Select the **Transfers** tab and change the viewing option to **Authorisation Needed** by clicking this option on the top of the page.
2. Select one or more transfers by clicking the check box next to the transfer **Name** that you want to authorise.
3. Click on **Authorise** to proceed with the authorisation process.
4. Once completed, an authorisation **result page** will be displayed.
5. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

The status of the transfer will change from Authorisation Requested to Fully Processed on the final authorisation, which means that the transfer was successful.

4.5.3 De-Authorise a Transfer

Use this function to cancel the "authorised" status of a transfer.

1. Select the **Transfers** tab.

2. Click on **Menu** for more options, select the **De-Authorise Transfer** Instruction and select the Transfer that you want to de-authorise by clicking on the Transfer name hyperlink.
3. The transfer status will change back to a **Work in Progress** status.

or

1. Select the **Transfers** tab and change the viewing option to **Authorisation Needed** by clicking this option on the top of the page.
2. Select the **De-Authorise** easy button next to the transfer name that you want to de-authorisation.
3. The transfer status will change back to a **Work in Progress** status.

Only transfers with an Partially Authorised or Authorised status can be de-authorised. A user with authorisation permissions will have the ability to de-authorise.

The transfer will return to the "work in progress" status and will have to be re-submitted for authorisation. The transfer can be deleted once it has been de-authorised, if necessary.

4.5.4 Reprocess a Transfer

Use this function to re-submit a transfer for processing if the transfer failed as a result of insufficient funds.

1. Select the **Transfers** tab.
2. Click on **Menu** for more options, select the **Reprocess Transfer** Instruction and select the Transfer that you want to reprocess by clicking on the Transfer name hyperlink.
3. Click on **Yes** to confirm the reprocess of the transfer.

The Reprocess option will only be displayed if there is a transfer with a 'Funds Unavailable' or ‘Settlement Limit Exceeded’ status.

4.6 eZiTransfer

Use this function to create an eZiTransfer. This type of transfer is ideal for a single transfer action between accounts to which you have access.

eZiTransfer - Single Entity

If you have a single level hierarchy, you have the option to create an eZiTransfer.

1. Select the **Transfers** tab.
2. Click on **Menu** for more options and select **eZiTransfer**.
3. Select an **account** to be debited in the **From** field by clicking on the drop-down list.
4. Select an **account** to be credited in the **To** field by clicking on the drop-down list.
5. Enter a valid transfer description in the **Description** field.
6. Type in the transfer **amount**.
7. Click on **Submit** to submit the eZiTransfer for authorisation or click on **Authorise** to authorise the eZiTransfer. The Authorise option will only be available to Authorisers.

eZiTransfer - Multiple Entities - Within Entity

Use this function if you have a multiple level hierarchy to create an eZiTransfer between your Entity's own accounts.

1. Select the **Transfers** tab.
2. Click on **Menu** for more options and select **eZiTransfer Within Entity**.
3. Select an **account** to be debited in the **From** field by clicking on the drop-down list.
4. Select an **account** to be credited in the **To** field by clicking on the drop-down list.
5. Enter a valid transfer description in the **Description** field.
6. Type in the transfer **amount**.
7. Click on **Submit** to submit the eZiTransfer for authorisation or click on **Authorise** to authorise the eZiTransfer. The Authorise option will only be available to Authorisers.

eZiTransfer - Multiple Entities - Across Entity

Use this function if you have a multiple level hierarchy to create an eZiTransfer across Entities within a Hierarchy.

1. Select the **Transfers** tab.
2. Click on **Menu** for more options and select **eZiTransfer Across Entity**.
3. Select an **account** to be debited in the **From** field by clicking on the drop-down list.
4. Select an **account** to be credited in the **To** field by clicking on the drop-down list.
5. Enter a valid transfer description in the **Description** field.
6. Type in the transfer **amount**.
7. Click on **Submit** to submit the eZiTransfer for authorisation or click on **Authorise** to authorise the eZiTransfer. The Authorise option will only be available to Authorisers.

5. Payments Tab

Online Banking Enterprise™ offers a simple and secure ways to pay employees and creditors.

- Use folders to make 3rd party payments to pre-defined recipients.
- Perform OnceOff payments.
- Import payments from line of business systems in (Bankserv) file format or an Excel (.CSV) spreadsheet.
- A range of service types such as same-day, 1-day and 2-day services are available to choose from.
- Make cross-border payments between South Africa, Namibia, Swaziland and Lesotho.
- Submit future-dated payments and transfers 365 days in advance.
- Pay your tax returns on SARS eFiling.
- Create Recurring Payments.
- Permissions to the Payment functionality can be specified, so each user will only see the functions they have access to.

The Payments landing page will list all the existing Payments that have been created on the system.

Depending on your site settings you can view Payments that have been made within the last 180 days. To increase the number of days for which you want to store information for Payments, please ask your Administrator(s) to extend the default settings to 90, 120, 150 or 180 days via Profiles tab > Site Settings > Retention Days.

Note: As per the Payments Association of South Africa (PASA), w.e.f. 01 May 2020, no cheques with a value greater than R50,000.00 may be issued or accepted. Cheques can not be split to circumvent this limit. Please utilise a digital form of payment as an alternative.

5.1 Payment Rules

This section includes some important guidelines and rules related to Payments on Online Banking Enterprise™.

5.1.1 Payment Cut-off Times

The Cut-off times for Normal, 1 Day, 2 Day and Pay and Clear Now payments.

Service	SameDay	1-day (Salaries)	2-day	Pay & Clear Now	eFiling
Submission	Anytime	1 business day before Action date	2 business days before Action date	In accordance with cut-off times below	Before 20h00
Cut-off: **Monday to Friday**	FNB: 20:00* Other banks: 16:15	All banks: 16:15*	All banks: 14:45*	FNB: 20:00 NPS Participating Banks: 16:00	The eFiling functionality is not available from 20h00 until the following day.
Cut-off: **Saturday**	FNB: 20:00* Other banks: 10:15*	All banks: 10:15*	All banks: 8:45*	FNB: 20:00 NPS Participating Banks: 10:00	
Cut-off: **Sunday**	Not Applicable – not a business day	Not Applicable – not a business day	Not Applicable – not a business day	NPS Participating Banks: Not applicable	
Time of Posting	Posted next day. Values date same as Action date.	Morning of Action Date	Morning of Action Date	Immediately	Posted next day. Values date same as Action date.

Important Notes:

- **Real Time Clearing (RTC)**
  - Real Time Clearing (RTC) Payments has temporarily been deactivated, all payments made using the Pay and Clear Now Service Type will processed via Real Time Gross Settlement (RTGS).

- **Business days exclude Sundays and Public holidays**
  - To ensure problem free transacting, we suggest that you only select Business days as your action dates for payments as dating these for an action on a Public Holiday will result in your recipients only receiving their funds on the next valid business day.

- **Pay & Clear Now**
  - Any transaction with a value of **R5 million and over** is handled by the NPS system; This means that the cut-off times for Pay & Clear Now as stipulated above must be adhered to.
  - Please refer to the Payment Service type section in the User guide to learn more about the Pay and Clear Now Service Type Option.

- Depending on the **AutoBump** option which has been set against your profile - if you miss the cut-off time:

    - and the Autobump option has been set to **On**, the payment will automatically be processed on the next business day.
    - and the Autobump option has been set to **Off**, the payment will fail.
    - and the Autobump option has been set to **Ask when cut-off time missed**, you can choose whether or not you would like to process the affected payment/s the next business day.

Payment Action date: This is the date on which the payment will be processed. If the Action date is a Sunday or a public holiday, FNB recipients will receive their funds on the same day. Non-FNB payments will only be processed on the next business day, irrespective of the AutoBump settings.

1.1.2 Pay and Clear Now Participating Banks

Bank	Branch Range	NPS allowed?
ABSA Bank	300000 - 349999 420000 - 429999 500000 - 569999 630000 - 659999	Y

5.1.3 Future Dated Payments

You are able to future date and authorise your transactions up to 1 year (365 days) in advance.

- When future dating payments please ensure that cleared funds are available in the nominated account by **05h00** on the selected **action date** or these transactions will be rejected due to insufficient funds.
- If you are processing payments using the 1 day (salary) and 2-day service type, you need to ensure that cleared funds are available in the nominated account for these payments by **05h00** on the **release date** (i.e. **one day prior to the action date**).
- If the Action date is a **Sunday** or a **Public Holiday**, **FNB recipients** will receive their funds on the **same day** and **Non-FNB payments** will only be processed on the **next business day**, irrespective of the AutoBump settings.
- Payments cannot be processed to recipients who bank in another **country** (Namibia, Swaziland and Lesotho) when there are **Public holidays**, these payments will **reject**.

5.1.4 Payment Batch Statuses

Status	Description
Work In Progress	Created but not authorised or authorisation not requested.
Authorisation Requested	Requested authorisation, not yet been authorised.
Updating Status	When working with large Payment Batches, the batch status will temporary change to Updating Status whilst each individual item in the batch is being checked, validated or processed and only when this process has been completed will it be updated to the correct and relevant Batch status.
Partially Authorised	Multiple authorisations required, and not all authorisers have authorised item.
Authorised	Fully authorised, ready for payment.
Submitted for Processing	Submitted to back end for processing, awaiting response. **Please check the final status once processing has taken place.**
Pay & Clear Now – Pending	Pay & Clear Now service type batch. The batch it will remain in this status until the responses for the individual items are received from each Recipient's bank. **Please check the final status once processing has taken place.**
Fully Processed	All items processed.
Partially Processed	Not all items processed (View Failed Items).
Processing Failed	All items failed.

Unsuccessful	Processed, but failed due to back end processing error.
Funds Unavailable	Everything failed due to funds unavailable, able to reprocess.
Settlement Limit Exceeded	Online Settlement Limits does not allow for any excesses, any transactions that exceed the limit available will automatically reject. **Please contact your Relationship Manager to arrange for an increase in the limit before the Payments can be submitted again.**
Dated Service – Fully Processed	1 Day or 2 Day Service type batch. All the items in the batch have passed validation. **Please check the final status on action date.**
Dated Service – Partially Processed	1 Day or 2 Day Service type batch. The batch has some failed items. **Please check the final status on action date.**
Recurring Payments	All Recurring Payments will have a status of Recurring Payment until the last payment has been processed.

5.2 Payment Service Types

We offer a range of service types to choose from.

Service Type	Description
SameDay (Normal)	Select this option if you want to use the normal process of paying a recipient, you can submit transactions during the day for payment, which will be value-dated the same day. • FNB recipients will receive their funds immediately on the same day. • Payments to recipients banking at other banks will be processed on the same day but the funds will only be available for withdrawal on the next business day. The advantage of using this service type is that processing of batches can be done 6 days a week as long as the batch is processed within the allowed cut-off processing times. • Business days exclude Sundays and Public holidays.
1 Day (Salaries)	Select this option if you want to pay salaries to your employees. • FNB recipients and recipients banking at other banks will be credited on your selected action date. • Your account will be debited with the full amount of successfully processed payment batches on the action date during overnight processing. Salary payments must be captured and authorised **at least 1 day prior** to the action date. The advantage of using this service type is that all employees will receive their salaries on the same day. Processing of batches can be done 6 days a week as long as the batch is processed within the allowed cut-off processing times. • Business days exclude Sundays and Public holidays.
2 Day Value	This option currently requires that you utilise a payment User Code which must be linked to your Online Banking Enterprise™ profile with an allocated payment limit. • FNB recipients and recipients banking at other banks will be credited on your selected execution date. • Your account will be debited with the full amount of successfully processed payment batches on the execution date during overnight processing. • Your action date is the SAME date as the date you would like your recipients to be credited. The payment batch must be captured and authorised **at least 2 business days** prior to the action date. • Business days exclude Sundays and Public holidays.

Pay and Clear Now	Select this option if you want to make payments to recipients in **near** real-time. The Pay and Clear Now Service type is a premium service and is priced accordingly. • Recipients banking at participating banks will be credited within an hour. • Your account will be debited with the full amount of successfully processed payment batches on the execution date during overnight processing. The payment batch must be captured and authorised within the allowed cut-off processing times on the action date. The advantage of using this service type is that it offers you the convenience of effecting payments in near real time across banks thus giving your recipients access to their funds almost immediately. • Business days exclude Sundays and Public holidays. • Payments processed outside of the RTGS cut-off times, to participating banks, will fail and need to be processed by selecting the next business day. ****Please refer to the Payment Rules section in this guide to obtain a list of Banks who Participate in this service type option.**
Recurring	Select this option if you want to create stop order whereby you can pay a certain amount to a recipient on a future date, either once off or regularly and for a specific number of payments or with a specific end date. • FNB recipients and recipients banking at other banks will be credited on your selected execution date. • Your account will be debited with the full amount of successfully processed payment batches on the execution date during overnight processing. The advantage of using this service type is that the payment will automatically process the entries on the morning of the due date and every subsequent due date. • Business days exclude Sundays and Public holidays. ****Please refer to the Recurring Payment section in this guide to obtain more guidelines on how to use this service type option.**

5.3 Add a Payment

Use this function to make payments to third parties.

Note: As per the Payments Association of South Africa (PASA), w.e.f. 01 May 2020, no cheques with a value greater than R50,000.00 may be issued or accepted. Cheques can not be split to circumvent this limit. Please utilise a digital form of payment as an alternative.

5.3.1 From Folder Payment

Use this function to make a payment from an existing folder. The folder contains the banking details of recipients, you can select the recipients you want to pay and enter the amounts you want to pay them.

1. Select the **Payments** Tab.
2. Click on **Menu** for more options and select **Add Payment From Folder**.

Add the Batch Header Details:

3. Type the name of the payment in the **Name** field.
4. Select the folder from which payments must be made from the dropdown list in the **Folder** field.
5. The **Account** field can be a display or dropdown field, depending if the **Allow Override** indicator for the selected folder has been set to **Yes**.
6. The **Action date** is the date that you want the payments to be processed.
7. The **Statement entry** option will default to the selected folder setting, but can be changed.
    - If you want to have each payment made from this folder itemised on your bank statement. Select the **Itemised** button.
    - If you want payments made from this folder to reflect as one consolidated amount. Select the **Consolidated** button.
8. Select the **Service type** from the dropdown list.
9. The **Own Reference** is mandatory if you have selected the Consolidated Statement Entry and will be the reference for the payment on your bank statement.

Note!

You can view the cut-off times for the various Service Types, when the payments will be posted and made available to the recipients. by clicking on "cut-off times" hyperlink.

10. Click on **Continue.**

Add the Recipient Details:

11. This page will display the recipients for the folder that you have selected to use.
12. Enter an amount in the **Amount** field next to each recipient.
13. The default **Own & Recipients** references can be changed.
14. Click on **Save** to save what you have captured on the current page. Click on **Save and Exit** to save the payment in a Work In Progress status and return to the Payment landing page. Click on **Submit** to submit the payment for authorisation to an Authoriser.

Once you click on **Save** or **Save and Exit**, the system will verify the payment details against the information loaded for each Recipient in the Folder. If the **payment limit** and/or **the number of payments allowed per day** for a specific recipient **has been exceeded**, the

system will display a new page listing these recipients that have failed this validation. Click on **Cancel** or select **Continue** to return to the payments landing page.

- If you select **Cancel**, the batch status will remain in Work in progress and allow you to maintain the relevant payment details before submitting the batch again. You are also able to refer to you OBE™ Inbox for more information on the failed items.
- If you select Continue, the batch status will change to **the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.**

To Authorise the Payment Instruction

1. Select the **Payments** tab and change the viewing option to **Authorisation Needed** by clicking this option on the top of the page.
2. Select one or more payments by clicking the check box next to the payment **Name** that you want to authorise.
3. Click on **Authorise** to proceed with the authorisation process.
4. Once completed, an authorisation **result page** will be displayed.
5. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

Note: A Transactional report will become available in the Online Banking Enterprise™ Inbox if there are one or more items that failed the validation at the time of authorising a payment batch on Online Banking Enterprise™.

This report will list all successful and/or failed transactions in the batch and a description of the result for each item. You can use this report to make any required changes to the recipient details that failed.

Once these changes have been made, you will be able to resubmit the batch for authorisation.

5.3.2 Import a Payment File

Use this function to import a payment file which has been created off-line. You can create an off-line file (.csv) using the spreadsheet provided or you can use the Bankserv (.txt) or ISO 20022 PAIN file directly from your own accounting package.

1. Select the **Payments** Tab.
2. Click on **+Add** and select **Import Payment**.

Add the Batch Header Details:

3. Type the name of the payment in the **Name** field.
4. Select the **File Type** from the drop-down list. The options are Excel (.CSV), BankServ (ACB) or ISO 20022 PAIN.
5. Select the **Statement entry** option as follows:
    - If you want to have each payment made from this folder itemised on your bank statement. Select the **Itemised** button.
    - If you want payments made from this folder to reflect as one consolidated amount. Select the **Consolidated** button.
6. Select the **Service type** from the dropdown list.

7. The **Own Reference** is mandatory if you have selected the Consolidated Statement Entry and will be the reference for the payment on your bank statement.
8. Select the folder from which payments must be made from the dropdown list in the **Folder** field or select **Once-Off**.

- **Verify Against a folder** - The list of folders is restricted to those linked to accounts for which you can capture payments.

- **Once-off**: You may click on **Yes** to **Save the recipient to a Folder**. The saved Once-Off recipient's daily limit and number of payments per day will be defaulted to unlimited. Select Existing Folder to save the account to an **Existing Folder** or select **New Folder** to save the account to a New Folder.

Note!

You can view the cut-off times for the various Service Types, when the payments will be posted and made available to the recipients. by clicking on "cut-off times" hyperlink.

9. Click on **Continue**.

The Payment Import Details:

10. Select the **Format for your Result Files.**
11. You have the option to **Ignore Invalid Items.**
    - If you click the **Yes** check box, the payment batch will be created containing only valid items.
    - If you click **No**, a payment batch will NOT be created if there are any invalid items in the import file.
12. The File Location field requires you to locate the file that you want to import. If you know where the file is located, you can type the file path into the File Path field or click on **Browse** to locate it.
13. Select how you want to receive the results file. You can select to view the import results from your **Inbox** or alternatively select the **Email** button to receive the results file via email. If you selected email, then complete the relevant address fields.
14. Click on **Finish** to return to the Payments landing page.
15. Click on **Import Again** to return to the Capture Import Payment Details screen.
16. Check the **Import Results Report**.

If you are imported using Folders, the system will verify the payment details against the information loaded for each Recipient in the Folder as soon as you click on **Save** or **Save and Exit**. If the **payment limit** and/or **the number of payments allowed per day** for a specific recipient **has been exceeded**, the system will display a new page listing these recipients that have failed this validation. Click on **Cancel** or select **Continue** to return to the payments landing page.

- If you select **Cancel**, the batch status will remain in Work in progress and allow you to maintain the relevant payment details before submitting the batch again. You are also able to refer to you OBE™ Inbox for more information on the failed items.
- If you select Continue, the batch status will change to **the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.**

To Authorise the Payment Instruction

1. Select the **Payments** tab and change the viewing option to **Authorisation Needed** by clicking this option on the top of the page.
2. Select one or more payments by clicking the check box next to the payment **Name** that you want to authorise.

3. Click on **Authorise** to proceed with the authorisation process.
4. Once completed, an authorisation **result page** will be displayed.
5. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

Note: A Transactional report will become available in the Online Banking Enterprise™ Inbox if there are one or more items that failed the validation at the time of authorising a payment batch on Online Banking Enterprise™.

This report will list all successful and/or failed transactions in the batch and a description of the result for each item. You can use this report to make any required changes to the recipient details that failed.

Once these changes have been made, you will be able to resubmit the batch for authorisation.

5.3.3 Copy a Payment

Use this function to copy the details of an existing payment, such as the recipients, to a new payment. You can then make any changes, if necessary, such as deleting or adding recipients.

1. Select the **Payments** Tab.
2. Click on **Menu** for more options, select **Copy Payment** and select the payments you want to copy by clicking on the payment name hyperlink.

Add the Batch Header Details:

3. Type the name of the payment in the **Name** field.
4. The folder name of the folder that was used to create the copied payments will be displayed in the **Folder** field, if payments from a folder were copied. If there is nothing displayed in the Folder field, you will then be copying a **Once-Off payment**.
5. The **Account** field can be a display or dropdown field, depending if the **Allow Override** indicator for the selected folder has been set to **Yes**.
6. The **Action date** is the date that you want the payments to be processed. Payments can be future dated up to 12 months in the future.
7. The **Statement entry** option will default to the selected folder setting, but can be changed.
    - If you want to have each payment made from this folder itemised on your bank statement. Select the **Itemised** button.
    - If you want payments made from this folder to reflect as one consolidated amount. Select the **Consolidated** button.
8. Select the **Service type** from the dropdown list.
9. The **Own Reference** is mandatory if you have selected the Consolidated Statement Entry and will be the reference for the payment on your bank statement.

Note!

You can view the cut-off times for the various Service Types, when the payments will be posted and made available to the recipients. by clicking on "cut-off times" hyperlink.

10. Click on **Continue**.

The Recipient Details:

11. All information will be the default information from the copied payment.
12. The **Own Reference** and **Recipient Reference** fields can be changed for any or all of the payments.
13. The **Amount** field can be changed for any or all of the payments. Clicking on Clear amounts will clear all the amount fields to enable you to capture new amounts.
14. The **Proof of Payment** field will default to the details captured in the folder used to create the payment. If no Payment Notification exists for a payment, and you want to send one on this occasion, you can do so by clicking on the Recipient name hyperlink and editing the required details for the relevant payment.
15. Click on **Save** to save what you have captured on the current page. Click on **Cancel** if you do not want to continue with the payment. Click on **Submit** to submit the payment for authorisation by a User with the required permissions.

If you copied a From Folders Payment Batch, the system will verify the payment details against the information loaded for each Recipient in the Folder as soon as you click on **Save** or **Save and Exit**. If the **payment limit** and/or **the number of payments allowed per day** for a specific recipient **has been exceeded**, the system will display a new page listing these recipients that have failed this validation. Click on **Cancel** or select **Continue** to return to the payments landing page.

- If you select **Cancel**, the batch status will remain in Work in progress and allow you to maintain the relevant payment details before submitting the batch again. You are also able to refer to you OBE™ Inbox for more information on the failed items.
- If you select Continue, the batch status will change to **the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.**

To Authorise the Payment Instruction

6. Select the **Payments** tab and change the viewing option to **Authorisation Needed** by clicking this option on the top of the page.
7. Select one or more payments by clicking the check box next to the payment **Name** that you want to authorise.
8. Click on **Authorise** to proceed with the authorisation process.
9. Once completed, an authorisation **result page** will be displayed.
10. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

Note: A Transactional report will become available in the Online Banking Enterprise™ Inbox if there are one or more items that failed the validation at the time of authorising a payment batch on Online Banking Enterprise™.

This report will list all successful and/or failed transactions in the batch and a description of the result for each item. You can use this report to make any required changes to the recipient details that failed.

Once these changes have been made, you will be able to resubmit the batch for authorisation.

5.3.4 Copy a Failed Payment

Use this function to copy the details of payments which have a status of "Partially Processed", "Updating Status" or "Dated Service - Partially Processed". You can then make any changes, if necessary, such as adding or deleting recipients.

1. Select the **Payments** Tab.
2. Click on **Menu** for more options, select **Copy Failed Payment** and select the payments you want to copy by clicking on the payment name hyperlink.

Add the Batch Header Details:

3. Type the name of the payment in the **Name** field.
4. The folder name of the folder that was used to create the copied payments will be displayed in the **Folder** field, if payments from a folder were copied. If there is nothing displayed in the Folder field, you will then be copying a **Once-Off payment**.
5. The **Account** field can be a display or dropdown field, depending if the **Allow Override** indicator for the selected folder has been set to **Yes**.
6. The **Action date** is the date that you want the payments to be processed. Payments can be future dated up to 12 months in the future.
7. The **Statement entry** option will default to the selected folder setting, but can be changed.
    - If you want to have each payment made from this folder itemised on your bank statement. Select the **Itemised** button.
    - If you want payments made from this folder to reflect as one consolidated amount. Select the **Consolidated** button.
8. Select the **Service type** from the dropdown list.
9. The **Own Reference** is mandatory if you have selected the Consolidated Statement Entry and will be the reference for the payment on your bank statement.

Note!

You can view the cut-off times for the various Service Types, when the payments will be posted and made available to the recipients. by clicking on "cut-off times" hyperlink.

10. Click on **Continue**.

The Recipient Details:

11. All information will be the default information from the copied payment.
12. The **Own Reference** and **Recipient Reference** fields can be changed for any or all of the payments.
13. The **Amount** field can be changed for any or all of the payments. Clicking on Clear amounts will clear all the amount fields to enable you to capture new amounts.
14. The **Proof of Payment** field will default to the details captured in the folder used to create the payment. If no Payment Notification exists for a payment, and you want to send one on this occasion, you can do so by clicking on the Recipient name hyperlink and editing the required details for the relevant payment.
15. Click on **Save** to save what you have captured on the current page. Click on **Cancel** if you do not want to continue with the payment. Click on **Submit** to submit the payment for authorisation by a User with the required permissions.

If you copied a From Folders Payment Batch, the system will verify the payment details against the information loaded for each Recipient in the Folder as soon as you click on **Save** or **Save and Exit**. If the **payment limit** and/or **the number of payments allowed per day**

for a specific recipient **has been exceeded**, the system will display a new page listing these recipients that have failed this validation. Click on **Cancel** or select **Continue** to return to the payments landing page.

- If you select **Cancel**, the batch status will remain in Work in progress and allow you to maintain the relevant payment details before submitting the batch again. You are also able to refer to you OBE™ Inbox for more information on the failed items.
- If you select Continue, the batch status will change to **the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.**

To Authorise the Payment Instruction

11. Select the **Payments** tab and change the viewing option to **Authorisation Needed** by clicking this option on the top of the page.
12. Select one or more payments by clicking the check box next to the payment **Name** that you want to authorise.
13. Click on **Authorise** to proceed with the authorisation process.
14. Once completed, an authorisation **result page** will be displayed.
15. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

Note: A Transactional report will become available in the Online Banking Enterprise™ Inbox if there are one or more items that failed the validation at the time of authorising a payment batch on Online Banking Enterprise™.

This report will list all successful and/or failed transactions in the batch and a description of the result for each item. You can use this report to make any required changes to the recipient details that failed.

Once these changes have been made, you will be able to resubmit the batch for authorisation.

5.3.5 Create a Once-Off Payment

Use this function to create a once-off payment. This type of payment is used to pay recipients you do not pay regularly.

1. Select the **Payments** tab.
2. Click on **Menu** for more options and select Once-Off Payment or click on the **+Add** button and select **Once Off**.

Add the Batch Header Details:

3. Type the name of the payment in the **Name** field.
4. Select an account to be used for the payment from the **Account** dropdown list.
5. The **Action date** is the date that you want the payments to be processed. Payments can be future dated up to 12 months in the future.
6. The **Statement entry** option will default to the selected folder setting, but can be changed.
    - If you want to have each payment made from this folder itemised on your bank statement. Select the **Itemised** button.

- If you want payments made from this folder to reflect as one consolidated amount. Select the **Consolidated** button.

7. Select the **Service type** from the dropdown list.
8. The **Own Reference** is mandatory if you have selected the Consolidated Statement Entry and will be the reference for the payment on your bank statement.

Save Recipients

9. Click on **Yes** if you want to **Save the recipient to a Folder**. The saved Once-Off recipient's daily limit and number of payments per day will be defaulted to unlimited. Select Existing Folder to save the account to an **Existing Folder** or select **New Folder** to save the account to a New Folder.

Note!

You can view the cut-off times for the various Service Types, when the payments will be posted and made available to the recipients. by clicking on "cut-off times" hyperlink.

10. Click on **Continue**.

Add the Recipient Details

11. Select a Recipient type: An Account; A Public Recipient; An eWallet

If you select Public Recipient:

- Enter the Recipient Name.
- Click on Search and select the required Country by clicking on the drop down list.
- Enter the Recipient Name and click on Search.
- The list with your results will display with the Public Recipient description.
- Select the required Recipient from the list by clicking on the Public Recipient Name hyperlink.

If you select Specify Account Details:

- Enter the Recipient Name.
- Select the Bank Name from the Choose Bank list or enter a valid Branch Code. If you enter a valid Branch Code, the system will automatically derive the bank name.
    - If the bank selected only has one branch/head office, the system will automatically display that branch code on the screen.
    - If the bank selected does not have a specific default branch code, the system will display the branch search functionality. Note. Click on the "more' option to activate the branch search functionality.
- Enter the Recipient's Account Number.

Verify Account Owner

- Click on Verify Account Owner if you would like to verify the account. This function provides an immediate response for accounts held at FNB, ABSA, Standard Bank, Capitec and Nedbank. To verify the owner of accounts held at other banks, please select the Multiple sub tab option via the Business Solutions > Verify Account Owner > Multiple or via the Profiles Tab > Menu Verify Account Owner > Multiple.
- Select the Account Type from the drop down list.

If you select Send Money to eWallet:

- Enter the Recipient Name.
- Enter the valid South African Cellphone Number.

Add the Payment Details

12. Enter **Their** reference, this reference will be used on the recipient's bank statement.
13. Enter **My** reference, this is the reference that will be used on your bank statement.
14. Enter an **Amount** that you want to pay to the Recipient.

Add the Proof of Payment Details

15. The **Proof of Payment** fields allow you to set up payment notifications to be sent to this recipient every time you pay them. If you do not want Payment Notifications sent to the recipient Do not complete the relevant Proof of Payment fields.

16. Click on **Add More** to add more Recipients to your batch.
17. Once you have captured all the Recipients, click on **Save and Exit** to save the payment with a status of Work In Progress and return to the Payments landing page.
18. Click on **Submit** to submit the batch for authorisation.

Once Submitted, the payment will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser. A Print Preview page will automatically display the Details of the payment batch; this can be printed or downloaded.

5.4 Maintain a Payment

Use this function to make changes to the recipient details of an existing payment.

1. Select the **Payments** tab.
2. Select the **Maintain** easy action button next to the Payment you want to maintain or click on **Menu** for more options, select **Maintain Payment** and select the Payment by clicking on the Name hyperlink.
3. Click on **Batch Header** sub tab if you want to edit the payment Name, Folder, Action Date, Statement Entry, Service Type, User Codes (if you have multiple user codes linked to your Online Banking Enterprise ™ profile and Own Reference.
4. Click on the **Recipient Details** sub tab if you want to edit the recipient details. You are able to modify the Own Reference, Recipient Reference and Amount field.
5. The **Proof of Payment** field will default to the details captured in the folder used to create the payment. If no Proof of Payment details exists for a payment, and you want to send one on this occasion, you can do so by clicking on the Recipient Name hyperlink and capture the relevant Proof of Payment details for the relevant payment.
6. Click on **Save** to save what you have captured on the current page. Click on **Submit** to submit the payment for authorisation to an Authoriser.

Once Submitted, the payment will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

A **Print Preview** page will automatically display the Details of the payment batch; this can be printed or downloaded.

The Maintain Payment button will only be present if you have permission to capture payments for any accounts and there are existing payments listed.

Payments with a status of Work In Progress and Authorisation Requested status can be maintained. If a payment is authorised, it must be de-authorised before it can be maintained.

5.5 Delete Payments

Use this function to delete any existing payments which are no longer required.

1. Select the **Payments** tab.
2. Click on **Menu** for more options and select **Delete Payment**.
3. Select one or more payments you want to delete and click on **Delete**.
4. Click on **Delete** to confirm deletion of the Payment(s).

The Delete button will only be present if you have permission to capture Payments.

5.6 Search for Payments

Use this function to search for existing payments according to the criteria you have entered.

1. Select the **Payments** tab.
2. Click on **Menu** for more options and select **Search Payment**.
3. Enter the payment **Name, Account, Payment Total From, Payment Total To, Status, Folder** and **Action date**.
4. Click on **Search**.
5. The Search Results page will display the information requested. You can download or print the page for your records.

5.7 View Payments

Use this function to view a history of Payments that you have initiated on Online Banking.

1. Click on Payments tab and select the History sub tab.
2. A list of your Payment Batches, together with the details and status of the transaction, are displayed.

You can also view the payment history and the maintenance history of a recipient paid from a Folder.

1. Click on Payments tab and select the History sub tab.
2. A list of your Payment Batches, together with the details and status of the transaction, are displayed.
3. Clicking on the Recipient name will provide payment, maintenance information for that recipient:

- Payment History – will display as per the default Data Retention days set on the Site Profile.
- Recipient Maintenance History – will display maintenance history for this recipient by date and time and action.

5.8 Payment Instructions

Use this function to Submit, Authorise, Reject, De-authorise and Reprocess Payments.

5.8.1 Submit a Payment

Use this function to submit a payment for authorisation by a User with the necessary authorisation permissions. Users that have capture permission, but no authorisation permission will use the Submit option.

1. Select the **Payments** tab.
2. Select the **Submit** easy button next to the payment **Name** that you want to submit for authorisation.
3. The status of the Payment will change from Work in Progress to Authorisation Requested.

The Payment is now ready to be **authorised**.

or

1. Select the **Payments** tab.
2. Click on **Menu** for more options, select the **Submit Payment** Instruction and select the Payment that you want to submit for authorisation by clicking on the name hyperlink.
3. The status of the payment will change from Work in Progress to Authorisation Requested.

The payment is now ready to be **authorised**.

5.8.2 Authorise a Payment

Use this function to authorise payments which have been created or amended.

1. Select the **Payments** tab and change the viewing option to **Authorisation Needed** by clicking this option on the top of the page.
2. Select one or more payments by clicking the check box next to the payment **Name** that you want to authorise.
3. Click on **Authorise** to proceed with the authorisation process.
4. Once completed, an authorisation **result page** will be displayed.
5. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

or

1. Select the **Payments** tab.
2. Click on **Menu** for more options, select the **Authorise Payment** Instruction and select the Payment that you want to authorise.
3. Click on **Authorise** to proceed with the authorisation process.
4. Once completed, an authorisation **result page** will be displayed.
5. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

The status of the payment(s) will change from either Authorisation Requested or Partially Authorised to Fully Processed, which means that the payment(s) was made successfully. Where there are payments in the batch that have not been successfully processed, the final status of the batch will be Partially Processed.

5.8.3 Reject a Payment

Use this function to reject a payment or several payments submitted for authorisation. The payment will return to the work in progress status and will have to be re-submitted for authorisation.

1. Select the **Payments** tab.
2. Click on **Menu** for more options, select the **Reject Payment** Instruction and select one or more payments by clicking the check box next to the payment **Name** that you want to reject.
3. Click on **Reject**.
4. A screen will display with all the selected rejections, **Reject** and **Cancel** buttons will be present at the bottom of the page.
5. Enter a description in the **Reason** field with a comment or reason for rejecting the payment batch. **Note. This allows you to capture approximately 100 characters. If your site profile setting is set to receive a 'reject notification', the system will automatically send a 'reject notification' to the user that submitted the batch for processing, advising the user that the batch has been rejected by the authoriser.**
6. Click on **Reject**.

or

1. Select the **Payments** tab and change the viewing option to **Authorisation Needed** by clicking this option on the top of the page.
2. Select the **Reject** easy button next to the payment **Name** that you want to reject.
3. Enter a description in the **Reason** field with a comment or reason for rejecting the payment batch. **Note. This allows you to capture approximately 100 characters. If your site profile setting is set to receive a 'reject notification', the system will automatically send a 'reject notification' to the user that submitted the batch for processing, advising the user that the batch has been rejected by the authoriser.**
4. Click on **Reject**.

Notes:

- Rejecting an authorisation will change the status of any rejected items from Authorisation Requested to Work In Progress.
- When rejecting payment batches with more than 1000 payments, the status will change to Updating Status whilst the authorisation process is taking place. This will allow the User to continue with other functions on Online Banking Enterprise ™. The final status of the rejected batch will be Work In Progress which can then be maintained.

- If you capture a ‘reason’ in the optional ‘reason field’, the system will then display the ‘reason’ for rejecting the batch or instruction on all pages where the Authorisation Audit Trail is displayed.

5.8.4 De-Authorise a Payment

Use this function to cancel the "authorised" status of a payment.

1. Select the **Payments** tab.
2. Click on **Menu** for more options, select the **De-Authorise Payment** Instruction and select one or more payments by clicking the check box next to the payment **Name** that you want to de-Authorise.
3. Click on **Confirm**.
4. The payment is now in a **Work in Progress** status.

When De-authorising payment batches with more than 1000 payments, the status will change to Updating Status whilst the authorisation process is taking place. This will allow the User to continue with other functions on Online Banking Enterprise ™. The final status of the rejected batch will be Work In Progress which can then be maintained.

5.8.5 Reprocess a Payment

Use this function to re-submit a payment for processing if the transfer failed as a result of insufficient funds.

1. Select the **Payments** tab.
2. Click on **Menu** for more options, select the **Reprocess Payment** Instruction and select one or more payments by clicking the check box next to the payment **Name** that you want to reprocess.
3. Click on Confirm.

Only payments with a ‘Funds unavailable’ status can be reprocessed. Administrators and Users who have authorisation permissions can use the Reprocess Payments option.

5.9 eZiPayments

Use this function to make eZiPayment. This type of payment allows you to easily pay a single recipient, multiple recipients from a selected folder and Once-Off payments.

eZiPay Single

Use this function to pay a single recipient from a selected folder.

1. Select the **Payments** tab.
2. Click on **Menu** for more options and select **eZiPay Single**.
3. Enter a valid description in the **Name** field.
4. Select a **Date** for your payment.
5. Type in the **Amount** of the payment.
6. Select the **Folder** from which you want to make the payment.
7. Select the **Account** from which you want to make the payment, if this field is accessible.
8. Select the **Recipient** to be credited from the list of recipients.
9. Click on **Submit**.

Once Submitted, the payment will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

A **Print Preview** page will automatically display the Details of the payment batch; this can be printed or downloaded.

eZiPay Multiple

Use this function to pay multiple recipients from a selected folder.

1. Select the **Payments** tab.
2. Click on **Menu** for more options and select **eZiPay Multiple**.
3. Enter a valid description in the **Name** field.
4. Select a **Date** for your payment.
5. Select the **Folder** from which you want to make the payment.
6. Select the **Account** from which you want to make the payment, if this field is accessible.
7. Select the **Recipient** to be credited from the list of recipients.
8. Enter an **Own** and **Recipient Reference** for each recipient.
9. Type in the **Amount** of each payment.
10. Click on **Submit**.

Once Submitted, the payment will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

A **Print Preview** page will automatically display the Details of the payment batch; this can be printed or downloaded.

eZiPay Once Off

Use this function to create a Once-Off eZipay payment for a recipient that you do not pay on a regular basis.

1. Select the **Payments** tab.
2. Click on **Menu** for more options and select **eZiPay Once-Off**.
3. Enter a valid description in the **Description** field.
4. Select the **Account** from which you want to make the payment, if this field is accessible.
5. Select a **Date** for your payment.

Add the Recipient Details:

6. Select a Recipient type: An Account; A Public Recipient; An eWallet

If you select Public Recipient:

- Enter the Recipient Name.
- Click on Search and select the required Country by clicking on the drop down list.
- Enter the Recipient Name and click on Search.
- The list with your results will display with the Public Recipient description.
- Select the required Recipient from the list by clicking on the Public Recipient Name hyperlink.

If you select Specify Account Details:

- Enter the Recipient Name.
- Select the Bank Name from the Choose Bank list or enter a valid Branch Code. If you enter a valid Branch Code, the system will automatically derive the bank name.
    - If the bank selected only has one branch/head office, the system will automatically display that branch code on the screen.
    - If the bank selected does not have a specific default branch code, the system will display the branch search functionality. Note. Click on the "more' option to activate the branch search functionality.
- Enter the Recipient's Account Number.

Verify Account Owner

- Click on Verify Account Owner if you would like to verify the account. This function provides an immediate response for accounts held at FNB, ABSA, Standard Bank, Capitec and Nedbank. To verify the owner of accounts held at other banks, please select the Multiple sub tab option via the Business Solutions > Verify Account Owner > Multiple or via the Profiles Tab > Menu Verify Account Owner > Multiple.

- Select the Account Type from the drop down list.

If you select Send Money to eWallet:

- Enter the Recipient Name.
- Enter the valid South African Cellphone Number.

Add the Payment Details:

7. Enter the reference that you want to appear on your bank statement in the Own Reference field.
8. Enter the reference that you want to appear on the recipient's bank statement in the Recipient Reference field.
9. Enter the Amount

Add the Proof of Payment Details:

10. The Proof of Payment fields allow you to set up payment notifications to be sent to this recipient every time you pay them. If you do not want Payment Notifications sent to the recipient Do not complete the relevant Proof of Payment fields.
11. You can send a Proof of Payment to one or more Recipients. Each recipient can have up to five emails, two SMS's and two faxes per payment.
12. Select the Notification Method: Email, Cellphone Number or Fax Number and complete the SMS, email or fax details for the recipient.

13. Click on Add More to add more Recipients to your batch.
14. Once you have captured all the Recipients, click on Save and Exit to save the payment with a status of Work In Progress and return to the Payments landing page.
15. Click on Submit to submit the batch for authorisation.

Once Submitted, the payment will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser. A Print Preview page will automatically display the Details of the payment batch; this can be printed or downloaded.

5.10 Archived Payments

Use this function to restore payment batches which have passed the archive period defined on your site profile as well as those batches that were deleted within the last five years.

1. Select the **Payments** tab.
2. Select the **Archived** sub tab.
3. Choose the **Archive Period** and click on **Search**.
4. All the deleted and archived payment batches for the period selected will be displayed.
5. Select one or more payment **batch(es)** by clicking in the check box next to the payment name and click on **Restore**.
6. The selected restored batch is displayed. Click on **Confirm**. Click on **Cancel** if you do not want to restore the batch.

The payments displayed here are those which have passed the archive period defined on your site profile as well as those batches that were deleted within the last five years.

The payments will be restored as Once-Off payments if the overnight process is successful, a service fee is charged for restoring archived payments.

The Execution date on Archived Payments will temporarily default to 2000-01-01 00:00. For reference purposes, please re-check the original execution date.

5.11 Send Money to eWallet

The Send Money to eWallet functionality enables a user to send money to a beneficiary via the beneficiary's local cellphone number; the beneficiary does not require a bank account and can withdraw these funds at any FNB ATM without an ATM Card.

When money is sent to the Recipient:

An eWallet is created using the Recipients cell phone number as the account number. The money is transferred instantly and the eWallet Recipient will receive an automated Short Message Service (SMS) message with instructions on how to access the money sent to them.

The eWallet holder is able to access the funds immediately via a FNB ATM using their Wallet PIN.

What other functionality is available to the eWallet holder?

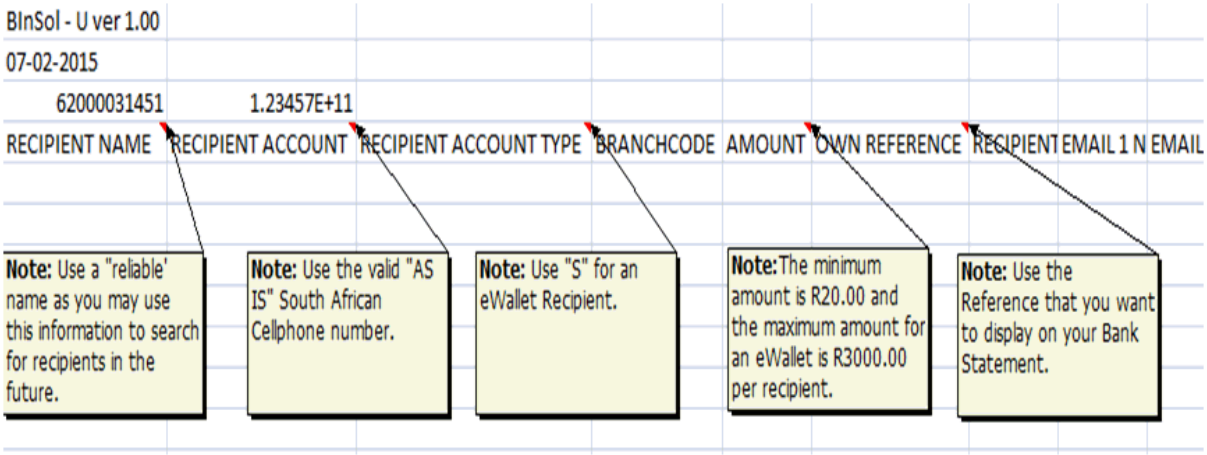
- Withdraw all or some of the money from the eWallet at an FNB ATM without needing a bank card. The rest of the money can be withdrawn at a later stage.
- Buy prepaid airtime from the eWallet.
- Check the eWallet account balance or get a mini statement.

How are payments made to an eWallet?

Payments are done like any normal payments on Online Banking Enterprise™ by selecting the eWallet recipient type and using the Recipient's cellphone number as the account number.

You can even import multiple payments to unbanked recipients using our easy Send Money to eWallet functionality.

- Payments can be imported using the existing .CSV Offline Payment template.
- It will be necessary to input ' ahead of inserting the cellphone number on the template to ensure that when this is saved that the required format for this field is not lost.
- Imported Payment files may contain both normal payments and eWallet payments.
- In the import file, the eWallet recipients should have the following information in these fields:
    - Account Number – Cell-Phone Number being paid
    - Account Type – S
    - Branch Code – Universal FNB Branch code (250655)



Note:

- Please note that, w.e.f the **14th of July 2019**, eWallet payments can no longer be made to recipients that have not presented a valid ID or Passport.
- Therefore, the **N indicator** is **no longer** a **valid** Document Status.
  If you enter an N in the Document Status field on the .csv template, the respective eWallet Recipient will not be imported.

Indicator	Description
~~**N**~~	~~No ID number or Passport number recorded.~~

Note! eWallet transactions will always be itemised on your Bank statement. Should you have an import of 'mixed' transactions (payments to eWallets and payments to normal bank account details), all transactions will be itemised even if you selected a consolidated contra.

What limits are applicable to eWallet payments?

- The minimum payment amount is R20
- The maximum payment is R3000
- The maximum balance allowed in an eWallet is R5000 at any one time
- The maximum daily spend on an eWallet is R5000

Note!

- If the eWallet holder has a balance of R3000 and you make a payment to that eWallet of R3000, the payment will reject as the eWallet maximum balance has been exceeded.
- If the maximum balance has been reached, the eWallet holder will need to use the funds in the eWallet before you can pay to it again.

eWallet holders can call the eWallet Call Centre on 087 575 9405 for support.

5.12 Cross Border Payments

Cross border EFT payments can only be made to **Participating Banks** within the **Common Monetary Area (CMA)**.

Common Monetary Area:

- South Africa
- Namibia
- Swaziland
- Lesotho

Participating Banks:

- FirstRand Bank - FNB/RMB (in all CMA countries)
- Standard Bank (in all CMA countries)
- Nedbank (in all CMA countries)
- Bank Windhoek (in Namibia only)
- ABSA (in South Africa only)
- HSBC (in South Africa only)

Payments to Non-Participating Banks within the Common Monetary Area will need to be made via the Global Payments service on the Forex Tab.

5.13 eFiling Payments

The eFiling function allows you to process eFiling and uFiling payments which have been exported from their respective websites to the Online Banking Enterprise ™ system. These payments are displayed with a status of Work In Progress and can be authorised or deleted. Once they have been authorised, they will follow the same process as other payments created using the Online Banking Enterprise ™ system.

The eFiling function on the SARS website allows you to create SARS eFiling payments and export them to the Online Banking Enterprise ™ system. To obtain detailed information regarding the creation and export of SARS payments into the Online Banking Enterprise ™ system, go to the SARS eFiling website http://www.sarsefiling.co.za or contact their call centre on 0860 709 709.

The uFiling function on the UIF (Department of Labour) website allows you to create UIF payments and export them to the Online Banking Enterprise ™ system. For more information regarding the creation and export of UIF payments into the Online Banking Enterprise ™system, go to the uFiling website http://www.ufiling.co.za

Note:

- If an eFiling payment is **not fully authorised** on Online Banking Enterprise™ **within 30 days**,of it being made available by SARS, the transaction will no longer be displayed.
- The daily cut-off time to submit SARS eFiling payments via Online Banking Enterprise™ is 20h00; the eFiling tab/functionality is not available from 20h00 until the following day

Authorise an eFiling Payment

1. Select the **Payments** tab.
2. Select the **eFiling** sub tab.
3. Click on **Menu** for more options and select **Authorise eFiling**.
4. Select one or more payments by clicking the check box next to the payment **Name** that you want to authorise.
5. Click on **Continue**.
6. Click on **Authorise** to proceed with the authorisation process.
7. Once completed, an authorisation **result page** will be displayed.
8. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

The status of the payment(s) will change from either Authorisation Requested or Partially Authorised to Fully Processed, which means that the payment(s) was made successfully. Where there are payments in the batch that have not been successfully processed, the final status of the batch will be Partially Processed.

Note:

- If an eFiling payment is **not fully authorised** on Online Banking Enterprise™ **within 30 days**,of it being made available by SARS, the transaction will no longer be displayed.
  The daily cut-off time to submit SARS eFiling payments via Online Banking Enterprise™ is 20h00; the eFiling tab/functionality is not available from 20h00 until the following day

Delete an eFiling Payment

1. Select the **Payments** tab.
2. Select the **eFiling** sub tab.
3. Click on **Menu** for more options and select **Delete eFiling**.
4. Select one or more payment by clicking the check box next to the payment **Name** that you want to delete.
5. Select one or more payments you want to delete and click on **Delete**.
6. Click on **Delete** to confirm deletion of the Payment(s).

Note:

- The eFiling tab/functionality is not available from 20h00 until the following day.

5.14 Reversals on Online Banking Enterprise™

If you have submitted an EFT payment incorrectly and the transaction has already been debited from your account and processed into the recipient's account, follow the Payment Reversal process below to have the transaction reversed.

Payment Reversal Documentation

The Reversal Form can be downloaded from the Help Text.

Simply follow these easy steps:

1. Log in to your Online Banking Enterprise™ profile.
2. Click on the hamburger menu on the top left of the page and then select Help.
3. Use the menu on the left to navigate to the Payments page.
4. Click on the Reversals Form hyperlink.
5. This document can be downloaded for your ease of use.

Instructions

1. Complete the Payment Reversal Request Form in full.
2. This form must be completed in full and signed by the account holder/mandated representative.
3. The completed form must be e-mailed to 'fnbdigitalrecalls@fnb.co.za
4. You will receive an automated response with a reference number for the reversal request.
5. If this reference number is not received within 15 (fifteen) minutes, please contact the bank on the number at the back of your card for further assistance.

Fraud

Where you believe a fraudulent transaction has taken place, the transaction must rather be reported to the bank's fraud department. To proceed with reporting the transaction with the bank's Fraud Department contact the bank immediately on 087 575 9444.

Fraud Requirements

You will be required to submit the following information/documentation to the bank's Fraud Department:

- Account number of the complainant
- Suspected fraudulent account details
- SAPS case details
- An Affidavit
- Supporting documents (Proof of Payment)

5.15 Proof of Payment Notifications

Use this function to Send, Create, Export or Download One or more Proof of Payment Notifications for one or more recipients in a payment batch you have already processed.

- **Send** - Create an instruction to send a single Payment Notification to a recipient via sms, email and/or fax.
- **Export** - Export Payment Notifications for all the recipients in a payment batch. You have the option to create a Summary Only, Notifications Only or Summary With Notifications. The Notifications will be generated as a PDF document, allowing you to view, save and/or print the required Payment Notifications.
- **Create** - Create a single Proof of Payment Notifications for a recipient in a payment batch you have already processed. The Notification will be generated as a PDF document, allowing you to view, save and/or print the required Payment Notification.
- **Download** - Download Payment Notifications for one or more recipients in a payment batch. You have the option to create a Summary Only, Notifications Only or Summary With Notifications. The Notifications will be generated as a PDF document, allowing you to view, save and/or print the required Payment Notifications.

Send a Proof of Payment Notification

Use this function to initiate a Send Payment Notification instruction for a recipient in a payment batch you have already processed.

1. Click on the **Payments** tab.
2. Select the **Payment History** view and select the batch name you are looking for by clicking on the payment name hyperlink.
3. Click on the Send easy action button next to the payment you want to create and send a Payment notification advice for.
4. Capture the **SMS**, **email** or **fax** details for the recipient. Each recipient can have up to five emails, two SMS's and two faxes per payment.
5. Once you have captured all the required information in the fields, click on **Send**.

Create a Proof of Payment Notification

Use this function to create a single Proof of Payment Notification for a recipient in a payment batch you have already processed.

1. Click on the **Payments** tab.
2. Select the **Payment History** view and select the batch name you are looking for by click on the payment name hyperlink.
3. Click on the **Create** easy action button next to the payment you want to create a Payment notification advice for.
4. You will have the option to **Save**, **Open** or **Cancel**.
5. Once you have saved and/or opened, the Notification will be generated as a PDF document. You can now View, Save or choose to Print the PDF Notification document by selecting the print option.

Export Payment Notifications

Use this function to export Proof of Payment Notifications for all the recipients in a payment batch that you have already processed.

1. Click on the **Payments** tab.
2. Select the **Payment History** view and then select the batch name you are looking for by click on the payment name hyperlink.
3. Click on the **Export** easy action button.
4. Select the notification type, you have the option to select **Summary Only**, **Notifications Only** or **Summary With Notifications**.
5. Select the **Inbox** button to receive the file in your Inbox or alternatively select the **Email** button to receive it via email. If you selected email, then complete the relevant address fields.
6. Click on **Go**.
7. Once you have saved and/or opened, the Notification/s will be generated as a PDF document. You can now View, Save or choose which pages you want to Print from the document by selecting the printer and detailing which pages in the document you require or print the full document with all notifications.

Download Payment Notifications

Use this function to download Payment Notifications for one or more recipients in a payment batch you have already processed.

1. Click on the **Payments** tab.
2. Select the **Payment History** view and select the batch name you are looking for by clicking on the payment name hyperlink.
3. Select the check box(es) next to the payments you want to download and click on **Download**.
4. Confirm where you would like to send the details to your: **Desktop**, **Inbox** or **Email**. **Note!** Due to download size constraints, the Desktop option will be hidden if you selected more than 5 payments. **Note!** If you select two or more payments in the batch, you will be presented with an option to confirm if you want to combine these Payment Notifications into a single document or opt to have separate documents created for each Payment Notification.
5. Select if you want to create a **Summary Only**, **Notifications Only** or **Summary With Notifications**.
6. Note! This option will not display if you selected to send the details to your Desktop. If you selected the Desktop option in the previous step, the system will by default send the Notifications Only.
7. Click on **Download**.
8. You will have the option to **Save**, **Open** or **Cancel**.
9. Once you have saved and/or opened, the Notification/s will be generated as a PDF document. You can now View, Save or choose which pages you want to Print from the document by selecting the printer and detailing which pages in the document you require or print the full document with all notifications.

5.16 Recurring Payments

Select this option if you want to create stop order whereby you can pay a certain amount to a recipient on a future date, either once off or regularly and for a specific number of payments or with a specific end date.

- FNB recipients and recipients banking at other banks will be credited on your selected execution date.
- Your account will be debited with the full amount of successfully processed payment batches on the execution date during overnight processing.

The advantage of using this service type is that the payment will automatically process the entries on the morning of the due date and every subsequent due date.

- Business days exclude Sundays and Public holidays.

Once a Recurring Payment has been saved, the recipient/s will be paid on the date(s) that you selected without you having to login to Online Banking Enterprise ™. You can create a scheduled payment to the following accounts:

- FNB accounts
- Non FNB accounts
- Recipients on the Public List

Recurring Payments will have a status of Recurring Payment until the final payment has been processed.

Recurring Payments will be saved as the Batch name together with the date of that Recurring Payment, e.g. if the payment name is Salaries, on the dates the payments are processed as per the recurring options the payment names will be:

Salaries 2012-08-25; Salaries 2012-09-25; Salaries 2012-10-25 etc.

Notes.

- A Recurring Payment start date cannot be future dated more than 12 months.
- Recurring Payments will ignore the 'duplicate name' check defined in your Site Profile, if you have selected to use this option.
- The Action date cannot be a Sunday or a Public Holiday.
- FNB recipients will receive their funds on the same day as Action date and Non-FNB payments will only be processed on the next business day.

How to Add a Recurring Payment

1. Select the **Payments** tab.
2. Click on **Menu** for more options and select **Add Payment**.
3. Select the **Once-Off** or **From Folder** option on the Add Payment drop down list.
4. Type the name of the payment in the **Name** field.

    1.

- If **From Folder** was selected, then select the folder from which payments must be made from the dropdown list in the **Folder** field. The **Account** field can be a display or dropdown field, depending if they **Allow Override** indicator for the selected folder has been set to **Yes**.
- If **Once -Off** was selected, then select an account to be used for the payment from the **Account** dropdown list.

5. The **Action date** is the date that you want the payments to be processed. Payments can be future dated up to 12 months in the future.
6. The **Statement entry** option will default to the selected folder setting, but can be changed.

    - If you want to have each payment made from this folder itemised on your bank statement. Select the **Itemised** button.
    - If you want payments made from this folder to reflect as one consolidated amount. Select the **Consolidated** button.

7. Select the **Recurring Payment Service type** from the dropdown list.
8. Under the heading **Recurring Payments Information**, next to **Start Date**, use the calendar to select the date that the scheduled payment must start.
9. In the drop down, select the **Frequency** e.g. weekly, monthly.
10. Stipulate when the payments must end:

    - Click in the button to indicate the **Date** and enter the **Date** in the field provided,
    - Click in the button to indicate the **Number of payments** and enter the number of payments in the space provided,
    - Click in the button to indicate **No Expiry date**, if you want the payments to continue indefinitely.

11. Click on **Continue** to add the Recipients for the payment.

Note. All Recurring Payments will have a status of Recurring Payment until the last payment has been processed.

To **Maintain Recurring Payments**, you must first **De-authorise** the payment. Click on **Menu** for more options and select **De-authorise**.

To **Delete Recurring Payment** that has been created. The payment must first be De-authorised and have a status of Work In Progress before it can be deleted. Click on **Menu** for more options and select **De-authorise**.

Recurring Payments can be deleted on any date prior to the execution date of the payment. No deletions can be made on execution date.

6. Recipients Tab

The Recipients tab is used to access folders containing Recipients. A folder is a group of Recipients that have a common factor, for example:

- A Payments folder named Salaries could contain all the Recipients to whom you pay salaries.
- A Payments folder named Creditors could contain all your creditors as Recipients.
- A Collections folder named Debtors could contain all your debtors as Recipients.

Saving your recipient's banking details into a folder is not just very convenient, it is much safer as all details have already been verified.

- Capturers - Your job is made easier as all the information is grouped into logical groups, you can quickly set up batches; and

- Authorisers - If all your Recipients' banking details were verified and validated at the time they are captured into your folders, the banking details for your Recipients does not need to be checked again at the time of processing payments, speeding up the entire authorisation process.

Folders also allow you to divide activities into separate steps such as loading and authorising the banking details in the database maintained on the Online Banking system and loading and authorising the payment details loaded within your own internal systems.

They reinforce internal processes and segregation of duties by allowing you to assign different people to each step with each system and process (banking and internal).

Additional security layers on Folders:

- set a Payment Limit i.e. the highest amount that can ever be paid to the relevant Recipient at one time
- select the Number of Payments Allowed Per Day to a Recipient.
- set up Proof of Payment notifications to be sent via email, sms and/or fax everytime a payment is made to the Recipient.

When a payment is made from a Folder, the system will verify the Payment Limit and the Number of Payments Allowed Per Day for each Recipient. If it exceeds the values loaded for one or more Recipients, the system will alert the capturer before they submit their payment batch for authorisation that there are items that are exceeding either the limit and/or the number of payments allowed.

The default screen will list all the existing folders to which you have access.

Some options have been grouped together in the Recipient Folders sub-tab to ensure that the functionality is easily accessible within a single page.

There are several action buttons available on the right side of the main screen which you can use to easily access the **+Add**, **Search, Download** and **Print** functions. You can also use the easy action buttons available on the page to access the various functions related to your folders.

The Menu on the left of the page will display the options that are applicable to the page and specific to your Recipient Folders permissions.

When the Menu is active, an Extended Menu List will be displayed in grey. This list provides quick access to functionality within that tab / sub-tab as well as to other commonly used functions on Online Banking Enterprise™.

6.1 Add Recipients

Use this function to add Recipients to a folder

1. Select the **Recipient** tab.
2. Click on **Menu** for more options and select **Add Recipient**.
3. Select the **folder** to which you want to add the Recipients to by clicking on the folder name **hyperlink**.
4. Select **Public Recipient** or **Specify Account Details** or **Send Money to eWallet** and enter the required details for the recipient in the fields.

Note. Once this selection has been made, all the other fields not applicable to the selection will be hidden.

If you select Public Recipient:

- Enter the Recipient Name.
- Click on Search and select the required Country by clicking on the drop down list.
- Enter the Recipient Name and click on Search.
- The list with your results will display with the Public Recipient description.
- Select the required Recipient from the list by clicking on the Public Recipient Name hyperlink.

If you select Specify Account Details:

- Enter the Recipient Name.
- Select the Bank Name from the Choose Bank list or enter a valid Branch Code. If you enter a valid Branch Code, the system will automatically derive the bank name.
    - If the bank selected only has one branch/head office, the system will automatically display that branch code on the screen.
    - If the bank selected does not have a specific default branch code, the system will display the branch search functionality. Note. Click on the "more' option to activate the branch search functionality.
- Enter the Recipient's Account Number.

  Verify Account Owner

    - Click on Verify Account Owner if you would like to verify the account. This function provides an immediate response for accounts held at FNB, ABSA, Standard Bank, Capitec and Nedbank. To verify the owner of accounts held at other banks, please select the Multiple sub tab option via the Business Solutions > Verify Account Owner > Multiple or via the Profiles Tab > Menu Verify Account Owner > Multiple.
- Select the Account Type from the drop down list.

If you select Send Money to eWallet:

- Enter the Recipient Name.
- Enter the valid South African Cellphone Number.

5. Enter the reference that you want to appear on your bank statement in the **Own Reference** field.
6. Enter the reference that you want to appear on the recipient's bank statement in the **Recipient Reference** field.

Payment Limits

7. The **Payment limit** field allows you to choose the highest amount that can ever be paid to this recipient at one time. If you tick the unlimited check box, an unlimited amount can be paid to the recipient. You can limit the amount per payment by entering an amount in the set limit field.
8. The **Number of payments per day** field allows you to set how many payments per day can be made to this recipient. Ticking the unlimited check box will allow an unlimited number of payments per day. You can limit the number of payments that can be made per day to this recipient, by entering the number of payments limit in the set limit field. Setting the limit to 1 payment per day prevents duplication of payments.

Proof of Payment

9. The **Proof of Payment** fields allow you to set up payment notifications to be sent to this recipient every time you pay them. If you do not want Payment Notifications sent to the recipient Do not complete the relevant Proof of Payment fields.
10. Click on **Save and Exit** to save the folder with a status of Work In Progress and return to the Recipients landing page or, Click on **Submit** to submit the Folder for authorisation by a User with the necessary permissions.

Once Submitted, the recipient folder will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

Copy Recipients

1. Select the **Recipient** tab.
2. Click on **Menu** for more options and select **Copy Recipient**.
3. Select the **folder** from which you want to copy the Recipients by clicking on the folder name **hyperlink**.
4. The Recipients in the folder are displayed.
5. Select the **folder** into which the Recipients must be copied to.
6. Tick the check box under the heading, **Delete after copy** next to the recipient if you want the recipient deleted from the current folder.
7. Click on **Save & Exit** to return to the main Recipients page or, click on **Cancel** if all the selected and captured information must be ignored and no Recipients must be copied or deleted. The folders will need to be authorised to activate the copied and deleted Recipients.

Search Recipients

1. Select the **Recipients** tab.
2. Click on **Menu** for more options and select **Search Recipient**.
3. Enter the **Name** and/or **Account number** and/or **recipient Number** of the folder that you are searching for.
4. Select the **folders** that you would like to search, by clicking the checkbox next to the folder name or click on **All**, to search all folders.
5. Click on **Confirm**.

6.2 Add Folders

Use this function to create a new folder, copy an existing folder, import an existing folder or merge folders.

6.2.1 Create a New Folder

Use this function to create a new folder.

Add the Folder Details

1. Select the **Recipient** tab.
2. Select the **+Add** action button on the right and select **Create** or click on **Menu** for more options and select **Create Folder**.
3. Enter the **Folder name**. Duplicate folder names are allowed.
4. Select the **Folder type** from the drop-down list i.e. Payment or Collections.
5. The **Account** drop-down list will contain only those accounts for which you have permission to capture folders.
6. Checking the **Allow override** option will allow you to choose a different account when making collections using this folder.
7. Select the **Statement entry** options: If you want to have each payment or collection item made using this folder **itemised** on your bank statement. Select the **Itemised** radio button. If you want the total payment or collection made to reflect as one consolidated entry. Select the **Consolidated** radio button.
8. The **Own reference** is mandatory. This will be the reference for the payment/collection on your bank statement, if **Consolidated** has been selected.
9. Click on **Continue** to proceed to the **Add Recipients** screen.

Add the Recipient Details

10. Select **Public Recipient** or **Specify Account Details** or **Send Money to eWallet** and enter the required details for the recipient in the fields. **Note. Once this selection has been made, all the other fields not applicable to the selection will be hidden.**

If you select Public Recipient:

- Enter the Recipient Name.
- Click on Search and select the required Country by clicking on the drop down list.
- Enter the Recipient Name and click on Search.
- The list with your results will display with the Public Recipient description.
- Select the required Recipient from the list by clicking on the Public Recipient Name hyperlink.

If you select Specify Account Details:

- Enter the Recipient Name.
- Select the Bank Name from the Choose Bank list or enter a valid Branch Code. If you enter a valid Branch Code, the system will automatically derive the bank name.
    - If the bank selected only has one branch/head office, the system will automatically display that branch code on the screen.

- If the bank selected does not have a specific default branch code, the system will display the branch search functionality. Note. Click on the "more' option to activate the branch search functionality.

- Enter the Recipient's Account Number.

Verify Account Owner

- Click on Verify Account Owner if you would like to verify the account. This function provides an immediate response for accounts held at FNB, ABSA, Standard Bank, Capitec and Nedbank. To verify the owner of accounts held at other banks, please select the Multiple sub tab option via the Business Solutions > Verify Account Owner > Multiple or via the Profiles Tab > Menu Verify Account Owner > Multiple.

- Select the Account Type from the drop down list.

If you select Send Money to eWallet:

- Enter the Recipient Name.
- Enter the valid South African Cellphone Number.

11. Enter the reference that you want to appear on your bank statement in the Own Reference field.
12. Enter the reference that you want to appear on the recipient's bank statement in the Recipient Reference field.

Payment Limits

13. The Payment limit field allows you to choose the highest amount that can ever be paid to this recipient at one time. If you tick the unlimited check box, an unlimited amount can be paid to the recipient. You can limit the amount per payment by entering an amount in the set limit field.
14. The Number of payments per day field allows you to set how many payments per day can be made to this recipient. Ticking the unlimited check box will allow an unlimited number of payments per day. You can limit the number of payments that can be made per day to this recipient, by entering the number of payments limit in the set limit field. Setting the limit to 1 payment per day prevents duplication of payments.

Proof of Payment

15. The Proof of Payment fields allow you to set up payment notifications to be sent to this recipient every time you pay them. If you do not want Payment Notifications sent to the recipient Do not complete the relevant Proof of Payment fields.
16. Click on Save and Exit to save the folder with a status of Work In Progress and return to the Recipients landing page or, Click on Submit to submit the Folder for authorisation by a User with the necessary permissions.

Once Submitted, the recipient folder will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

6.2.2 Copy a Folder

Use this function to copy the contents of an existing folder to a new folder.

1. Select the **Recipient** tab.
2. Click on **Menu** for more options and select **Copy Folder**.
3. Select the folder you want to copy by clicking on the folder name hyperlink.
4. Enter the **Folder name**. Duplicate folder names are allowed.
5. Select the folder **type** from the drop-down list i.e. Payment or Collections.
6. The **Account** drop-down list will contain only those accounts for which you have permission to capture folders.
7. Checking the **Allow override** option will allow you to choose a different account when making collections using this folder.
8. Select the **Statement entry** options: If you want to have each payment or collection item made using this folder **itemised** on your bank statement. Select the **Itemised** radio button. If you want the total payment or collection made to reflect as one consolidated entry. Select the **Consolidated** radio button.
9. The **Own reference** is mandatory. This will be the reference for the collection on your bank statement, if **Consolidated** has been selected.
10. Click on **Continue**.
11. Select the **Recipients** you want to copy or click on the All button to select all the Recipients.
12. Click on **Submit** to submit the Folder for authorisation or click on **Authorise** to initiate the authorisation process

6.2.3 Merge Payments Folders

Use this function to combine the contents of a number of payment folders into a new folder.

1. Select the **Recipient** tab.
2. Click on **Menu** for more options and select **Merge Payment Folder**.
3. Select the **folders** that you want to merge by ticking their check boxes and click on **OK**.
4. Enter the **Folder name**. Duplicate folder names are allowed.
5. The **Account** drop-down list will contain only those accounts for which you have permission to capture folders.
6. Checking the **Allow override** option will allow you to choose a different account when making payments using this folder.
7. When making payments using this folder, you have the following **Statement entry** options: If you want to have each payment item made using this folder **itemised** on your bank statement. Select the Itemised radio button. If you want the total payment made to reflect as one consolidated entry. Select the **Consolidated** radio button.
8. The **Own reference** is mandatory. This will be the reference for the payment on your bank statement, if **Consolidated** has been selected.
9. Click on **Continue**.
10. The Maintain folder screen displays the folder details and lists the Recipients from both the folders that you selected.
11. Click on **Submit** to submit the Folder for authorisation or click on **Authorise** to initiate the authorisation process.

6.2.4 Merge Collection Folders

Use this function to combine the contents of a number of collection folders into a new folder.

1. Select the **Recipient** tab.
2. Click on **Menu** for more options and select **Merge Collections Folder**.
3. Select the **folders** that you want to merge by ticking their check boxes and click on **OK**.
4. Enter the **Folder name**. Duplicate folder names are allowed.
5. The **Account** drop-down list will contain only those accounts for which you have permission to capture folders.
6. Checking the **Allow override** option will allow you to choose a different account when making collections using this folder.
7. When making collections using this folder, you have the following **Statement entry** options: If you want to have each collection item made using this folder **itemised** on your bank statement. Select the Itemised radio button. If you want the total collection made to reflect as one consolidated entry. Select the **Consolidated** radio button.
8. The **Own reference** is mandatory. This will be the reference for the collection on your bank statement, if **Consolidated** has been selected.
9. Click on **Continue**.
10. The Maintain folder screen displays the folder details and lists the Recipients from both the folders that you selected.
11. Click on **Submit** to submit the Folder for authorisation or click on **Authorise** to initiate the authorisation process.

6.2.5 Import a Folder

Use this function to import a folder which has been created off-line.

1. Select the **Recipient** tab.
2. Select the **+Add** action button on the right and select **Import** or click on **Menu** for more options and select **Import Folder**.
3. Select the folder **type** from the drop-down list i.e. Payment or Collections.
4. Select **New Folder** if this is a new folder that is being imported or select **Existing Folder** and select the folder name from the dropdown list, if you are importing Recipients that you want to add to an existing folder.
5. Enter the **Folder name**. Duplicate folder names are allowed.
6. Select the **Format** either: BankServ (ACB), CSV.
7. The **Account** drop-down list will contain only those accounts for which you have permission to capture folders.
8. Checking the **Allow override** option will allow you to choose a different account when making collections using this folder.
9. Select the **Statement entry** options: If you want to have each payment or collection item made using this folder **itemised** on your bank statement. Select the **Itemised** radio button. If you want the total payment or collection made to reflect as one consolidated entry. Select the **Consolidated** radio button.
10. The **Own reference** is mandatory. This will be the reference for the collection on your bank statement, if **Consolidated** has been selected.
11. Click on **Continue.**
12. You have the option to **Ignore invalid items** in the file by checking the check box. If you check the **Ignore invalid items** check box. The folder will be created containing only valid items. If you **do not check the Ignore invalid items** check box. A folder will NOT be created if there are any invalid items in the import file.
13. The File Location field requires you to locate the file that you want to import. If you know where the file is located, you can type the file path into the File Path field, or click on **Browse** to locate it.
14. Click on **Upload**.
15. A new page will display with your Folder details.

16. Click on **Finish** to return to the Recipients landing page or click on **Import Again** to return to the Capture Import Payment Details screen to import another file.
17. Check the **Import Results Report** in your **Online Banking Enterprise™ Inbox**.

You can create an off-line file (.csv) containing your recipient's details using the spreadsheet provided or you can use an ACB file, CAMS import file or CAMS export file (if applicable)

6.3 Maintain Folders

Use this function to make changes to existing folders. You can make changes to the folder Header or Recipients in the folder.

1. Select the **Recipient** tab.
2. Select the **Maintain** button next to the folder you want to maintain.
3. You will be able to maintain any of the folder header details and click on **Continue**.
    - If you want to M**aintain a recipient** within the folder, select the recipient you want to maintain by clicking on the recipient name hyperlink.
    - If you want to **Add a recipient** within the folder, click on **Menu** for more options and select **Add.**
    - If you want to **Delete a recipient** within the folder, click on **Menu** for more options and select **Delete.**
4. Click on **Submit** to submit the Folder for authorisation or click on **Authorise** to initiate the authorisation process.

6.4 Delete Folders

Use this function to delete folder or delete changes made to a folder.

Delete Folder

Use this function to delete folders and the Recipients within the folders.

1. Select the **Recipient** tab.
2. Select the **Delete** action button next to the folder name you want to delete.
3. The system will return a message asking you to **confirm** that you want to delete the Folder, click on **Delete**.

Delete Changes

Use this function to delete any changes made to a folder.

1. Select the **Recipients** tab.
2. Click on **Menu** for more options and select **Delete Changes**.
3. Select the **Delete** action button next to the folder you want to delete changes for.
4. The system returns a message asking you to **confirm** that you want to delete the changes for the Folder, click on **Delete**.

6.5 Search Folders

Use this function to search for a folder according to a folder name or account number.

1. Select the **Recipient** tab.
2. Select the Search action button on the right.
3. Enter the **Criteria** of the folder that you are searching for.
4. Click on **Search**.

You are able to perform a wild card search using any 3 characters of the recipient Name, or the first 2 digits of the account number.

6.6 Export Folder

Use this function to export Recipients in a folder. Select either Active or Pending. These are folders that are either in an “Authorised” (Active) or folders that have been changed but not authorised (Pending) status.

Export Active folders

Use this function to export Recipients in an Active (Authorised) folders.

1. Select the **Recipient** tab.
2. Select the **Export** action button next to the folder name you want to export or click on **Menu** for more options, select **Export Active Folder** and click on the **Export** action button next to the folder name you want to export.
3. Select the **Format** from the drop down list either: CSV, PDF or CAMS (Export) and click on **Confirm**.
4. Open your Online Banking Enterprise ™ Inbox, select the file, click on **Download** and save to a destination of your choice in order to view the information.
5. The information will be saved in a zipped file, per exported folder.

The CSV (Detailed) export format option will enable you to export all your Recipients’ banking details held within the existing Folders on Online Banking Enterprise™.

Export Pending Folders

Use this function to export Recipients in a Pending (Work in Progress / Authorisation Requested) folders.

1. Select the **Recipient** tab.
2. Select the **Export** action button next to the folder name you want to export or click on **Menu** for more options, select **Export Pending Folder** and click on the **Export** action button next to the folder name you want to export.
3. Select the **Format** from the drop down list either: CSV, PDF or CAMS (Export) and click on **Confirm**.
4. Open your Online Banking Enterprise ™ Inbox, select the file, click on **Download** and save to a destination of your choice in order to view the information.
5. The information will be saved in a zipped file, per exported folder.

The CSV (Detailed) export format option will enable you to export all your Recipients’ banking details held within the existing Folders on Online Banking Enterprise™.

6.7 Recipient Instructions

Use this function to Submit and Authorise Folders.

6.7.1 Submit folders

Use this function to submit folders, which you have created or changed, for authorisation.

1. Select the **Recipients** tab.
2. Select one or more folders by clicking the check box next to the folder **Name** that you want to submit for authorisation
3. Click on **Submit**.
4. The status of the folder will change from Work in Progress to Authorisation Requested.

or

1. Select the **Recipients** tab.
2. Click on **Menu** for more options and select the **Submit Folder** Instruction.
3. Select one or more folders by clicking the check box next to the folder **Name** that you want to submit for authorisation
4. Click on **Submit**.
5. The status of the folder will change from Work in Progress to Authorisation Requested.

The status of the folder(s) that you selected will automatically be changed to **Authorisation Requested**.

6.7.2 Authorise Folders

Use this function to authorise folders which have been created or amended.

1. Select the **Recipients** tab and select the **Authorisation Needed** viewing option on the top of the page.
2. Select one or more folders by clicking the check box next to the folder **Name** that you want to authorise.
3. Click on **Authorise** to proceed with the authorisation process.
4. Once completed, an authorisation **result page** will be displayed.
5. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

or

1. Select the **Recipients** tab.
2. Click on **Menu** for more options and select the **Authorise Folder** Instruction.
3. Select one or more folders by clicking the check box next to the folder **Name** that you want to authorise.
4. Click on **Authorise** to proceed with the authorisation process.
5. Once completed, an authorisation **result page** will be displayed.
6. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

Once you have authorised the folder, the status will change to Partially Authorised or Authorised, depending on how many authorisations are required.

6.8 View Public Recipient

Use this function to view a list of frequently used Recipients, such as Telkom and SARS, whose banking details are saved on the system.

1. Select the **Payments**, **Collections** or **Recipients** tab.
2. Click on **Menu** for more options and select **View Public Recipients**.
3. Select the relevant **Country** sub tab.
4. The list will display with the Public Recipient Description and Reference that must be used as the Account number when importing Payments.

6.9 Open a Staff Account

Use this function to enter the personal details of an employee who wants to apply for an account on-line.

1. Select the **Recipients** tab.
2. Click on **Menu** for more options and select **Open Staff Account** from the extended Menu list.
3. Click on **Menu** for more options and select **New Application** in the action bar.
4. Enter the **employee details** and click on **Open Application** to continue.

Print the **Application letter** and ensure that it is signed by the Employee and the Company signatories. **The Employee must take this letter to the branch selected within 2 weeks in order for this application to be valid.**

All fields on the Open Staff Account screens are **mandatory**.

Note: on completion of the application, funds can be paid into the account, but employees can only withdraw funds once they have supplied the branch with the required FICA documentation.

7. Collections Tab

Online Banking Enterprise™ offers a simple and secure ways to make Collections from third parties.

- Collect funds from recipients using folders for each recipient dataset.
- Perform once-off collections through capture or file import.
- Import collections from line of business systems in Bankserv, ISO or a .CSV file formats.
- Select a service type to suit needs such as Sameday, 2-day, DebiCheck
- Submit future dated collections up to 365 days in advance.
- Generate and schedule exports of reports for management of your debtors' book.
- Permissions to the Collection functionality can be specified, so each user will only see the functions they have access to.

Requirements:

- All collections effected need to be supported by an approved signed mandate from your client.
- Collections are subject to business rules, legislative and regulatory provisions, these will be provided for your ease of use.
- Credit facilities will be marked to support collections and will need to be applied for subject to their requirements for the limit.
    - Limits are negotiated between you and your FNB Relationship Manager.
    - Exceeding limits will have an impact on your daily operations – transactions will be rejected if they are in excess of the agreed limits.

Permissions

Once the module has been opened on your Online Banking Enterprise™ profile, the Administrators must allocate the required Collection permissions and limits applicable for their Users via the Profiles Tab > Maintain User > Account Permissions sub tab:

- Collection Permissions > Folder Collections (Manage and Authorise Folders)
- Collection Permissions > Once – Off Collections (Capture and Authorise)

If the user has been allocated permission to Authorise Collections, the Administrators will also need to allocate the relevant authorisation Limits:

- Select the unlimited option to allow the user to capture/authorise Collections and Once Off Collections for any amount.
- Select the set limit option to set the maximum amount for Collections and Once Off Collection that can be captured/authorised.

The landing page will list all current Collections, as well as the status of each Collection.
To increase the number of days for which you want to store information for Collections, please ask your Administrator(s) to extend the default settings to 90, 120, 150 or 180 days via Profiles tab > Site Settings > Retention Days.

Important Guidelines for Managing your Collections

There are various rules and guidelines on how you should manage your Collections in order to comply with the many business rules, legislative and regulatory provisions associated with using Collections on Online Banking Enterprise™.

If your Collections are not managed correctly it could easily turn into a real risk for your business.

Mandates

A mandate is the written and signed authority that a customer signs, allowing a company to collect funds from their account by means of a debit instruction. The mandate contains specific information relating to the collection. Voice mandates are accepted but must be supported by written confirmation.

- All your Collection transactions are supported by an approved signed mandate from your client.
- Confirm that your mandates are valid and that you are adhering to the rules determined by the supervisory and regulatory authorities.

A mandate loses its validity when:

- The customer directly instructs your company to cancel the mandate.
- Your company terminates services with the customer.
- A debit order transaction against an account is unsuccessful for two consecutive collections.
- The conditions of the mandate change.
- The customer’s account has been closed.

Please ensure that you have a correct and legal mandates in place for your customers and able to produce an auditor's certificate confirming the existence and compliance of these mandates.

All Mandates, whether written or voice-recorded, must be kept for a minimum period of five years after collections have ceased or from the date of the last Debit Order Payment Instruction having been processed in terms of the Mandate.

Returned Transactions

Please confirm that you are adhering to the rules determined by the supervisory and regulatory authorities, such as:

- Items that is returned on consecutive authorised Action Dates – Note that you may not resubmit these transactions unless you have obtained a new authority to debit from the Accountholder concerned.
- Items that are in returned because the Accountholder have instructed you to cancel the instruction – Please ensure that no further transactions are processed under the existing debit order authority. A new authority must be obtained from the Accountholder concerned.
- Items that are returned because the account is closed – Please ensure that no further transactions are processed under the existing debit order authority. A new authority must be obtained from the Accountholder concerned.

Disputed Transactions

Confirm that you are adhering to the rules determined by the supervisory and regulatory authorities, such as:

- If an item is returned because a consumer complains that your company has taken money from their account without permission, you must ensure that no further transactions are processed under the existing debit order authority. A new authority must be obtained from the Accountholder concerned.
- These may include any of the following reasons:
    - He/She did not authorise the drawing in question, or
    - The drawing is in contravention of his/her authority, or
    - He/She has instructed your company to cancel the authority.
    - He/She has stopped the payment of the instruction.

Recovery of Arrears

Returned and Disputed transactions must be removed from your debit order file and you will need to make alternative arrangements to collect the outstanding funds or obtain a new debit order authority from your customer to recover the arrears.

Referencing Transactions

It is crucial that you use the required reference field provided for Collections to enable your customer to clearly identify by who and why they are being debited. Using a meaningful reference will also ensure that you are able to reconcile any unpaid transactions more efficiently and assist in reducing your dispute ratios.

7.1 Collection Rules

This section includes some important guidelines and rules related to Collections on Online Banking Enterprise™.

7.1.1 Collections Cut-off Times

The Cut-off times for Normal, 2 Day, NAEDO and DebiCheck Collections.

Service	CSDV (Normal)	2-Day service	NAEDO	*DebiCheck
Submission	Anytime	2 Business Days prior to Action date	1 Business Day prior to Action Date	1 Business Day prior to Action Date
Monday to Friday	Other Banks - 16:15 FNB - 20:00	All Banks - 14:45	All Banks - 16:00	All Banks – between 08:00 and 16:30
Saturday	Other Banks - 10:15 FNB - 20:00	All Banks - 08:45	All Banks - 10:00	All Banks – between 08:00 and 12:00
Sunday	Not Applicable – not a business day	Not Applicable – not a business day	All Banks - 10:00	Not Applicable – not a business day
Time of Posting	Posted the next day value date the same as action date	Morning of Action Date	Morning of Action Date Saturday and Sunday Submissions for Monday	Posted the next Business day

*DebiCheck is currently available to a limited number of clients. Please call 087 575 0000 for more information.

7.1.2 Collection Autobump Rules

Depending on the **Autobump** option which has been set against your company profile - if you miss the cut-off time:

- and the autobump option has been set to **On**, the collection will automatically be processed on the next business day.
- and the autobump option has been set to **Off**, the collection will fail.
- and the autobump option has been set to **Ask when cut-off time missed**, you can choose whether or not you would like to process the collection/s the next business day.

7.1.3 Future Dated Collections

Collections can be future dated up to 365 days in advance.

Note: Collections cannot be processed to recipients who bank in another country (Namibia, Swaziland and Lesotho) when there are Public holidays. These collections will reject.

7.1.4 Collection Service Types

Service Type	Description
SameDay (Normal)	Select this option if you want to use the normal process of collecting funds from a recipient. • FNB recipients will be debited on the same day. • Recipients banking at other financial institutions will be debited the next business day, with value the same as the action date. • Your account will be credited with the successful collections the next business day with value the same as the action date.
2 Day Value	This option will only be available if you have a User Code(s) linked to your Online Banking Enterprise™ profile. • Your account will be credited with the full amount on the execution date. • Your **action** date is the SAME date as the date you would like your recipients to be debited. The collection batch must be captured AND authorised at least 2 business days prior to the action date. • Business days exclude Sundays and Public holidays.
NAEDO	This option will only be available if there is a NAEDO User Code(s) linked to your Online Banking Enterprise ™ profile. Debit orders are processed on a randomised basis ensuring equal and fair opportunity to recover payments, no bank or service provider is given priority. • Your account will be credited on the action date with the value of all successful collections. • Your **action** date is the SAME date as the date on which you would like your recipients to be debited. The NAEDO collection batch must be captured AND authorised at least 1 day prior to the **action** date. NAEDO has a tracking or response facility that allows your company to 'monitor' an account against which a collection instruction has been presented and to collect the required amount as soon as funds enter that account.

	• A NAEDO debit order can be marked to track a customer's account from a minimum of one day through to a maximum of 32 days. • Tracking takes place 24/7 and include Sundays and Public Holidays and is done on **calender** days for banks that do tracking. **Please refer to the NAEDO section in this User guide to learn more about using the NAEDO Service Type Option. **As an FNB sponsored collector, you are required to adhere to the FRB NAEDO Terms of Use. Please download the document for more guidelines on Unpaid, Disputes and requirements for Mandates.**
DebiCheck	This option will only be available if the DebiCheck module has been linked to your Online Banking Enterprise ™ profile. • You will be required to populate/capture all the required fields on the mandate and send this to the bank for authorisation by the debtor. • Debtors are required to authenticate the mandate on their preferred banking channel i.e. internet banking, FNB app, ATM, etc. . • Once the mandate is accepted from the paying bank, a confirmation message will be sent from the paying bank to the creditor bank who in turn on-sends it to you for your consumption. • You will need to include the Mandate Reference Number on all transactions initiated for the Debtor. The DebiCheck collection batch must be captured AND authorised at least 1 day prior to the **action** date. DebiCheck also has a tracking or response facility (maximum of 10 days) that allows your company to 'monitor' an account against which a collection instruction has been presented and to collect the required amount as soon as funds enter that account. **Please refer to the DeBiCheck section in this User guide to learn more about using this Service Type Option. **As an FNB sponsored collector, you are required to adhere to the FRB Terms of Use.**

7.1.5 Collections Unpaid Reason Codes

Code	Unpaid Reason

02	Not provided for
03	Debits not allowed to this account
04	Payment stopped
06	Accounts stopped (Divorce etc)
08	Account in sequestration (individual)
10	Account in liquidation (company)
12	Account closed
14	Account transferred (within FNB)
16	Account transferred (out of FNB)
18	Account holder deceased
22	Account effects not cleared
26	No such account
28	Recall/Withdrawal
30	No authority to debit
32	Debit in contravention of payer's authority
34	Authorisation cancelled
36	Previously stopped via stop payment advice

7.1.6 Cross Border Collections

Funds may be moved cross-border between both FNB and non-FNB accounts in RSA, Namibia, Swaziland and Lesotho.

Namibia

- The base currency for Namibia is the Namibia Dollar (NAD).
- Wintertime day-light-savings in Namibia starts the first weekend (Sunday) in April and ends the first weekend in September; therefore, in wintertime the Namibian time moves one hour earlier and cut-off times are adjusted accordingly.
- No processing is done on a Saturday, Sunday and Public Holidays.
- South African public holidays do not affect payments within Namibia in any way.

General Collection Rules

- Customers can make collections for FNB and non-FNB accounts in Namibia, RSA, Swaziland and Lesotho.
- Collection Limit for FNB Namibia is NAD 500,000.00 per transaction/item. If the collection transaction limit is exceeded, the transaction will be rejected.
- No processing on Saturday, Sunday and Public Holidays.

Swaziland

- The base currency for Swaziland is the Swaziland Emalangeni (SZL).

- Payments and Collections in Swaziland are affected by South African public holidays.

General Collection Rules

- Customers can make collections for FNB and non-FNB accounts in Swaziland, RSA, Namibia and Lesotho.
- Collection Limit for FNB Swaziland is SZL 500,000.00 per transaction/item. If the collection transaction limit is exceeded, the transaction will be rejected.
- Make use of a range of service types such as real-time, same-day, 1-day and 2-day to process collections.

Lesotho

- The base currency for Lesotho is the Lesotho Maloti (LSL).
- Transactions originating from Lesotho and destined for other LACH participating banks in Lesotho, will be processed and cleared through the Lesotho Automated Clearing House [LACH].

General Collection Rules

- Customers can make collections for FNB and non-FNB accounts in Lesotho, RSA, Swaziland and Namibia.
- Collection Limit for FNB Lesotho is LSL 100,000.00 per transaction/item. If the collection transaction limit is exceeded, the transaction will be rejected.
- Make use of the same-day service type to process collections.

Botswana

- The base currency for Botswana is the Botswana Pula (BWP).
- FNB Botswana falls outside of the Common Monetary Area so they are only able to transact within the country, no cross border payments and collections are allowed.

General Collection Rules

- Customers can make collections for FNB and non-FNB accounts in Botswana.
- Cross border Collections not allowed.
- Make use of the same-day service type to process collections.
- No processing on Saturday, Sunday and Public Holidays.

Zambia

- The base currency for Zambia is Kwacha (ZMK).

- Other non-base currencies for Zambia include the Euro, Pound, United States Dollar, and South African Rand. Non-base currency accounts can be opened at a branch.

General Collection Rules

- Customers can make collections for FNB and non-FNB accounts in the base currency.
- Limit structure must be loaded in the base currency, Kwacha.
- Cross border Collections not allowed.
- Collection Limit for FNB Zambia is ZMK 50,000,000.00 per transaction/item. If the collection transaction limit is exceeded, the file will be rejected.
- Make use of the Sameday service type to process collections.
- No processing on Saturday, Sunday and Public Holidays.

Tanzania

- The base currency for Tanzania is Shilling (TZS).
- Other non-base currencies for Tanzania include the Euro, Pound, United States Dollar, and South African Rand. Non-base currency accounts can be opened at a branch.

General Collection Rules

- Customers can only make collections for FNB (on-us) transactions in the base currency.
- Limit structure must be loaded in the base currency, Shilling.
- Cross border Collections not allowed.
- Collection Limit for FNB Tanzania is TZS 10,000,000.00 per transaction/item. If the collection transaction limit is exceeded, the file will be rejected.
- Make use of the Sameday service type to process collections.
- No processing on Saturday, Sunday and Public Holidays.

7.1.7 Collection Batch Statuses

Status	Description
Work In Progress	Created but not authorised or authorisation not requested.
Authorisation Requested	Requested authorisation, not yet authorised.
Updating Status	When working with large Collection Batches, the batch status will temporary change to **Updating Status** whilst each individual item in the batch is being checked, validated or processed and only when this process has been completed will it be updated to the correct and relevant Batch status.
Partially Authorised	Multiple authorisations required, and not all authorisers have authorised item.

Authorised	Fully Authorised ready for collection.
Submitted for Processing	Submitted to back end for processing, awaiting response. **Please check the final status once processing has taken place.**
Fully Processed	All items processed.
Partially Processed	Not all items processed (View Failed Items).
Processing Failed	All items failed.
Unsuccessful	Processed, but everything failed due to back end processing error, able to reprocess.
Limit exceeded	Items failed due to the limit being exceeded. **Please contact your Relationship Manager to arrange for an increase in the limit before the Collections can be submitted again.**
Settlement Limit Exceeded	Online Settlement Limits does not allow for any excesses, any transactions that exceed the limit available will automatically reject. **Please contact your Relationship Manager to arrange for an increase in the limit before the Collections can be submitted again.**
Dated Service – Fully Processed	2 Day Service type batch. All the items in the batch have passed validation. **Please check the final status on action date.**
Dated Service – Partially Processed	2 Day Service type batch. The batch has some failed items. **Please check the final status on action date.**
In Tracking – Partially Processed	All the items in the batch have passed validation and all transactions have been processed. Some may have been successful immediately and some have gone into Tracking. **Please check the final status on action date to ensure all items have been processed.**
In Tracking – Fully Processed	The batch has some failed items e.g. failed limit and some of the transactions have been processed. Some may have been immediately successful or unsuccessful and some have gone into Tracking. **Please check the final status on action date to view the failed items.**

7.2 Add Collections

Use this function to make collections from third parties.

The Payments Association of South Africa (PASA) introduced Transaction Referencing Standards with the key purpose of providing greater transparency on consumers' bank statements that would enable recipients of collections to identify the source of the debit processed against their account.

The Transaction Referencing Standards requires the following components to be included in the Recipient Reference field:

The first 14 characters must represent the debit order mandate/agreement number (Reference) followed by a 6-character Date field for NAEDO transactions or any other info relevant to you for a regular collection transaction.

The Transaction Referencing Standards also requires the inclusion of an Abbreviated Name:
Please ensure that you enter the Abbreviated Name (Company name) fields provided, the abbreviated name is the short name loaded on FNB's systems which forms part of the recipient reference and used to identify your company name.

7.2.1 Add Collections From a Folder

Use this function to make a collection from an existing folder. The folder contains the banking details of recipients, you can select the recipients you want to collect from and enter the amounts you want to collect from them.

1. Select the **Collections** tab.
2. Click on the **+Add** action button on the right and select **From Folder**.

Add the Batch Header Details:

3. Type the name of the Collection in the **Name** field.
4. Select the **Folder** to be used for the collection from the dropdown list. The list of folders in the dropdown is restricted to those containing accounts for which you can capture Collections.
5. The **Account number** field will be displayed depending on the following:

    - If the **Allow Override** indicator for the selected folder has been set to **'Yes'** The Account can be selected from a dropdown list (restricted to those accounts for which you can capture Collections).
    - If the **Allow Override** indicator for the selected folder has been set to **'No'** the Account displayed is the default account set for the folder and cannot be changed.

6. The **Action date** is the date on which you want the Collection to be processed. Collections can be future dated up to 365 days in advance.
7. Select your **Statement Entry**:

    - If you want to have each Collection amount itemised on your bank statement Tick the **Itemised** tick box.
    - If you want the total Collection amount to reflect as one entry on your bank statement. Tick the **Consolidated** tick box. Note: If you select the Consolidated option and the total collection amount exceeds the settlement

limit when processed, the whole collection will fail. If you select the Itemised option, the collection items will be processed until the limit is reached and only those items exceeding the limit will fail.

8. Select the **Service type** from the dropdown list.
9. Select the **User Code** from the dropdown list.
10. The **Own Reference** is mandatory if you have selected the Consolidated Statement Entry and will be the reference for the collections on your bank statement.

Note!
You can view the **cut-off times** for the various service types as well as information when the Collections will be posted, and when debited to the recipients by clicking on the cut-off times hyperlink.

11. Click on **Continue**.

Add the Recipient Details:

12. The page will display the recipients for the folder that you have selected.
13. Enter an amount in the **Amount** field next to each recipient. You can use the Tab key on the keyboard to move to the next field.
14. The default **Own & Recipient References** as well as the **Abbreviated Names** can be changed in the applicable fields, where necessary. **Note!** Please ensure that the **Recipient References** are compliant with the requirements prescribed by PASA and that your Abbreviated Name(s) match those loaded on FNB's systems.
15. Click on **Save** to save the information captured on the current page. Click on **Save and Exit** to save the Collection in a Work In Progress status and return to the Collections landing page. Click on **Submit** to submit the Collection for authorisation by a User with the necessary authorisation permissions. Click on **Clear Amounts** if you want to recapture the amounts again and **Cancel** if you no longer want to continue the collection batch.

Once Submitted, the Collection will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

A **Print Preview** page will automatically display the Details of the payment batch; this can be printed or downloaded.

Note: Collections cannot be processed to recipients who bank in another country (Namibia, Swaziland and Lesotho) when there are Public holidays. These collections will be rejected.

7.2.2 Import Collections

Use this function to import a Collection File which has been off-line from an Excel (.CSV) spreadsheet, or you can use the Bankserv (.txt) or ISO 20022 PAIN file directly from your own accounting package.

Select the help icon **"?"** at the top of your screen. Scroll down to **File Formats and Online Templates** and select the relevant File format and/or CSV Collection spreadsheet.

The import function is very useful when your collections batches contain a large number of recipients.

1. Select the **Collections** tab.
2. Click on the **+Add** action button on the right and select **Import**.

Add the Batch Header Details:

3. Select the **File Type** from the drop down list, either BankServ (ACB), CSV or ISO 20022 PAIN.
4. Type the name of the Collection in the **Name** field.
5. Select your **Statement Entry as follows**:

    - If you want to have each Collection amount itemised on your bank statement Tick the **Itemised** tick box.
    - If you want the total Collection amount to reflect as one entry on your bank statement. Tick the **Consolidated** tick box. **Note**: If you select the Consolidated option and the total collection amount exceeds the settlement limit when processed, the whole collection will fail. If you select the Itemised option, the collection items will be processed until the limit is reached and only those items exceeding the limit will fail.

6. Select the **Service type** from the dropdown list.
7. The **Own Reference** is mandatory if you have selected the Consolidated Statement Entry and will be the reference for the collections on your bank statement.
8. Select the folder from which payments must be made from the dropdown list in the **Folder** field or select **Once-Off**. The list of folders is restricted to those linked to accounts for which you can capture payments.

    - If you are importing a **Once-Off** collection batch and want to save the recipients details to a folder, click on the **Save Recipient Folder** checkbox. You will have the option to select if you want to save the recipients to an **Existing** Folder or to create a **New Folde**r. Select the Folder Name from the dropdown list if you have chosen to save the recipients to an existing folder. Note: If you have chosen to add the Once-Off recipient to an existing folder, the recipient's daily limit and number of collections per day will be saved as unlimited.

Note!
You can view the **cut-off times** for the various service types as well as information when the Collections will be posted, and when debited to the recipients by clicking on the cut-off times hyperlink.

9. Click on **Continue**.

Add Import Details:

10. You have the option to **Ignore Invalid Items**. If you check the **Ignore Invalid Items** check box. The batch will be created using only the valid items found in the import file. If you **do not check the Ignore Invalid Items** check box. The batch will NOT be created if any invalid items are found in the import file.
11. Click on **Browse** and select the file that must be imported.
12. Select the Inbox button to receive the results file in your **Inbox** or alternatively click on the **Email** button to receive the results file via email. If you selected email, then complete the relevant address fields.
13. Select the **Format** from the dropdown and click on **Continue**.
14. Click on **Finish**.

7.2.3 Copy a Collection

Use this function to copy the details of an existing collection, such as the recipients, to a new collection. You can then make any changes, if necessary, such as deleting or adding recipients.

1. Select the **Collections** tab.
2. Select a Collection you want to copy and click on the **Copy** action button next to the relevant collection batch or click on **Menu** for more options, select **Copy Collection** and select the Collection batch you want to copy by clicking on the collection name hyperlink.

Add the Batch Header Details:

3. Type a description of the Collection in the **Name** field.
4. The **Account number** field will be displayed depending on:

    - If the **Allow Override** indicator for the selected folder has been set to **'Yes'** The Account can be selected from a dropdown list (restricted to those accounts for which you can capture Collections).
    - If the **Allow Override** indicator for the selected folder has been set to **'No'** the Account displayed is the default account set for the folder and cannot be changed.

5. The **Action date** is the date on which you want the Collection to be processed. Collections can be future dated up to 365 days in advance.
6. Select your **Statement Entry** as follows:

    - If you want to have each Collection amount itemised on your bank statement Tick the **Itemised** tick box.
    - If you want the total Collection amount to reflect as one entry on your bank statement. Tick the **Consolidated** tick box. Note: If you select the Consolidated option and the total collection amount exceeds the settlement limit when processed, the whole collection will fail. If you select the Itemised option, the collection items will be processed until the limit is reached and only those items exceeding the limit will fail.

7. Select the **Service type** from the dropdown list.
8. The **Own Reference** is mandatory if you have selected the Consolidated Statement Entry and will be the reference for the collections on your bank statement.

Note!
You can view the **cut-off times** for the various service types as well as information when the Collections will be posted, and when debited to the recipients by clicking on the cut-off times hyperlink.

9. Click on **Continue**.

The Recipient Details:

10. The recipients' details and references will copy exactly from the copied Collection, but can be changed.
11. The **Amount** can be changed for any or all of the recipients. Clicking on **Clear Amounts** will clear all the amount fields, allowing you to enter new amounts.

12. Click on **Next** to proceed to the next page of recipients and enter amounts, if required. Repeat this step until all the amounts have been captured. Click on **Save** to save the information captured on the current page. Click on **Submit** to submit the Collection for authorisation by a User with the necessary authorisation permissions.

Once Submitted, the Collection will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

A **Print Preview** page will automatically display the Details of the payment batch; this can be printed or downloaded.

Collections cannot be processed to recipients who bank in another country (Namibia, Swaziland and Lesotho) when there are Public holidays. These collections will be rejected.

7.2.4 Copy a Failed Collection

Use this function to copy the details of a collection which has a status of "Partially Processed", "Updating Status", "Dated Service - Partially Processed" or 'In Tracking – Partially Processed' status.". You can then make any changes, if necessary, such as adding or deleting recipients.

1. Select the **Collections** Tab.
2. Click on **Menu** for more options, select **Copy Failed Collection** and select the collection batch you want to copy by clicking on the name hyperlink.

Add the Batch Header Details:

3. Type a description of the Collection in the **Name** field.
4. The **Account number** field will be displayed depending on:

    - If the **Allow Override** indicator for the selected folder has been set to **'Yes'** The Account can be selected from a dropdown list (restricted to those accounts for which you can capture Collections).
    - If the **Allow Override** indicator for the selected folder has been set to **'No'** the Account displayed is the default account set for the folder and cannot be changed.

5. The **Action date** is the date on which you want the Collection to be processed. Collections can be future dated up to 365 days in advance.
6. Select your **Statement Entry** as follows:

    - If you want to have each Collection amount itemised on your bank statement Tick the **Itemised** tick box.
    - If you want the total Collection amount to reflect as one entry on your bank statement. Tick the **Consolidated** tick box. Note: If you select the Consolidated option and the total collection amount exceeds the settlement limit when processed, the whole collection will fail. If you select the Itemised option, the collection items will be processed until the limit is reached and only those items exceeding the limit will fail.

7. Select the **Service type** from the dropdown list.
8. The **Own Reference** is mandatory if you have selected the Consolidated Statement Entry and will be the reference for the collections on your bank statement.

Note!

You can view the **cut-off times** for the various service types as well as information when the Collections will be posted, and when debited to the recipients by clicking on the cut-off times hyperlink.

9. Click on **Continue**.

The Recipient Details:

10. The recipients' details and references will copy exactly from the copied Collection, but can be changed.
11. The **Amount** can be changed for any or all of the recipients. Clicking on **Clear Amounts** will clear all the amount fields, allowing you to enter new amounts.
12. Click on **Next** to proceed to the next page of recipients and enter amounts, if required. Repeat this step until all the amounts have been captured. Click on **Save** to save the information captured on the current page. Click on **Submit** to submit the Collection for authorisation by a User with the necessary authorisation permissions.

Once Submitted, the Collection will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

A **Print Preview** page will automatically display the Details of the payment batch; this can be printed or downloaded.

Collections cannot be processed to recipients who bank in another country (Namibia, Swaziland and Lesotho) when there are Public holidays. These collections will be rejected.

7.2.5 Create a Once-Off Collection

Use this function to create a once-off collection. This type of collection is used to collect funds from recipients who you do not collect from regularly.

1. Select the **Collections** tab.
2. Click on the **+Add** action button on the right and select **Once-Off**.

Add the Batch Header Details:

3. Type a description of the Collection in the **Name** field.
4. Select the **Account** which must be credited with the Collection amount from the dropdown list. The list of accounts in the dropdown is restricted to those containing accounts for which you can capture Once-Off Collections.
5. The **Action date** is the date on which you want the Collection to be processed. Collections can be future dated up to 365 days in advance.
6. Select your **Statement Entry as follows**:

    - If you want to have each Collection amount itemised on your bank statement Tick the **Itemised** tick box.
    - If you want the total Collection amount to reflect as one entry on your bank statement. Tick the **Consolidated** tick box. **Note**: If you select the Consolidated option and the total collection amount exceeds the settlement limit when processed, the whole collection will fail. If you select the Itemised option, the collection items will be processed until the limit is reached and only those items exceeding the limit will fail.

7. Select the **Service type** from the dropdown list.

8. The **Own Reference** is mandatory if you have selected the Consolidated Statement Entry and will be the reference for the collections on your bank statement.
9. Click on **Yes** if you want to **Save the recipient to a Folder**. The saved Once-Off recipient's daily limit and number of collection per day will be defaulted to unlimited. Select Existing Folder to save the account to an **Existing Folder** or select **New Folder** to save the account to a New Folder.

Note!
You can view the **cut-off times** for the various service types as well as information when the Collections will be posted, and when debited to the recipients by clicking on the cut-off times hyperlink.

10. Click on **Continue**.

Add Recipient Details:

11. Enter the Recipient **name** in the Recipient field.
12. Enter the recipient's **Account Number**.
13. Select the **Bank Name** from the **Choose Bank** list or enter a valid **Branch Code.** If you enter a valid Branch Code, the system will automatically derive the bank name.

    - If the bank selected only has one branch/head office, the system will automatically display that **branch code** on the screen.
    - If the bank selected does not have a specific default branch code, the system will display the branch **search** functionality. **Note**. Click on the "more' option to activate the branch search functionality.

14. Select the **Account Type** from the drop down list.
15. Enter the reference that you want to appear on your bank statement in the **Own Reference field.** This field is mandatory.
16. Enter the **Recipient Reference** that you want to appear on the recipient's bank statement. This is a mandatory field which must be compliant with the requirements prescribed by PASA.
17. Enter the **Abbreviated Name** that you want to appear on the recipient's bank statement. This is a mandatory field which must be compliant with the requirements prescribed by PASA and match the Abbreviated name(s) loaded on FNB's systems.
18. Enter the **Amount** that you want to collect from the recipient.
19. Click on **Add More** to save the Collection and add another recipient. Click on **Save and Exit** to save the Collection.
20. Click on **Submit** to submit the Collection for authorisation.

Once Submitted, the Collection will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

A **Print Preview** page will automatically display the Details of the payment batch, this can be printed or downloaded.

7.3 Maintain a Collection

Use this function to make changes to the recipient details of an existing collection.

1. Select the **Collections** tab.
2. Select a Collection you want to maintain and click on the **Maintain** action button next to the relevant collection batch name.
3. Click on **Batch Header** sub tab if you want to edit the Collection Name, Folder, Action Date, Statement Entry, Service Type, User Codes (if you have multiple user codes linked to your Online Banking Enterprise ™ profile and Own Reference.
4. Click on the **Recipient Details** sub tab if you want to edit the recipient details. You are able to modify the Own Reference, Recipient Reference and Amount field.
5. Click on **Save** to save what you have captured on the current page. Click on **Save and Exit** to save the collection in a Work In Progress status and return to the Collection landing page. Click on **Submit** to submit the collection for authorisation to an Authoriser.

Once Submitted, the Collection will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

A **Print Preview** page will automatically display the Details of the payment batch; this can be printed or downloaded.

7.4 Delete Collections

Use this function to delete any existing collections which are no longer required.

1. Select the **Collections** tab.
2. Select one or more collections you want to delete by ticking the tick box next to the Collection batches.
3. Click on **Delete**.
4. Click on **OK** to confirm deletion of the Collection.
5. After clicking on OK, the Collection(s) will removed and the Collections landing page will be refreshed.

7.5 Search Collections

Use this function to search for existing collections according to the criteria you have entered.

1. Select the **Collections** tab.
2. Select the **Search** action button on the right
3. Enter the Collection search criteria, such as: **Name, Account, Collection Total From, Collection Total To, Status, Folder and Action date**.
4. The Search Results page will display the information requested.

You can download or print the page for your records.

7.6 Collections Instructions

Use this function to Submit, Authorise, Reject, De-authorise and Reprocess Collections.

7.6.1 Submit a Collection

Use this function to submit a collection for authorisation by a User with the necessary authorisation permissions. Users that have capture permission, but no authorisation permission will use the Submit option.

1. Select the **Collections** tab.
2. Select the **Submit** easy button next to the collection **Name** that you want to submit for authorisation.
3. The status of the Collection will change from Work in Progress to Authorisation Requested.

The Collection is now ready to be **authorised**.

or

1. Select the **Collections** tab.
2. Click on **Menu** for more options, select the **Submit Collection** Instruction and select the Collection that you want to submit for authorisation by clicking on the name hyperlink.
3. The status of the collection will change from Work in Progress to Authorisation Requested.

The collection is now ready to be **authorised**.

7.6.2 Authorise a Collection

Use this function to authorise collections which have been created or amended.

1. Select the **Collections** tab and change the viewing option to **Authorisation Needed** by clicking this option on the top of the page.
2. Select one or more collections by clicking the check box next to the collection **Name** that you want to authorise.
3. Click on **Authorise** to proceed with the authorisation process.
4. Once completed, an authorisation **result page** will be displayed.
5. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

or

1. Select the **Collections** tab.
2. Click on **Menu** for more options, select the **Authorise Collection** Instruction and select the Collection that you want to authorise.
3. Click on **Authorise** to proceed with the authorisation process.
4. Once completed, an authorisation **result page** will be displayed.
5. Click on **Finish**.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

The status of the collection(s) will change from either Authorisation Requested or Partially Authorised to Fully Processed, which means that the collection(s) was made successfully. Where there are collections in the batch that have not been successfully processed, the final status of the batch will be Partially Processed.

7.6.3 Reject a Collection

Use this function to reject a collection or several collections submitted for authorisation. The collection will return to the work in progress status and will have to be re-submitted for authorisation.

1. Select the **Collections** tab.
2. Click on **Menu** for more options, select the **Reject Collection** Instruction and select one or more collections by clicking the check box next to the collection **Name** that you want to reject.
3. Click on **Reject**.
4. A screen will display with all the selected rejections, **Reject** and **Cancel** buttons will be present at the bottom of the page.
5. Enter a description in the **Reason** field with a comment or reason for rejecting the collection batch. **Note. This allows you to capture approximately 100 characters. If your site profile setting is set to receive a 'reject notification', the system will automatically send a 'reject notification' to the user that submitted the batch for processing, advising the user that the batch has been rejected by the authoriser.**
6. Click on **Reject**.

or

1. Select the **Collections** tab and change the viewing option to **Authorisation Needed** by clicking this option on the top of the page.
2. Select the **Reject** easy button next to the collection **Name** that you want to reject.
3. Enter a description in the **Reason** field with a comment or reason for rejecting the collection batch. **Note. This allows you to capture approximately 100 characters. If your site profile setting is set to receive a 'reject notification', the system will automatically send a 'reject notification' to the user that submitted the batch for processing, advising the user that the batch has been rejected by the authoriser.**
4. Click on **Reject**.

Notes:

- Rejecting an authorisation will change the status of any rejected items from Authorisation Requested to Work In Progress.
- When rejecting collection batches with more than 1000 collections, the status will change to Updating Status whilst the authorisation process is taking place. This will allow the User to continue with other functions on Online Banking Enterprise ™. The final status of the rejected batch will be Work In Progress which can then be maintained.
- If you capture a 'reason' in the optional 'reason field', the system will then display the 'reason' for rejecting the batch or instruction on all pages where the Authorisation Audit Trail is displayed.

7.6.4 De-Authorise a Collection

Use this function to cancel the "authorised" status of a collection.

1. Select the **Collections** tab.
2. Click on **Menu** for more options, select the **De-Authorise Collection** Instruction and select one or more collections by clicking the check box next to the collection **Name** that you want to de-Authorise.
3. Click on **Confirm**.
4. The collection is now in a **Work in Progress** status.

When De-authorising collection batches with more than 1000 collections, the status will change to Updating Status whilst the authorisation process is taking place. This will allow the User to continue with other functions on Online Banking Enterprise ™. The final status of the rejected batch will be Work In Progress which can then be maintained.

7.6.5 Reprocess a Collection

Use this function to re-submit a collection for processing if the transfer failed as a result of insufficient funds.

1. Select the **Collections** tab.
2. Click on **Menu** for more options, select the **Reprocess Collection** Instruction and select one or more collections by clicking the check box next to the collection **Name** that you want to reprocess.
3. Click on Confirm.

Only collections with a ‘Funds unavailable’ status can be reprocessed. Administrators and Users who have authorisation permissions can use the Reprocess Collections option.

7.7 Recipient Collections

Use this function to Save or Search Recipients.

Save Recipients

Use this function to save the recipient account details to an existing folder or a new folder.

1. Select the **Collections** tab.
2. Click on **Menu** for more options, select **Save Recipient** and select the collection name you want to save by clicking on the collection name hyperlink.
3. Select the folder from the dropdown list if you want the Recipients to be added to an **Existing Folder** or type in a **Folder Name** and complete the relevant details if you want to create a new folder. The saved Once-Off recipient's daily limit and number of payments per day will be defaulted to unlimited.
4. Click on **Save and Exit**.

Search Collection Recipients

Use this function to perform a search for recipients across all folders and once off collections.

1. Select the **Collections** tab.
2. Click on **Menu** for more options and click on **Search**.
3. You are able to search by completing one or more of the following fields: **Recipient Name, From and To Date, From** and **To Amount, From** and **To Account** and **select Folders** or **Once off Payment.**
4. Click on **Search**.
5. The Search Results page will display the information requested. **Note.** Click on the hyperlink if you want to 'drill-down" into the detail.
6. You can download or print the page for your records.

Notes:

- Users will be able to do search on all the folders and once off collections for accounts that the User has permission on.

  If the Administrators has enabled the "**Search Recipients Across Batches**" setting on the **User Permissions** sub-tab for the user, the user will also be able to do a search on all folders and once off collections for all accounts, even for those accounts that the user does not have permissions on.

- The Search is based on the number of retention days for collections batches as per your site profile settings.
- Please refer to your pricing guide to confirm the cost associated for using this function.

7.8 eZiCollect

Use this function to quickly and easily collect funds from Recipients. Recipients are people or companies that you want to collect money from.

eZiCollect Single

Use this function to collect from a single recipient from a selected folder.

1. Select the **Collections** tab.
2. Click on **Menu** for more options and select **eZiCollect Single**.
3. Enter a valid description in the **Name** field.
4. Select a **Date** for your collection.
5. Select the **Folder** from which you want to make the collection.
6. Select the **Account** from which you want to make the collection, if this field is accessible.
7. Select the **Recipient** to be debited from the list of recipients.
8. Type in the **Amount** of the collection.
9. Click on **Submit**.

Once Submitted, the collection will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

A **Print Preview** page will automatically display the Details of the collection batch; this can be printed or downloaded.

eZiCollect Multiple

Use this function to collect multiple recipients from a selected folder.

1. Select the **Collections** tab.
2. Click on **Menu** for more options and select **eZiCollect Multiple**.
3. Enter a valid description in the **Name** field.
4. Select a **Date** for your collection.
5. Select the **Folder** from which you want to make the collection.
6. Select the **Account** from which you want to make the collection, if this field is accessible.
7. Select the **Recipient** to be debited from the list of recipients.
8. Enter an **Own** and **Recipient Reference** for each recipient.
9. Type in the **Amount** of each collection.
10. Click on **Submit**.

Once Submitted, the collection will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

A **Print Preview** page will automatically display the Details of the collection batch; this can be printed or downloaded.

eZiCollect Once Off

Use this function to create a Once-Off collection for a recipient that you do not collect on a regular basis.

1. **S**elect the **Collections** tab.
2. Click on **Menu** for more options and select **eZiCollect Once-Off**.
3. Enter a valid description in the **Name** field.
4. Select a **Date** for your collection.
5. Select the **Account** from which you want to make the collection, if this field is accessible.

Add recipient Details:

6. Enter the **Recipient Name**.
7. Enter the recipient's **Account Number**.
8. Select the **Bank Name** from the **Choose Bank** list or enter a valid **Branch Code.** If you enter a valid Branch Code, the system will automatically derive the bank name.
   - If the bank selected only has one branch/head office, the system will automatically display that **branch code** on the screen.
   - If the bank selected does not have a specific default branch code, the system will display the branch **search** functionality. **Note**. Click on the "more' option to activate the branch search functionality.
9. Select the **Account Type** from the drop down list.
10. Enter **Own** reference, this is the reference that will be used on your bank statement.
11. Enter **Recipient** reference, this reference will be used on the recipient's bank statement.
12. Enter an **Amount** that you want to collect to the Recipient.
13. Click on **Submit**.

Once Submitted, the collection will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

A **Print Preview** page will automatically display the Details of the collection batch; this can be printed or downloaded.

7.9 Archived Collections

Use this function to restore collection batches which have passed the archive period defined on your site profile as well as those batches that were deleted within the last five years.

1. Select the **Collections** tab.
2. Select the **Archived** sub tab.
3. All the deleted and archived collection batches are displayed.
4. Select one or more collection **batch(es)** by clicking in the check box next to the collection name and click on **Restore**.
5. The selected restored batch is displayed. Click on **Confirm**. Click on **Cancel** if you do not want to restore the batch.

The Collections displayed here are those which have passed the archive period defined on your site profile as well as those batches that were deleted within the last five years.

The Collections will be restored as Once-Off collections if the overnight process is successful. All successfully restored batches will remain on the Collections tab until archived again based on your Site Profile archiving setting.

Note: The Execution date on Archived Collections will temporarily default to 2000-01-01 00:00. For reference purposes, please re-check the original execution date.

7.10 Collection Reports

You can generate Collection Reports to assist you with managing your debtors' book.

Users who have either Authoriser or Capturer permissions for Collections, will be able to access the following Reports via the Business Solutions Tab:

- Unpaids
- Redirects
- Unpaids and Redirects
- Collection Preview (Simple)
- Collection Preview (Detailed)

To view and export these reports, simply follow the guidelines listed below:

1. Click on the **Business Solutions** tab and select the **Reports** icon.
2. The landing page is divided into the following 3 sections: Popular Reports, Other Reports and the Event Log Search.
3. Select the **Report type** by clicking on the relevant hyperlink option.
4. Complete the required fields for the Report you require and click on **View** or **Export**.

7.11 Scheduled Exports

You can create Scheduled Exports for the available Collection Reports to assist you with managing your debtors' book.

- Reports only go back to the last 10 days so it would be beneficial to client to set up scheduled exports

Automate delivery of the Collection transactions by creating Scheduled exports:

- Delivery directly to an email address
- Selected format of choice
- Frequency of choice
- The option to deliver the reports in such a way that your Line of Business application can access the reports without human interaction.

How to view, create, maintain or delete your Collection scheduled exports.

1. Click on the **Business Solutions** tab and select the **Reports** icon.
2. The landing page is divided into the following 3 sections: Popular Reports, Other Reports and the Event Log Search.
3. Click on **Menu** for more options and select the relevant **Payment** or **Collections Scheduled Exports** option.
4. A list of all you existing scheduled exports will be displayed on the page.

- To **View** an export - click on the Scheduled Export **Name hyperlink**.
- To **Create** a new Export - click on **Menu** for more options and select the relevant **Payment** or **Collections Create Exports** option. Click on the **+Add** easy action and complete the required details, the Report Delivery options, Format, Frequency and click on **Save & Exit**. Scheduled Exports are created at user level. No authorisation is required as only exports for accounts to which the user has permission are allowed.
- To **Maintain** an export - click on the **Maintain** easy action button next to the scheduled export you want to modify. **Note**: It is possible to edit the format and email address.
- To **Delete** an export, select the check box next to one or more scheduled export(s) you want to delete and click on **Delete**.

7.12 NAEDO

NAEDO was enforced by PASA (Payments Association of South Africa - www.pasa.org.za) to address the need to lower the ratio of unsuccessful collections and to minimize high levels of return debit fees. NAEDO is preferential in that debit order collections coincide as closely as possible with credits to a bank account (e.g. salaries, wages)

NAEDO has a tracking or response facility that allows your company to 'monitor' an account against which a collection instruction has been presented and to collect the required amount as soon as funds enter that account.

Debit orders are processed on a randomised basis ensuring equal and fair opportunity to recover payments. No participating bank or service provider is given priority.

NAEDO is non-authenticated. This means that the customer permits your company to collect payment from their accounts by signing a mandate.

NAEDO transactions are subject to a maximum item limit of R30 000.00 and apply to transactions performed within South Africa only.

In order to use NAEDO your company must be a member of the Payment System Stakeholder Forum (PSSF) www.pssf.org.za. The function of this association is to ensure that NAEDO users adhere to stipulated standards. The current list of associations for which NAEDO users must hold membership prior to bank's accepting EDO payment instructions are:

- Association of Investments, Savings and Assurance (SAISA)
- Banking Association South Africa
- Commercial Independent Bureaux Association (CIBA)
- EDO Service Providers Association (eSPA)
- Micro Finance South Africa (MFSA)

NAEDO users must also comply with the following rules and legislative acts in accordance with their line of business.

- NPS Acts.
- Code of Banking Practice.
- Microlender regulations.
- Debt collectors Act.

Mandates

A mandate is the written and signed authority that a customer signs, allowing your company to collect funds from their account by means of a debit order. The mandate contains specific information relating to the collection.

A mandate loses its validity when:

- The customer issues a stop payment.
- The customer directly instructs your company to cancel the mandate.
- Your company terminates services with the customer.
- A debit order transaction against an account is unsuccessful for four consecutive months.
- The conditions of the mandate change.
- The customer's account has been closed.

You must ensure that you have a correct and legal mandate from your customer to use NAEDO and must produce an auditor's certificate confirming the existence and compliance of mandates.

Randomising

Randomising is the process of ensuring that NAEDO payment instructions collect from or track accounts in a random order. This ensures that no one NAEDO collection or tracking instruction has priority over another.

All transactions are re-randomised each time they are presented – including transactions in tracking.

Tracking

NAEDO's tracking facility allows your company to track an account from which funds could not be collected. By tracking the account over a specified period of time, the system is able to detect when the account is credited and then make the required collection.

A NAEDO debit order can be marked to track a customer's account from a minimum of one day through to a maximum of 32 days.

Tracking takes place 24/7 and include Sundays and Public Holidays and is done on calender days for banks that do tracking.

You are able to Track transactions for a specified number of days which is specified when capturing the batch or defined in the CSV or Bankserv (ACB) imported file. The table below indicates how your tracking requirements should be indicated:

The tracking codes (known as entry class codes), as they appear in the response file, and the number of days (entry class description) they represent are as follows:

Number of Tracking days	Bankserv (ACB) Import File	Manual Capture and CSV Import file
No Tracking	12	0
1 Day Tracking (on action date)	13	1
2 Day Tracking (on action date & 1 calendar day)	01	2
3 Day Tracking (on action date & 2 calendar days)	14	3
4 Day Tracking (on action date & 3 calendar days)	02	4
5 Day Tracking (on action date & 4 calendar days)	03	5
6 Day Tracking (on action date & 5 calendar days)	04	6
7 Day Tracking (on action date & 6 calendar days)	15	7
8 Day Tracking (on action date & 7 calendar days)	05	8
9 Day Tracking (on action date & 8 calendar days)	06	9
10 Day Tracking (on action date & 9 calendar days)	07	10
14 Day Tracking (on action date & 13 calendar days)	16	14
21 Day Tracking (on action date & 20 calendar days)	17	21
32 Day Tracking (on action date & 31 calendar days)	18	32

Response Files

Response Files are created at: 06h00, 07h00, 09h00, 11h00, 14h00, 17h00 and 21h00 Monday to Saturday excluding Sundays.

The Response File reports on all collection requests, be they immediately successful, unsuccessful or have gone into tracking.

The Response File will report on both successful and unsuccessful (where tracking has expired) items that are in Tracking.

Tracking must be monitored until there is a final response on the transaction, i.e. that it is successful or unsuccessful.

Response Codes	Response Code Description
00	Transaction Successful
99	Held for re-presentment
02	Not provided for
03	Debits not allowed to this account
04	Payment stopped by Account Holder
05	Dormant Account
06	Account frozen
08	Account In Liquidation
10	Account in sequestration
12	Account closed
18	Account holder deceased
22	Account effects not cleared
26	No Such Account
40	Item Limit Exceeded
42	AEDO MAC Verification Failure
44	Unable to Process
46	Account in Advance
48	Account Number Fails CDV Routine
56	Not FICA compliant
E1	Payment Stopped - NAEDO
E4	Dormant Account
E8	Successful Recall
E9	Unsuccessful Recall
W0	Waiting to be posted
F1	Transaction Duplicated (Used by FNB Only)
F2	Transaction Disputed by account holder (Used by BankServ & FNB when there is a dis

General Information

As an FNB sponsored collector, you are required to adhere to the FRB NAEDO Terms of Use.

Please download the document for more guidelines on Unpaid, Disputes and requirements for Mandates.

This option will only be available if there is a NAEDO User Code(s) linked to your Online Banking Enterprise ™ profile.

Debit orders are processed on a randomised basis ensuring equal and fair opportunity to recover payments, no bank or service provider is given priority.

- Your account will be credited on the action date with the value of all successful collections.
- Your action date is the SAME date as the date on which you would like your recipients to be debited.

The NAEDO collection batch must be captured AND authorised at least 1 day prior to the action date.

NAEDO has a tracking or response facility that allows your company to ‘monitor’ an account against which a collection instruction has been presented and to collect the required amount as soon as funds enter that account.

- A NAEDO debit order can be marked to track a customer's account from a minimum of one day through to a maximum of 32 days.
- Tracking takes place 24/7 and include Sundays and Public Holidays and is done on calender days for banks that do tracking.

NAEDO Cut-Off Times

Service	NAEDO
Submission	You are able to submit files 365 days before action date
Online Banking Account Credited	Only when collection is successful
Monday to Friday cut-off time	16h00
Saturday cut-off time	Can submit a batch however, the batch will only be processed for action date Monday.
Sundays	10h00. Action date Monday.
Item Limit	No item can exceed R30 000
Aggregate Limit	All NAEDO collections will be processed against your Aggregate limit.

NAEDO batches submitted after cut-off time will be rejected as there is NO Autobump facility.

NAEDO Collections CANNOT be processed to Credit Cards, Homeloans and Public Recipients.

NAEDO transactions cannot be duplicated. Online Banking Enterprise ™ will check for duplicates and validate that the same account does not appear more than once in a captured or imported NAEDO batch. If a transaction is duplicated, the following message will be displayed "NAEDO transaction duplicated for recipient "x" and "y". For imported batches, the import results file will contain "Duplicate NAEDO Transactions are not allowed".

Partial collections are not allowed.

7.13 DebiCheck

The South African collections environment has been under scrutiny for some years, with calls for review and reform from multiple stakeholders to address problem areas.

Symptoms of these problem areas include the alarming levels of unpaid and/or disputes associated with Early debit orders (EDO).

With this in mind, the introduction of DebiCheck, a new collection stream requiring collectors to submit mandates to customers for authentication.

What is DebiCheck?

- A new collection stream requiring collectors to submit mandates to customers for authentication.
- Debtors are required to authenticate the mandate on their preferred banking channel i.e. internet banking, FNB app, ATM, etc.
- Once approved, all debits submitted will be verified against the registered mandate before being processed.

DebiCheck aims to address much more than just debit order abuse, it is believed to be enhancing the safety and efficiency of the system in a substantial way.

Two of the envisaged outcomes are to reduce the amount of unauthorised debit orders being processed by companies as well as consumer disputes being processed with 'no authority to debit'.

Please note that this option will only be available if the DebiCheck module has been linked to your Online Banking Enterprise™ profile.

How does DebiCheck work?

The DebiCheck process can be broken down into 3 primary areas: Pre-Collection, Collection and Post-Collection.

Pre-Collection	**Step 1 – Creditor: Submit the Mandate** A creditor (collector) such as an insurance company, gym or a micro lender will create a mandate on their Online Banking Enterprise™ profile based on rules and fields predefined by Industry. They will have the option of capturing debit order mandates online or could use a spreadsheet format to import multiple mandates, enabling their operation to become more efficient. There are three types of Mandates (Fixed, Variable and Usage Based) you will be able to submit and manage through Online Banking Enterprise™ and we allow for different ways in which you can initiate and register a mandate (i.e. Real-time, Batch and Pre-authorised).

	Step 2 – Debtor: Accept/Reject the Mandate Once the creditor has successfully submitted the Mandate request, the system will send the DebiCheck mandate to the debtor (the consumer or business client) who can accept or reject the mandate at a FNB branch or digitally by using any one of our channels: • ATM; • Cellphone Banking; • Banking App; • Online Mobile; • Online Banking or; • Online Banking Enterprise™ profile. **The creditor will also be able to perform the following Mandate Management via their Online Banking Enterprise™ profile:** • **Amend Mandate** - making updates (for example adjust the amounts, the tracking facility) to an existing mandate; Changes made to the mandate must then be re-submitted to the debtor for re-approval. • **Cancel Mandate** – where changes in the contractual relationship between the creditor and the debtor could require the cancellation of the electronic mandate stored in the mandate register prior to maturity and/or the creditor no longer needs to collect payments from the debtor for the remainder of their original mandated period or the creditor and debtor come to a mutual agreement to no longer proceed with a particular service being provided or the account is closed.
Collection	**Step 3 – Creditor: Submit the Debit Order Request** Once the debtor has accepted the mandate, the creditor will be advised digitally. The creditor will only then be allowed to process the linked financial collection attached to the mandate (i.e. the actual debit order) against the account specified by the debtor for the service/product being provided with less chance of these debit orders being returned back to them as dispute transactions. **Collections are done as per normal via Online Banking Enterprise™:** • From Folder Collection • Once-off Collection • Import Collections (CSV spreadsheet provided)
Post - Collection	**Stop Payments** Should the debtor initiate a Stop Payment, it stops all future and current unprocessed payments at their paying bank, including transactions that are in tracking.

	The result of the stop payment will effect a suspension of the mandate i.e. no future payment instructions can be processed. **Note**: No payment instructions can be processed against a mandate that has a stop payment logged against it. **Disputes** The Debtor will be given the right to dispute transactions relating to the following: • Amount – collection amount is not in line with mandate • Date – collection date is not in line with mandate • Contract – contract expired but creditor is still debiting the debtor Transactions that are disputed within 40 days of the debit collection processed will be reversed immediately if the dispute is found to be legitimate; and transactions disputed over 40 days of the debit collection processed can have a processing delay of a maximum of two days (as per bank's internal production system or as per recovering transaction records that have been archived).

Types of DebiCheck Mandates

A mandate is the authorisation given by the debtor (recipient) allowing a creditor (user) to initiate a payment instruction against the account of the Debtor (recipient).

This mandate must be electronic and stored at the paying bank (recipient bank) for validation of all DebiCheck transactions.

Any mandate initiated will have its own mandate reference number that is generated by the debtor banks once a mandate is accepted by the debtor (recipient) a mandate reference number is generated by the debtor bank (recipient bank) and stored on the mandates register.

- No mandate reference number will be generated if the mandate request is rejected.

This reference number will be sent to the creditor (user) via their bank and must be used for any future payment initiation instructions, mandate amendments and mandate cancellations going forward as validation will be made on this unique reference number.

Debtors (recipients) must also use this reference number for any post payment instructions such as disputes and stop payments.

There are three types of Mandates you will be able to submit and manage mandates through Online Banking Enterprise™:

Fixed Mandate:

Fixed mandate is used for contracts where one or more upfront calculated instalment amount is the basis for normal collection.

- This includes the maximum instalment amount used during re-presentment to cater for late payment and arrear interest calculations.
- The calculated Instalment amount due and maximum instalment amount is known and authenticated by the debtor.

- The maximum amount is the same as the amount that can be collected as arrears and must reflect as arrears. This means that two amounts can therefore be collected in a cycle – instalment and arrears.

Variable Mandate:

Variable mandate is used for contracts with amounts due per collection that can be amended by the user in relation to variables which are known and authenticated by the debtor e.g. annual increases, loans with variable interest rates.

Usage Mandate

Usage based is used for contracts that have an amount due to the value of a maximum amount that can be collected by the user (creditor).

- This maximum amount is known and authenticated by the debtor.
- A minimum amount to be collected may also be known and authenticated by the debtor. An example would include a collection that is defined by the debtors' usage of a service during a payment cycle e.g. a cell phone contract. In such cases, the exact monthly instalment amount may not be known upfront.

DebiCheck Mandate Registration Types

There are also different ways in which you can initiate and register a mandate (i.e. Real-time, Batch and Pre-authorised).

Only one mandate type will be permitted per mandate initiation request sent by the creditor to the bank for authorisation. Every paying bank participating in DebiCheck will be required to cater for these transaction types at a minimum.

Type of Mandates Table:

Real-Time mandate request	**Extended Response mandate request**	**Pre-authorised mandate Request**
If your business needs to confirm the authentication of the mandate immediately, it can be submitted in real-time. You will be able to send the mandate between 03:00 and 18:45 on Monday to Friday and 03:00 and 18:00 on Saturday. Your client (the Debtor) will receive an SMS within minutes after your submission and will have to respond on the same day by 22:00 on Monday to Friday and by 19:00 on Saturday. They have up to 12 hours in which to acknowledge the mandate. If they do not respond at all by the	If you do not need a real-time response back and you have multiple mandates you would like to submit. You can submit the mandates via batch submission between 03h00 and 18:45. Your client (the Debtor) will receive an SMS at 08h00 on next working day (Monday to Saturday) and will have 36 hours in which to acknowledge the mandate. If they do not respond by 19h00 on the second business day the mandate will expire.	If you are using a Card-device to authenticate the Debtor using their Card and PIN as validation, the process must be completed in real time. If Card & PIN validation is positive, the debtor's bank will generate and send back an approval code ("Mandate Authentication Code (MAC)). You can submit the mandate between 03h00 and 19h00 with the required approval code (Mandate Authentication Code (MAC) which will display on your

cut-off time the mandate will expire. ***Examples***: • If the debtor receives a mandate on a Monday at 08h00, they have until 20h00 to respond on that same Monday. • If the debtor receives a mandate on a Saturday at 08h00, they have until 19h00 to respond on that same Saturday. • If the debtor receives a mandate on a Monday at 15h00, they have until 22h00 to respond on that same Monday.	***Example***: If the debtor receives the mandate on a Saturday at 08h00, they have until 19h00 the following Monday to respond.	card authentication device on successful validation of the Card & PIN.

How to allocate DebiCheck Permissions

The DebiCheck Mandates sub-tab will be displayed if the module has been opened by FNB.

The Administrator will need to assign the relevant DebiCheck Account permissions for each user via the Profiles Tab > User Dashboard > Maintain User > Account Permissions sub tab > select DebiCheck Mandates from the dropdown > assign the following DebiCheck Mandate Permissions:

- Folder Permissions: Manage and/or Authorise DebiCheck Folders
- DebiCheck: Capture and/or Authorise DebiCheck

The Administrator will also need to assign the relevant DebiCheck User permissions for each user via the Profiles Tab > User Dashboard > Maintain User > User Permissions sub tab > assign the following DebiCheck Mandate Permissions:

- Create DebiCheck Mandates
- View DebiCheck Mandates

7.13.1 Create a DebiCheck Mandate Online

Use this function to create a single DebiCheck Mandate online.

1. Select the **Recipients** tab and click on the **DebiCheck Mandates** sub tab.
2. If you have any Mandates in place, a list of these as well as the relevant status for each Mandate will be displayed on the page.
3. Select the **+Add button** and click on **Create Mandate**.
4. Complete the **relevant information** required:

    1. Mandate Details
    2. Debtor Details

3. Bank Details
4. Creditors Details

5. Once you have completed all the required information, click on **Save and Exit**.

The system will send an SMS notification to the debtor, alerting them to the fact that there is a new DebiCheck Mandate that they must respond to.

The SMS will read as follows:" ***Debit order has been loaded on your account. Use Banking App, Online Banking, Cellphone Banking, App or our ATM to accept."***

7.13.2 Import Multiple DebiCheck Mandates

Use this function to create multiple DebiCheck Mandates via a file import.

You can download the (.csv) spreadsheet as well as document with guidelines on how to complete the CSV template via our Templates and Form Support Centre by following the step actions listed below:

1. Select the help icon **"?"** at the top of your screen
2. Scroll down to the File Formats and Online Templates section or simply click on the File Formats and Online Templates link provided in the Contents section on the left.
3. Download the relevant CSV template or the file format by clicking on the required links provided in the DebiCheck Mandate section.

How to import multiple DebiCheck Mandates via the CSV file import.

1. Select the **Recipients** tab and click on the **DebiCheck** sub tab.
2. Select the + **Add** action button on the right and select **Import**.
3. Enter the file name and click on **Browse** to locate the file to be imported.
4. You have the option to **Ignore Invalid Items.**

    - If you click the **Yes** check box, the Mandate file will be created containing only valid items.
    - If you click **No**, the Mandate file will NOT be created if there are any invalid items in the import file.

5. Select how you want to receive the results file. You can select to view the import results from your **Inbox** or alternatively select the **Email** button to receive the results file via email. If you selected email, then complete the relevant address fields.
6. Select the **Format** from the dropdown and click on **Continue**.
7. Click on **Finish**. Alternatively click on **Import Again** if the file failed and you would like to import the file again.
8. Check the **Import Results Report**. A Results file will be created and sent to your Online Banking Enterprise™ Inbox. The results of the DebiCheck Mandates will be either **Failed** if the item has failed the creation process or **Successful** if the Mandate was successfully created.

The system will send an SMS notification to the debtor, alerting them to the fact that there is a new DebiCheck Mandate that they must respond to.

The SMS will read as follows:" ***Debit order has been loaded on your account. Use Banking App, Online Banking, Cellphone Banking, App or our ATM to accept."***

7.13.3 Maintain DebiCheck Mandate Details

Use this function to maintain an DebiCheck Mandate.

- You may only cancel Mandates in a Pending, Accepted or Suspended status.

Changes made to the following mandate fields will require co-authorisation from the debtor:

Amounts:

- Threshold amount
- Debit value type

Dates:

- Collection day
- First collection date
- Tracking indicator
- Date adjustment indicator
- Frequency

Debtor Information:

- Debtor account number
- Payer Identification

All other remaining fields will result in automatic amendment as no re-authentication is needed however, the debtor must be notified of the relevant change.

1. Select the **Recipients** tab and click on the **DebiCheck** sub tab.
2. A list of all the DebiCheck Mandates will be displayed on the page.
3. Select the **Maintain** action button next to the DebiCheck Mandate you would like to maintain.
4. Enter the required details and click on **Submit**.

A mandate can be maintained if it is in an Accepted or Suspended status only.

The system will send an SMS notification to the debtor, alerting them to the fact that there is an amended DebiCheck Mandate that they must respond to.

The SMS will read as follows: "***Successful amendment on your debit order. For queries contact your Banker or the number at the back of your Card."***.

7.13.4. Cancel a DebiCheck Mandate

Use this function to cancel a DebiCheck Mandate when you no longer need to collect payments from the debtor for the remainder of their original mandated period or you and debtor come to a mutual agreement to no longer proceed with a particular service being provided or the account is closed.

Notes:

- Cancellation for a mandate can only be submitted between 03:00 to 20:00 Monday to Sunday.
- You may only cancel Mandates in a Pending, Accepted or Suspended status.

1. Select the **Recipients** tab and click on the **DebiCheck** sub tab.
2. A list of all the DebiCheck Mandates will be displayed on the page.
3. Select the **Cancel** action button next to the DebiCheck Mandate you would like to cancel.
4. A confirmation message is displayed. Click on **Yes**. Alternatively click on **No** to cancel the request.
5. If you confirmed the cancellation of the mandate, you will be prompted to select one of the following reasons:

    - Mandate cancelled due to early settlement
    - Contract expired
    - Mandate cancellation due to fraud
    - Cancellation of mandate initiation
    - Cancellation of mandate amendment

6. Click on **Finish**.

The system will send two SMS notifications to the debtor.

The first SMS will be a notification of a request to cancel the mandate:" ***A cancellation of your debit order has been requested."*** and;

The second will be a notification of cancellation of the mandate: "Your ***debit order was successfully cancelled by your service provider. For queries contact your service provider."***.

7.13.5 Search for a DebiCheck Mandate

Use this function to locate a specific DebiCheck Mandate.

1. Select the **Recipients** tab and click on the **DebiCheck Mandates** sub tab.
2. A list of all the DebiCheck Mandates will be displayed on the page.
3. Select the **Search** on the right-side of the page or on **Menu** for more options and click on **Search**.
4. Enter the relevant Search Criteria and click on **Search**.

The following criteria may be used for searching:

- Creditor Name
- Ultimate Creditor Name
- Debtor Name
- Ultimate Debtor Name
- Mandate Reference Number

5. The results of the search are displayed.

7.13.6 Generate a Report to track submitted DebiCheck Mandates

To help ensure that you can manage all transactions and comply with the various business rules and regulatory requirements that forms part of this management process, the 'Submitted mandates Reports' will be made available for viewing, printing, export and/or downloading in both CSV and PDF formats of all mandate requests submitted via Online Banking Enterprise™.

1. Select the **Insight360** tab and click on the **Reports** sub tab.
2. Click on **Submitted Mandates Report**.
3. Select the relevant **Search Criteria** and click on **View**.
4. The reports will display a consolidated view of all mandates submitted and by whom they were submitted over a specified period of time.

You can only search for a mandate to up to 90 days after the date that that mandate was generated.

The following information will be displayed on the Report:

- Date - the date the mandate was sent to the debtor;
- Debtor Name - the name and surname of the debtor;
- Contract Reference Number - the number of the contract signed between the creditor and the debtor;
- Mandate Reference Number - the mandate number generated after the debtor accepted he mandate;
- Instalment Amount - the amount of the debit order
- Status - the mandate status:

    - Accepted - mandate accepted by the debtor;
    - Rejected - mandate rejected by the debtor;
    - Pending - mandate awaiting debtor response;
    - Expired - mandate received no debtor response;
    - Suspended - mandate suspended due to stop payment instruction from debtor;
    - Cancelled - creditor cancels (an active) mandate;
    - Amend Failed - when an amendment fails;
    - Cancel Failed - when cancellation of a mandate fails;
    - Failed - when creation of a mandate fails.

7.13.7 Add a DebiCheck Mandate to a Folder – Online Capture

Use this function to add a DebiCheck Mandate to a Folder.

1. Select the **Recipient** tab.

If you are adding a mandate to an existing DebiCheck folder:

- Click on **Menu** for more options, select **Add Recipient** and **s**elect the **folder** to which you want to add the Recipients to by clicking on the folder name **hyperlink.**

If you are creating a new DebiCheck folder:

- Click on **+Add button** and click on **Create**.
- Enter the **Folder name**.
- Select the **Folder type** from the drop-down list i.e. DebiCheck Mandates.
- The **Account** drop-down list will contain only those accounts for which you have permission to capture folders.
- Checking the **Allow override** option will allow you to choose a different account when making collections using this folder.
- Click on **Continue** to proceed to the **Add Recipients** screen.

2. Enter the following Mandate details for the Recipient:

    - Enter the Recipient Name
    - Enter the Mandate Reference Number
    - Select the **Bank Name** from the **Choose Bank** list or enter a valid **Branch Code.** If you enter a valid Branch Code, the system will automatically derive the bank name.

        - If the bank selected only has one branch/head office, the system will automatically display that **branch code** on the screen.
        - If the bank selected does not have a specific default branch code, the system will display the branch **search** functionality. **Note**. Click on the "more' option to activate the branch search functionality.

    - Enter the debtor's **Account Number**.
    - Select the **Account Type** from the drop down list.
    - Enter the Contract Reference Number.
    - Enter the Abbreviated Name.

3. The **Collection limit** field allows you to choose the highest amount that can ever be collected from this recipient at one time. Tick the unlimited check box or you can limit the amount per collection by entering an amount in the set limit field.
4. The **Number of Collections per day** field allows you to set how many collections per day can be made to this recipient. Tick the unlimited check box or limit the number of collections that can be made per day for this recipient, by entering the number in the set limit field.
5. Click on **Save and Exit** to save the folder with a status of Work In Progress and return to the Recipients landing page or, Click on **Submit** to submit the Folder for authorisation by a User with the necessary permissions.

Once Submitted, the recipient folder will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

7.13.8 Add a DebiCheck Mandate to a Folder – Import

Use this function to import a folder which has been created off-line

1. Select the **Recipient** tab.
2. Select the **+Add** action button on the right and select **Import** or click on **Menu** for more options and select **Import Folder**.
3. Select the folder **type** from the drop-down list i.e. Collections.
4. Select **New Folder** if this is a new folder that is being imported or select **Existing Folder** and select the folder name from the dropdown list, if you are importing Recipients that you want to add to an existing folder.

5. Enter the **Folder name**.
6. Select the **Format**: CSV.
7. The **Account** drop-down list will contain only those accounts for which you have permission to capture folders.
8. Checking the **Allow override** option will allow you to choose a different account when making collections using this folder.
9. Select the **Itemised Statement entry** type.
10. Click on **Continue.**
11. You have the option to **Ignore invalid items** in the file by checking the check box. If you check the **Ignore invalid items** check box. The folder will be created containing only valid items. If you **do not check the Ignore invalid items** check box. A folder will NOT be created if there are any invalid items in the import file.
12. The File Location field requires you to locate the file that you want to import. If you know where the file is located, you can type the file path into the File Path field, or click on **Browse** to locate it.
13. Click on **Upload**.
14. A new page will display with your Folder details.
15. Click on **Finish** to return to the Recipients landing page or click on **Import Again** to return to the Capture Import Details screen to import another file.
16. Check the **Import Results Report** in your **Online Banking Enterprise™ Inbox**.

7.13.9 Add Collections - From a DebiCheck Folder

Use this function to make a collection from an existing DebiCheck folder. The folder contains the banking details of recipients, you can select the recipients you want to collect from and enter the amounts you want to collect from them.

1. Select the **Collections** tab.
2. Click on the **+Add** action button on the right and select **From Folder**.

Add the Batch Header Details:

3. Type the name of the Collection in the **Name** field.
4. Select the **DebiCheck Folder** to be used for the collection from the dropdown list. The list of folders in the dropdown is restricted to those containing accounts for which you can capture Collections.
5. The **Account number** field will be displayed depending on the following:

    - If the **Allow Override** indicator for the selected folder has been set to **'Yes'** The Account can be selected from a dropdown list (restricted to those accounts for which you can capture Collections).
    - If the **Allow Override** indicator for the selected folder has been set to **'No'** the Account displayed is the default account set for the folder and cannot be changed.

6. The **Action date** is the date on which you want the Collection to be processed.
7. Select your **Statement Entry**:

    - If you want to have each Collection amount itemised on your bank statement Tick the **Itemised** tick box.
    - If you want the total Collection amount to reflect as one entry on your bank statement. Tick the **Consolidated** tick box. Note: If you select the Consolidated option and the total collection amount exceeds the settlement limit when processed, the whole collection will fail. If you select the Itemised option, the collection items will be processed until the limit is reached and only those items exceeding the limit will fail.

8. Select the **Service type** from the dropdown list.
9. The **Own Reference** is mandatory if you have selected the Consolidated Statement Entry and will be the reference for the collections on your bank statement.

Note!
You can view the **cut-off times** for the various service types as well as information when the Collections will be posted, and when debited to the recipients by clicking on the cut-off times hyperlink.

11. Click on **Continue**.

Add the Recipient Details:

12. The page will display the recipients for the folder that you have selected.
13. Enter an amount in the **Amount** field next to each recipient. You can use the Tab key on the keyboard to move to the next field.
14. The default **Own & Recipient references** can be changed in the applicable fields, where necessary.

    Important Note! If you are doing DebiCheck transaction, you will also need to complete the following additional information and referencing standards:

- Mandate Reference number – The Reference Number generated by the system once the Debtor has accepted the Mandate.
- Cycle Date – The Instalment Date: the format must be yymmdd
- Contract Reference Number: The Client Contract /Mandate /Agreement Reference number: This is the unique debit order **mandate/agreement number** used to identify your client.
- Abbreviated Name – This is your **Company's Short Name** that is loaded in FNB's system. It must represent your Company's name and must be easily identified by your customers.
- Tracking Period - Each transaction in the batch can have a different Tracking period: track up to 10 days
- **Reason** for your Collection:
    - Insurance Premium
    - Pension Fund Contribution
    - Medical Aid Fund Contribution
    - Unit Trust Purchase
    - Charitable or religious contributions
    - H.P. Repayment
    - Account Repayment
    - Account Repayment
    - Loan Repayment (other than Mortgage)
    - Rental-Lease (other than Property)
    - Service Charge (Maintenance of Service Agreements, etc.)
    - Service Charge (Variable Amounts)
    - Rent (Property)
    - Bond Repayment
    - Bank Use - Debit Transfer
    - Bank use – Cheque Card Debits
- Collection Type - the sequence type in the business function:
    - First
    - Once-Off
    - Recurring
    - Represented
    - Final

15. Click on **Save** to save the information captured on the current page. Click on **Save and Exit** to save the Collection in a Work in Progress status and return to the Collections landing page. Click on **Submit** to submit the Collection for authorisation by a User with the necessary authorisation permissions. Click on **Clear Amounts** if you want to recapture the amounts again and **Cancel** if you no longer want to continue the collection batch.

Once Submitted, the Collection will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

A **Print Preview** page will automatically display the details of the batch; this can be printed or downloaded.

7.13.10 Import DebiCheck Collections

Use this function to import a DebiCheck Collection File which has been off-line from an Excel (.CSV) spreadsheet.

Select the help icon **"?"** at the top of your screen. Scroll down to **File Formats and Online Templates** and select the DebiCheck CSV Collection spreadsheet.

The import function is very useful when your collections batches contain a large number of recipients.

1. Select the **Collections** tab.
2. Click on the **+Add** action button on the right and select **Import**.

Add the Batch Header Details:

3. Select the **File Type** from the drop down list: CSV.
4. Type the name of the Collection in the **Name** field.
5. Select the **Itemised Statement Entry** type.
6. Select the **Service type** from the dropdown list.
7. The **Own Reference** is mandatory if you have selected the Consolidated Statement Entry and will be the reference for the collections on your bank statement.
8. Select the folder from which payments must be made from the dropdown list in the **Folder** field or select **Once-Off**. The list of folders is restricted to those linked to accounts for which you can capture payments.

    - If you are importing a **Once-Off** collection batch and want to save the recipients details to a folder, click on the **Save Recipient Folder** checkbox. You will have the option to select if you want to save the recipients to an **Existing** Folder or to create a **New Folde**r. Select the Folder Name from the dropdown list if you have chosen to save the recipients to an existing folder. Note: If you have chosen to add the Once-Off recipient to an existing folder, the recipient's daily limit and number of collections per day will be saved as unlimited.

Note!
You can view the **cut-off times** for the various service types as well as information when the Collections will be posted, and when debited to the recipients by clicking on the cut-off times hyperlink.

9. Click on **Continue**.

Add Import Details:

10. You have the option to **Ignore Invalid Items**. If you check the **Ignore Invalid Items** check box. The batch will be created using only the valid items found in the import file. If you **do not check the Ignore Invalid Items** check box. The batch will NOT be created if any invalid items are found in the import file.
11. Click on **Browse** and select the file that must be imported.
12. Select the Inbox button to receive the results file in your **Inbox** or alternatively click on the **Email** button to receive the results file via email. If you selected email, then complete the relevant address fields.
13. Select the **Format** from the dropdown and click on **Continue**.
14. Click on **Finish**.

7.13.11 Create a Once-Off DebiCheck Collection

Use this function to create a once-off collection. This type of collection is used to collect funds from recipients who you do not collect from regularly.

1. Select the **Collections** tab.
2. Click on the **+Add** action button on the right and select **Once-Off**.

Add the Batch Header Details:

3. Type a description of the Collection in the **Name** field.
4. Select the **Account** which must be credited with the Collection amount from the dropdown list. The list of accounts in the dropdown is restricted to those containing accounts for which you can capture Once-Off Collections.
5. The **Action date** is the date on which you want the Collection to be processed. Collections can be future dated up to 365 days in advance.
6. Select the **Itemised Statement Entry** type.
7. Select the **Service type** from the dropdown list.
8. The **Own Reference** is mandatory if you have selected the Consolidated Statement Entry and will be the reference for the collections on your bank statement.
9. Click on **Yes** if you want to **Save the recipient to a Folder**. The saved Once-Off recipient's daily limit and number of collection per day will be defaulted to unlimited. Select Existing Folder to save the account to an **Existing Folder** or select **New Folder** to save the account to a New Folder.

Note!
You can view the **cut-off times** for the various service types as well as information when the Collections will be posted, and when debited to the recipients by clicking on the cut-off times hyperlink.

10. Click on **Continue**.

Add recipient Details:

11. Enter the Recipient **name** in the Recipient field.
12. Enter the recipient's **Account Number**.
13. Select the **Bank Name** from the **Choose Bank** list or enter a valid **Branch Code.** If you enter a valid Branch Code, the system will automatically derive the bank name.

- If the bank selected only has one branch/head office, the system will automatically display that **branch code** on the screen.
- If the bank selected does not have a specific default branch code, the system will display the branch **search** functionality. **Note**. Click on the "more' option to activate the branch search functionality.

14. Select the **Account Type** from the drop down list.
15. Enter the reference that you want to appear on your bank statement in the **Own Reference field.** This field is mandatory.
16. Enter the **Recipient Reference** that you want to appear on the recipient's bank statement. This is a mandatory field.
17. Enter the **Amount** that you want to collect from the recipient.

Important Note! If you are doing **DebiCheck transaction**, you will also need to complete the following additional information and referencing standards:

- Mandate Reference number – The Reference Number generated by the system once the Debtor has accepted the Mandate.
- Cycle Date – The Instalment Date: the format must be yymmdd
- Contract Reference Number: The Client Contract /Mandate /Agreement Reference number: This is the unique debit order **mandate/agreement number** used to identify your client.
- Abbreviated Name – This is your **Company's Short Name** that is loaded in FNB's system. It must represent your Company's name and must be easily identified by your customers.
- Tracking Period - Each transaction in the batch can have a different Tracking period: Track up to 10 days.
- **Reason** for your Collection:
    - Insurance Premium
    - Pension Fund Contribution
    - Medical Aid Fund Contribution
    - Unit Trust Purchase
    - Charitable or religious contributions
    - H.P. Repayment
    - Account Repayment
    - Account Repayment
    - Loan Repayment (other than Mortgage)
    - Rental-Lease (other than Property)
    - Service Charge (Maintenance of Service Agreements, etc.)
    - Service Charge (Variable Amounts)
    - Rent (Property)
    - Bond Repayment
    - Bank Use - Debit Transfer
    - Bank use – Cheque Card Debits
- Collection Type - the sequence type in the business function:
    - First
    - Once-Off
    - Recurring
    - Represented
    - Final

18. Click on **Add More** to save the Collection and add another recipient. Click on **Save and Exit** to save the Collection.
19. Click on **Submit** to submit the Collection for authorisation.

Once Submitted, the Collection will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

A **Print Preview** page will automatically display the Details of the batch; this can be printed or downloaded.

DebiCheck Cut-off times

Service	DebiCheck
Submission	DebiCheck collections using the Tracking service type option must be captured AND authorised at least 1 day prior to the action date. Your action date is the SAME date as the date on which you would like your recipients to be debited.
Online Banking Account Credited	Your account will be credited on the action date with the value of all successful collections.
Monday to Friday cut-off time	All Banks - between 08:00 and 16:30
Saturday cut-off time	All Banks - between 08:00 and 12:00
Sundays	Not Applicable – Not a Business Day
Item Limit	No item can exceed R1 000 000.00
Credit Facilities: Aggregate Limit	Credit facilities will be marked to support DebiCheck collections and will need to be applied for subject to their requirements for the limit. • Limits are negotiated between you and your FNB Relationship Manager. It is important to note that exceeding limits will have an impact on your daily operations – transactions will be rejected if they are in excess of the agreed limits. It is therefore important that you advise FNB timeously of any excess amount so that the limits are adjusted by the specified cut-off times. • DebiCheck Collections are also subject to a R1 000 000.00 item limit only; you may not circumvent the overall item limit by splitting the Debit Order Payment Instructions.

DebiCheck batches submitted after cut-off time will be rejected as there is NO Autobump facility.

A Debtor using Online Banking Enterprise™ will also be able to make use of the following:

- Responding to a mandate by either accepting(confirming) or rejecting it;
- Viewing mandates.

How to Accept/Reject a Mandate Request:

This functionality is only available to the Administrator(s).

In the case of a multiple Administrator site, then at least 2 Administrators will be required to fully authorise the acceptance of the Mandate request within the specified service type cut-off time.

When new accounts have been added to your profile a message will be displayed after successful login to advise that there is a new account that needs to be assigned to the Entity.

1. Logon to Online Banking Enterprise™
2. A message will be displayed after successful login to advise that there is a new Mandate that needs to be **Accepted** or **Rejected**.
3. Click in the check box next to the **Mandate** that must be confirmed and select the **Accept** button.
4. Click on **Authorise** to authorise the changes, alternatively, the Administrator can select to **Reject** the Mandate request by clicking on the **Reject** button.

Notes:

- In the event of multiple Administrators, the second Administrator needs to follow the same prompts to accept the request.
- If both Administrator(s) does not respond within the specified time, the mandate will expire.

To view Debit orders, go to My Accounts tab> Accounts > My Debit Orders

A list of all your debit orders will be displayed by **Date**, **Description** and **Amount**

8. Authorise Tab

This screen displays a list of all items which are pending authorisation for the Accounts, Transfers, Payments, Recipients, Collections, CashMan and Profiles Tab.

Authorise an Instruction

Use this function to authorise from one page instead of authorising individual items on each tab. An Administrator or Authoriser can select several items to be authorised simultaneously, as long as the necessary authorisation permissions have been set.

1. Select the **Authorise** tab.
2. Tick the check box next to one or more **item(s)** that you want to authorise. You can click on any **Name hyperlink** on the authorisations landing page to provide a detailed view of the item requiring authorisation.
3. Click on **Authorise** to proceed with the authorisation process.

If you are using Smart InContact for Business to authorise a Transaction or Instruction:

- You will be directed to the FNB Banking App to authorise the transaction/s. The unique ID for the transaction is displayed. Check that it is the same ID for the items you have selected to authorise.
- Enter your 4-digit PIN to authorise the instruction and click on Authorise.

If you are using Passcodes to authorise a Transaction or Instruction:

- You will be prompted to enter the authentication passcodes, one will be sms'd to your mobile phone, and another will be sent to your email address.
- Enter your passcodes to authorise the instruction and click on Authorise.

4. Once completed, an authorisation **result page** will be displayed. This screen displays the results of the authorisation process. The items which you selected to authorise are displayed here with the status of the item and result of the authorisation process.
5. Click on the **Finish** button to end the authorisation process and return to the main Authorisation screen.

If there are multiple Authorisers, the second Authoriser needs to follow the same authorisation process.

Reject and Cancel an Authorisation

Use this function to cancel an authorisation and return the item to a ‘Work in Progress’ status.

The Administrator or Authoriser can select several items be rejected simultaneously.

1. Select the **Authorise** tab.
2. Tick the check box next to one or more **item(s)** that you want to reject.
3. Click on **Reject**.
4. The screen will appear with all the selected rejections, as well as the **Reject** and **Cancel** buttons at the bottom of the page.

5. Enter a description in the **Reason** field with a comment or reason for rejecting the batch or instruction. **Note. This allows you to capture approximately 100 characters. If your site profile setting is set to receive a 'reject notification', the system will automatically send a 'reject notification' to the user that submitted the batch or instruction for processing, advising the user that the batch has been rejected by the authoriser.**
6. Click on **Reject**.

Notes:

- Rejecting an authorisation will change the status of any rejected items from Authorisation Requested to Work In Progress.
- When rejecting payment batches with more than 1000 payments, the status will change to Updating Status whilst the authorisation process is taking place. This will allow the User to continue with other functions on Online Banking Enterprise ™. The final status of the rejected batch will be Work In Progress which can then be maintained.
- If you capture a 'reason' in the optional 'reason field', the system will then display the 'reason' for rejecting the batch or instruction on all pages where the Authorisation Audit Trail is displayed.

9. Business Solutions Tab

The Business Solutions tab holds the following useful products and functionality which can be used to enhance your daily Business operations:

- Reports
- For My Business
    - Insight360™
    - Instant Solutions
- Verify Account Owner
- Link out to Trade Finance

9.1 Reports

Use this functionality to view and create Reports.

The landing page is divided into the following 3 sections: Popular Reports, Other Reports and the Event Log Search.

Popular Reports

Online Billing

View your Online Billing Reports for the last 12 months.

1. Click on the **Business Solutions** tab and select the **Reports** icon.
2. The landing page is divided into the following 3 sections: Popular Reports, Other Reports and the Event Log Search.
3. Click on the **Online Billing** button and select the relevant month.
4. Select the required billing report type option:

    - **Service Type** - The service type indicates whether it is financials, non-financials, subscriptions or support. Only the service types which have been availed of during the month will be displayed.
    - **By Account**
    - **Service Description**
    - **Detailed**

You can **Export** the **Service Description** and **Detailed Billing** information as follows:

1. Click on **Export** button.
2. Select if you want the information to go to your **Inbox** or **Email** and select the required format, **PDF** or **CSV**. If you selected email, complete your email address details and click on **Submit**.

Other Reports

This section allows you to view the following Online Reports:

- **Redirect Reports** - Use this function to view and export Payment and Collection Redirect Reports.
- **Unpaid Reports** - Use this function to view and export Payment and Collection Unpaid Reports.
- **Redirect and Unpaid Reports** - Use this function to view and export Payment and Collection Redirect and Unpaid Reports.

To view and export these reports, simply follow the guidelines listed below:

5. Click on the **Business Solutions** tab and select the **Reports** icon.
6. The landing page is divided into the following 3 sections: Popular Reports, Other Reports and the Event Log Search.
7. Select the **Report type** by clicking on the relevant hyperlink option.
8. Complete the required fields for the Report you require and click on **View** or **Export**.

User Reports

This functionality allows an Administrator to download a PDF report of the users and their permissions.

Due to the potential size of the report, it will be sent directly to the Administrator's Online Banking Enterprise™ inbox. The Administrator can select one, multiple or all users to be included in the report with a PDF report file being generated for each selected user, however the files will be batched together in one Zip file.

Only users with a status of Authorised will be reported upon. This will ensure accuracy in determining what the active permissions are when auditing users.

Only fields based on user permissions and modules are reported upon, thus if the entity is not opened to the CashMan module then it will not appear on the report.

1. Click on the **Business Solutions** tab and select the **Reports** icon.
2. The landing page is divided into the following 3 sections: Popular Reports, Other Reports and the Event Log Search.
3. Select the **User Report** hyperlink option under the **Other Reports** heading.
4. Select one or more users for which the report must be drawn by clicking on the tick box next to the user names and click on **Export**.

Check your Online Banking Enterprise™ Inbox to download the Detailed User Report in PDF format.

Smart Payroll Reports

You can download a Smart Payroll Application Report in a PDF or .CSV format.

1. Click on the **Business Solutions** tab and select the **Reports** icon.
2. The landing page is divided into the following 3 sections: Popular Reports, Other Reports and the Event Log Search.
3. Select the **Smart Payroll Report** hyperlink option under the **Other Reports** heading.

The application information will only be available for 3 months (90 days).

Event Log Search

Use this function to search for an event, using the search criteria. An event is any function that is available on the system e.g. password reset, transfer added. A list of all Users ID'S that have created that event is displayed, with the date and time it was logged.

1. Click on the **Business Solutions** tab and select the **Reports** icon.
2. The landing page is divided into the following 3 sections: Popular Reports, Other Reports and the Event Log Search.
3. Simply specify one or more of the following search options for the Event Log Search: **Event**, **User Name**, **From Date**, **To Date** and click on **View**.

Scheduled Exports

Use this function to view, create, maintain or delete your Payment and Collection scheduled exports.

5. Click on the **Business Solutions** tab and select the **Reports** icon.
6. The landing page is divided into the following 3 sections: Popular Reports, Other Reports and the Event Log Search.
7. Click on **Menu** for more options and select the relevant **Payment** or **Collections Scheduled Exports** option.
8. A list of all you existing scheduled exports will be displayed on the page.

- To **View** an export - click on the Scheduled Export **Name hyperlink**.
- To **Create** a new Export - click on **Menu** for more options and select the relevant **Payment** or **Collections Create Exports** option. Click on the **+Add** easy action and complete the required details, the Report Delivery options, Format, Frequency and click on **Save & Exit**. Scheduled Exports are created at user level. No authorisation is required as only exports for accounts to which the user has permission are allowed.
- To **Maintain** an export - click on the **Maintain** easy action button next to the scheduled export you want to modify. **Note**: It is possible to edit the format and email address.
- To **Delete** an export, select the check box next to one or more scheduled export(s) you want to delete and click on **Delete**.

1.2 For My Business

The Business Solutions tab and "For my business" icon, allows for easy access via a single, central point to personalised Business analytics and Business information (both financial and non-financial) across a range of products and solutions.

9.2.1 Insight360™

Insight360™ aims to provide you with useful information to improve your operations, management and decision-making functions within your businesses.

The following Sub Tabs are available via the Insight360 Tab:

Cash Solutions

These views depict a client's transactional volumes per cash channel graphically and provides insights and tips to indicate how to deposit cash 'more wisely' in order to save on fees.

Entrepreneurial Help

You can access insightful and well-researched content from other entrepreneurs & business leader's on how to operate your businesses more efficiently as well as some very useful tips on growing and expanding your business operations.

Queries

This is an alternative platform that gives you easy access to engage with a team of bankers. You can submit a query and feedback will be sent back to you via email within 48 hours after successfully submitting your enquiry online.

9.2.2 Instant Solutions

Use this functionality to register and/or access the various Instant Solutions.

Note: You may also access the **Instant Solutions** offerings via the My Bank Accounts tab.

1. Click on the **My Bank Accounts** tab.
2. Click on the **Menu** for more options and select the relevant **Instant Solution** offering from the extended Menu list.

Instant Accounting

Automate your bookkeeping. Keeping your books up to date is effortless with Instant Accounting.

Instant Accounting is a unique, online accounting solution which uses your FNB electronic bank statement to generate financial statements and reports.

Because the system uses information from your electronic bank statements, Instant Accounting reduces manual data capturing and processing which enables you to produce updated financials effortlessly.

Benefits of Instant Accounting to Entrepreneurs:

- **Empowerment** - With accurate financial statements and reports, you always know how your business is performing, allowing you to make informed financial decisions.
- **It's FREE** - Instant Accounting is FREE to all Business Banking clients.
- **Saves you time** - Spend less time doing your books and more time running your business.
- **Easy to use** - Instant Accounting is a user-friendly online accounting solution that makes it easy to stay up to date with your bookkeeping.
- **Increased accuracy** - Instant Accounting generates accurate financial statements and reports. Manual data capturing is minimal and human error is reduced.

How to register for Instant Accounting

1. Click on the **Business Solutions** tab and select the **For My Business** icon.
2. Click on the **Instant Solutions** icon and select **Instant Accounting**.
3. Click **Yes** to confirm that you want to end your Online Banking Enterprise™ session and enter the **Instant Accounting website.**

Notes:

- The Instant Accounting option will only display if you have qualifying accounts linked to your Online Banking Enterprise™ profile.
- Only Administrators will be able to register for Instant Accounting and only once registration has occurred will all other users on the profile be able to logon to Instant Accounting.

Instant Financial Manager

Instant Financial Management is an easy-to-use online solution that uses the information from your personal FNB bank statements to provide you with a complete overview of your personal financial position. The system automatically assigns transactions to predefined income and expense categories, although you can adjust the categories and teach it your preferences.

With Instant Financial Management you can generate various reports and graphs, which you can view online or have emailed to you, that will reflect your:

- Income and Expenditure
- Cash Flow (Surplus or Deficit)
- Investments
- Assets, Liabilities and Nett Worth
- Budgets vs Actuals.

Having a single view of your finances can help you to:

- Better manage your income and expenditure;
- Set and attain financial goals; and
- Easily complete your tax return and loan applications.

How to register for Instant Financial Management:

1. Click on the **Business Solutions** tab and select the **For My Business** icon.
2. Click on the **Instant Solutions** icon and select **Instant Financial Management**.
3. Click **Yes** to confirm that you want to end your Online Banking Enterprise™ session and enter the **Instant Financial Management** website.

Notes:

- The Instant Financial Management option will only display if you have qualifying accounts linked to your Online Banking Enterprise™ profile.
- Only Administrators will be able to register for Instant Financial Management and only once registration has occurred will all other users on the profile be able to logon to Instant Financial Management.

Merchant Insights

Merchant Insights, a web-based service, allows you quick and easy access to all processed card transactions and to retrieve reports on any acquired transactions via Online Banking.

With Merchant Insights you can:

- View and download current and archived processed transactions;
- Reconcile daily settlements to individual point of sale transactions;
- Generate customised reports that will be emailed to you;
- Download data or analysis to a spreadsheet.

How to register for Merchant Insights

1. Click on the **Business Solutions** tab and select the **For My Business** icon.
2. Click on the **Instant Solutions** icon and select **Merchant Insights**.
3. Click **Yes** to confirm that you want to end your Online Banking Enterprise™ session and enter the **Merchant Insights** website.

Notes:

- The Merchant Insights option will only display if you have qualifying accounts linked to your Online Banking Enterprise™ profile.
- Only Administrators will be able to register for Merchant Insights and only once registration has occurred will all other users on the profile be able to logon to Merchant Insights.

Instant Payroll

Use Instant Payroll to make managing your business' payroll hassle-free.

Instant Payroll from FNB is a complete, web-based payroll processing solution that helps you to manage your business' payroll quickly and easily.

It allows you to generate payslips and pay your employees and third parties with minimum fuss.

Once you have loaded your business and employees on the system, preparing your monthly payroll and generating payslips is quick and easy.

Instant Payroll also ensures that you, as an employer, adhere to current SARS requirements. And because Instant Payroll is web-based, you have access to the system wherever you have an Internet connection.

Saves you money
The first 5 payslips are FREE each month and you pay R20 per payslip thereafter.

Is easy to use

- It simplifies the management of your monthly payroll.
- It is a fast, reliable and user-friendly way to pay your employees.

Makes compliance simple

- It ensures that you stay compliant with the latest requirements from SARS.
- Instant Payroll makes your tax year-end process hassle-free.
- All statutory contributions are automatically calculated, including UIF, PAYE and SDL contributions.

Is secure and convenient

- Instant Payroll lets you pay your employees easily, as it integrates seamlessly with FNB Online Banking.
- All your payroll information is backed up on our secure servers.

Allows easy reporting

- Instant Payroll keeps a full history of your employees' payroll information and gives you full access to all historical data with easy-to-use reports.
- Instant Payroll provides you with various reports such as Costing Reports, Net Pay Reports and Payments Reports.

How to register for Instant Payroll

1. Click on the **Business Solutions** tab and select the **For My Business** icon.
2. Click on the **Instant Solutions** icon and select **Instant Payroll**.
3. Click **Yes** to confirm that you want to end your Online Banking Enterprise™ session and enter the **Instant Payroll** website.

Note. You must have at least one **qualifying Business account** linked to your profile have the **Access Instant Payroll** permission access as per the Rights screen before you can link-out to the **Instant Payroll** website, via Online Banking Enterprise™.

How to make Instant Payroll Payments.

Once they are logged into Instant Payroll you can set up your monthly payroll and request to process this payroll.

You can process your payroll payments which have been exported from the Instant Payroll website to the Online Banking Enterprise ™ system.

These payments are displayed on your **Payments tab** > **Payments sub - tab** with a status of Work In Progress and can be **authorised** or **deleted**. Once they have been authorised, they will follow the same process as other payments created using the Online Banking Enterprise ™ system.

Notes:

- Salary payments will be processed using the Salaries (one-day) service type and all other Third Party payments will be processed using the Normal service type.
- Instant Payroll batches will be itemised on your Bank Statement, no Consolidated Entries for Instant Payroll payments.

For more information or assistance on Instant Payroll, clients can send a email to **fnbinstant.payroll@bcx.co.za** or call **0861 333 136**.

Instant Cashflow

Instant Cashflow, an online, interactive tool that can help you to better manage your cash flow and make informed business decisions.

The tool uses information from your business' bank statement to provide you with historical cash flow reports as well as predictive reports which are calculated by looking at patterns in your business over the past 12 months.

These forward looking reports can help you to anticipate when to expect drops in your cash flow in the coming months enabling you to take pro-active and informed decisions to better manage your business' cash flow.

How to register for Instant Cashflow

1. Click on the **Business Solutions** tab and select the **For My Business** icon.
2. Click on the **Instant Solutions** icon and select **Instant Cashflow**.
3. Click **Yes** to confirm that you want to end your Online Banking Enterprise™ session and enter the **Instant Cashflow** website.

Notes:

- The Instant Cashflow option will only display if you have qualifying accounts linked to your Online Banking Enterprise™ profile.
- Only Administrators will be able to register for Instant Cashflow and only once registration has occurred will all other users on the profile be able to logon to Instant Cashflow.

Instant Invoicing

Instant Invoicing is a SARS compliant template which will allow you to generate your own standardised invoices.

For a business using the FNB Instant Invoicing tool, they are guaranteed that the invoice format is the correct one, adheres to the most recent requirements stipulated by SARS for submission, and offers the purchaser the peace of mind that the invoice allows VAT claims against it (if the purchaser in turn is a registered VAT claimant).

How to register for Instant Invoicing

1. Click on the **Business Solutions** tab and select the **For My Business** icon.
2. Click on the **Instant Solutions** icon and select **Instant Invoicing**.
3. Click **Yes** to confirm that you want to end your Online Banking Enterprise™ session and enter the **Instant Invoicing** website.

Notes:

- The Instant Invoicing option will only display if you have qualifying accounts linked to your Online Banking Enterprise™ profile.
- Only Administrators will be able to register for Instant Invoicing and only once registration has occurred will all other users on the profile be able to logon to Instant Invoicing.

9.3 Verify Account Owner

Account Owner Verification is an electronic banking solution which verifies that the account details captured belong to the person or organisation that you intend to pay or collect from.

All you need to perform an Account Owner Verification via Online Banking Enterprise™ is the following:

Individual Client:	Account Number	Branch Code	ID Number

Business Client:	Account Number	Branch Code	Business Registration Number

You can also verify the following Optional fields for Individual/Business clients:

Individual Client:	Surname	Initials	Cellphone Number	Email Address

Business Client:	Business Name	Cellphone Number	Email Address

The Verify Account Owner service is available for the following participating banks:

Bank	Single (Real-Time)	Batch (2 Hours)
ABSA Bank	X	X
African Bank	X	X
Bidvest Bank	-	X
Capitec Bank	X	X
Discovery Bank	X	X
Finbond Net1	X	-
Grindrod Bank	X	-
Grobank Limited (Bank of Athens)	-	X
Investec Bank	X	X
Mercantile Bank	-	X
Nedbank Limited	X	X
SASFIN Bank	X	-
Standard Bank	X	X
TymeBank	X	X

For your convenience, the Verify Account Owner functionality for FNB/RMB accounts only is also available at the following touch points:

- Profiles Tab > Menu > Verify Account Owner
- Payments Tab > + Add > Once Off
- Payments Tab > Menu > EziPay > Once Off
- Folders Tab > +Add > Recipient
- Folders Tab > Maintain > Recipient

We offer the following Account Verification services for you to choose from:

Service	Description
Single	• Single allows for Real time account verifications of accounts held at FNB and any of the other Participating banks. • **Details are captured online:** Select the Single sub tab option and enter the following information in the fields provided: • **Account number** • **ID/Co. Registration Number** • **Branch Code** • **Initials** (optional field) • **Surname /Business Name** (optional field). **Note**! You can capture up to 60 characters in this field. • **Cellphone Number** (optional field)

	• **Email Address** (optional field) **Responses for these submissions will be sent back to you within seconds**. If the details are verified as True, you can click on **Save as Recipient** to save the verified details to your Recipient Folders.
Multiple	• Multiple allows you to verify the account owner of up to 5 accounts for accounts held at FNB and any of the other Participating banks. • **Details are captured online:** Select the Multiple sub tab option and enter the following information in the fields provided: • **Account number** • **ID/Co. Registration Number** • **Branch Code** • **Initials** (optional field) • **Surname /Business Name** (optional field). **Note**! You can capture up to 60 characters in this field. • **Cellphone Number** (optional field) • **Email Address** (optional field) **Responses for these submissions will be sent back to you within 2 hours**.
Imports	• Import allows you to submit the details that you want to verify, using a Bankserv (.txt) file directly from your own accounting package or the (.csv) spreadsheet provided by Digital Banking. You can download the Bankserv (.txt) file layout and/or the (.csv) spreadsheet via our Templates and Form Support Centre by following the step actions listed below: 1. Select the help icon **"?"** at the top of your screen 2. Scroll down to the File Formats and Online Templates section or simply click on the File Formats and Online Templates link provided in the Contents section on the left. 3. Download the relevant CSV template or the file format by clicking on the required links provided in the Verify Account Owner section. • **Details are imported via the Bankserv or CSV files:** Select the **Imports** sub tab option and import the details that you want to verify, using the Bankserv or CSV file format. **Response file containing the results of these imported submissions will be send back to you within 2 hours**.

There are costs associated for this service, kindly refer to the pricing guide or your Digital Portfolio Manager for further information. Please note that the pricing differs across the real time and batch services.

Important Notes:

- Users will not be able to capture an account type when submitting records for verification; the account type will be derived from the account number but a response will not be returned for account type.
- The following banks: FNB, ABSA, Nedbank and Capitec accommodates the inclusion of alpha characters in the ID number field (to accommodate the use of a Passport) as well as the Account Number Fields (to allow complete details to be verified for Trust Account Numbers).
- For FNB accounts, if the account submitted for verification is not a Current (Cheque/Bond), Savings or Transmission account, then all verification fields will be returned as unverified.
- For FNB accounts, if an account is in any status other than open, all verification fields will be returned as false.
- If a Batch request via the Multiple or Import sub tab option is selected for submissions to verify the account owner for accounts held at any of the other Participating banks, the system will verify the information within 2 hours. The Account Verification services for other banks are available between 08h00 and 16h00.

    - Details submitted outside of these times, which contain verification requests for other banks, will only be processed on the next business day.
    - Details submitted outside of these times, which contain verification requests for only FNB accounts, will be processed immediately.

- If a Single Online verification is submitted for participating banks, the results for these items will be returned back to you within seconds of your initial online submission.

View Verify Account Owner History

1. Click on the **Business Solutions** tab and select the **Verify Account Owner** icon.
2. You can view the status of your Verify Account Owner History files.

Verify Account Owner - Single (Online)

- Use this function to verify the account owner details for a single account held at FNB and any of the other Participating banks.

- Details are captured online: Select the Single sub tab option and enter the following information in the fields provided:

    - **Account number**
    - **ID/Co. Registration Number**
    - **Branch Code**
    - **Initials** (optional field)
    - **Surname /Business Name** (optional field). **Note**! You can capture up to 60 characters in this field.
    - **Cellphone Number** (optional field)
    - **Email Address** (optional field)

- Responses for these submissions will be sent back to you within seconds.

1. Click on the **Business Solutions** tab and select the **Verify Account Owner** icon.
2. Select the **Verify** sub tab, this page defaults to the **Single** sub tab option.

3. Enter the information you want to verify in the fields provided and click on **Verify** to proceed with the verification process.
4. The verification **results** will be displayed in **real time**.
5. If the details are verified as **True**, you can click on **Save as Recipient** to be redirected to the **Add Recipient** process to save the verified details to your **Recipient Folders**; alternatively, click on **Finish** to complete the process.

Verify Account Owner Results:

On submission, the system will verify the information provided and return you the Results for each field informing you whether the verification is correct or incorrect with either:

Y - True - The details have been successfully verified.
N - False - The details have been verified but they do not match
U -Unverified - The details could not be verified.

- If a Participating Bank does not respond to the request in time all recipients for that bank will be returned as unverified; you will not be billed for these; or
- Invalid data, i.e. invalid ID Number / Company Registration Number or Account Number; these responses are billable.

L: Late Transactions The bank concerned did not respond to your request in time; these recipients may be resubmitted on the same day in a new file.

Verify Account Owner - Multiple (Online)

Use this function online to verify the account owner of up to 5 accounts for accounts held at FNB and any of the other Participating banks.

- Details are captured online: Select the Multiple sub tab option and enter the following information in the fields provided:
  - **Account number**
  - **ID/Co. Registration Number**
  - **Branch Code**
  - **Initials** (optional field)
  - **Surname /Business Name** (optional field). **Note**! You can capture up to 60 characters in this field.
  - **Cellphone Number** (optional field)
  - **Email Address** (optional field)
- Responses for these submissions will be sent back to you within 2 hours.

1. Click on the **Business Solutions** tab and select the **Verify Account Owner** icon.
2. Select the **Verify** sub tab and select the **Multiple** sub tab option.
3. Enter the **details you want to verify** in the fields provided.
4. Enter the **Delivery Options** on how you want to receive the **Account Owner Verification Results**.
5. Select if you want the response to be sent to your Online Banking **Inbox** or to your **Email**, by clicking in the relevant option.
   - If **e-mail** is selected, enter your e-mail address.

- If **Inbox** is selected, you can opt to be notified of the response via Email or SMS. Enter your e-mail address and/or cellphone number in the field where you want to be notified of the response.

6. Click on **Verify** to proceed with the verification process.

Verify Account Owner Results:

On submission, the system will verify the information provided and return you the Results for each field informing you whether the verification is correct or incorrect with either:

Y - True - The details have been successfully verified.
N - False - The details have been verified but they do not match
U -Unverified - The details could not be verified.

- If a Participating Bank does not respond to the request in time all recipients for that bank will be returned as unverified; you will not be billed for these; or
- Invalid data, i.e. invalid ID Number / Company Registration Number or Account Number; these responses are billable.

L: Late Transactions The bank concerned did not respond to your request in time; these recipients may be resubmitted on the same day in a new file.

Notes:

- An Account Owner Verification response file will be received within 2 hours of the file being processed.
- The Account Verification services for other banks are available between 08h00 and 16h00. Details submitted outside of these times, which contain verification requests for other banks, will only be processed on the next business day.

Verify Account Owner - Imports

How to Download the Import File Layout

Use this function to import the details that you want to verify, using the Bankserv .txt) or CSV file format.

You can download the (.csv) spreadsheet as well as document with guidelines on how to complete the CSV template via our Templates and Form Support Centre by following the step actions listed below:

1. Select the main Menu at the top of your screen and click on Help “?”
2. Scroll down to the File Formats and Online Templates section or simply click on the File Formats and Online Templates link provided in the Contents section on the left.
3. Download the relevant CSV template or help guide on the required links provided in the Collection section.

How to Import a Verify Account Owner File

1. Click on the Business Solutions tab and select the Verify Account Owner icon.
2. You can view the status of your Verify Account Owner History files.
3. Select the Verify sub tab and select the Imports sub tab option.
4. Select the Format for the file you want to import from the dropdown list.
5. Click on Browse to find the file you want to import (next to File Name).
6. Enter the Delivery Options on how you want to receive the Account Owner Verification Results.
7. Select if you want the response to be sent to your Online Banking Inbox or to your Email, by clicking in the relevant option.
    - If e-mail is selected, enter your e-mail address.
    - If Inbox is selected, you can opt to be notified of the response via Email or SMS. Enter your e-mail address and/or cellphone number in the field where you want to be notified of the response.
8. Click on Submit.

Response Files

- An Account Owner Verification response file will be received within 2 hours of the file being processed.
- Responses on CSV file submissions which only include FNB accounts will be returned in real-time, for up to 150 records.
- CSV Files that contain either >150 records or include non-FNB accounts, and files submitted in ACB format, will be processed in batch format, on the hour, and will be returned within 2 hours of being processed.
- Account Verification services for other banks are available between 08h00 and 16h00.
- Files submitted outside of these times, which contain verification requests for other banks, will only be processed on the next business day.
- Files submitted outside of these times, which contain verification requests for only FNB accounts, will be processed immediately.

E.g. a batch sent at 13h20 will only be submitted @14h00 and a response file will be sent back to the user by 16h00. Another example, a batch is sent at 13h40 will be submitted @ 14h00 and a response file will be sent back to the user by 16h00.

Verify Account Owner Results

If you submitted multiple requests to verify the account owner for accounts held at FNB only, the system will verify the information provide you with a message informing you whether the verification is correct or incorrect with either:

- True – Validated
- False – Not matched.
- Unverified – The field was not verified.

Search Verify Account Owner Records

Use this function to search for instructions.

1. Click on the **Business Solutions** tab and select the **Verify Account Owner** icon.
2. You can view the status of your Verify Account Owner History files.
3. Click on the More **Menu** on the left and select **Advanced Search**.
4. Select the **From** and **To Date** and click on **Search**.
5. Results for your search will be displayed.

Delete Verify Account Owner Records

Use this function to delete individual or multiple instructions.

1. Click on the **Business Solutions** tab and select the **Verify Account Owner** icon.
2. You can view the status of your Verify Account Owner History files.
3. Select **one** or **more** records you want to delete by clicking on the check boxes next to these records or click on **Select All** to delete all the records.
4. Click on **Delete**.
5. After clicking on Delete, the record (s) will be removed, and the page will be refreshed.

9.4. Link out to Trade Finance

Administrators and Users with the respective permissions can use this functionality to link out to the Trade Finance site.

Please note that clicking on this link will end your current banking session.

How to access the Trade Finance Site

1. Click on the **Business Solutions** tab.
2. Click on Trade Finance.
3. The **Trade Finance Redirect** page will be displayed.
4. Click on **Yes** to end your current banking session and be redirected to the Trade Finance site.

How to View your Employee Benefit Funds

1. Click on the **Employee Benefits** Tab.
2. A list of the **Employee Benefit Funds** linked to your Business Profile will be displayed.
3. Click on the **Fund Name hyperlink** of the respective Fund.
4. Select the **Fund Details view**.
5. The **Fund Details** for the respective fund will be displayed.
6. Click on **Back** to return to the **Employee Benefit Funds** page.

9.5.2 Submit and/or View Queries History

As an employer, you can use this functionality to enquire about Employee Benefit Products or to view a history of the queries that you have logged via Online Banking.

Important Information about Viewing your Employee Benefit Funds	
	• This functionality is restricted to the **Primary User** (Profile Owner) of a **Business (Employer)** and **profile**. • For **Navigational Assistance**, please contact **Digital Banking Support**. • For **Information or Queries**, please contact your **Fund Administrator.**

How to Submit a Query to the Fund Administrator

1. Click on the **Employee Benefits** Tab.
2. A list of the **Employee Benefit Funds** linked to your Business Profile will be displayed.
3. Click on the **Queries view.**
4. If you have previously submitted queries via Online Banking, these will be displayed in your **Queries History**.
5. Click on the **Add** table action to log a new query.
6. A **Call Me Back** capture page will be displayed.
7. Complete your preferred contact details.
8. Select the **Product Type** that you are interested in.
9. Click on **Submit**.
10. A **confirmation page** will be displayed.
11. Check that this information is correct and, if necessary, click on **Edit** to make amendments.
12. Click on **Submit**.
13. A **results page** will display the status of your request.
14. Click on **Finish** to complete the process.
15. This query will now reflect in your **Queries History**.

9.5.3 View Fund Contribution History

As an employer, you can use this functionality to view the details of the contributions made to a specific Employee Benefit Fund.

Important Information about Viewing the Contribution History of an Employee Benefit Fund	
	• This functionality is restricted to the **Primary User** (Profile Owner) of a **Business (Employer)** and **profile**. • For **Navigational Assistance**, please contact **Digital Banking Support**. • For **Information or Queries**, please contact your **Fund Administrator**.

How to View the Fund Contribution History

1. Click on the **Employee Benefits** Tab.
2. A list of the **Employee Benefit Funds** linked to your Business Profile will be displayed.
3. Click on the **Fund Name hyperlink** of the respective Fund.
4. Select the **Contribution History view**.
5. The **Contribution History** for the respective fund will be displayed.
6. Click on the **Description hyperlink** of a specific contribution to **view the details** of that contribution.
7. Click on **Back** to return to the **Contribution History** page.

9.5.4 View Detailed Balance of Fund

As an employer, you can use this functionality to view the detailed balance of a specific Employee Benefit Fund.

Important Information about Viewing the Detailed Balance of an Employee Benefit Fund	
	• This functionality is restricted to the **Primary User** (Profile Owner) of a **Business (Employer)** and **profile**. • For **Navigational Assistance**, please contact **Digital Banking Support**. • For **Information or Queries**, please contact your **Fund Administrator**.

How to View the Fund Contribution History

1. Click on the **Employee Benefits** Tab.
2. A list of the **Employee Benefit Funds** linked to your Business Profile will be displayed.
3. Click on the **Fund Name hyperlink** of the respective Fund.
4. Select the **Contribution History view**.
5. The **Contribution History** for the respective fund will be displayed.
6. Click on the **Description hyperlink** of a specific contribution to **view the details** of that contribution.
7. Click on **Back** to return to the **Contribution History** page.

2. News Tab

This tab allows you to keep updated for the latest News and Communications from FNB Online. You are also able to download your Operating Manual, Security Guide and Pricing Letters from this tab.

Operating Manual

Use this function to Download your Operating Manual.

The Operating Manual sets out the procedures for the use of the Service and serves as an overview of the Online Banking Enterprise™ solutions, detailing all relevant information needed to understand the functionality of the system.

Security Guide

Use this function to download the Online Banking Enterprise ™ Security Guide.

The Security Guide details information on common threats you are faced with as well as information that enables you to make informed decisions on how to defend yourself against these threats and protect your Online Banking Enterprise™ profile.

Pricing Letter

Use this function to download your Annual Price Review Letter

11. Liquidity Management

Liquidity Management is a suite of products offered by FNB which provides tools to better equip your Treasurers and Financial Managers in their day-to-day activities.

The following functionality is available:

- Cash Management
    - Cash Management allows you to administer and control your cash balances, allowing you to minimise interest charges and maximise interest earned.

- Balance View
    - Balance View provides you with visibility of your accounts and their balances using a single lens.

- Target Balancing
    - Target Balancing is the automated movement of funds between accounts in order to achieve a predetermined target balance in specified target accounts.

11.1 Cash Management

Cash Management (CashMan) allows you to administer and control your cash balances, allowing you to minimise interest charges and maximise interest earned.

The following CashMan functionality is available:

- Assign CashMan Permissions
- View a CashMan Structure
- CashMan Interest Management
- View CashMan Group Balances
- View CashMan Consolidated Balances

Cash Management Options:

1. **Pooling:**
   Pooling involves consolidation of balances through set-off.

   The following set-off options are available:

   a) **Full Set-Off:**
   - All the accounts in a CashMan group are consolidated into a total debit balance and a total credit balance.
   - The total balances are then set-off against each other to determine the net balance.
     The net balance is then used to calculate interest.
   - You can only operate a full set-off Cash Management Scheme if you meet the requirements of Regulation 16 of the Banks Act.

   b) **Marginal Set-Off:**
   - Interest is calculated in the same manner as full set-off, except there is an additional margin charge levied.

   c) **No Set-Off:**
   - All the accounts in a CashMan group are consolidated into a total debit balance and a total credit balance.
     The total balances are not set-off against each other.
     The total balances are then used for interest calculation purposes.

   d) **Account Level Actual:**
   - This option allows you to earn and pay interest at account level within a Cash Management group.
     Unlike the other set-off categories, balances are not consolidated nor set-off before calculating interest.
   - The benefit of this option is that it allows you to view the reports of your balances and access to the full Target Balancing capability.

2. **Target Balancing:**
   Target Balancing is the automated physical movement of balances between specified accounts which also allows for the consolidation of balances.

   Please note: The functionality offered for Target Balancing on the CashMan tab is limited; for the complete functionality, please access the Target Balancing sub-tab.

3. **Accessibility:**
   The Cash Management system enables you to access the following functionality:
   - View consolidated balances at group and sub-group level.

- Real-time access to group reports based on the previous day's closing balances.
- The ability to define and manage your Target Balancing plans as well as the interest calculation and distribution.
- Placement of your accounts in to a group structure and arranging them by reporting hierarchies.
- View, print, export download and schedule Cash Management reports.

11.1.1 Assign CashMan Permissions

An Administrator can use this function to assign CashMan Permissions to a user; permissions can be allocated via the Profiles tab.

1. Select the **Profiles** tab.
2. Select the **Maintain** button directly from the **User Dashboard** or click on **Menu** for more options and select **Maintain**.
3. Select the user you want to maintain by clicking on the user **name hyperlink**.
4. Select the **Liquidity Management Permissions** sub tab
5. Select the **CashMan** icon.
6. Select the **check box(es)** to confirm the relevant user permissions you want to allocate for the user.
7. Click on **Save & Exit** to save the User with a status of Work in Progress and click on **Authorise** to authorise the User.

11.1.2 View a CashMan Structure

Use this function to view a Cash Management structure on Online Banking Enterprise™.

1. Click on the **Liquidity Management** tab.
2. Your Cash Management structure will be displayed by Level, Name and CCN.
3. Click on the **Name hyperlink** to expand the group and view the accounts linked to each group. Click on the hyperlink again to collapse the expanded group view. The expanded group view allows you to:
    - View the group **daily Consolidated** and **monthly Summary** balances for the group by clicking on the **CCN** hyperlink.
    - View the daily balances for the individual account/s in the group by clicking on the **Account** hyperlink.
4. Click on the **CCN hyperlink** to view the daily Consolidated Balances for the group.
5. Click on the **Daily Balances** pill to view the daily balances of the Cashman group or click on the **Summary** pill to view the monthly balances of the Cashman group.
6. You can **Print**, **Download** or **Export** this information.

11.1.3 CashMan Interest Management

Use this function to:

- View your Interest Rate History and Interest Distribution Plan
- Maintain your Interest Distribution Plan
- View your Interest Audit Trail

- View your Account Balances
- View, Set-up, Maintain or Delete Scheduled Exports on Online Banking Enterprise™.

11.1.3.1 View Interest Rate History

Use this function to view the history of interest rate changes made to specific account/s or CCN/s in a Cash Management Structure.

1. Click on the **Liquidity Management** tab.
2. The Cash Management structure will be displayed by Level, Name and CCN.
3. Click on the side **Cashman Menu** for more options and select **Interest Rate History**.
4. The current and previous **Interest Rate** details will be displayed.
5. You can **Print** or **Download** this information.

11.1.3.2 View Interest Distribution Plan

Use this function to view the current interest distribution plans in place for the Cash Management structure.

1. Click on the **Liquidity Management Tab**.
2. The Cash Management structure will be displayed by Level, Name and CCN.
3. Click on the side **Cashman Menu** for more options and select **Interest Distribution Plan**.
4. The relevant Interest Distribution details will be displayed.
5. You can **Print** or **Download** this information.

11.1.3.3 Maintain Interest Distribution Plan

Use this function to request changes to be made to a Cash Management Interest Distribution Plan.

The request must be authorised on Online Banking Enterprise™.

The requested change will then be sent to the FNB fulfilment team where it will be checked and, if correct, will be implemented within 2 business days.

1. Click on the **Liquidity Management** tab.
2. The Cash Management structure will be displayed by Level, Name and CCN.
3. Click on the side **Cashman Menu** for more options and select **Maintain Plan**.
4. Click in the checkbox under the Terms and Conditions.
5. Click on **Continue**.
6. Capture the required changes.
7. Click on **Save & Exit** if you want to make more changes later or, click on **Save** to ensure no captured information is lost as you are capturing or, **Cancel** to not save the changes or, **Submit** to have your changes authorised if you are not an authoriser or have dual authorisation for the second authoriser to authorise or **Authorise** if you want to authorise the changes.
8. You can **Print** or **Download** this information.

Important Notes:

- Changes must be authorised **5 business days** before the effective date as FNB must still approve these changes.

- Changes to the **Interest Capitalisation date** cannot be submitted via Online Banking Enterprise™.

11.1.3.4 View Interest Audit Trail

Use this function to view the Interest distribution transactions of a selected CCN.

1. Click on the **Liquidity Management** tab.
2. The Cash Management structure(s) will be displayed by Level, Name and CCN.
3. Click on the side **Cashman Menu** for more options and select **Audit Trail**.
4. An Audit trail of the relevant Interest Distribution details will be displayed.
5. You can **Print** or **Download** this information.

11.1.3.5 View Account Balances

Use this function to view account balances for a selected CCN.

1. Click on the **Liquidity Management** tab.
2. The Cash Management structure will be displayed by Level, Name and CCN.
3. Click on the side **Cashman Menu** for more options and select **Account Balances**.
4. Select a **CCN** on the **Search By** drop-down menu.
5. Select an **Account Number** on the **Search By** drop-down menu.
6. A history of the **daily end-of-day balances** for the specified account number will be displayed; this includes:
    - Debit and Credit interest rates
    - Daily and Daily Aggregate Interest
7. You can **Print** or **Download** this information.

11.1.3.6 View Scheduled Exports

Use this function to view the scheduled exports that have been created for CashMan.

1. Click on the **Liquidity Management** tab
2. The Cash Management structure will be displayed by Level, Name and CCN.
3. Click on the side **Cashman Menu** for more options and select **Scheduled Exports.**
4. Select on the CCN you want to view.
5. A list of your Scheduled Exports will be displayed
6. You can **Print** or **Download** this information.

11.1.4 View CashMan Group Balances

Use this function to view the Daily Group Balances, the Daily Group Interest and Summary of information of all the accounts linked to a CCN.

11.1.4.1 View Daily Balances

Use this function to view daily balance information of an account liked to a CCN.

1. Click on the **Liquidity Management Tab**.
2. The Cash Management structure will be displayed by Level, Name and CCN.
3. Click on the side **Cashman Menu** for more options and select **Daily Balances.**
4. Select the CCN you want to view.
5. The end of day balances for the last five days historical 5-day balances for accounts linked to the selected CCN will be displayed by Account and Date.
6. You can **Print** or **Download** this information.

11.1.4.2 View Group Daily Interest

Use this function to view the effective balances, interest rates and aggregate interest earned on the individual accounts linked to the CCN(s).

1. Click on the **Liquidity Management Tab**.
2. The Cash Management structure will be displayed by Level, Name and CCN.
3. Click on the side **Cashman Menu** for more options and select **Daily Interest.**
4. Select the CCN you want to view.
5. The Effective Balance, Interest Rate, Daily Interest and Aggregate Interest will be displayed for the previous day at account level.
6. You can **Print** or **Download** this information.

11.1.4.3 View Group Balance Summary

Use this function to view the total and net balances, interest rates, interest earned or interest payable. The data available and displayed for the Group Balances summary varies, based on Set-off category loaded on your CashMan structure.

1. Click on the **Liquidity Management Tab**.
2. The Cash Management structure will be displayed by Level, Name and CCN.
3. Click on the side **Cashman Menu** for more options and select **Summary.**
4. Select the CCN you want to view.
5. The end of day historical 5-day debit, credit, net position for accounts linked to the selected CCN will be displayed. The below information will also be displayed:
    - Debit and credit interest rate
    - Debit interest
    - Credit interest
    - Net interest
    - Aggregate interest
6. You can **Print** or **Download** this information.

Please note:
The debit, credit and net interest will be displayed based on the set-off type of your CCN.
Where the CCN is on full set-off or marginal set-off, the net interest will be displayed.
Where the CCN is on no set-off or account level actual, the debit and credit interest will be displayed.

11.1.5 View CashMan Consolidated Balances

Use this function to view the Daily Consolidated Balances and Summary of information of all the accounts linked to a CCN.

11.1.5.1 Consolidated Daily Balances

Use this function to view the total and net balances, interest rates, interest earned or interest payable.

1. Click on the **Liquidity Management Tab**.
2. The Cash Management structure will be displayed by Level, Name and CCN.
3. Click on the side **Cashman Menu** for more options and select **Daily Balances.**
4. Select the CCN you want to view.
5. The consolidated end of day historical 5-day debit and credit balances selected CCN will be displayed. The below information will also be displayed:
    - Debit interest
    - Credit interest
    - Net interest
    - Aggregate interest
    - Debit interest rate
    - Credit interest rate
6. You can **Print** or **Download** this information.

Please note:
The debit, credit and net interest will be displayed based on the set-off type of your CCN.
Where the CCN is on full set-off or marginal set-off, the net interest will be displayed.
Where the CCN is on no set-off or account level actual, the debit and credit interest will be displayed.

11.1.5.2 Consolidated Balance Summary

Use this function to view a summary of information of the total account balances, interest rates and interest earned/paid on accounts.

1. Click on the **Liquidity Management Tab**.
2. The Cash Management structure will be displayed by Level, Name and CCN.
3. Click on the side **Cashman Menu** for more options and select **Summary.**
4. Select the CCN you want to view.
5. The consolidated historical monthly balances will be displayed consisting of the below information:
    - Average gross debit and credit balances
    - Total gross debit and credit balances
    - Average net debit and credit balances
    - Total net debit and credit balances
    - Total debit and credit interest

6. You can **Prin**t or **Download** this information.

Please note: The debit, credit and net interest will be displayed based on the set-off type of your CCN. Where the CCN is on full set-off or marginal set-off, the net interest will be displayed. Where the CCN is on no set-off or account level actual, the debit and credit interest will be displayed.

11.1.5.3 Target Balancing Plan

Use this function to view and maintain your Target Balancing Plans

Please note: The functionality offered on Target Balancing on the CashMan tab is limited.
For the complete functionality, please access the Target Balancing sub tab

11.2 Balance View

Balance View provides you with visibility of your accounts and their balances using a single lens. Accounts can be viewed using predefined categories i.e. Entity, Currency, Account Type, Bank (provided SWIFT capabilities exist within each counter-party bank environment) and Country. You can also view your accounts using a Custom category. This allows you to group your accounts into custom subcategories that are defined by you.

Balance View allows you to view your accounts and their balances in a detailed and consolidated manner. The detailed view provides account level information of your accounts and their balances as well as subtotals for these balances. The consolidated view provides a summary of your balances for each category as well as a consolidated position of your balances.

Balance View also enables you to notionally translate your account balances to a reporting currency of your choice.

The following Balance View functionality is available:

- Assign Balance View Permissions
- View Balances
- Custom Subcategories
- Set a Reporting Currency
- Scheduled Exports - Balance View

Balance View Options:

- A PDF version of the onscreen filtered view
- An exportable CSV file format report of all accounts and their details
- A scheduled export in a CSV file format, PDF file format or both PDF and CSV file formats

11.2.1 Assign Balance View Permissions

Use this function to assign Balance View Permissions to a user.

Administrators can assign the Balance View permissions for the Users via the Profiles tab:

1. Click on the **Profiles** tab.
2. Select the **Maintain** button directly from the **User Dashboard** or click on **Menu** for more options and select **Maintain User**.
3. Select the user you want to maintain by clicking on the user name hyperlink.
4. Select the **Liquidity Management Permissions** sub tab.
5. Select the **Balance View** icon to go to the account permissions page. If you do not have the Cashman and Target Balancing product, the Balance View account permissions page will display immediately after clicking the Liquidity Management Permissions sub tab.
6. Select the **check box(es)** next to the accounts you want to allocate for the user.
7. Click on the **Submit** button if you are not an authoriser or have dual authorisation for the second authoriser to authorise or **Authorise** button to authorise. Click on the **Cancel** button to discard changes made.

11.2.2 View Balances

You can view your balances in either a Detail view or Summary view with the Detail format being the default.

11.2.2.1 Detail View

1. Click on the **Liquidity Management** tab.
2. Click on the **Balance View** sub tab.
3. The detailed Account Balances for all the accounts will be displayed on the **Detail** pill according to the view selected. E.g. if the Entity view is selected, your accounts and their balances will be grouped into the Entities that they belong to. The balances will be displayed in the local currency and the reporting currency selected. The subtotals for the Entities will be displayed in the reporting currency selected.
4. You can Print, Download or Export this information.

11.2.2.2 Summary View

1. Click on the **Liquidity Management** tab.
2. Click on the **Balance View** sub tab.
3. Click on the **Summary** pill and a summary view of your balances will be displayed

A consolidated position of all your balances will be displayed in the reporting currency selected. This will indicate your Net Cash Balance, your total credit and debit balances. You will also see the subtotal of your balances as per the view selected and the reporting currency selected. You can also view the details by clicking on the hyperlink. E.g. If you select the Entity view, you will see the subtotals for each entity in your balance view structure. If you click on the hyperlink, your balances will be displayed in the Detail format.

Important Notes!

- FRB account balances are quoted on a real time basis.
- Off-us account balances are quoted as at the end of day (EOD) of the previous day.
- The balance date column displays the date and time the account balance was last updated.
- Account balances will be displayed in the local currency and the reporting currency, if selected.

You can Print or Download this information.

11.2.3 Custom Subcategories

Use this function to view your account balances in Custom subcategories using the “Group by’ option on the Detail and Summary pills. The custom subcategories can only be created, maintained or deleted by an administrator.

11.2.3.1 How to create a Custom Subcategory

Use this function to create a Custom subcategory.

1. Click on the **Liquidity Management** tab.
2. Click on the **Balance View** sub tab.
3. Click on the **Client Preferences** pill
4. A list of all existing subcategories will be displayed, where these have been created.
5. Click on **Add** or **Add custom category** to add a new export. If clicking on **Add**, Click on **Subcategory** for the prompt “What would you like to add?”.
6. Capture a Subcategory name.
7. Select the required account/s to assign to this subcategory.
8. Click on the **Add** button.
9. Click on the **Confirm** button. You can edit the details captured for the subcategory by clicking on the **Edit** button or cancel the action by clicking on the **Cancel** button.
10. Click on the **Finish** button.

11.2.3.2 How to view a Custom subcategory

Use this function to view a Custom subcategory that you have created.

1. Click on the **Liquidity Management** tab.
2. Click on the **Balance View** sub tab.
3. Click on the **Client preferences** pill.
4. A list of all existing subcategories will be displayed.
5. Click on the hyperlink of the name of the subcategory you want to view.
6. The account/s assigned to that subcategory will then be displayed.
7. Click on the **Back** button to go back to the Subcategory List.

11.2.3.3 How to maintain a Custom subcategory

Use this function to maintain a Custom subcategory that you have created.

1. Click on the **Liquidity Management** tab.
2. Click on the **Balance View** sub tab.
3. Click on the **Client preferences** pill.
4. A list of all existing subcategories will be displayed.
5. Click on the **Maintain** button for the subcategory you want to maintain.
6. Maintain the subcategory name and/or accounts selected as required.
7. Click on the **Update** button.
8. Click on the **Confirm** button. You can edit the details captured for the subcategory by clicking on the **Edit** button or cancel the action by clicking on the **Cancel** button.
9. Click on the **Finish** button.

11.2.3.4 How to delete a Custom subcategory

Use this function to delete a Custom subcategory that you have created.

1. Click on the **Liquidity Management** tab.
2. Click on the **Balance View** sub tab.
3. Click on the **Client preferences** pill.
4. A list of all existing subcategories will be displayed.
5. Click on the **Delete** button for the subcategory you want to delete.
6. Click on the **Delete** button to delete or the **Cancel** button to cancel the action and go back to the Subcategory List.

Important Notes:

- An administrator can create multiple subcategories; however, all these subcategories will be linked to a single Custom category. This Custom category is available for selection in the "Group by" drop-down list on the Detail and Summary pills.
- An administrator cannot create a subcategory name using the pre-defined category names i.e. Entity, Currency, Account Type, Bank, Country and Custom.
- Users will be able to view their accounts in the Custom category view in line with Balance View account permissions granted to them.
- An account can only be assigned to one subcategory at a time.
- Where accounts have not been assigned to a subcategory, these accounts will be displayed in a default subcategory called Unassigned.

11.2.4 Set a Reporting Currency

You can select a preferred reporting currency to view your balances in.

1. Click on the **Liquidity Management** tab.
2. Click on the **Balance View** sub tab.
3. Click on the **User Preferences** pill
4. Select your preferred reporting currency from the drop-down list.

Note: The currency preference will be retained for all views and reporting.

11.2.5 Scheduled Exports - Balance View

Use this function to view, set-up, maintain or delete scheduled exports. This function can also be used to view and export activity logs for scheduled exports.

11.2.5.1 View Balance View Scheduled Exports

Use this function to view your Balance View scheduled exports.

1. Click on the **Liquidity Management** tab.
2. Click on the **Balance View** sub tab.
3. Click on the **Scheduled Exports** pill.
4. A list of your Scheduled exports and Scheduled exports created by other users on the same profile as yours will be displayed on the page.
5. Click on the hyperlink of the name of the requester whose scheduled exports you want to view.
6. The details of the scheduled export will be displayed.

11.2.5.2 Create Balance View Scheduled Exports

Use this function to create a scheduled export on Online Banking Enterprise™ to have your Balances automatically emailed to you daily, weekly or monthly to your preferred email address. In this way, you do not need to login to Online Banking to view this information.

1. Click on the **Liquidity Management** tab.
2. Click on the **Balance View** sub tab.
3. Click on the **Scheduled Exports** pill.
4. A list of your Scheduled exports and Scheduled exports created by other users on the same profile as yours will be displayed on the page.
5. Click on **Add** or **Add scheduled export** to add a new export. If clicking on **Add**, Click on **Scheduled export** for the prompt “What would you like to add?”.
6. Capture the below fields:
   - Requester Name
   - Requester Surname
   - Frequency
   - Execution Time
   - File Format
   - Primary Email Address
   - Other Email Address 1 (This is not mandatory)
   - Other Email Address 1 (This is not mandatory)
7. Click on the **Add** button.
8. Click on the **Confirm** button. You can edit the captured details by clicking on the **Edit** button or cancel the action by clicking on the **Cancel** button.
9. Click on the **Finish** button.

11.2.5.3 Maintain Balance View Scheduled Exports

Use this function to maintain a scheduled export that you have created.

1. Click on the **Liquidity Management** tab.
2. Click on the **Balance View** sub tab.
3. Click on the **Scheduled Exports** pill.
4. A list of your Scheduled exports and Scheduled exports created by other users on the same profile as yours will be displayed on the page. You will only be able to maintain the Scheduled exports that you have created.

5. Click on the **Maintain** button for the scheduled export you want to maintain.
6. Click on the **Update** button once the required amendments to the Scheduled export details have been made or cancel the action by clicking on the **Cancel** button.
7. Click on the **Confirm** button. You can edit the captured details by clicking on the **Edit** button or cancel the action by clicking on the **Cancel** button.
8. Click on the **Finish** button.

11.2.5.4 Delete Balance View Scheduled Exports

Use this function to delete a scheduled export that you have created.

1. Click on the **Liquidity Management** tab.
2. Click on the **Balance View** sub tab.
3. Click on the **Scheduled Exports** pill.
4. A list of your Scheduled exports and Scheduled exports created by other users on the same profile as yours will be displayed on the page. You will be able to delete the Scheduled exports that you have created as well as those created by other users.
5. Click on the **Delete** button for the scheduled export you want to delete.
6. Click on the **Delete** button to delete or the **Cancel** button to go back to the Scheduled Exports List.

11.2.5.5 View activity logs for Balance View Scheduled Exports

Use this function to view activity logs detailing actions carried out on Balance View scheduled exports such as create, maintain or delete.

1. Click on the **Liquidity Management** tab.
2. Click on the **Balance View** sub tab.
3. Click on the **Scheduled Exports** pill.
4. Click on the **Activity logs** icon.
5. A list of activities carried out on each scheduled export will be displayed such as create, maintain or delete.
6. Click on the hyperlink of the name of the requester to view further details of activities carried out on a specific scheduled export.
7. Click on the **Back** button to go back to the Scheduled Exports Activity Logs List.
8. Click on the **Export** button to export a PDF file format of the scheduled exports activity logs or the **Back** button to go back to the Scheduled Exports List.

11.3 Target Balancing

Target Balancing is the automated movement of funds between accounts in order to achieve a predetermined target balance in specified target accounts.

The following functionality is available:

- Assign Target Balancing Permissions
- View a Target Balancing Execution Plan
- Maintain a Target Balancing Plan
- View a Target Balancing Plan Execution Report
- Scheduled Exports - Target Balancing Plan Execution Report

Target Balance Options

1. **Target Balance**

   This target balance option allows you to set a target balance per target account. If the account balance, at the elected execution time is above the target balance, the excess funds will be swept to the primary nominated account. If the balance is below the target balance, the shortfall will be funded from the nominated account/s.

2. **Fixed Amount**

   The fixed amount option allows you to set a fixed amount per target account to be either swept to a primary nominated account, or funded from the nominated account/s.

3. **Threshold Balance**

   The threshold balance option allows you to set a minimum and maximum balance threshold and minimum and maximum target balance amounts per target account. If an account balance is below the minimum threshold, the shortfall will be funded by the nominated account/s back to the specified minimum target balance. If the account balance is above the maximum threshold, the excess balance above the maximum target balance will be swept to the primary nominated account.

   This function allows you to view and maintain existing Target Balancing plans as well as view and schedule Target Balancing Plan Execution Reports on Online Banking Enterprise™.

11.3.1 Assign Target Balancing Permissions

Use this function to assign Target Balancing Permissions to a user.

Administrators can allocate the Target Balancing permissions for the Users via the Profiles tab:

1. Click on the **Profiles** tab**.**
2. Select the **Maintain** button directly from the **User Dashboard** or click on **Menu** for more options and select **Maintain**.
3. Select the user you want to maintain by clicking on the user name hyperlink.
4. Select the **Liquidity Management Permissions** sub tab.

5. Select the **Target Balancing** icon.
6. Select the check box(es) to confirm the relevant user permissions you want to allocate for the user.
7. Click on the **Submit** button if you are not an authoriser or have dual authorisation for the second authoriser to authorise or **Authorise** button to authorise. Click on the Cancel button to discard changes made.

Important Notes:

- Target Balancing permissions are granted at CCN level and not Plan level i.e. If a user is granted full access to a CCN level, that user will have access to all plans under that CCN level.

11.3.2 View a Target Balancing Execution Plan

Use this function to view your Target Balancing Plan list and individual Target Balancing Plans.

1. Click on the **Liquidity Management** Tab.
2. Click on the **Target Balancing** sub tab. This will display your Target Balancing Plan List.
3. Click on the **CCN - Plan ID hyperlink** to view details of your Target Balancing Plan.
4. You can Print or Download this information.

11.3.3 Maintain a Target Balancing Plan

Use this function to request changes to an existing Target Balancing Plan.

The request must be authorised on Online Banking Enterprise™.

The requested change will then be sent to our fulfilment team where it will be checked and if correct will then be implemented within 2 business days.

1. Click on the **Liquidity Management** Tab.
2. Click on the **Target Balancing** sub tab. This will display your Target Balancing Plan List.
3. Click the **Maintain** button for the Target Balancing Plan that you want to maintain.
4. Click on the **Maintain** button for a specific Target Account under Target Balancing Plan Accounts.
   The following details can be maintained:
   - **Target Type** for a Target Balance and Fixed Amount Target Balancing type
   - **Target Amount** for a Target Balance and Fixed Amount Target Balancing type
   - If the **Target Type** for the respective account is **Threshold,** then **Minimum Threshold Amount**, **Maximum threshold Amount**, **Minimum Target Amount** and **Maximum Target Amount** can be maintained.
   - **Target Balance Action**
   - **Sweep Reference**

   This step can be ignored if the above details do not need to be maintained. You will proceed from step 3 to step 6.
5. Once the required maintenance has been selected, click the **Update** button.
6. You will then be able to maintain the following details:
   - **Plan Name**
   - **Plan Status**. You can suspend or activate a plan.
7. Once the required maintenance has been selected, Click the **Update** button.

8. Click on the **Confirm** button. You can edit the maintenance instruction by clicking on the **Edit** button or cancel the instruction by clicking on the **Cancel** button.
9. Click on the **Finish** button after confirming the maintenance instruction.
10. Click on the **Authorise** tab to authorise the maintenance. The Target Balance plan number and authorisation status will be displayed on this screen. You can click on the plan number in the 'Service Short Description' column to view the plan details that you want to authorise.
11. Select the check box(es) for the plans and click Authorise. A user can reject this authorisation with a reason. If you have dual authorisation, a second authoriser will be required to authorise the maintenance requested and authorised by the first authoriser.
12. You can **Print** or **Download** this information.

Important Notes:

- A user cannot submit maintenance for a Target Balancing Plan where authorisation is pending for a maintenance request.
- You cannot change the Nominated and/or Target account numbers associated with the Target Balance plans. Please contact your Bank representative to assist you with these changes.
- A Threshold Target Balancing type plan cannot be converted to a Target Balance or Fixed Amount Target Balancing plan or vice versa. If you wish to convert a Threshold Target Balancing plan to a Target Balance or Fixed Amount Target Balancing plan or vice versa, please contact your Bank representative to assist you with this change.
- When a change is made to the plan reference, the new reference will appear on all Client statements, interim statements and transaction history.

11.3.4 View a Target Balancing Plan Execution Report

Use this function to view your Target Balancing Plan Execution Report.

The following functionality is available:

- View
- Download (PDF File Format)
- Export (CSV File Format)

How to View a Target Balancing Plan Execution Report

1. Click on the **Liquidity Management** Tab.
2. Click on the **Target Balancing** sub tab.
3. Your Target Balancing Plan List will be displayed.
4. Click on the **Report** button for the respective plan.
5. Select a **Report Date** and click the **Continue** button.
6. The execution time/s that your Target Balance plan executed on will be displayed. Select the desired **Execution Time hyperlink** to view the report or click the **Export** button to export a CSV file format.
7. On clicking the hyperlink, the Report for the selected **Execution Time** will be displayed.
8. You can **Download** or **Print** this report.

9. Click on **Back** to go back to the **Date selection** or once you click **Back**, then click **Cancel** to close the screen.
10. You can **Print** or **Download** this information.

Important Notes:

- A Target Balancing Plan Execution Report will only be available for active plans.

11.3.5 Scheduled Exports - Target Balancing Plan Execution Report

Use this function to view, create, maintain or delete scheduled exports. This function can also be used to view and export activity logs for scheduled exports.

11.3.5.1 Create Scheduled Exports for a Target Balancing Plan Execution Report

Use this function to create a scheduled export for a Target Balancing Plan Execution Report.

1. Click on the **Liquidity Management** Tab.
2. Click on the **Target Balancing** sub tab.
3. Click on the **Scheduled Exports** pill.
4. Click on **Add** or **Add scheduled export** to add a new export. If clicking on **Add**, Click on **Scheduled export** for the prompt “What would you like to add?”.
5. Capture the below fields:

    - Requester Name
    - Requester Surname
    - Delivery Time
    - Primary Email Address
    - Other Email Address 1 (This is not mandatory)
    - Other Email Address 2 (This is not mandatory)
    - Select a Target Balancing Plan/s. A user can select either 1 plan or multiple plans.
6. Click on the **Add** button once all the required details have been captured.
7. Click on the **Confirm** button. You can edit the captured details by clicking on the **Edit** button or cancel the action by clicking on the **Cancel** button.
8. Click on the **Finish** button.
9. You can **Print** or **Download** this information.

Important Notes:

- A Target Balancing scheduled export will be delivered to a user on the next business day after the day of execution of the plan at the delivery time the user selects when creating or maintaining the scheduled export.
- A separate scheduled export will be created for each plan if a user selects multiple Target Balancing Plans. A separate email will be delivered to the user for each Target Balancing Plan.

11.3.5.2 View Scheduled Export for a Target Balancing Plan Execution Report

Use this function to view a scheduled export for a Target Balancing Plan Execution Report.

1. Click on the **Liquidity Management** Tab.
2. Click on the **Target Balancing** sub tab.
3. Click on the **Scheduled Exports** pill. All your existing scheduled exports will be displayed. You will also be able to view scheduled exports created by other users on the same profile as yours.
4. Click on the **Requester hyperlink** to view further details for a specific scheduled export.
5. Click on the **Back** button to go back to the Scheduled Exports list.
6. You can Print or Download this information.

11.3.5.3 Maintain Scheduled Export for a Target Balancing Plan Execution Report

Use this function to maintain a scheduled export for a Target Balancing Plan Execution.

1. Click on the **Liquidity Management** Tab.
2. Click on the **Target Balancing** sub tab.
3. Click on the **Scheduled Exports** pill. You will also be able to view your scheduled exports as well as those created by other users on the same profile as yours. You will only be able to maintain the scheduled exports that you have created.
4. Click on the **Maintain** button for a specific scheduled export.
5. The following details can be maintained:
    - Requester Name
    - Requester Surname
    - Delivery Time
    - Primary Email Address
    - Other Email Address 1
    - Other Email Address 2
6. Click on the **Update** button.
7. Click on the **Confirm** button. You can edit the captured details by clicking on the **Edit** button or cancel the action by clicking on the **Cancel** button.
8. Click on the **Finish** button.
9. You can Print or Download this information.

Important Notes:

- A Target Balancing scheduled export will be delivered to a user on the next business day after the day of execution of the plan at the delivery time the user selects when creating or maintaining the scheduled export.
- A separate scheduled export will be created for each plan if a user selects multiple Target Balancing Plans. A separate email will be delivered to the user for each Target Balancing Plan.

11.3.5.4 Delete Scheduled Export for a Target Balancing Plan Execution Report

Use this function to delete a scheduled export for a Target Balancing Plan Execution Report.

1. Click on the **Liquidity Management** Tab.
2. Click on the **Target Balancing** sub tab.

3. Click on the **Scheduled Exports** pill. You will also be able to view your scheduled exports as well as those created by other users on the same profile as yours. You will be able to delete the scheduled exports that you have created as well as those created by other users on the same profile as yours.
4. Click on the **Delete** button for the scheduled export you want to delete.
5. Click on the **Delete** button to delete or the **Cancel** button to go back to the Scheduled Exports List.

11.3.5.5 View Activity Logs for Target Balancing Plan Execution Report Scheduled Exports

Use this function to view activity logs detailing actions carried out on the Target Balancing Plan Execution Report scheduled exports such as create, maintain or delete.

1. Click on the **Liquidity Management** tab.
2. Click on the **Target Balancing** sub tab.
3. Click on the **Scheduled Exports** pill.
4. Click on the **Activity logs** icon.
5. A list of activities carried out on each scheduled export will be displayed, e.g. create, maintain or delete.
6. Click on the hyperlink of the name of the requester to view further details of activities carried out on a specific scheduled export.
7. Click on the **Back** button to go back to the Scheduled Exports Activity Logs List.
8. Click on the **Export** button to export a PDF file format of the scheduled exports activity logs or the **Back** button to go back to the Scheduled Exports page.

12. Rewards Tab

You are able to view your rewards from the My Rewards tab.

When a Retail client (individual) selects the My Rewards tab, they will have access to the eBucks website embedded on the page, Business clients will have access to the eBucks for Business which will also be embedded on the page and Wealth individuals will have access to their Wealth Rewards information.

Should you have qualifying accounts linked to your Online profile that expands across multiple segments, you will have the option to select and switch between the relevant Rewards programmes (eBucks Rewards for individuals, eBucks for Business, or Wealth Rewards).

eBucks for Business

eBucks for Business is South Africa's leading rewards programme for FNB Business Banking customers.

Get discounts on business-related tools and services. eBucks for Business gives you access to highly discounted landline, cellphone and internet services as well as hardware and website hosting services.

A business can spend eBucks in a variety of ways:

Shop at the **eBucks for business shop** available on **Online Banking Enterprise™.**

1. Click on the **Rewards tab** where you will find latest special offers on phones, laptops, printers, designer furniture and much more.
2. When you ready to check out, click on the **checkout button**. You will receive a confirmation page displaying all your shopping cart details such as your Order number, Account number, Rand Amount, eBucks Business account, eBucks Total and the total of your order.
3. Click on **Submit** to submit your payment for authorisation or click on **Authorise** to continue with the authorisation process. When you click on Authorise, you will follow the same process as you would for any other payment which has been created on Online Banking Enterprise ™.

Note: You must have a qualifying account linked to your Online Banking Enterprise™ profile as well as permissions to capture once -off payments and/or capture and authorise once-off payments.

Shop at eBucks **Consumer shop** available on www.eBucks.com.

Members can also spend their eBucks in the following ways:

- Spend in the eBucks Shop on over 3,000 products.
- Spend at any of 12 Retail Partners such as Makro, Hifi Corp, Incredible Connection.
- Fill up with fuel at Engen.
- Spend at any of Online partners such as Kalahari.com.
- Spend on flights, accommodation, car hire via eBucks Travel Desk.

To register businesses, go to www.ebucks.com

For any queries or assistance with eBucks for Business, contact **087 320 3200**

13. Forex Tab

Forex is the exchange of foreign currency; Forex enables trade and transactions between countries.

For your added convenience, a Help sub-tab has been added within the Forex tab to provide you with further information regarding the different types of Forex Transactions/Products that are available.

The Forex landing page will list all the existing Global Payments that have been created on the system.

There are several action buttons available on the right side of the main screen which you can use to easily access the **Search, Download** and **Print** functions.

You can also use the easy action buttons available on the landing page to quickly access some of the most used payment functions. When using the easy buttons for a specific item you will be taken directly to the capture page for the selected transaction type.

The Menu on the left of the page will display the options that are applicable to the page and specific to your Forex permissions.

When the Menu is active, an Extended Menu List will be displayed in grey. This list provides quick access to functionality within that tab / sub-tab as well as to other commonly used functions on Online Banking Enterprise™.

Forex Permissions

Administrators can assign either Capture or Authorise permissions or have both these permissions and can assign the relevant transacting limits where applicable for the following Forex functionality:

Global Beneficiary Payments

- Capture Global Beneficiary Payments
- Authorise Global Beneficiary Payments + (authorised payment limit per account)

You can make Global Beneficiary Payments by saving your beneficiaries to one Global Beneficiaries List or your Administrators can opt in to use Forex Folders which allows you to create different beneficiary lists and group your Global beneficiaries together, with a common factor in the same Forex Folder.

Global Once Off Payments

- Capture Global Once Off Payment
- Authorise Global Once Off Payment + (authorised payment limit per account)

Global Transfers

- Capture Global Transfers
- Authorise Global Transfers + (authorised transfer limit per account)

Get Global Quote Global Payments and Transfers

- Global Payments - Get Quote + (authorised limit per account)
- Global Transfers - Get Quote + (authorised limit per account)

Global Receipts

- Capture Global Receipts
- Authorise Global Receipts + (authorised receipt limit per account)

Get Global Quote Global Receipts

- Global Receipts - Get Quote + (authorised limit per account)

Order Forex

- Capture Order Forex
- Authorise Order Forex + (authorised receipt limit per account)

Get Quote Order Forex

- Order Forex- Get Quote + (authorised limit per account)

PayPal

- PayPal – Top-Ups + (authorised limit per account)
- PayPal Withdrawal + (authorised limit per account)

In addition to the User permissions listed above, the Administrator(s) must confirm the **Number of Authorisers** required to authorise the following Forex Permissions:

- Global Beneficiary Maintenance
- Global Beneficiary Payments
- Global Once-Off Payments
- Global Receipts
- Global Transfers
- Order Forex

These permissions must be allocated to the Site by the Administrator(s) via the **Profiles Tab** > **Site Settings** > **Number of Authorisers**

How to Allocate Forex Permissions for Users

1. Select the **Profiles** tab.
2. Select the **Maintain** button directly from the **User Dashboard** or click on **Menu** for more options and select **Maintain**.
3. Select the user you want to maintain by clicking on the user name hyperlink.
4. Select the **Account Permissions** sub tab and select the **Forex** option you want to allocate permissions for.
5. If you have not opted in to use folders, you will be required to select the **Recipient Permissions** and assign the relevant permissions per user.
6. Select the **check box(es)** to confirm the relevant user permissions as well as the **Limits** you want to allocate for the user.
7. Click on **Save & Exit** to save the User with a status of Work in Progress and click on **Authorise** to authorise the User.

If dual/multiple authorisers are required, the second Administrator must complete the authorisation process.

13.1 Global Transfers

The following possible scenarios exist for multiple Global Account Transfers:

- Transfer funds from a South African Transactional Account to a Multi-Currency Global Account or a Customer Foreign Currency (CFC) Account.
- Transfer funds from a Multi-Currency Global Account or a Customer Foreign Currency (CFC) Account to a South African Transactional Account.
- Transfer funds from one Multi-Currency Global Account or Customer Foreign Currency (CFC) Account to another Multi-Currency Global Account or Customer Foreign Currency (CFC) Account.

13.1.2 Create a Transfer to / from a Global Account

Use this function to Transfer funds to or from a Global Account, or to/from or between CFC Accounts and other Transactional Accounts.

Notes:

- This functionality is only available to users who have a qualifying account linked to their Online Banking Enterprise™ profile.
- Users must have the relevant permissions to **Capture**, **Authorise** and/or **Get Quote** to process Forex Application for the qualifying account(s). These permissions must be allocated to each relevant User by the Administrator(s) via the **Profiles Tab** > **Account Permissions**.
- The Administrator(s) must confirm the **Number of Authorisers** required to authorise a Global Transfer transaction. These permissions must be allocated to the Site by the Administrator(s) via the **Profiles Tab** > **Site Settings** > **Number of Authorisers**.

Create a Global Transfer

1. Click on the **Forex tab**.
2. Click on the **Global Transfers** sub tab.
3. Click on the **Create** viewing option.
4. Enter a Transfer Name and select a **From Account** and click on **Continue**. The list of **accounts** in the drop down is restricted to those that you have permission to capture for.
5. The **Global Transfer Application Wizard** will start.
6. Complete all the required **Applicant Details** in the fields provided and click on **Continue**.
7. Complete the Transaction Details (including capturing a Value Date if Available. The value date may be today or a future date, depending on currency and the related cut off times. The application must be quoted on or before the stipulated value date. If you request a Quote and the value date is past due, you will need to de-authorise the application and re-select a new value date for the application) and click on Continue.
8. If applicable, select whether you have a **pre-booked deal with FNB or RMB**.

   If you have pre-booked a deal with FNB or RMB, you may search for Deals using any of the three options below:

   - Deal Reference Number
   - All deals matching the transaction criteria

- Date range

You may assign multiple deals to a single application and are not required to assign a deal to the full transaction value. If a Deal has been assigned to a portion of the full transaction value, the remainder may be booked at a spot rate at the time of the Quote Generation.

9. If a BoP code is required for the relevant Transfer type, you will need to click on the **+Add** button to add the related **BoP category code** for your transfer. **Note!** It is imperative that all information is captured correctly as it is required for Balance of Payments (BoP) reporting to the South African Reserve Bank (SARB). You may **enter the BoP code** or **Search** for it under the related **Category**.
10. Accept **Regulatory Declaration** and the **Terms and Conditions** and click on **Continue**.
11. Click on **Save and Exit** to save what you have captured on the current page. Click on **Cancel** if you do not want to continue with the transfer. Click on **Submit** to submit the transfer for authorisation.

Authorise the Global Transfer

Once the Global Transfer has been submitted for authorisation:

1. Click on the **Authorisation Needed** viewing option and select the application to authorise by clicking on the check box next to the item you want to authorise. **Note!** You can click on the hyperlinked name to view the application.
2. Click on **Authorise**.
3. A **confirmation page** is displayed.
4. Once you have viewed the information and confirmed the correctness thereof, the request must be authorised.
5. Select the transactions you want to authorise and click on the authorise button
6. Follow the authorisation instructions and complete the authorisation process for the transaction.
7. An authorisation result page will be displayed.
8. Click on **Finish**.

If multiple dual/multiple Authorisers are required, ask the second Authoriser to complete the authorisation process.

The status of the Transfer will change from Authorisation Requested to Partially Authorised or Fully Authorised depending on the Number of Authorisers required for Global Transfers.

The application must be Fully Authorised in order to proceed to Get Quote and complete the application.

Reject a Global Transfer Instruction

To **Reject** a Global Transfer Instruction, click on **Reject** and enter a description in the **Reason** field with a comment or reason for rejecting the transfer.

The system will display the ‘reason’ for rejecting the instruction on all pages where the Authorisation Audit Trail is displayed.

Get Quote and Process the Global Transfer

Once the Instruction has been **Fully Authorised**, users with the relevant **Get Quote** permissions will have the option to **Get a Quote** and **Process the Application**.

1. Click on the **Process Transfers** viewing option and click on the **Get Quote** button next to the item you want to process.
2. A **confirmation page** is displayed.
3. The authorised User can either select to **Accept or Decline**.

- **Accept Quote** - Select this option to accept the current quote and submit the transaction for processing. Once the quote has been accepted the payment will reflect under the History viewing option reflecting the status it is in.

- **Decline Quote** - Select this option if you would like to decline the current quote. A confirmation page will be displayed and, for statistical purposes, you will be required to select a reason for declining the quote.

If you have received a Quote with a Rate, the Rate may only be available for 2 Minutes, if you have not Accepted the Quote within the 2 minutes, you will be redirected to a page where you have the following options:

- **Re-Quote** - Select this option if you would like to get a new quote for your transaction.
- **Quote Later** - Select this option if you would like to complete the transaction later.

If documents are required for Exchange Control purposes, the status of the application under the History viewing option will reflect as **Documents Required**.

De-Authorise a Global Transfer Instruction

To **De-Authorise** a Global Transfer Instruction, click on **De-Authorise**. The transfer status will change to **Work in Progress** and will allow the user to make corrections and re-submit the Global Transfer for authorisation. **Note!** Only Authorisers can De-Authorise a Global Transfer.

View Global Transfer History

Use this function to view a history of Global Transfers that you have initiated on Online Banking.

1. Click on the **Forex** tab.
2. Click on the **Global Transfers** sub tab and select the **History** viewing option.
3. A list of your Global Transfers, together with the details and status of the transaction, are displayed.
4. To view the Application Details for a transaction, click on the **Name hyperlink**.

13.2 Global Payments

Use this function to make once-off and/or regular payments to a Global Beneficiary (International Beneficiary), view Global Payment History, Manage your Global Beneficiary and view or search Global Payment Beneficiaries.

13.2.1 Once-Off Global Payment

This function enables you to make a payment via SWIFT, in another country's currency, to an international bank account.

SWIFT, the Society for Worldwide Inter-Bank Financial Telecommunication, is an electronic communication method used by banks all over the world to correspond with each other and effect payments in a secure and standardised way.

Notes:

- This functionality is only available to users who have a qualifying account linked to their Online Banking Enterprise™ profile.
- Users must have the relevant permissions to **Capture**, **Authorise** and/ or **Get Quote** to process Forex Application for the qualifying account(s). These permissions must be allocated to each relevant User by the Administrator(s) via the **Profiles Tab** > **Account Permissions**.
- The Administrator(s) must confirm the **Number of Authorisers** required to authorise a Global Payments transaction. These permissions must be allocated to the Site by the Administrator(s) via the **Profiles Tab** > **Site Settings** > **Number of Authorisers**.

Create a Once-off Global Payment

1. Click on the **Forex tab**.
2. Click on the **Global Payments** sub tab.
3. Click on **+Add** and select **Once-off Payment**
4. Select the **Account Number** from which you would like to pay and click on **Continue**.
5. The **Application for Payment capture page** will be displayed.
6. Complete all the required **Applicant Details** in the fields provided and click on **Continue**.
7. Select whether you are making payment to an **Individual** or **Business** beneficiary.
8. Complete all the required **Beneficiary Details** in the fields provided and click on **Continue**.
9. Complete all the required **Payment Details** in the fields provided and click on **Continue**.
10. If applicable, confirm whether you have a **pre-booked deal with FNB** or **RMB**. If you have selected **Yes**, click on **+Add** and search for the relevant pre-booked deal. **Note!** The deal can be searched by: **Deal Reference Number**, **Date Range** or by selecting **All Deals Matching Transaction Criteria**. Select the relevant pre-booked deal from the **Search Results screen** and click on **Add**. All the selected pre-booked deals will be displayed on the screen, click on **Continue**. Please also note that you need to accept the **Declaration** that all unallocated amounts will be given a Spot Rate at the Time of Quoting.

11. If a BoP code is required for the relevant Payment type, you will need to click on the **+Add** button to add the related **BoP category code** for your payment. **Note!** It is imperative that all information is captured correctly as it is required for Balance of Payments (BoP) reporting to the South African Reserve Bank (SARB). You may **enter the BoP code** or **Search** for it under the related **Category**. Select the relevant **BoP code** from the search result list and complete the required details for the **Exchange Control Authority**, **BoP Specific Details** as well as **Third Party Details** if applicable.
12. A **confirmation page** is displayed, click on **Continue**.
13. Accept **Regulatory Declaration** if applicable (The Regulation Declaration will only be displayed if a BoP code was captured for the payment) and the **Terms and Conditions** and click on **Continue**.
14. You now have the option to select **Yes** to **Save the Beneficiary details**.

Upload Documents for the Global Payment

Depending on the BoP code selected for the payment, additional documents may be required for Exchange Control purposes. If applicable, the system will confirm which documents are required to complete your application. You may upload a maximum of 10MB per file.

1. Click on the **Document Upload** sub tab.
2. Click on the **Upload** button next to the applicable application.

3. Select the relevant **Document Upload** and the **File format**. Documents in the following formats may only be uploaded: PDF, Jpeg, Tiff, Gif.
4. Click on **Browse** to locate the file.
5. Click on **Upload**.
6. An upload **results page** will be displayed. You can either upload more documents by clicking the **Upload More** Button or you can select **Finish** to end the process.

The documents that you have uploaded will only reflect once they are processed by FNB/RMB.

Authorise the Global Payment

1. Select the **Authorisation Needed** viewing option (authorise permissions are required) and select the application to authorise by clicking on the check box next to the item you want to authorise. **Note!** You can click on the hyperlinked name to view the application.
2. Click on **Authorise** to proceed with the authorisation process.
3. Once completed, an authorisation **result page** will be displayed.
4. Click on **Finish**.

If multiple dual/multiple Authorisers are required, ask the second Authoriser to complete the authorisation process.

To **Reject** a Global Payment Instruction, click on **Reject** and enter a description in the **Reason** field with a comment or reason for rejecting the payment.

The system will display the ‘reason’ for rejecting the instruction on all pages where the Authorisation Audit Trail is displayed.

The status of the payment will change from **Authorisation Requested** to **Partially Authorised** or **Fully Authorised** depending on the **Number of Authorisers** required for **Global Payments**.

The application must be **Fully Authorised** in order to proceed to **Get Quote** and complete the application
.

Process the Global Payment

Once the Instruction has been **Fully Authorised**, users with the relevant **Get Quote** permissions will have the option to **Get a Quote** and **Process the Application**.

1. Click on the **Process Payment** viewing option and click on the Get Quote button next to the item you want to process.
2. A **confirmation page** is displayed.
3. The authorised User can either select to **Accept** or **Decline**.

- **Accept Quote** - Select this option to accept the current quote and submit the transaction for processing. Once the quote has been accepted the payment will reflect under the History viewing option reflecting the status it is in.

- **Decline Quote** - Select this option if you would like to decline the current quote. A confirmation page will be displayed and, for statistical purposes, you will be required to select a reason for declining the quote.

Once the quote has been accepted the payment will reflect under the **History viewing** option reflecting the status it is in.

If documents are required for Exchange Control purposes, the status of the application under the History viewing option will reflect as **Documents Required**.

De-Authorise a Global Payment Instruction

To **De-Authorise** a Global Payment Instruction, click on **De-Authorise**. The application status will change to **Work in Progress** and will allow the user to make corrections and re-submit the Global Payment Instruction for authorisation. **Note!** Only Authorisers can De-Authorise a Global Payment Instruction.

View Global Payment History

Use this function to view a history of all your Global Payments that you have initiated on Online Banking Enterprise™ for the last 30 days. Should you require history going back further than 30 days, please contact the Forex desk for assistance.

1. Click on the **Forex** tab.
2. Click on the **Global Payments** sub tab and select the **History** viewing option.
3. A list of your Global Payment Transactions, together with the details and status of the transaction, are displayed.
4. To view the Application Details for a transaction, click on the **Name hyperlink**.

13.2.2 Pay an existing Global Beneficiary

This function enables you to make a payment via SWIFT, in another country's currency, to a beneficiary that you have previously added to your Global Beneficiary list or to a Forex Folder.

SWIFT, the Society for Worldwide Inter-Bank Financial Telecommunication, is an electronic communication method used by banks all over the world to correspond with each other and effect payments in a secure and standardised way.

Notes:

- This functionality is only available to users who have a qualifying account linked to their Online Banking Enterprise™ profile.
- User must have the relevant permissions to **Capture**, **Authorise** and/ or **Get Quote** to process Forex Application for the qualifying account(s). These permissions must be allocated to each relevant User by the Administrator(s) via the **Profiles Tab** > **Account Permissions**.
- The Administrator(s) must confirm the **Number of Authorisers** required to authorise a Global Payments transaction. These permissions must be allocated to the Site by the Administrator(s) via the **Profiles Tab** > **Site Settings** > **Number of Authorisers**.
- It is imperative that all information is captured correctly as it is required for Balance of Payments (BoP) reporting to the South African Reserve Bank (SARB).

Create a Global Payment using your Global Beneficiary List

1. Click on the **Forex tab**.
2. Click on the **Global Payments** sub tab.
3. Click on **+Add** and select **Pay Beneficiary**
4. Click on the **Pay** easy button next to the Beneficiary you would like to pay.
5. Select the **Account Number** from which you would like to pay and click on **Continue**.
6. The **Global Payment Application capture page** will be displayed and will be pre-populated with the selected beneficiary's details.
7. If applicable, confirm whether you have a **pre-booked deal with FNB** or **RMB**. If you have selected **Yes**, click on **+Add** and search for the relevant pre-booked deal. **Note!** The deal can be searched by: **Deal Reference Number**, D**ate Range** or by selecting **All Deals Matching Transaction Criteria**. Select the relevant pre-booked deal from the **Search Results screen** and click on **Add**. All the selected pre-booked deals will be displayed on the screen, click on **Continue**.
8. If a BoP code is required for the relevant Payment type, you will need to click on the **+Add** button to add the related **BoP category code** for your payment. **Note!** It is imperative that all information is captured correctly as it is required for Balance of Payments (BoP) reporting to the South African Reserve Bank (SARB). You may **enter the BoP code** or **Search** for it under the related **Category**. Select the relevant **BoP code** from the search result list and complete the required details for the **Exchange Control Authority**, **BoP Specific Details** as well as **Third Party Details** if applicable.
9. A **confirmation page** is displayed, click on **Continue**.

10. Accept the Regulatory **Declaration** if applicable (The Regulation Declaration will only be displayed if a BoP code was captured for the payment) and the **Terms and Conditions** and click on **Continue**.

Create a Global Payment using your Global Forex Folders

1. Click on the **Forex tab**.
2. Click on the **Global Payments** sub tab
3. Select Folder from the Drop-down
4. Click on **+Add –Pay Beneficiary**
5. Type the name of the payment in the **Name** field.
6. Select the **Folder** from which payments must be made from the dropdown list in the Folder field.
7. Select the **Account Number** from which you would like to pay and click on **Continue**.
8. This page will display the **Beneficiaries** that have been saved in the **Folder** that you have selected to use.
9. Click on the **Pay** easy button next to the Beneficiary you would like to pay.
10. The **Global Payment Application capture page** will be displayed
11. Once you have selected the from account, the selected beneficiary's details will be pre-populated.
12. If applicable, confirm whether you have a **pre-booked deal with FNB** or **RMB**. If you have selected **Yes**, click on **+Add** and search for the relevant pre-booked deal. **Note!** The deal can be searched by: **Deal Reference Number**, D**ate Range** or by selecting **All Deals Matching Transaction Criteria**. Select the relevant pre-booked deal from the **Search Results screen** and click on **Add**. All the selected pre-booked deals will be displayed on the screen, click on **Continue**.
13. To select the required BoP code for the relevant Payment type, you will need to click on the **+Add** button to add the related **BoP category code** for your payment. **Note!** It is imperative that all information is captured correctly as it is required for Balance of Payments (BoP) reporting to the South African Reserve Bank (SARB). You may **enter the BoP code** or **Search** for it under the related **Category**. Select the relevant **BoP code** from the search result list and complete the required details for the **Exchange Control Authority**, **BoP Specific Details** as well as **Third Party Details** if applicable.
14. A **confirmation page** is displayed, click on **Continue**.
15. Accept the Regulatory **Declaration** if applicable (The Regulation Declaration will only be displayed if a BoP code was captured for the payment) and the **Terms and Conditions** and click on **Continue**.

Authorise the Global Payment

1. Select the **Authorisation Needed** viewing option (authorise permissions are required) and select the application to authorise by clicking on the check box next to the item you want to authorise. **Note!** You can click on the hyperlinked name to view the application.
2. Click on **Authorise** to proceed with the authorisation process.
3. Once completed, an authorisation **result page** will be displayed.
4. Click on **Finish**.

If multiple dual/multiple Authorisers are required, ask the second Authoriser to complete the authorisation process.

To **Reject** a Global Payment Instruction, click on **Reject** and enter a description in the **Reason** field with a comment or reason for rejecting the payment.

The system will display the ‘reason’ for rejecting the instruction on all pages where the Authorisation Audit Trail is displayed.

The status of the payment will change from **Authorisation Requested** to **Partially Authorised** or **Fully Authorised** depending on the **Number of Authorisers** required for **Global Payments**.

The application must be **Fully Authorised** in order to proceed to **Get Quote** and complete the application.

Process the Global Payment

Once the Instruction has been **Fully Authorised**, users with the relevant **Get Quote** permissions will have the option to **Get a Quote** and **Process the Application**.

1. Click on the **Process Payment** viewing option and click on the Get Quote button next to the item you want to process.
2. A **confirmation page** is displayed.
3. **The authorised User can either select to Accept or Decline.**

    - **Accept Quote** - Select this option to accept the current quote and submit the transaction for processing. Once the quote has been accepted the payment will reflect under the History viewing option reflecting the status it is in.
    - **Decline Quote** - Select this option if you would like to decline the current quote. A confirmation page will be displayed and, for statistical purposes, you will be required to select a reason for declining the quote.

Once the quote has been accepted the payment will reflect under the **History viewing** option reflecting the status it is in.
If documents are required for Exchange Control purposes, the status of the application under the History viewing option will reflect as **Documents Required**.

De-Authorise a Global Payment Instruction

To **De-Authorise** a Global Payment Instruction, click on **De-Authorise**. The application status will change to **Work in Progress** and will allow the user to make corrections and re-submit the Global Payment Instruction for authorisation. **Note!** Only Authorisers can De-Authorise a Global Payment Instruction.

View Global Payment History

Use this function to view a history of Global Payments that you have initiated on Online Banking.

1. Click on the **Forex** tab.
2. Click on the **Global Payments** sub tab and select the **History** viewing option.
3. A list of your Global Payment Transactions, together with the details and status of the transaction, are displayed.
4. To view the Application Details for a transaction, click on the **Name hyperlink**.

13.2.3 Manage your Global Beneficiaries

Save your international beneficiaries' details as follows:

- You can add your global beneficiary's details to a single Global Beneficiary list or
- You can create Forex Folders and set up multiple beneficiary lists and group your Global beneficiaries together, with their common factor in the same Forex Folder.

Using a Single Global Beneficiary List

Add a Single Beneficiary to your Global Beneficiary List

The Add Beneficiary function enables you to save the banking details of the individuals or companies that you pay regularly.

By adding these beneficiaries to your Global Beneficiary list, you can make payments to them without having to capture their account details every time.

1. Click on the **Forex tab**.
2. Click on the **Global Beneficiaries** sub tab.
3. A list of all your Beneficiaries will be displayed on the landing page.
4. Click on **+Add** and select **New Beneficiary** to add a new beneficiary.
5. Select whether you are adding an **Individual** or **Business** beneficiary.
6. The **Add Global Beneficiary** capture page will be displayed.
7. Complete all the required **Beneficiary details** and **Beneficiary Banking Details** in the fields provided and click on **Submit**. **Note!** You may select the **Search** option to find the relevant **Swift/BIC Code** for the Beneficiary.
8. A **confirmation page** will be displayed. Check that these details are correct and, if required, click on **Edit** to make any amendments.
9. Once you have viewed the information, the request must be authorised.
10. Select the **Authorisation Needed** viewing option (authorise permissions are required).
11. Select the relevant **Beneficiary** and click on **Authorise** to proceed with the authorisation process.
12. Once completed, an authorisation **result page** will be displayed.
13. Click on **Finish**.

If there are multiple Authorisers, all Authorisers must complete the authorisation process.

Note! No validation of the intended beneficiary account name against the actual beneficiary account details shall be done in respect of Forex payments.

Import Bulk Beneficiaries to your Global Beneficiary List

Use this function to import multiple Global Beneficiaries using a file which has been created off-line using the (.csv) spreadsheet provided by FNB Online.

1. Click on the **Forex tab**.
2. Click on the **Global Beneficiaries** sub tab.
3. A list of all your Beneficiaries will be displayed on the landing page.
4. Click on **+Add** and select **Import Beneficiaries.**
5. Click on Download CSV Template.

6. Once downloaded, you can enter all the required information for multiple Global Beneficiaries off-line using this (.csv) spreadsheet, save it and then import the file directly into Online Banking Enterprise™.
7. You have the option to choose whether to **Reject Invalid Items only** or to **Reject all the items** if an invalid item is found in your spreadsheet during the Beneficiary Import.
8. The **File Location** field requires you to locate the file that you want to import. If you know where the file is located, you can type the file path into the File Path field, or click on **Browse** to locate it.
9. Choose where you would like to send your **Results** file to. Depending on your choice your Results file will be created and sent to your **Online Banking Enterprise™ Inbox** or to your specified **email Address**.
10. Click on **Submit**.
11. A new page will display with your Global Beneficiary details.
12. Click on **Finish** to return to the Global Payments landing page. Alternatively click on **Import Again** if the file failed and you would like to import the file again.
13. A **Results file** will be created and sent to your **Online Banking Enterprise™ Inbox** or specified **email Address.**
14. The results of an Import File item will be either **Failed** if the item failed during the creation process or **Successful** if the Beneficiary was successfully created.
15. Check that these details are correct and, if required, click on **Edit** to make any amendments.
16. Once you have viewed the information, the request must be authorised.
17. Select the **Authorisation Needed** viewing option (authorise permissions are required).
18. Select the relevant **Beneficiary** Click on **Authorise** to proceed with the authorisation process.
19. Once completed, an authorisation **result page** will be displayed.
20. Click on **Finish**.

If multiple dual/multiple Authorisers are required, ask the second Authoriser to complete the authorisation process.

Note! No validation of the intended beneficiary account name against the actual beneficiary account details shall be done in respect of Forex payments.

Export a list of all your existing Beneficiaries

Use this function to export a CSV list of all your Beneficiaries held within in the Global Beneficiary List.

1. Click on the **Forex tab**.
2. Click on the **Global Beneficiaries** sub tab.
3. A list of all your Beneficiaries will be displayed on the landing page.
4. Click on the **Bulk Beneficiary Export** option.
5. Choose where to would like to send the exported File to.
    - If **email** was selected, enter the desired **email address**.
    - If **Inbox** was selected, **open** your **Online Banking Enterprise ™ Inbox**, select the file, click on **Download** and save to a destination of your choice in order to view the information.

6. Click on **Submit**.
7. The information will be saved in a zipped file, per exported folder.

Modify the Details of a Beneficiary on your Global Beneficiary List

Use this function to edit the Bank Account and/or Personal Details of a beneficiary that has been added to your Global Beneficiary list.

1. Click on the **Forex tab**.
2. Click on the **Global Beneficiaries** sub tab.
3. A list of all your Beneficiaries will be displayed on the landing page.
4. Click on the **Maintain** easy button next to the Beneficiary you would like to modify.
5. The **Modify** Global Beneficiary capture page will be displayed.
6. Update the required fields and click on **Update**.
7. A **confirmation page** will be displayed. Check that these details are correct and, if required, click on **Edit** to make any amendments.
8. Once you have viewed the information, the request must be authorised.
9. Click on **Authorise** to proceed with the authorisation process.
10. Once completed, an authorisation **result page** will be displayed.
11. Click on **Finish**.

If multiple dual/multiple Authorisers are required, ask the second Authoriser to complete the authorisation process.

Note! No validation of the intended recipient account name against the beneficiary account details shall be done in respect of Forex payments.

Delete a Beneficiary from your Global Beneficiary List

Use this function to permanently delete a beneficiary's details from your Global Beneficiary list. You can delete single or multiple beneficiaries simultaneously.

1. Click on the **Forex tab**.
2. Click on the **Global Beneficiaries** sub tab.
3. A list of all your Beneficiaries will be displayed on the landing page.
4. Click on the **Delete** easy button next to the Beneficiary you want to delete.
5. A confirmation message is displayed, click on **Delete**.

View or Search Global Beneficiary

Use this function to view and search for existing beneficiaries that you have saved to your Global Beneficiary list.

1. Click on the **Forex tab**.
2. Click on the **Global Beneficiaries** sub tab.
3. A list of all your Beneficiaries will be displayed on the landing page.
4. Select the **Search** on the right-side of the page and enter any part of the description that you are looking for.
5. A list of all possible recipients matching your search criteria will be displayed.
6. Click on the desired **Name hyperlink** to view the Beneficiary Details.

Using a Forex Folders

Your Administrator(s) can choose to opt in to use Forex Folders.

How to opt in to use Folders

1. Select the **Profiles** tab.
2. Select the **Site Settings** button directly from the **User Dashboard** and select **Preferences**.
3. Tick the check box to enable **Forex Folders** and **Authorise** the changes.

If dual/multiple authorisers are required, the second Administrator must complete the authorisation process.

Once the Forex Folders option has been selected and authorised, your Administrators need to create Folders.

Create a New Forex Folder

How to create New Folders

1. Select the **Profiles Tab**.
2. Click on **Total Folders**.
3. Select **Global Folders** from the **Folder Type** drop down.
4. Click on **+Add** and select **Create Folder**.
5. Enter the **Folder Name**.
6. Allocate **Folder Permissions per User**

Allocate User Permissions for the Folder

You will need to assign either Capture or Authorise permissions or have both these permissions, together with transacting limits for the following Forex Folder functions:

- Folder Maintenance – Allow users to maintain Folder details i.e. change the folder name.
- Beneficiary Maintenance – Allow users to add, maintain or delete Forex Beneficiaries from this folder.
- Beneficiary Payments – Allow users to make payments to Beneficiaries using the details in the Folder.

7. Click on **Authorise** to proceed with the authorisation process.
8. Once completed, an authorisation **result page** will be displayed.
9. Click on **Finish**.

If multiple dual/multiple Authorisers are required, ask the second Authoriser to complete the authorisation process.

Add Beneficiaries to your Forex Folders

1. Click on the **Forex tab**.

2. Click on the **Global Beneficiaries** sub tab.
3. Select Folder from the drop-down
4. Select **Beneficiaries** and select the Folder.
5. Click on **+Add** and select **New Beneficiary** to add a new beneficiary.
6. Select whether you are adding an **Individual** or **Business** beneficiary.
7. The **Add Global Beneficiary** capture page will be displayed.
8. Complete all the required **Beneficiary details** and **Beneficiary Banking Details** in the fields provided. **Note!** You may select the **Search** option to find the relevant **Swift/BIC Code** for the Beneficiary.
9. Once you have completed all the mandatory fields you add another Beneficiary by selecting **Add Another**.
10. Once you have added all your Beneficiaries to the Folder, click on **Save + Exit**
11. A **confirmation page** will be displayed. Check that these details are correct and, if required, click on **Edit** to make any amendments.
12. Once you have viewed the information, the request must be authorised.
13. Select the **Authorisation Needed** viewing option (authorise permissions are required).
14. Select the relevant **Beneficiary** and click on **Authorise** to proceed with the authorisation process.
15. Once completed, an authorisation **result page** will be displayed.
16. Click on **Finish**.

If there are multiple Authorisers, all Authorisers must complete the authorisation process.

Note! No validation of the intended beneficiary account name against the actual beneficiary account details shall be done in respect of Forex payments.

Copying a Beneficiary from one Folder to another Folder

1. Click on the **Forex tab**.
2. Click on the **Global Beneficiaries** sub tab.
3. Select folder from the Drop-down
4. Select **Beneficiaries** and select the Folder.
5. Click on **+Add** and select **Copy from another folder** to add a new beneficiary.
6. Click in the dropdown to select the folder you wish to copy from.
7. Click on the checkbox next to the beneficiary.
8. Capture a unique alias for the beneficiary.
9. Click submit

If there are multiple Authorisers, all Authorisers must complete the authorisation process.

Moving a Beneficiary from one Folder to another Folder

1. Click on the **Forex tab**.
2. Click on the **Global Beneficiaries** sub tab.
3. Select folder from the Drop-down
4. Select **Beneficiaries** and select the Folder.
5. Click on **+Add** and select **Move from another folder** to add a new beneficiary.
6. Click in the dropdown to select the folder you wish to move from.
7. Click on the checkbox next to the beneficiary.
8. Click submit

If there are multiple Authorisers, all Authorisers must complete the authorisation process.

Import Bulk Beneficiaries to your Forex Folders

Use this function to import multiple Global Beneficiaries using a file which has been created off-line using the (.csv) template that can be downloaded from the Import beneficiaries sub tab.

1. Click on the **Forex tab**.
2. Click on the **Global Beneficiaries** sub tab.
3. Select Beneficiaries and select the Folder
4. Click on **+Add** and select **Import Beneficiaries.**
5. Click on Download CSV Template.
6. Once downloaded, you can enter all the required information for multiple Global Beneficiaries off-line using this (.csv) spreadsheet, save it and then import the file directly into Online Banking Enterprise™.
7. You have the option to choose whether to **Reject Invalid Items only** or to **Reject all the items** if an invalid item is found in your spreadsheet during the Beneficiary Import.
8. The **File Location** field requires you to locate the file that you want to import. If you know where the file is located, you can type the file path into the File Path field, or click on **Browse** to locate it.
9. Choose where you would like to send your **Results** file to. Depending on your choice your Results file will be created and sent to your **Online Banking Enterprise™ Inbox** or to your specified **email Address**.
10. Click on **Submit**.
11. A new page will display with your Global Beneficiary details.
12. Click on **Finish** to return to the Global Payments landing page. Alternatively click on **Import Again** if the file failed and you would like to import the file again.
13. A **Results file** will be created and sent to your **Online Banking Enterprise™ Inbox** or specified **email Address.**
14. The results of an Import File item will be either **Failed** if the item failed during the creation process or **Successful** if the Beneficiary was successfully created.
15. Check that these details are correct and, if required, click on **Edit** to make any amendments.
16. Once you have viewed the information, the request must be authorised.
17. Select the **Authorisation Needed** viewing option (authorise permissions are required).
18. Select the relevant **Beneficiary** Click on **Authorise** to proceed with the authorisation process.
19. Once completed, an authorisation **result page** will be displayed.
20. Click on **Finish**.

If multiple dual/multiple Authorisers are required, ask the second Authoriser to complete the authorisation process.

Note! No validation of the intended beneficiary account name against the actual beneficiary account details shall be done in respect of Forex payments.

Export a list of all your existing Beneficiaries in a Folder

Use this function to export a CSV list of all your Beneficiaries held within in the Global Beneficiary List.

1. Click on the **Forex tab**.
2. Click on the **Global Beneficiaries** sub tab.
3. Select **Folders**.
4. A list of all your Forex Folders will be displayed on the landing page.
5. Select the **Folder Name**.

6. A list of all your Beneficiaries will be displayed on the landing page.
7. Click on the **Bulk Beneficiary Export** option.
8. Choose where to would like to send the exported File to.
    - If **email** was selected, enter the desired **email address**.
    - If **Inbox** was selected, **open** your **Online Banking Enterprise ™ Inbox**, select the file, click on **Download** and save to a destination of your choice in order to view the information.

8. Click on **Submit**.
9. The information will be saved in a zipped file, per exported folder.

Modify the Details of a Beneficiary in your Forex Folder

Use this function to edit the Bank Account and/or Personal Details of a beneficiary that has been added to a Forex Folder.

1. Click on the **Forex tab**.
2. Click on the **Global Beneficiaries** sub tab.
3. Select **Folders**.
4. A list of all your Forex Folders will be displayed on the landing page.
5. Select the **Folder name**.
6. A list of all your Beneficiaries will be displayed on the landing page.
7. Click on the **Maintain** easy button next to the Beneficiary you would like to modify.
8. The **Modify** Global Beneficiary capture page will be displayed.
9. Update the required fields and click on **Update**.
10. A **confirmation page** will be displayed. Check that these details are correct and, if required, click on **Edit** to make any amendments.
11. Once you have viewed the information, the request must be authorised.
12. Click on **Authorise** to proceed with the authorisation process.
13. Once completed, an authorisation **result page** will be displayed.
14. Click on **Finish**.

If multiple dual/multiple Authorisers are required, ask the second Authoriser to complete the authorisation process.

Note! No validation of the intended recipient account name against the beneficiary account details shall be done in respect of Forex payments.

Delete a Beneficiary from your Forex Folder

Use this function to permanently delete a beneficiary's details from your Forex Folder. You can delete single or multiple beneficiaries simultaneously.

1. Click on the **Forex tab**.
2. Click on the **Global Beneficiaries** sub tab.
3. Select **Folders**.
4. A list of all your Forex Folders will be displayed on the landing page.
5. Select the **Folder name**.
6. A list of all your Beneficiaries will be displayed on the landing page.
7. Click on the **Delete** easy button next to the Beneficiary you want to delete.
8. A confirmation message is displayed, click on **Delete**.

View or Search Global Beneficiary

Use this function to view and search for existing beneficiaries that you have saved to your Global Beneficiary list.

1. Click on the **Forex tab**.
2. Click on the **Global Beneficiaries** sub tab.
3. Select **Folders**.
4. A list of all your Forex Folders will be displayed on the landing page.
5. Select the **Folder name**.
6. A list of all your Beneficiaries will be displayed on the landing page.
7. Select the **Search** on the right-side of the page and enter any part of the description that you are looking for.
8. A list of all possible recipients matching your search criteria will be displayed.
9. Click on the desired **Name hyperlink** to view the Beneficiary Details.

13.3 Global Receipts

Use this function to provide instructions for the processing of receipts of foreign currency payments from an international bank directly into your nominated account, View History and Manage Standing Instructions for recurring Inward Payments.

13.3.1 Forex Payments Received

This function enables you to provide instructions for the processing of foreign currency payments received via SWIFT from an international bank directly into your nominated account.

SWIFT, the Society for Worldwide Inter-Bank Financial Telecommunication, is an electronic communication method used by banks all over the world to correspond with each other and effect payments in a secure and standardised way.

The following functionality is available online:

- Decline a Forex Inward Payment, if you believe the payment is not for you.
- Obtain a real-time foreign exchange quote before processing the transaction
- Defer the processing of the transaction for a maximum of 30 days to take advantage of better exchange rates
- View your Global Receipts transaction history
- Manage standing instructions for recurring inward payments

Notes:

- This functionality is only available to users who have a qualifying account linked to their Online Banking Enterprise™ profile.
- User must have the relevant permissions to **Capture** and/or **Authorise Global Receipts** for the qualifying account(s). These permissions must be allocated to each relevant User by the Administrator(s) via the **Profiles Tab** > **Account Permissions**.
- The Administrator(s) must confirm the **Number of Authorisers** required to authorise a Global Receipt transaction. These permissions must be allocated to the Site by the Administrator(s) via the **Profiles Tab** > **Site Settings** > **Number of Authorisers**.
- It is imperative that all information is captured correctly as it is required for Balance of Payments (BoP) reporting to the South African Reserve Bank (SARB).

Create Settlement Instructions for an Inward Payment

1. Click on the **Forex tab**.
2. Click on the **Global Receipts** sub tab.
3. Select the New Receipts viewing option. If you have new **Forex Inward Payments,** they will be displayed on this page.
4. Click on the **Proceed** button next to the respective transaction.
5. The Global **Transfer Application Wizard** will start.

6. Complete all the required **Applicant Details** in the fields provided and click on **Continue**.
7. Complete the **Transaction Details** (including capturing a Value Date if available. The value date may be today or a future date, depending on currency and the related cut off times. The application must be quoted on or before the stipulated value date. If you request a Quote and the value date is past due, you will need to de-authorise the application and re-select a new value date for the application) and click on **Continue**.
8. If applicable, select whether you have a pre-booked deal with FNB or RMB.

   If you have pre-booked a deal with FNB or RMB, you may search for Deals using any of the three options below:

   - Deal Reference Number
   - All deals matching the transaction criteria
   - Date range

   You may assign multiple deals to a single application and are not required to assign a deal to the full transaction value. If a Deal has been assigned to a portion of the full transaction value, the remainder may be booked at a spot rate at the time of the Quote Generation.

9. If a **BoP code** is required for the relevant Payment type, you will need to click on the **+Add** button to add the related **BoP category code** for your transaction. **Note**! It is imperative that all information is captured correctly as it is required for Balance of Payments (BoP) reporting to the South African Reserve Bank (SARB). You may enter the BoP code or Search for it under the related Category.
10. Accept **Regulatory Declaration** and the **Terms and Conditions** and click on **Continue**.
11. Click on **Save and Exit** to save what you have captured on the current page. Click on **Cancel** if you do not want to continue with the transaction. Click on **Submit** to submit the transaction for authorisation.

Authorise the Inward Payment Instruction

Once the Global Receipt has been submitted for authorisation:

1. Click on the **Authorisation Needed** viewing option and select the receipt you want to authorise by clicking on the check box next to the relevant transaction. **Note!** You can click on the hyperlinked name to view the receipt.
2. Click on **Authorise**.
3. A **confirmation page** is displayed.
4. Once you have viewed the information, and confirmed the correctness thereof, the request must be authorised.
5. Select the transactions you want to authorise and click on **Authorise** to proceed with the authorisation process.
6. Once completed, an authorisation **result page** will be displayed.
7. Click on **Finish**.

If multiple dual/multiple Authorisers are required, ask the second Authoriser to complete the authorisation process.

The status of the payment will change from **Authorisation Requested** to **Partially Authorised** or **Fully Authorised** depending on the **Number of Authorisers** required for **Global Receipts**.

The instruction must be **Fully Authorised** in order to proceed and process the Inward Payment Instruction.

Reject an Inward Payment Instruction

To **Reject** the Inward Payment Instruction, click on **Reject** and enter a description in the **Reason** field with a comment or reason for rejecting the application. The system will display the 'reason' for rejecting the instruction on all pages where the Authorisation Audit Trail is displayed.

Get Quote and Process the Inward Payment Instruction

Once the Inward Payment Receipt has been Authorised, the authorised users will have the option to **Get a Quote** and **Process the Application**.

1. Click on the **Process Receipts** viewing option and click on the **Get Quote** button next to the item you want to process.
2. **A confirmation page** is displayed.
3. The authorised User can either select to **Accept or Decline**.

- **Accept Quote** - Select this option to accept the current quote and submit the transaction for processing, once the quote has been accepted the payment will reflect under the History viewing option reflecting the status it is in.
- **Decline Quote - S**elect this option if you would like to decline the current quote. A confirmation page will be displayed and, for statistical purposes, you will be required to select a reason for declining the quote. You have 30 days in which to process this transaction, bearing in mind that the exchange rate may fluctuate during this period. If the transaction is not processed within the 30 days, the payment may be returned to the originating bank, in order to comply with prevailing Exchange Control Regulations.

If you have received a Quote with a Rate, the Rate may only be available for 2 Minutes, if you have not Accepted the Quote within the 2 minutes, you will be redirected to a page where you have the following options:

- **Re-Quote** - Select this option if you would like to get a new quote for your transaction.
- **Quote Later** - Select this option if you would like to complete the transaction later. You have 30 days in which to process this transaction, bearing in mind that the exchange rate may fluctuate during this period. If the transaction is not processed within the 30 days, the payment may be returned to the originating bank, in order to comply with prevailing Exchange Control Regulations.

Once the quote has been accepted the Inward Payment will reflect under the History viewing option reflecting the status it is in.
If documents are required for Exchange Control purposes, the status of the application under the History viewing option will reflect as **Documents Required**.

De-Authorise an Inward Payment Instruction

To **De-Authorise** the Inward Payment Instruction, click on **De-Authorise**. The application will change to a **Work in Progress** and will allow the user to make corrections and re-submit the Inward Payment Instruction for authorisation. **Note!** Only Authorisers can De-Authorise an Inward Payment Instruction.

Upload Documents

Once the quote has been accepted the Inward Payment will reflect under the **History** viewing option reflecting the status it is in.

If documents are required for Exchange Control purposes, the status of the application under the History viewing option will reflect as **Documents Required**.

The system will confirm which documents are required to complete your application. You may upload a maximum of 10MB per file.

1. Click on the **Document Upload** sub tab.
2. Click on the **Upload** button next to the applicable application.

3. Select the relevant **Document Upload** and the **File format**. Documents in the following formats may only be uploaded: PDF, Jpeg, Tiff, Gif.
4. Click on **Browse** to locate the file.
5. Click on **Upload**.
6. An upload **results page** will be displayed. You can either upload more documents by clicking the **Upload More** Button or you can select **Finish** to end the process.

The documents that you have uploaded will only reflect once they are processed by FNB/RMB.

View a History of Forex Inward Payments

Use this function to view a history of Forex Inward Payments processed over the last 12 months.

All transactions that have been successfully processed or are currently being processed are displayed on this page, i.e., the transactions for which you have accepted the quote offer and/or have submitted the transaction for processing.

1. Click on the **Forex tab**.
2. Click on the **Global Receipts** sub tab and select the **History** viewing option.
3. A list of your current **Inward Payments** will be displayed on the screen with the **Status** of the transaction.
4. To view more details about a Forex Inward Payment, click on the **Name hyperlink** of the respective transaction. Use the action bar to search your payments.
5. Click on **Finish** to complete the process.

Manage Standing Instructions

Use this function to delete a standing instruction.

A standing instruction refers to a recurring Forex Inward Payment which you have authorised FNB/RMB to process automatically at the daily spot rate.

1. Click on the **Forex tab**.
2. Click on the **Global Receipts sub tab**.
3. Click on the **Manage Standing Instructions** viewing option.
4. A list of your standing instructions will be displayed.
5. Select the transaction that you would like to delete and click on **Delete**.
6. Once you have viewed the information, the request may be deleted.

13.4 eForex

eForex facilitates foreign currency denominated outward payments to predetermined beneficiaries for recurring payments as well as warehousing and authorisation of future value dated payments prior to payment date.

Accessing eForex

This function enables you to access the eForex system via your Online Banking Enterprise™ profile.

1. Click on the **Forex tab**.
2. Click on the **eForex sub tab** and select on the **eForex button** at the bottom of the page.
3. The eForex system will now open in a separate tab/window on your browser.

Notes:

- This functionality will only be available to clients who are registered for eForex and who have been granted the relevant eForex permissions (by the Administrator(s).

Administrators can allocate the following eForex permissions for the Users via the Profiles Tab > User Permissions > Request eForex Permissions:

- View, Capture and/or Authorise to make Outward Payments
- View, Capture and/or Authorise all Inward Payments
- View, Capture and/or Authorise Recipients to be loaded for Forex Payments.

How to allocate eForex permissions

1. Select the **Profiles** tab.
2. Select the **Maintain** button directly from the **User Dashboard** or click on **Menu** for more options and select **Maintain**.
3. Select the user you want to maintain by clicking on the user name hyperlink.
4. Select the **User Permissions** sub tab and click on the **Request eForex Permission** hyperlink.
5. Select the **check box** to grant user access to eForex and select the relevant user permissions for the required **eForex functionality** as well as the **Limits** you want to allocate for the user.
6. Click on **Save & Exit** to save the User with a status of Work in Progress and click on **Authorise** to authorise the User.

Once the Administrator(s) have fully authorised the new user permissions, the request will be processed within 24 hours. If you have queries, please contact us on 087 736 7754.

13.5 Accelerate and FX Reporting

Accelerate is an existing foreign exchange and money market dealing system currently used by RMB Global Markets. It provides dealing room facilities from the comfort of your office and allows for High Volume, High Value Foreign Exchange with dealers on hand if needed

Accessing Accelerate

This function enables you to access the Accelerate system via your Online Banking Enterprise™ profile.

1. Click on the **Forex tab**.
2. Click on the **Accelerate sub tab** and select on the **Accelerate button** at the bottom of the page.
3. The Accelerate system will now open in a separate tab/window on your browser.

Accessing FX Reporting

This function enables you to access the FX Reporting function via your Online Banking Enterprise™ profile.

1. Click on the **Forex tab**.
2. Click on the **Accelerate sub tab** and select on the **Report button** at the bottom of the page.
3. The FX Reporting function will now open in a separate tab/window on your browser.

Notes:

- This functionality will only be available to clients who are registered for Accelerate and who have been granted the relevant Accelerate permissions (by the Administrator(s).

Administrators can select the following Accelerate functions for each user via the Profiles Tab > User Permissions > Request Accelerate Permissions:

- Spot
- Outright
- Swaps
- Money Market Call
- Money Market Term

How to allocate Accelerate permissions

1. Select the **Profiles** tab.
2. Select the **Maintain** button directly from the **User Dashboard** or click on **Menu** for more options and select **Maintain**.
3. Select the user you want to maintain by clicking on the user name hyperlink.
4. Select the **User Permissions** sub tab and click on the **Request Accelerate Permission** hyperlink.

5. Select the **check box** to grant user access to Accelerate and select the relevant user permissions for the required **Accelerate functionality** as well as the **Limits** you want to allocate for the user.
6. Click on **Save & Exit** to save the User with a status of Work in Progress and click on **Authorise** to authorise the User.

Once the Administrator(s) have fully authorised the new user permissions, the request will be processed within 24 hours. If you have queries, please contact us on 0861 FX DEAL (0861 393 325).

13.6 Order Forex

Business users can access and purchase currencies on Online Banking Enterprise™.

This can be done by purchasing Foreign Notes or a Cash Passport.

- **Buy Foreign Notes** - Clients can access and purchase several Foreign currencies in notes.
- **Purchase and load a Cash Passport** - Clients can purchase a prepaid travel card that can be loaded with up to four currencies which can be used at merchants and ATMs worldwide, displaying the MasterCard Acceptance Mark.

Notes:

- This functionality is only available to users who have a qualifying account linked to their Online Banking Enterprise™ profile.
- Users must have the relevant **Capture** and/or **Authorise Order Forex** as well as **Process Order Forex** permissions for the qualifying account(s). These permissions must be allocated to each relevant User by the Administrator(s) via the **Profiles Tab** > **Account Permissions** > Capture and/or Authorise Order Forex and/or Process Order Forex permissions for **Process Buy Forex**.
- The Administrator(s) must confirm the **Number of Authorisers** required to authorise a Forex Order transaction. These permissions must be allocated to the Site by the Administrator(s) via the **Profiles Tab** > **Site Settings** > **Number of Authorisers** > **Buy Forex**.
- It is imperative that all information is captured correctly as it is required for Balance of Payments (BoP) reporting to the South African Reserve Bank (SARB).

13.6.1 Create a Travel Order

1. Click on the **Forex tab**.
2. Select the **Order Forex s**ub tab and click on **Create**.
3. Select the **Currencies** you want to purchase, and if you want it as **Notes** or a **Cash Passport** (10 items max per application)
4. The **Application for Payment capture page** will be displayed.
5. Confirm if you want to split the **Payment** and **Fees** across **different Accounts**. **Note!** If you are using your Global Account to fund your cash passport, fees will be deducted from your rand Account.
6. If applicable, confirm whether you have a **pre-booked deal with FNB** or **RMB** and complete all of the required information in the fields provided.
7. **Multiple** travelers can be added, allowing you to allocate the currency being purchased to each traveller individually. Complete all of the required information for each traveller in the fields provided.
8. Please specify the **Delivery details**. **Note!** You may select to collect at your nearest Branch or have the Notes and Multicurrency Cash Passport delivered to your business premises at a charge.
9. Click on **Save and Exit** to save the application in a **Work In Progress** status or click on **Submit** to forward the Travel Order instruction to an Authoriser for authorisation.

Upload Documents for the Travel Order

Once the travel order has been submitted, the system will prompt the user to upload any outstanding documents required for Exchange Control purposes.

1. The system will confirm which documents are required to complete your application.
2. Click on the **Attach** button next to the applicable item.
3. Select the relevant **Document Type** and click on **Browse** to locate the file.
4. An upload **results page** will be displayed. You can either upload more documents by or you can select **Upload** to end the process.

Authorise the Travel Order

Once the Travel Order application has been submitted for authorisation:

1. Click on the **Authorisation Needed** viewing option and select the Travel Order application to authorise by clicking on the check box next to the item you want to authorise. **Note!** You can click on the hyperlinked name to view the application.
2. Click on **Authorise**.
3. A **confirmation page** is displayed.
4. Once you have viewed the information and confirmed the correctness thereof, the request must be authorised.
5. Click on **Authorise** to proceed with the authorisation process.
6. Once completed, an authorisation **result page** will be displayed.
7. Click on **Finish**.

If there are multiple Authorisers, all Authorisers must complete the authorisation process.

The application must be **Fully Authorised** in order to proceed to **Process** and complete the application.

Reject a Travel Order Instruction

To **Reject** a Travel Order Instruction, click on **Reject** and enter a description in the **Reason** field with a comment or reason for rejecting the payment. The system will display the 'reason' for rejecting the instruction on all pages where the Authorisation Audit Trail is displayed.

De-Authorise the Travel Order Instruction

To **De-Authorise** a Travel Order Instruction, click on **De-Authorise**. The application status will change to **Work in Progress** and will allow the user to make corrections and re-submit the Travel Order Instruction for authorisation. **Note!** Only Authorisers can De-Authorise a Travel Order Instruction.

Process the Travel Order

Once the Travel Order Instruction has been **Fully Authorised**, users with the relevant **Process Forex Order** permissions will have the option to **Get a Quote** and **Process the Order**.

1. Click on the **Process Order** viewing option and click on the Get Quote button next to the item you want to process.
2. A **confirmation page** is displayed.
3. The authorised User can either select to **Accept**, **Decline** or **Quote later**.

- **Accept Quote** - Select this option to accept the current quote and submit the order for processing. Once the quote has been accepted the order will reflect under the History viewing option reflecting the status it is in.
- **Decline Quote** - Select this option if you would like to decline the current quote. A confirmation page will be displayed and, for statistical purposes, you will be required to select a reason for declining the quote.
- **Quote Later -** Select this option if you would like to complete the transaction at a later time.

4. The quote will show amount being paid for the foreign currency, commission as well as the exchange rate at the time of the quote.
5. Click on **Accept**. **Note!** This quote is only valid for 2 minutes.
6. A summary page with the details of the purchase will now appear, you can click on **Finish** to complete the process.

Once the quote has been accepted the travel order will reflect under the History viewing option reflecting the status it is in.

View Order Forex History

Use this function to view a history of your Forex Orders that you have initiated on Online Banking.

1. Click on the **Forex** tab.
2. Click on the **Order Forex** sub tab and click on the **History** viewing option.
3. A list of your **Forex Order** Transactions, together with the details and status of the transaction, are displayed.
4. To view the Details for a Forex order transaction, click on the **Name hyperlink**.

13.6.2 Re-load a Cash Passport

Use this function to reload funds into an active Cash Passport.

1. Click on the **Forex tab**.
2. Select the **Order Forex** sub tab and click on the **Maintain** viewing option to view a list of all your existing orders and Cash Passports.
3. A list of all your active orders and **Cash Passports** will be displayed on the screen. Click on the **Load** button next to the Cash Passport you want to re-load.
4. Select the **Currencies** you want to load on your Cash Passport.
5. Complete all the required information in the fields provided.

6. Confirm if you want to split the **Payment** and **Fees** across **different Accounts**. **Note!** If you are using your Global Account to fund your cash passport, fees will be deducted from your rand Account.
7. If applicable, confirm whether you have a **pre-booked deal with FNB** or **RMB** and complete all of the required information in the fields provided.
8. Click on **Save and Exit** to save the application in a **Work In Progress** status or click on **Submit** to forward the Travel Order instruction to an Authoriser for authorisation.

Upload Documents for the Global Payment

Once the travel order has been submitted, the system will prompt the user to upload any outstanding documents required for Exchange Control purposes.

1. The system will confirm which documents are required to complete your application.
2. Click on the **Attach** button next to the applicable item.
3. Select the relevant **Document Type** and click on **Browse** to locate the file.
4. An upload **results page** will be displayed. You can either upload more documents by or you can select **Upload** to end the process.

Authorise the Travel Order

Once the Travel Order application has been submitted for authorisation:

1. Click on the **Authorisation Needed** viewing option and select the Travel Order application to authorise by clicking on the check box next to the item you want to authorise. **Note!** You can click on the hyperlinked name to view the application.
2. Click on **Authorise**.
3. A **confirmation page** is displayed.
4. Once you have viewed the information and confirmed the correctness thereof, the request must be authorised.
5. Click on **Authorise** to proceed with the authorisation process.
6. Once completed, an authorisation **result page** will be displayed.
7. Click on **Finish**.

If there are multiple Authorisers, all Authorisers must complete the authorisation process.

The application must be **Fully Authorised** in order to proceed to **Process** and complete the application.

Reject a Travel Order Instruction

To **Reject** a Travel Order Instruction, click on **Reject** and enter a description in the **Reason** field with a comment or reason for rejecting the payment. The system will display the 'reason' for rejecting the instruction on all pages where the Authorisation Audit Trail is displayed.

De-Authorise the Travel Order Instruction

To **De-Authorise** a Travel Order Instruction, click on **De-Authorise**. The application status will change to **Work in Progress** and will allow the user to make corrections and re-submit

the Travel Order Instruction for authorisation. **Note!** Only Authorisers can De-Authorise a Travel Order Instruction.

Process the Travel Order

Once the Travel Order Instruction has been **Fully Authorised**, users with the relevant **Process Forex Order** permissions will have the option to **Get a Quote** and **Process the Order**.

1. Click on the **Process Order** viewing option and click on the Get Quote button next to the item you want to process.
2. A **confirmation page** is displayed.
3. The authorised User can either select to **Accept**, **Decline** or **Quote later**.

    - **Accept Quote** - Select this option to accept the current quote and submit the order for processing. Once the quote has been accepted the order will reflect under the History viewing option reflecting the status it is in.
    - **Decline Quote** - Select this option if you would like to decline the current quote. A confirmation page will be displayed and, for statistical purposes, you will be required to select a reason for declining the quote.
    - **Quote Later -** Select this option if you would like to complete the transaction at a later time.

4. The quote will show amount being paid for the foreign currency, commission as well as the exchange rate at the time of the quote.
5. Click on **Accept**. **Note!** This quote is only valid for 2 minutes.
6. A summary page with the details of the purchase will now appear, you can click on **Finish** to complete the process.

Once the quote has been accepted the travel order will reflect under the History viewing option reflecting the status it is in.

View Order Forex History

Use this function to view a history of your Forex Orders that you have initiated on Online Banking.

1. Click on the **Forex** tab.
2. Click on the **Order Forex** sub tab and click on the **History** viewing option.
3. A list of your **Forex Order** Transactions, together with the details and status of the transaction, are displayed.
4. To view the Details for a Forex order transaction, click on the **Name hyperlink**.

13.6.3 Sell Back Cash Passport

Use this function to sell back unused funds on your Cash Passport.

1. Click on the **Forex tab**.
2. Select the **Order Forex** sub tab and click on the **Maintain** viewing option to view a list of all your existing orders and Cash Passports.

3. A list of all your active orders and **Cash Passports** will be displayed on the screen. Click on the **Cash Out** button next to the Cash Passport you want to cash out and sell back.
4. Select the **Account(s)** you want the currencies to be transferred into and click on **Submit** to forward the Sell Back request to an Authoriser for authorisation.

Authorise the Sell Back Request

Once the Sell back request has been submitted for authorisation:

1. Click on the **Authorisation Needed** viewing option and select the Sell back request to authorise by clicking on the check box next to the item you want to authorise. **Note!** You can click on the hyperlinked name to view the request.
2. Click on **Authorise**.
3. A **confirmation page** is displayed.
4. Once you have viewed the information and confirmed the correctness thereof, the request must be authorised.
5. Click on **Authorise** to proceed with the authorisation process.
6. Once completed, an authorisation **result page** will be displayed.
7. Click on **Finish**.

If there are multiple Authorisers, all Authorisers must complete the authorisation process.

The request must be **Fully Authorised** in order to proceed to **Process** and complete the Sell Back request.

Reject a Sell Back Request

To **Reject** a Sell Back request, click on **Reject** and enter a description in the **Reason** field with a comment or reason for rejecting the request. The system will display the 'reason' for rejecting the request on all pages where the Authorisation Audit Trail is displayed.

De-Authorise a Sell Back Request

To **De-Authorise** a Sell back request, click on **De-Authorise**. The application status will change to **Work in Progress** and will allow the user to make corrections and re-submit the request for authorisation. **Note!** Only Authorisers can De-Authorise a Sell back request.

Process the Sell Back request

Once the Sell Back Request has been **Fully Authorised**, users with the relevant permissions will have the option to **Get a Quote** and **Process the Request**.

1. Click on the **Process Order** viewing option and click on the Get Quote button next to the item you want to process.
2. A **confirmation page** is displayed.
3. The authorised User can either select to **Accept**, **Decline** or **Quote later**.

    - **Accept Quote** - Select this option to accept the current quote and submit the request for processing. Once the quote has been accepted the request will reflect under the History viewing option reflecting the status it is in.

- **Decline Quote** - Select this option if you would like to decline the current quote. A confirmation page will be displayed and, for statistical purposes, you will be required to select a reason for declining the quote.
- **Quote Later -** Select this option if you would like to complete the transaction at a later time.

4. The quote will show amount being paid for the foreign currency, commission as well as the exchange rate at the time of the quote.
5. Click on **Accept**. **Note!** This quote is only valid for 2 minutes.
6. A summary page with all the details of the Sale request will now appear, you can click on **Finish** to complete the process.

Once the quote has been accepted the request will reflect under the History viewing option reflecting the status it is in.

View Forex History

Use this function to view a history of your Forex Orders that you have initiated on Online Banking.

1. Click on the **Forex** tab.
2. Click on the **Order Forex** sub tab and click on the **History** viewing option.
3. A list of your **Forex Order** Transactions, together with the details and status of the transaction, are displayed.
4. To view the Details for a Forex order transaction, click on the **Name hyperlink**.

14. PayPal

PayPal is a secure global online payment system that enables users to receive and make payments for goods and services with other PayPal account holders. Payments are made directly into/from the PayPal Account, thus eliminating the security risk of exposing your credit card or bank account number and therefore ensuring safe and secure transactions.

Online Banking Enterprise™ users who have linked their PayPal Account to their banking profile can withdraw the proceeds of the sale back into their linked bank account or top-up their PayPal Account with funds from their linked bank account.

To make use of this exciting functionality you will need to:

1. Link a qualifying transactional bank account, with a Sole Owner (SOL) relationship code, i.e. an individual or business that has an account and profile in the user's own name, to your Online Banking Enterprise™ profile.
2. Register for a PayPal Account on www.PayPal.com
3. Verify your PayPal Account on www.PayPal.com
4. Link your PayPal profile on Online Banking Enterprise™

To read more information about PayPal and its services click on PayPal Guide in the action bar. Alternatively, you can go to the PayPal website at at www.paypal.com

For PayPal related queries please contact the PayPal Help Line via telephone 0875 PAYPAL (729 725).

PayPal Permissions:

The Global Payments sub-tab and Global Receipts sub-tab will be displayed to users that have permissions to Access and Receive Global Payments for PayPal Withdrawals and the Access and Make Global Receipts for PayPal Top - Ups.

The PayPal services will be available for selection from either the Accounts, Payments and Forex Tab depending on the following criteria:

If you are a Single Authoriser who has a qualifying Business account with a turnover of less than R40 million and who has the access to Receive Global Payments and/or Make Global Payments (Rights screen) you will be able to access the PayPal functionality from the Payments and Forex Tab, for all other clients with a turnover more than R40 million, the PayPal functionality will be available from the Accounts and Payments tab.

Note! Only one authorisation applies for PayPal, including linking and maintaining a PayPal profile as well as for authorising a Top-Up or Withdrawal transaction regardless of the number of authorisers required for other types of transactions.

14.1 Link your PayPal Account

Link a PayPal profile in order to transact using a PayPal account.

During the linking process you will be redirected to PayPal in order to log onto your PayPal account. To do so you will need your primary PayPal email address and your PayPal password.

Note: Please ensure that pop up blockers are disabled before you attempt to link your profile.

1. Click on the **Accounts**, **Payments** or **Forex Tab**.
2. Click on **Menu** for more options and select **PayPal Services** from the extended Menu list.
3. Click on the **More Menu Option** on the left and select **Link PayPal Profile**.
4. Enter the **required information** and click on **Continue**.
5. Check your details on the **confirmation page**.
6. Before you can continue you will be required to read and accept the **Terms and Conditions**.
7. Click on **Continue** to initiate the **Authorisation** process. Click on **Browse** to search for the **Digital Certificate**. Double click on the Digital certificate to upload it.
8. Enter your **certificate password**.
9. Click on the **disclaimer** and click on **Accept** to complete the process.
10. You will be redirected to the **PayPal website**. To complete your PayPal setup, please verify your details once logged in to PayPal. Click PayPal Login if the PayPal redirect page does not automatically open. Linking for PayPal related queries please contact 0875 PAYPAL (729 725). To do so you will need your primary PayPal email address and your PayPal password.

Once the account has been linked, the Administrators will automatically be able to view the PayPal account on the accounts landing screen but will need to give access to this account for other users on the Online Banking Enterprise™ profile.

Notes:

- This functionality is applicable to Administrators only.
- If you are a Single Authoriser who has a qualifying Business account with a turnover of less than R40 million and who has the access to Receive Global Payments and/or Make Global Payments (Rights screen) you will be able to access the PayPal functionality from the Payments and Forex Tab, for all other clients with a turnover more than R40 million, the PayPal functionality will be available from the Accounts and Payments tab.
- Only one authorisation applies for PayPal, including linking and maintaining a PayPal profile as well as for authorising a Top-Up or Withdrawal transaction regardless of the number of authorisers required for other types of transactions.
- To read more information about PayPal and its services click on PayPal Guide in the action bar. Alternatively, you can go to the PayPal website at www.paypal.com
- For PayPal related queries please contact the PayPal Help Line via telephone 0875 PAYPAL (729 725).

14.2 Top Up your PayPal Account

Top Up your PayPal account from your FNB account.

1. Click on the **My Bank Accounts**, **Payments** or **Forex Tab**.
2. Click on **Menu** for more options and select **PayPal Services** from the extended Menu list.
3. Click on **Menu** for more options and select **Top Up to PayPal**.
4. Complete the Top Up Details by selecting the **From FNB Account**, enter the **Top Up Amount** and select the **Reason for the Transaction** and complete the relevant **Top Up Transaction Details**. To view a description of the available transaction reasons, click on the **More Info** hyperlink.
5. Click on **Get Quote**.
6. The Top Up Quote Details will be displayed; this quote is only valid for **2 minutes**.
7. Click on **Continue** to proceed with the transaction or click on **Cancel** to cancel the Transaction.
8. Once you click on Continue, a results page will display the status of your request.
9. Before you can continue you will be required to read and accept the **Terms and Conditions**.
10. Click on **Authorise** to proceed with the authorisation process.
11. Once completed, an authorisation **result page** will be displayed.
12. Click on **Finish**.

Notes:

- Top Up transactions takes less than 10 Minutes to reflect in the nominated PayPal account.
- Only one authorisation applies for PayPal Top Up Transactions regardless of the number of authorisers required for other types of transactions as you only have 2 minutes to accept a quote.
- When completing the Online Banking 'Top Up' service you will be required to disclose the purpose of your transaction and provide contact information to ensure that you comply with all South African Reserve Bank regulations as this is a cross border payment.
- If you are a Single Authoriser who has a qualifying Business account with a turnover of less than R40 million and who has the access to Receive Global Payments and/or Make Global Payments (Rights screen) you will be able to access the PayPal functionality from the Payments and Forex Tab, for all other clients with a turnover more than R40 million, the PayPal functionality will be available from the Accounts and Payments tab.
- To read more information about PayPal and its services click on PayPal Guide in the action bar. Alternatively, you can go to the PayPal website at www.paypal.com
- For PayPal related queries please contact the PayPal Help Line via telephone 0875 PAYPAL (729 725).

14.3 Withdraw funds from your PayPal Account

Withdraw available funds from your PayPal account to your South African bank account.

1. Click on the **My Bank Accounts**, **Payments** or **Forex Tab**.
2. Click on **Menu** for more options and select **PayPal Services** from the extended Menu list.
3. Click on **Menu** for more options and select **Withdraw from PayPal**.
4. Complete the Withdrawal Details by selecting the **Account** to which you would like to transfer funds, the Reason for the Transaction and entering the **Withdrawal Amount**. To view a description of the available transaction reasons, click on the **More** Info hyperlink.
5. Click on **Get Quote**.
6. The Withdrawal Quote Details will be displayed; this quote is only valid for **4 minutes**.
7. Click on **Continue** to proceed with the transaction or click on **Cancel** to cancel the Transaction.

8. Once you click on Continue, a results page will display the status of your request.
9. Before you can continue you will be required to read and accept the **Terms and Conditions**.
10. Click on **Authorise** to proceed with the authorisation process.
11. Once completed, an authorisation **result page** will be displayed.
12. Click on **Finish**.
13. You will be redirected to the **PayPal site** where you will be required to log in to complete the withdrawal process. If the PayPal page is not automatically opened, click on **PayPal Login**.
14. Once your withdrawal instruction has been submitted you will be redirected to the results page on **Online Banking Enterprise™**.
15. Click on **Finish** to complete the process.

Notes:

- Withdraw transactions may take between 5 to 8 business days to reflect in the nominated qualifying account
- Only one authorisation applies for PayPal Withdrawal Transactions regardless of the number of authorisers required for other types of transactions as you only have 4 minutes to accept a quote.
- When completing the Online Banking 'Withdrawal' service you will be required to disclose the purpose of your transaction and provide contact information to ensure that you comply with all South African Reserve Bank regulations as this is a cross border payment.
- If you are a Single Authoriser who has a qualifying Business account with a turnover of less than R40 million and who has the access to Receive Global Payments and/or Make Global Payments (Rights screen) you will be able to access the PayPal functionality from the Payments and Forex Tab, for all other clients with a turnover more than R40 million, the PayPal functionality will be available from the Accounts and Payments tab.
- To read more information about PayPal and its services click on PayPal Guide in the action bar. Alternatively, you can go to the PayPal website at www.paypal.com
- For PayPal related queries please contact the PayPal Help Line via telephone 0875 PAYPAL (729 725).

14.4 View your PayPal Transaction History

View your FNB Top Up to PayPal and Withdraw from PayPal transactions.

1. Click on the **My Bank Accounts**, **Payments** or **Forex Tab**.
2. Click on **Menu** for more options and select **PayPal Services** from the extended Menu list.
3. All your PayPal transaction will be displayed on the page.
4. Click on the transaction hyperlink to obtain more information for the relevant PayPal transaction.

Notes:

- This functionality is applicable to Administrators only.
- If you are a Single Authoriser who has a qualifying Business account with a turnover of less than R40 million and who has the access to Receive Global Payments and/or Make Global Payments (Rights screen) you will be able to access the PayPal functionality from the Payments and Forex Tab, for all other clients with a turnover more than R40 million, the PayPal functionality will be available from the Accounts and Payments tab.
- Only one authorisation applies for PayPal, including linking and maintaining a PayPal profile as well as for authorising a Top-Up or Withdrawal transaction regardless of the number of authorisers required for other types of transactions.
- To read more information about PayPal and its services click on PayPal Guide in the action bar. Alternatively, you can go to the PayPal website at www.paypal.com
- For PayPal related queries please contact the PayPal Help Line via telephone 0875 PAYPAL (729 725).

14.5 Maintain your PayPal Profile

Maintain your Online Banking PayPal Profile

(This functionality is applicable to Administrators only)

Update the primary PayPal email address of your linked PayPal account or to update any contact details for the balance of payment reporting for Top up or Withdraw transactions.

Should you wish to link a new PayPal account to your FNB Online Banking profile please contact 0875 PAYPAL (729 725). You will need to delink your current PayPal account and then re-link your new PayPal account.

1. Click on the **My Bank Accounts**, **Payments** or **Forex Tab**.
2. Click on **Menu** for more options and select **PayPal Services** from the extended Menu list.
3. Click on **Menu** for more options and select **Maintain PayPal Profile**.
4. **Update** the required fields.
5. Click on **Continue**.
6. Once you click on Continue, a results page will display the status of your request.
7. Before you can continue you will be required to read and accept the **Terms and Conditions**.
8. Click on **Authorise** to proceed with the authorisation process.
9. Once completed, an authorisation **result page** will be displayed.
10. Click on **Finish**.

Notes:

- In compliance with exchange control regulations, this information is reported to the South African Reserve Bank.
- Changing this information will not update your address and contact details with the bank, please contact your branch to update your details.
- This functionality is applicable to Administrators only.
- If you are a Single Authoriser who has a qualifying Business account with a turnover of less than R40 million and who has the access to Receive Global Payments and/or Make Global Payments (Rights screen) you will be able to access the PayPal functionality from the Payments and Forex Tab, for all other clients with a turnover more than R40 million, the PayPal functionality will be available from the Accounts and Payments tab.
- Only one authorisation applies for PayPal, including linking and maintaining a PayPal profile as well as for authorising a Top-Up or Withdrawal transaction regardless of the number of authorisers required for other types of transactions.
- To read more information about PayPal and its services click on PayPal Guide in the action bar. Alternatively, you can go to the PayPal website at www.paypal.com
- For PayPal related queries please contact the PayPal Help Line via telephone 0875 PAYPAL (729 725).

14.6 PayPal Settings

You can grant the bank permission to retrieve your PayPal account balance without needing to log into PayPal.com to view this, before completing a Withdrawal or a Top-Up.

This functionality is applicable to Administrators only.

1. Click on the **My Bank Accounts**, **Payments** or **Forex Tab**.
2. Click on **Menu** for more options and select **PayPal Services** from the extended Menu list.
3. Click on **Menu** for more options and select **PayPal Settings**.
4. Click on **Menu** for more options and select **Grant PayPal Permission**.
5. Select the **check box** next to each permission and click on **Confirm**.
6. You will be redirected to PayPal to authorise the request. **Note**. Click PayPal Login if the PayPal redirect page does not automatically open.

Once the PayPal Balance Inquiry Permission has been granted, the PayPal Balance can be viewed under the following screens:

- PayPal Services
- Top Up to PayPal
- Withdraw from PayPal

Note. You can revoke the Balance Inquiry permission should you no longer require the Bank to retrieve the balance from PayPal on your behalf by selecting the **Revoke** option on the PayPal Settings action bar.

14.7 View the PayPal Guide

To read more information about PayPal and its services. Alternatively, you can go to the PayPal website at www.paypal.com

For PayPal related queries please contact the PayPal Help Line via telephone 0875 PAYPAL (729 725).

1. Click on the **My Bank Accounts**, **Payments** or **Forex Tab**.
2. Click on **Menu** for more options and select **PayPal Services** from the extended Menu list.
3. Click on **Menu** for more options and select **PayPal Guide**.
4. The PayPal Guide will be displayed.

Notes:

- If you are a Single Authoriser who has a qualifying Business account with a turnover of less than R40 million and who has the access to Receive Global Payments and/or Make Global Payments (Rights screen) you will be able to access the PayPal functionality from the Payments and Forex Tab, for all other clients with a turnover more than R40 million, the PayPal functionality will be available from the Accounts and Payments tab.
- Only one authorisation applies for PayPal, including linking and maintaining a PayPal profile as well as for authorising a Top-Up or Withdrawal transaction regardless of the number of authorisers required for other types of transactions.

15. eWallet Pro

eWallet Pro provides Online Banking Enterprise™ Users with the ability to disburse cash to any individual regardless of whether they have a bank account. eWallet Pro is only dependent on the eWallet holder (recipient) having a valid South African cellphone number or a debit card which is issued on-site by you, the Online Banking Enterprise™ User.

These payments can take place on a regular basis (e.g. Wages and Salaries paid on a weekly or monthly basis) or as Once-Off payments (e.g. Temporary Loans, Incentives and Gift Card pay-outs). Funds will be available almost immediately to the eWallet holder. After each payment, the eWallet holder will be notified via SMS that money has been paid into their eWallet and they will receive directions on how to activate and access the eWallet.

Depending on the eWallet Pro contract you have signed up for, it is possible to sponsor up to two cash withdrawals on behalf of the eWallet holder (recipient), therefore allowing the recipient free access to funds. Only once the sponsored withdrawals have been used will the recipient incur withdrawal fees.

eWallet Pro Benefits for your Company and Recipients

eWallet Holder	**Business Owner**
Funds Available Immediately	**Convenient and Flexible**
No waiting, the funds are available and can be withdrawn immediately.	Create recipients and pay them online or via file upload using Online Banking Enterprise™.
Safe for your Recipients	**Saves you Money**
Avoid risks of carrying cash.	Reduce the costs incurred from using the traditional cash and cheque payments methods.
It Saves on Costs	**Secure Transacting**
Sponsor up to two cash withdrawals on behalf of the eWallet holder, therefore allowing the recipient free access to funds.	• No lost, stolen or fraudulent cheques. • Reduces cash on premises. • Set your own limits, have your own authorisation.

eWallet Pro also offers Services for your Recipients

- ATM Withdrawal via ATM card (includes Saswitch ATMs) or Cellular phone (only FNB ATMs).
- ATM Airtime purchases.
- ATM Balance enquiry.
- Point of Sale (POS) purchases (with debit card).
- Point of Sale (POS) Cash-back transaction (with debit card).
- Cellphone airtime purchase.
- Cellphone balance enquiry or mini statement.
- eWallet recipients who have a card and a pin will be able to check their eWallet Pro balance outside of login via www.fnb.co.za > Contact Us + Tools > eWallet Balance Enquiry

In the event that a card is lost, the eWallet holder is required to report the lost card to the Cellphone Banking help desk. After hours the eWallet holder will be automatically re-routed to the Debit Card Lost Card call centre. FNB will ensure that the card is cancelled. You are responsible for re-issuing the eWallet holder with a new card and PIN mailer.

If a PIN for the card becomes invalid (due to multiple incorrect entries) then the eWallet holder has to contact, you (their employer) in order to have a new PIN Mailer issued and activated.

How it works - 3 easy steps

Step 1 - Create	Step 2 - Pay	Step 3 - Access
You can create a eWallet account by capturing the necessary data fields (e.g. employee/recipient name) or via a file upload on Online Banking Enterprise™. Link a prepaid card and/or cellphone number (and PIN) to the eWallet Pro. Order and distribute the cards to employees/recipients (if applicable).	Payments to eWallets are done like any other normal Payment on Online Banking Enterprise™. Create the payment online or use the import option for bulk payments via the file upload process.	The eWallet holder will receive an SMS informing them of their payment and how to access their funds. They can transact immediately using their cellphone or the debit card and PIN you have issued to them. eWallet recipients who have a card and a pin will be able to check their eWallet Pro balance outside of login via www.fnb.co.za > Contact Us + Tools > eWallet Balance Enquiry

Note! For your added convenience, you can view the the following PDF's to provide you with further information regarding eWallet Pro, by clicking on "Product User Guide " hyperlink:

- eWallet Pro Client User Guide
- eWallet Pro T's and C's
- eWallet Pro Overview
- Recipient Guide

Payments to an eWallet

Payments made using eWallet Pro are immediately available, and the eWallet holder will be notified via SMS that money has been paid into their eWallet with directions on how to activate and access the eWallet.

- Payments to eWallets are done like a normal Folder payment, a Payments file import or via a Once-Off payment. It is also possible to copy a previous eWallet payment or copy a Failed eWallet payment.
- The KYC status (Document Status) of a eWallet governs the amount of funds that can be paid to a eWallet, move through a eWallet and what the maximum balance may be.
- Payments for eWallets are processed on the day of execution as specified by you and are only deducted from your nominated account at that time.
- Payments will be processed based on the available balance or online settlements as per normal payments. A payment to an eWallet can only be made from the nominated account specified in the Client Contract.

- eWallet Pro will be billed per payment. The cost per transaction is linked to the agreed contract with FNB. Thus all eWallet Pro payments related to the same contract will be billed with the same base cost.

The **Create + Maintain**, **Authorisation Needed** and **Active Contracts** options have been grouped together in the eWallet Pro sub-tab to ensure that all functionality is easily accessible within a single page.

There are several action buttons available on the right side of the main screen which you can use to easily access the **+Add**, **Search, Download** and **Print** functions.

You can also use the easy action buttons available on the landing page to quickly access some of the most used eWallet Pro functions. When using the easy buttons for a specific item you will be taken directly to the capture page for the selected transaction type.

The Menu on the left of the page will display the options that are applicable to the page and specific to your eWallet Pro permissions.

When the Menu is active, an Extended Menu List will be displayed in grey. This list provides quick access to functionality within that tab / sub-tab as well as to other commonly used functions on Online Banking Enterprise™.

15.1 Apply for an eWallet Contract

Use this function to create an eWallet contract.

1. Select the **Recipients** tab and click on the **eWallet Pro** sub tab.
2. If you do not have an active contract in place, a Marketing page will be displayed on the page.
3. Select **Apply Now** to apply for the eWallet Pro functionality.
4. Complete the **relevant information** required.
5. Once you have completed all the required information, accept the **Terms and Conditions.**
6. Click on **Authorise**.
7. Once authorised, the Contract will be displayed on the Active Contact viewing option.

Notes:

- You will be limited to a maximum of 15 contracts Online.
- When applying for a contract the access mechanism (Card and/or Cellphone) for the recipient needs to be selected.
- The card ordering option will only be available to users if this was selected when creating the contract.
  The option to order International Cards will only become available on Online Banking Enterprise™ once South African Reserve Bank (SARB) approval has been received and acknowledged by eWallet.
- The Administrator will also need to indicate if any recipient withdrawals will be sponsored.

15.1.1 Allocate eWallet Permissions

The eWallet sub-tab will be displayed to users that have permissions to Manage Folders and/or Authorise Folders for Payments and/or Collections. In addition, the Administrator will also need to assign the relevant eWallet permissions for each user via the Profiles Tab > User Dashboard > Maintain User > Recipient Permissions sub tab > select eWallet Pro from the dropdown > select eWallet Pro permissions for the contracts displayed.

The Administrator can assign the following eWallet Pro Permissions:

- Create and Maintain eWallet Pro Recipient
- Order eWallet Pro Cards

15.1.2 Order eWallet Cards

Use this function to order cards for your eWallet Recipients.

Note:

- The card ordering option will only be available to users if this was selected when creating the contract.

- The option to order International Cards will only become available on Online Banking Enterprise™ once South African Reserve Bank (SARB) approval has been received and acknowledged by eWallet.

1. Select the **Recipients** tab and click on the **eWallet Pro** sub tab.
2. Click on the **Active Contracts** viewing option.
3. A list of all the active eWallet Contracts will be displayed on the page.
4. Select the **Order Cards** action button next to the relevant eWallet contract.
5. Select the + **Add** action button on the right and select **Order Card**.
6. Once you have completed all the required information, click on **Authorise**.

15.1.3 eWallet Pro Card Report

Use this function to view or download an eWallet Pro card order report, in .csv format, directly from your Online Banking Enterprise™ Inbox.

The eWallet Pro Card report will assist you to record and manage your eWallet Pro cards.

The report includes the following information:

- Card Order Date
- Total Number of Cards
- Card Numbers

Note:

- The eWallet Pro Card report will only be generated if the card ordering request has been fully processed on Online Banking Enterprise™.

1. Click on Menu.
2. Click on Inbox.
3. Click on the Download option for the most recent eWallet Pro Card report.
4. The eWallet Pro Card report is only available in .csv format

15.2 Add eWallet Accounts

Use this function to create a eWallet account and associate at least one access mechanism (Cellphone or Card) to it via Online Banking Enterprise™. A eWallet can be created online or via a file import.

The KYC status (Document Status) of a eWallet governs the amount of funds that can be paid to a eWallet, move through a eWallet and what the maximum balance may be.

Decide on the Documentation Status BEFORE entering the required details as the data required is determined by the Documentation Status:

- **Proof of ID or Passport & Proof of Residence taken:** Contract, eWallet Name, First Name, Surname, Type of ID, ID/Passport Number, Nationality, Country of Issue, Nationality, Date of Birth, Address,Suburb, Area Code, Country, Gender and at least one access mechanism.
- **ID or Passport shown and Copy taken:** Contract, eWallet Name, First Name, Surname, Type of ID, ID/Passport Number, Nationality, Date of Birth, Country of Issue,Gender and at least one access mechanism.

It is essential to ensure that the information provided is accurate in terms of name and ID / passport number (and residential address where applicable) and that a copy of the relevant proof of identity is on record, as it needs to be made available to FNB, on request, within 24 hours' notice.

15.2.1 Create eWallet Recipients Online

Use this function to create a eWallet account online.

6. Select the **Recipients** tab and click on the **eWallet Pro** sub tab.
7. Click on the **Active Contracts** viewing option.
8. A list of all the active eWallet Contracts will be displayed on the page.
9. Click on the **Name** hyperlink to select the relevant contact.
10. Select the + **Add** action button on the right and select **Add Recipient**.
11. Select the **Document Status** and complete the relevant information required.
12. Once you have completed all the required information, click on **Submit**.

It is possible to save the eWallet to a new or an existing folder. To save the Recipient to a folder, click on the "**Yes**" button next to the question **" Would you like to save the recipient to a folder?"** and select Existing Folder to save the account to an **Existing Folder** or select **New Folder** to save the account to a New Folder.

- If you have selected to add the account to an existing Payment Folder, select the existing Folder Name and enter the **Recipient Name**. The recipient name is limited to 20 characters and does not have to be the recipient's birth name.

- If you have selected to add the account to a New Folder Name, additional fields will display: Enter the Folder Name, select the Account, select the check box to Allow Override if you want to make payments of a different account; select either Consolidated or Itemised as the Statement Entry; enter the reference that you want to appear on your bank statement next to the Own Reference field and enter the **Recipient Name**. The recipient name is limited to 20 characters and does not have to be the recipient's birth name.

Notes:

- When entering the cellphone details, the cellphone number in the details section must be in standard format e.g. 082 3302807.

- Where a card and PIN have been used as an access mechanism, you will hand out the card and PIN Mailer to your recipients (this can take place before or after the actual payment).

- Where a cellphone has been used as the access mechanism, the recipient will receive an SMS as soon as the payment has been made. The SMS will inform the recipient that they have been paid, and will instruct them to dial a dial-string in order to access the Wallet. Once the Wallet holder has accessed the Wallet using the 5-digit PIN code selected by you and has

been prompted to change it, it will no longer be active and cannot be used again by the Wallet holder.

15.2.2 Import Multiple eWallet Accounts

Use this function to create multiple eWallet accounts via a file import.

You can download the (.csv) spreadsheet as well as document with guidelines on how to complete the CSV template via our Templates and Form Support Centre by following the step actions listed below:

4. Select the help icon **"?"** at the top of your screen
5. Scroll down to the File Formats and Online Templates section or simply click on the File Formats and Online Templates link provided in the Contents section on the left.
6. Download the relevant CSV template or the file format by clicking on the required links provided in the eWallet Pro section.

How to import multiple eWallet accounts via the CSV file import.

1. Select the **Recipients** tab and click on the **eWallet Pro** sub tab.
2. Click on the **Active Contracts** viewing option.
3. A list of all the active eWallet Contracts will be displayed on the page.
4. Click on the **Name** hyperlink to select the relevant contact.
5. Select the + **Add** action button on the right and select **Import**.
6. Enter the file name and click on **Browse** to locate the file to be imported.
7. The **Add to Folder** section is present if you have Payment folder permission It is possible to add the eWallet Recipients to a new or an existing folder. Select Existing Folder to save the account to an **Existing Folder** or select **New Folder** to save the account to a New Folder.

    - If you have selected to add the account to an existing Payment Folder, select the existing Folder Name and enter the **Recipient Name**. The recipient name is limited to 20 characters and does not have to be the recipient's birth name.

    - If you have selected to add the account to a New Folder Name, additional fields will display: Enter the Folder Name, select the Account, select the check box to Allow Override if you want to make payments of a different account; select either Consolidated or Itemised as the Statement Entry; enter the reference that you want to appear on your bank statement next to the Own Reference field and enter the **Recipient Name**. The recipient name is limited to 20 characters and does not have to be the recipient's birth name.

8. Select the tick box confirming that the relevant supporting documentation has been completed, checked and is correct.
9. Click on **Continue**.
10. A results page is displayed. Click on **Finish** to return to the eWallet Pro landing page. Alternatively click on **Import Again** if the file failed and you would like to import the file again.
11. A Results file will be created and sent to your Online Banking Enterprise™ Inbox. The results of a eWallet Pro Import File item will be either **Failed** if the item has failed the creation process or **Successful** if the eWallet was successfully created.

15.3 Maintain eWallet Details

Use this function to maintain an eWallet by either changing or adding personal details about the eWallet holder or changing or adding access mechanism details.

5. Select the **Recipients** tab and click on the **eWallet Pro** sub tab.
6. Click on the **Active Contracts** viewing option.
7. A list of all the active eWallet Contracts will be displayed on the page.
8. Click on the **Name** hyperlink to select the relevant contact.
9. A list of all the eWallet Recipients loaded for the relevant contract will be displayed on the page.
10. Select the **Maintain** action button next to the eWallet Recipient you would like to maintain.
11. Enter the required details and click on **Submit**.

15.4 Delete an eWallet Account

Use this function to delete a eWallet from the visible Client Contract for a specific contract. This means that the next time the Client Contract is displayed; the eWallet won't be visible. The deleted eWallet will also not be searchable.

6. Select the **Recipients** tab and click on the **eWallet Pro** sub tab.
7. Click on the **Active Contracts** viewing option.
8. A list of all the active eWallet Contracts will be displayed on the page.
9. Click on the **Name** hyperlink to select the relevant contact.
10. A list of all the eWallet Recipients loaded for the relevant contract will be displayed on the page.
11. Select the **Delete** action button next to the eWallet Recipient you would like to delete.
12. A confirmation message is displayed. Click on **OK**. Alternatively click on **Cancel** to cancel the request.

Note: Deleted eWallets can only be found on the Restore eWallet Pro page.

15.5 Restore an eWallet

Use this function to restore a previously deleted eWallet.

1. Select the **Recipients** tab and click on the **eWallet Pro** sub tab.
2. Click on the **Restore Recipients** viewing option.
3. A list of all the eWallet Recipients which can be restored will be displayed.
4. Select one or more eWallet by ticking the tick box next to the eWallet Name and click on **Restore**.
5. The Restore eWallet Pro page is displayed with the selected restored eWallets.
6. Click on **Confirm**.

The eWallet can only be restored from a deleted request and not if the underlying account has expired.

15.6 Search an eWallet

Use this function to locate a specific eWallet account.

1. Select the **Recipients** tab and click on the **eWallet Pro** sub tab.
2. Click on the **Active Contracts** viewing option.
3. A list of all the active eWallet Contracts will be displayed on the page.
4. Click on the **Name** hyperlink to select the relevant contact.
5. A list of all the eWallet Recipients loaded for the relevant contract will be displayed on the page.
6. Select the **Search** on the right-side of the page or on **Menu** for more options and click on **Search**.
7. Enter the eWallet Name and/or Account Number and click on **Search**. The search is limited to the Client List that is displayed on the eWallet Pro page. To search in another Client List, that contract name must be loaded on the page.
8. The results of the search are displayed.

15.7 View eWallet Payment History

Use this function to view Payment History for a specific eWallet account.

1. Select the **Recipients** tab and click on the **eWallet Pro** sub tab.
2. Click on the **Active Contracts** viewing option.
3. A list of all the active eWallet Contracts will be displayed on the page.
4. Click on the **Name** hyperlink to select the relevant contact.
5. Click on the **Active Wallets** viewing option.
6. A list of all the eWallet Recipients loaded for the relevant contract will be displayed on the page.
7. Select the **View History** button.

The last 5 payments made to the eWallet Recipient will be displayed.

15.8 Add eWallet Recipient to a Folder

Use this function to add an existing eWallet Recipient to a Folder.

1. Select the **Recipients** tab and click on the **eWallet Pro** sub tab.
2. Click on the **Active Contracts** viewing option.
3. A list of all the active eWallet Contracts will be displayed on the page.
4. Click on the **Name** hyperlink to select the relevant contact.
5. Click on the **Active Wallets** viewing option.
6. A list of all the eWallet Recipients loaded for the relevant contract will be displayed on the page.
7. Select the eWallet Recipients you want to add to a Folder and select **Add to Folder**.

It is possible to save the eWallet to a new or an existing folder.

- If you have selected to add the eWallet Recipients to an **Existing Folder**, select **Existing** and choose the Folder Name.
- If you have selected to add the account to a **New Folder** Name, additional fields will display: Enter the Folder Name, select the Account, select the check box to Allow Override if you want to make payments of a different account; select either Consolidated or Itemised as the Statement Entry; enter the reference that you want to appear on your bank statement next to the Own Reference field and enter the **Recipient Name**. The recipient name is limited to 20 characters and does not have to be the recipient's birth name.

8. Click on **Authorise**.

15.9 Export a eWallet Recipient Report

Use this function to export a list of all your active eWallet Recipients linked to an eWallet contract.

1. Select the **Recipients** tab and click on the **eWallet Pro** sub tab.
2. Click on the **Active Contracts** viewing option.
3. A list of all the active eWallet Contracts will be displayed on the page.
4. Click on the **Name** hyperlink to select the relevant contact.
5. Click on the **Active Wallets** viewing option.
6. A list of all the eWallet Recipients loaded for the relevant contract will be displayed on the page.
7. Click on **Menu** for more options, select **Export Recipient Report.**
8. You will get a confirmation message confirming that the details of the recipients in the contract have been sent to your Online Inbox.
9. Click on **Finish**.
10. Open your **Online Banking Enterprise ™ Inbox**, select the file, click on **Download** and save to a destination of your choice in order to view the information.

16. Merchant Services Tab

Merchants can view and manage their transactions from the Merchant Services Tab.

In order to view the Merchant Services Tab, the Administrator(s) must assign permissions to users via Profiles > Maintain User > User Permissions.

Once the necessary rights have been assigned by an Administrator, the user will have access to the following functionality:

- View their transaction history;
- View transaction details for each transaction;
- View receipts;
- Search for specific transactions; and
- View and print their statements online.

Transaction History

Use this function to view the Transaction History by Terminal ID.

1. Click on the **Merchant Services** Tab.
2. Select the **Merchant ID** by clicking on the account **Name** hyperlink.
3. A list of **Terminal IDs** linked to the merchant ID will be displayed.
4. Select the relevant **Terminal ID** by clicking on the account **Name** hyperlink.
5. The Transaction History of the selected Terminal ID is displayed.

The Transaction History information can be Exported in CSV and flat fixed length file format to your e-mail.

View transaction details

Use this function to view transaction details for each transaction.

1. Click on the **Merchant Services** Tab.
2. Select the **Merchant ID** by clicking on the account **Name** hyperlink.
3. A list of **Terminal IDs** linked to the merchant ID will be displayed.
4. Select the relevant **Terminal ID** by clicking on the account **Name** hyperlink.
5. The Transaction History of the selected Terminal ID is displayed.
6. Click on the relevant transaction hyperlink to obtain more transaction details for each transaction.

View Receipts

1. Click on the **Merchant Services** Tab.
2. Select the **Merchant ID** by clicking on the account **Name** hyperlink.
3. A list of **Terminal IDs** linked to the merchant ID will be displayed.
4. Select the relevant **Terminal ID** by clicking on the account **Name** hyperlink.
5. The Transaction History of the selected Terminal ID is displayed.
6. Click on the **View Receipt** button next to the transaction.
7. Transaction Receipt will be displayed.

Search Transactions

Quick Search

A search can be performed on the following search criteria:

- Card number
- Sequence number
- Batch number

1. Click on the **Merchant Services** Tab.
2. Select the **Merchant ID** by clicking on the account **Name** hyperlink.
3. A list of **Terminal IDs** linked to the merchant ID will be displayed.
4. Select the relevant **Terminal ID** by clicking on the account **Name** hyperlink.
5. The Transaction History of the selected Terminal ID is displayed.
6. Select **Search** on the top right corner.
7. Select the **Quick** button.
8. Enter the required search **criteria** and click on **Search**.
9. The transaction history of the selected day is displayed

This can be printed or downloaded in a PDF format.

Advanced Search

Use this function to search for a transaction over a period of time.

1. Click on the **Merchant Services** Tab.
2. Select the **Merchant ID** by clicking on the account **Name** hyperlink.
3. A list of **Terminal IDs** linked to the merchant ID will be displayed.
4. Select the relevant **Terminal ID** by clicking on the account **Name** hyperlink.
5. The Transaction History of the selected Terminal ID is displayed.
6. Select **Search** on the top right corner.
7. Select the **Advanced** button.
8. Enter the required search **criteria** and click on **Search**.

The information can be Exported in CSV format to your e-mail.

Statements

Use this function to view current and historical Statements.

1. Click on the **Merchant Services** Tab.
2. Click on the **View** button next to the **Merchant ID**.
3. The statements will be displayed, select the **Download hyperlink** to open and/or save the statement in a PDF format.

The latest three statements can be downloaded for free; a fee will be charged to download older statements.

17. 3rd Party Investment Manager

3rd Party Investment Manager is an online Third Party Funds Management system which allows 3rd Party Investment Managers such as Attorneys, Property Managers, Estate Administrators, Debt Collectors and Estate Agents to manage entrusted funds on behalf of their clients on Online Banking Enterprise™.

This functionality enables the 3rd Party Investment Manager to perform the following functionality via Online Banking Enterprise™:

- Create and Maintain of 3rd Party Client profiles
- Open Investment (Notice, Call and Fixed) Accounts on behalf of 3rd Party Clients
- Perform various Instructions on the 3rd Party Clients Investment Accounts (Notice to withdraw, maturity withdrawal and reinvestment)
- Perform Financial Transactions (Fund, Transfers, Payments) on Investment Accounts
- Close Investment Accounts
- View and extract the required Statements and Reports on the Trust and Investment Accounts

In order to use the 3rd Party Investment Manager functionality via Online Banking Enterprise™, Trust Account needs to be opened and linked to an Investment Structure on FNB's back office systems, this can by your Relationship Manager.

Navigation

The 3PIM Platform is controlled through its own main tab in Online Banking Enterprise.

Once the 3PIM tab is selected the following sub tab options are available:

- Investment Accounts
- Pending Instructions
- Clients

These have been grouped together in separate sub-tabs to ensure that the functionality is easily accessible within a single page.

Investment Accounts Tab

The Investment Accounts Tab reflects all information pertaining to 3rd Party Client Investment Accounts and consists of 3 sub-tabs:

Active Accounts	Closed Accounts	Empty Accounts
The Active Accounts sub-tab displays all active 3rd Party Client investment accounts, linked to the Trust Account, with a balance greater than R0.00. **Note**: The sum of the balances in the 3rd Party Client investment accounts is not the total balance in the Trust Account.	The Closed Accounts sub-tab displays all 3rd Party Client investment accounts that were closed. It reflects the 3rd Party Client to which the investment account was linked and the date which the account was closed.	The Empty Accounts sub-tab displays all the 3rd Party Client investment accounts that do not have a balance (R0.00) and need to be funded.

Pending Instructions Tab

The Pending Instructions Tab reflects 3rd Party Client investment accounts that have been opened and/or funded, as well as instructions that require authorisation. This tab consists of 4 sub-tabs:

New Accounts	Closed Accounts	Withdraw Instructions	Maturity Instructions
The New Accounts sub-tab lists all new 3rd Party Client investment accounts that have been opened and funded and require authorisation.	The Closed Accounts sub-tab lists active 3rd Party Client investment accounts that require authorisation to be closed.	The Withdraw Instructions sub-tab lists all instructions for **7 and 32 Day Notice accounts** that require authorisation.	The Maturity Instructions sub-tab lists all instructions for **Fixed Deposit accounts** which require authorisation.

Clients Tab

The Clients Tab lists all 3rd Party Clients that have been created. It also reflects the active investment accounts linked to the 3rd Party Clients.

1. Click on the **3rd Party Client** to edit their details.
2. Click the number under **No. of accounts** column to view the active accounts linked to the3rd Party Client.

Note: 3rd Party Client information can be edited at any time. It is however important that this information is accurate for interim and year-end tax submissions.

Investment Structures

There are two different types of Investment structures that can be created, namely an Indirect and Direct Structure.

The Indirect Structure:	The Indirect Structure is specifically designed for Attorneys, as they are not allowed to submit money into their 3rd Party Clients' Investment Accounts directly. This structure will ensure that transactions flow only from the Trust Account to the 3rd Party Client Investment Account and vice versa. Upon payment to a 3rd party beneficiary, the payment amount will automatically process to the Trust Account and is then automatically redirected to the specified beneficiary account. The debit, and corresponding credit, will reflect in the Trust Account transaction history. **Note**: Interest earned, less expenses, in the Trust Account will automatically be paid to the Attorneys Fidelity Fund (AFF), provided the Managed Option was selected at sign up.
The Direct Structure:	The Direct Structure can be used by all other 3rd Party Investment Managers. This structure does not force the same regulatory requirements as the

	Indirect Structure, which means that all Investment Accounts are fully transactional and money can be paid both into and out of these accounts, without having to go through the Trust Account.

Permissions:

The Online Banking Enterprise™ user permissions for 3PIM are based on the trust account which is activated and/or linked on setup of the 3PIM.

Once the Trust and 3PIM has been linked and setup the Administrator(s) of the ZBI profile will can allocate Users with the necessary permissions to access the 3PIM functionality via their Online Banking Enterprise™ profile.

- Permissions must be allocated on the linked Trust account (**Profiles tab > Maintain User > Account Permissions > Non - Financial Permissions**) which will automatically apply to all the Investment accounts opened under the relevant 3PIM profile and linked Trust Account.

- The 3PIM Account permission will allow the user to Create and Maintain 3rd Party Client profiles, perform a Balance Enquiry, view the Transaction history, obtain Statements and other Reports, create and maintain 3rd Party Client profiles and allow them to Open Investment (Notice, Call and Fixed) Accounts on behalf of their 3rd Party Clients.

- A user who needs to perform any financial transactions (Funding, Transfers and Payments) will need to be given the necessary Transfer and/or Payment permission (**Profiles tab > Maintain User > Account Permissions > Financial Permissions**) on the Trust Account as required.

- A user who has been entrusted to setup a multi-tiered management fee structures for each trust account will need to be given the necessary Capture and Authorise permissions (**Profile tab > Maintain User > User Permissions > Capture and/or Authorise 3PIM tier structures**)

17.1 Create and Maintain of 3rd Party Client profiles

You can create new 3rd Party Clients for individual or business profiles. Once you have created the client profile, you may open several Investment Accounts linked to each client profile.

The system will display all the clients linked to your profile and will also display the number of active accounts linked to each client. If you click on the number, it will display all the account details for the linked accounts relevant to the selected client.

Create a new 3rd Party Client Profile

This function allows you to create a new 3rd Party Client for individual or business profile.

Add an Individual Client

1. Click on the **Add** action button and select **Add Individual Client**. Note: Clients can also be added by navigating to the Clients tab and following the same process.
2. Complete the relevant details required to create the new3rd Party Client.
3. Insert a **Reference Number** that will be unique to this client.
4. It is your responsibility, as the3rd Party Manager to ensure that you collect and store your client's verified FICA documentation.
5. Click on **Add** when done.

Note: All fields are mandatory expect Middle Name, Tax Number, Cell Phone Number, Email Address, Unit Number and Complex Name.

6. Once complete, a confirmation screen will display with the3rd Party Client details.
7. Click **Confirm** to proceed, or **Edit** to change the information captured.
8. Once confirmed, you will receive the message "You have successfully added a new client".
9. Click on **Finish** to proceed, or **Add Account**, to add another new client.

Add a Business Client

1. Click on the **Add** action button and select **Add Business Client**.
2. Complete the relevant details required to create the new 3rd Party Client.
3. Insert a **Reference Number** that will be unique to this client.
4. Enter the **Company Registration Number** in the prescribed format.
5. It is your responsibility, as the3rd Party Manager to ensure that you collect and store your client's verified FICA documentation.
6. Click on **Add** when done.

Note: All fields are mandatory expect Trading Name, VAT Reg Number, Tax Ref Number, Cell Phone Number, Email Address, C/O, Unit Number and Building Name

7. Once complete, a confirmation screen will display with the3rd Party Client details.
8. Click **Confirm** to proceed, or **Edit** to change the information captured.
9. Once confirmed, you will receive the message "You have successfully added a new client". Click on **Finish** to proceed or **Add Account** to add another new client.

Clients can also be added by navigating to the Clients tab and following the same process.

The Clients Tab lists all 3rd Party Clients that have been created. It also reflects the active investment accounts linked to the 3rd Party Clients. Simply click on the **Clients** sub tab, select the **3rd Party Client** to **edit** their details.

3rd Party Client information can be edited at any time. It is however important that this information is accurate for interim and year-end tax submissions.

Create and Manage the Management Fee Structure

This function allows you to set up a tiered Management Fee structures for each Trust Account.

The ability to add a tiered structure is a stand-alone process performed by a client who has permissions to add a tiered structure. Once created the structure will then form part of the management fee options that are offered on account opening.

1. Click on the **3PIM** Tab.

2. Click on **Menu** for more options, select **3PIM Tier Structure**.
3. Maintain the Tiered Fee Structure, you can add a minimum of 2 and a maximum of 7 tiered rates.
4. Click on Submit and authorise the changes made to the tiered structure.

17.2 Open Investment Accounts

There are 4 types of investment accounts:

- Call Account
- 7-day Notice Deposit account
- 32-day Interest Plus (notice deposit)
- Fixed Deposit

A call account, 7-day notice deposit account and the 32-day interest plus account can be funded later. A fixed deposit account needs to be funded immediately.
You can open Investment (Notice, Call and Fixed) Accounts between 12:00am and 21:00pm on a business day and 12:00am and 23:00pm on a Saturday.

All new Investment Accounts will be linked to the Trust Account against which the Investment Account is opened.

Account Type	**Minimum Opening Balance**	**Important Rules**
Call Investment Account	R1000.00	You can choose to fund the account now or later. The Account can be funded and activated 180 days from the account opening day. However, if you choose "Fund Now" during the application, the Instruction must be authorised on the same day. All transactions not authorised before 9pm will expire and deleted from the system.
7 Day Notice Deposit	R50 000.00	You can choose to fund the account now or later. The Account can be funded and activated 180 days from the account opening day. However, if you choose "Fund Now" during the application, the Instruction must be authorised on the same day. All transactions not authorised before 9pm will expire and deleted from the system. **Important Note:** If the Balance amount falls below R50 000 no interest will be earned on the account.
32 Day Notice Deposit	R100.00	You can choose to fund the account now or later. The Account can be funded and activated 180 days from the account opening day. However, if you choose "Fund Now" during the application, the Instruction must be authorised on the same day. All transactions not authorised before 9pm will expire and deleted from the system.
Fixed Deposit	R10 000.00	You can only choose "Fund Now"

		This Instruction must be authorised on the same day. All transactions not authorised before 9pm will expire and deleted from the system.

Investment Accounts can only be funded from the linked Trust Account. If a Fund instruction is not fully authorised it will be display under the Pending Instructions sub tab > New Accounts Grouping.

If Investment accounts are not funded within the specified time period, they will expire and be deleted from the system.

Open a New Investment Account for a 3rd Party Client

This function allows you to open a new Investment Account for a 3rd Party Client.

1. Click on the **3PIM** Tab.
2. Select the **+Add** action button on the right and select **Existing Client**.
3. Select the **Client Name** and select the **Investment Account Type** (Call, Notice or Fixed) that you would like to open and link to the client.
4. Complete the relevant details including: The Account Reference which will be displayed on the client's statement, the Interest Capitalization Date and Select a Management Fee that will be charged for managing the Investment Account on behalf of your client.
5. Select the management fee to be applied to the account from the below options:
    - Fee Percentage based on Interest
    - Fee Percentage based on Capital
    - Fee Percentage based on Tiered Structure (This option will not be available if you have not setup a tiered structure for the trust account).
    - Flat Rate Fee
6. Once you have completed all the required fields, you may select to **Fund** the Account **Now** or **Later**.

Note: If you are opening a **Fixed Deposit Account** you need to complete the **Maturity Instructions** and choose **Fund Now.** This Instruction must be authorised on the same day. If this transaction is not authorised before 9pm, it will expire and deleted from the system.

17.3 Statements and Reports

You are able to retrieve the following statements and Reports from the 3rd Party Investment Manager tab:

- Transaction History
- Detailed Balance

- Account Statement
- Certificate of Balance
- Export a list of Active, Closed or Empty Accounts
- Tax Documents:
    - SARS IT3(b) File
    - Client IT3(b) Certificate

Transaction History

Use this function to view the Transaction History of either the Trust account or the Investment accounts.

1. Click on the **3PIM** Tab.
2. Click on **Menu** for more options, select **Transaction History**. **Note!** You can change the viewing option to view **Active Accounts**, **Closed Accounts** or **Empty Accounts** by clicking this option on the top of the page.
3. Select an account by clicking on the **Account Name** hyperlink.
4. The transaction history of the selected account is displayed.

Detailed Balance

Use this functionality to view the balance of a particular 3rd Party Investment Manager Account. Account Balances can be viewed for either Trust accounts or Investment accounts.

1. Click on the **3PIM** Tab.
2. Click on **Menu** for more options, select **Detailed Balance** and select an account by clicking on the **Account Name** hyperlink.
3. The balance information of the selected account is displayed.

The results can be printed or downloaded in ASCII, CSV or PDF format.

Account Statements

Use this function to obtain information for Statements on the Trust Account and/or the Investment Accounts.

1. Click on the **3PIM** Tab.
2. Click on **Menu** for more options, select **Account Statements**. **Note!** You can change the viewing option to view **Active Accounts**, **Closed Accounts** or **Empty Accounts** by clicking this option on the top of the page.
3. Select an account by clicking on the **Account Name** hyperlink.
4. You can choose to **Email** or **Download** the Account Statement Information.
5. If you select the email option, enter the **Email Address details** and **c**lick on **Continue**.

The statement will be emailed within 15 minutes in a PDF format.

Please note that there are service fees associated with requesting Historical Statements older than the last three free.

Certificates of Balance

The certificate of balance is always generated for the current date and time, you can view and download a Certificate of Balance for each Investment Account.

1. Click on the **3PIM** Tab.
2. Click on **Menu** for more options, select **Certificate of Balance** and select an account by clicking on the **Account Name** hyperlink.
3. The information of the selected account is displayed.

Account List Export

Use this function to export an excel report to show a balance of all Active, Empty and Closed Accounts.

1. Click on the **3PIM** Tab.
2. Click on **Menu** for more options, select **Export**.
3. Select one or more **Account Status**: **Active Accounts**, **Closed Accounts** or **Empty Accounts**.
4. Select the required **Format**: **PDF** or **CSV**.
5. You can choose to send the export results to your **Inbox** or **Email**.
6. If you select the email option, enter the **Email Address details** and **c**lick on **Export**.

Tax Documents

Use this function to download your Tax Certificates required for submission to SARS.

SARS IT3(b) File

The SARS IT3(b) file includes the tax information for all your Trust structures.

1. Click on the **3PIM** Tab.
2. Click on **Menu** for more options, select **SARS IT3(b) File** from the extended Menu option.
3. Click on **Download** next to the available **SARS IT3(b) file** displayed on the screen.

Notes:

- The data in these files and its integrity remain your sole responsibility, FNB is not responsible or liable for the completeness, accuracy or relevance of the data nor ensuring you submit the correct tax information to SARS.
- You will responsible for submitting the SARS IT3(b) file to SARS.

Client IT3(b) Certificate

The Client IT3(b) certificate (pdf document) includes all the Investment Accounts linked to the 3rd Party Clients for all structures.

1. Click on the **3PIM** Tab.
2. Click on **Menu** for more options, select **Client IT3(b) Certificate** from the extended Menu option.
3. Choose the required client.
4. A list of all the available Tax Certificates will be displayed with the most recent date on the top.
5. Click on **Download** next to the Client IT3(b) Certificate you want to download.

Note. You will need to provide the relevant Client IT3(b) certificates to your respective 3rd Party Clients.

17.4 Transfers

This functionality will be applicable to **Call Accounts** only,7 and 32-day Notice Deposit account and the Fixed Deposit account work on instructions.

You can transfer from the Investment Account to the Trust Account or Fund the linked Investment Account from you're Trust Account. You may not transfer between your Investment Accounts.

1. Click on the **Transfers** tab and select the **3PIM** sub tab.
2. Select the **+Add** action button on the right and select **Add**
3. **Select the relevant Transfer option: Fund from the Trust**, **From Investment account** or **Import**.

If you selected Fund from the Trust Account:

3. Select a **Trust Account** and click on **Continue**.
4. Select an **Investment Account** you wish to fund.
5. Give the transfer a **Name** and provide a **From** and T**o Reference**.
6. Click on **Authorise**.
7. The transfer will display under the **Authorisation Needed** sub-tab under the Transfers main tab.
8. Select the box next to the transfer to authorise and click on **Authorise**.
9. Once authorised, the transfer will be complete.

If you selected From Investment Account:

3. Select an **Investment Account** you wish to transfer **From**.
4. Select a **Trust Account** and click on **Continue**.
5. Give the transfer a **Name** and provide a **From** and **To Reference**.
6. Click on **Authorise**.
7. The transfer will display under the **Authorisation Needed** sub-tab under the Transfers main tab.
8. Select the box next to the transfer to authorise and click on **Authorise**.
9. Once authorised, the transfer will be complete.

If you selected Import:

3. Give the transfer a **Name** and **Import** the .CSV file.
4. You have the option to **Ignore Invalid Items** in the file by checking the check box. **Note.** If you check the Ignore Invalid Items check box. The transfer batch will be created containing only valid items. If you do not check the Ignore Invalid Items check box. A transfer batch will NOT be created if there are any invalid items in the import file.
5. The **File Location** field requires you to locate the file that you want to import. If you know where the file is located, you can type the file path into the File Path field, or click on **Browse** to locate it.
6. Select the required option to receive your import results file, select the **Online Banking Inbox** button to receive your result file via your **Online Banking Inbox** or alternatively select the **Email** button to receive the results file via email. If you selected email, then complete the relevant address fields.
7. Select the **Format** from the dropdown and click on **Continue**.
8. Click on **Finish**.

9. Check the **Import Results Report**.

You have the ability to import a file that may contain single or multiple Instructions.

Notes:

- All transfers have to be authorised, including the transfer for closure. It is possible to post-date Transfers between trust and investment accounts up to 365 days in advance.
- Please ensure that you have available funds in the accounts to make the required Transfers, Online Settlement Limits will not apply to these transactions.

- Only users with the relevant capture and/or authorise transfer permission to the linked Trust Account will be able to do Transfers.

17.5 Payments

This functionality will be applicable to **Call Accounts** only ,7 and 32-day Notice Deposit account and the Fixed Deposit account work on instructions.

You can make Payments on behalf of the Investment Accounts that are linked to a Trust Account on your 3rd Party Fund Manager profile.

Investment accounts that fall under the **Indirect Deposit Structure cannot make payments directly to 3rd party beneficiaries accounts**. The funds will first be moved to the linked Trust Account and then make the payment from the Trust Account to the required beneficiaries account. These payments will display as two separate transactions on the Transaction History information.

Investment accounts that fall under the **Direct Deposit Structure can make payments directly to 3rd party beneficiaries accounts**.

1. Click on the **Payments** tab and select the **3PIM** sub tab.
2. Select the **+Add** action button on the right and select **Add Batch.**
3. **Select the relevant Payment option: Once-Off**, **From Folder** or **Import**.

    - When making a Once Off Payment for a Call Account the recipients details must be completed.
    - When making a Payment from Folder the recipient must be selected from the relevant Folder.
    - When Importing, download the required .CSV templates, complete the relevant account details and import the file into Online Banking Enterprise.

If Once-Off Payment was selected:

3. Complete the **Payment Details**, including giving the payment a **Name** and selecting the applicable **Service Type**.
4. Indicate whether you would like to **save the recipient**, which you are about to set up, to a **Folder** for future payments.
5. Complete the **Recipient Details** and click on **Save and Exit**.

6. The payment will display under the **Authorisation Needed** sub-tab under the Payments main tab.
7. Select the box next to the payment to authorise and click on **Authorise**.
8. Complete the authorisation process.

If From Folder was selected:

3. Complete the **Payment Details**, including giving the payment a Name, Amount and providing a **From** and **To Reference**.
4. Once you have completed the **Payment Details**, click on **Save and Exit**.
5. The payment will display under the **Authorisation Needed** sub-tab under the Payments main tab.
6. Select the box next to the payment to authorise and click on **Authorise**.
7. Complete the authorisation process.

If Import was selected:

3. Give the Payment a **Name** and **Import** the .CSV file.
4. You have the option to **Ignore Invalid Items** in the file by checking the check box. **Note.** If you check the Ignore Invalid Items check box. The payment batch will be created containing only valid items. If you do not check the Ignore Invalid Items check box. A payment batch will NOT be created if there are any invalid items in the import file.
5. The **File Location** field requires you to locate the file that you want to import. If you know where the file is located, you can type the file path into the File Path field, or click on **Browse** to locate it.
6. Select the required option to receive your import results file, select the **Online Banking Inbox** button to receive your result file via your **Online Banking Inbox** or alternatively select the **Email** button to receive the results file via email. If you selected email, then complete the relevant address fields.
7. Select the **Format** from the dropdown and click on **Continue**.
8. Click on **Finish**.
9. Check the **Import Results Report**.

Notes:

- Only users with the relevant capture and/or authorise payment permission to the linked Trust Account will be able to make Payments.
- Please ensure that you have available funds in the accounts to make the required Payments, Online Settlement Limits will not apply to these transactions.

- All transactions will be itemised on your Bank statement.
- If payment is made from a Call Account to a Recipient for an **Indirect Structure** the payment will reflect in the Transaction History of the Investment Account and the Trust account.
- If payment is made from a Call account to a Recipient for a **Direct Structure** the payment will only reflect in the Transaction History of the Investment Account.

17.6 Account Settings

The Account settings can also be accessed by clicking on the hyperlinked account name.

Maintain an Existing Investment Account for a 3rd Party Client

This function allows you to customise the Account settings for an existing Investment Account for a 3rd Party Client.

1. Click on the **3PIM** Tab.
2. Click on **Menu** for more options, select **Account Settings** and select an account by clicking on the **Account Name** hyperlink.
3. You can maintain the following details: The **Account Reference** will be displayed on the client's statement, the **Interest Capitalisation Date**, the **Fee** that will be charged for managing the Investment Account on behalf of your client as well as any **Maturity Instructions** for Fixed Deposits or **Withdrawal Notice Instructions** for Notice Accounts. **Note**: The fee entered is based on a percentage of the capital in the account, the percentage fee entered cannot exceed the interest earned on the investment account. If it exceeds the current interest earned, the fee will be limited to the interest rate for the account.
4. Once you have completed all the required fields, click on **Update**.

You can **Add**, **Maintain** or **Delete** the Investment Instruction.

To Add a new Investment Instruction:

1. Select **Add** and complete the **Notice to Withdraw Instruction** by selecting the required **Withdrawal Instruction**, **Withdrawal Date**, **Withdrawal Amount** and the **Account number** you want the money to be paid to.

    - When adding an instruction for a **7 and 32-day Notice Deposit Account** for a **Direct structure** the recipient's details can be captured to be paid directly to their account.
    - When adding an instruction for a **7 and 32-day Notice Deposit Account** for an **Indirect structure** the funds have to be transferred to the Trust Account before a payment is made to the recipient.

2. Click on **Create** to add the instruction.
3. A **confirmation page** will be displayed with the details entered as per previous page.
4. Click on **Authorise** to add the instruction.

How to set a Maturity Instruction for a Fixed Deposit Account

This function allows you to set an instruction for **Fixed Deposit** accounts.

1. Click on the **3PIM** Tab.
2. Click on the **Quick Links Menu** next to the **Account** and select **Account Settings.**
3. You can maintain the following details: The **Account Reference** will be displayed on the client's statement, the **Interest Capitalization Date,** the **Fee** that will be charged for managing the Investment Account on behalf of your client, the **Investment Term** and **Amount**. **Note**: The fee is a flat rate fee of the interest earned on the interest Capitalization date. The fee cannot exceed the interest earned on the investment account. If it exceeds the current interest earned, the fee will be limited to the interest rate for the account.

4. Select the **Maturity Instruction Type**, **Amount** and the **Account number** you want the money to be paid to.

- When creating an instruction for a **Fixed Deposit Account** for a **Direct structure** the recipient's details can be captured to be paid directly to their account.
- When creating an instruction for a **Fixed Deposit Account** for an **Indirect structure** the funds have to be transferred to the Trust Account before a payment is made to the recipient.

5. Click on **Add** to add the instruction.
6. A **confirmation page** will be displayed with the details entered as per previous page.
7. Click on **Authorise** to add the instruction.

17.7 Notifications

If you are set up to receive notifications for **Authorisation** and/or for **Processed Batch Success or Failure** via the Profiles Tab > Your Notifications, you will also receive the following 3rd Party Fund Manager Instructions:

- **If Notifications for Authorisation has been created, you will receive Notifications when:**
    - For all your Account opening and Fund Now Instructions that requires authorisation (Call, Fixed and Notice Deposit Accounts)
    - For all your Notice and/or Maturity Instructions that requires authorisation.

- **If Notifications for Processed Batch Success or Failure has been created, you will receive Notifications when:**
    - For all your Account Opening and Fund Now Instructions authorised and processed Successfully or Failed during authorisation process (Call, Fixed and Notice Deposit Accounts)
    - For all your Notice and/or Maturity Instructions authorised and processed Successfully or Failed during authorisation process.

16.8 Guarantees

3rd Party Investment Managers such as Attorneys, Property Managers, Estate Administrators, Debt Collectors and Estate Agents can create and manage Guarantees via Online Banking Enterprise™.

A Guarantee is an assurance by one party to another party that they will pay an amount of money, upon certain conditions being met. It is common for Attorneys to use a Guarantee in real estate transactions that take place between a 3rd party client (purchaser) and a Beneficiary (seller) of a property to reduce potential losses.

Create a Guarantee

This function allows you to draft a new Guarantee.

1. Click on the **3PIM** Tab.
2. Select the relevant Trust account by clicking on the **Account Name** hyperlink.
3. A list of all linked investment accounts will be displayed on the screen, selects the **Guarantee** sub tab.
4. Select the **Active** grouping to view a list of all **Active** Guarantee.
5. Select the **+Add** action button on the right and complete the relevant **Beneficiary** and **Property** details.
6. Click on **Guarantee**.
7. A confirmation screen is displayed.
8. Click on **Confirm** or click on **Edit** to edit the information.
9. Click on **Save and Exit** and **Authorise** the request.

You can download the Draft Guarantee.

Re-Issue a Guarantee

Use this function to Re-Issue a Guarantee which expired in the past 6 months which has not been paid or has been cancelled.

6. Click on **Yes** to confirm that you want to cancel the Guarantee and click on **Cancel**.
7. Click on **Save and Exit** and **Authorise** the request.

Verify a Guarantee (outside of Login)

An external bank or beneficiary can access the FNB website and view the status of the Guarantee by entering all the details for the relevant Guarantee.

1. Go to **www.fnb.co.za**
2. Select Contact Us +Tools
3. Verify Guarantee
4. Enter the following details (found on the Guarantee letter itself):

- Guarantee Reference number
- Expiry date
- Beneficiary Account Number
- Maximum Pledge Amount

The system will then present one of the following statuses provided all the required details were provided:

- Invalid – The details entered are incorrect.
- Issued – The Guarantee has been issued and is currently valid
- Cancelled – The Guarantee has since been cancelled.
- Expired – The Guarantee is past the 6-month expiry period and is no longer valid.
- Paid – The Guarantee has been paid.

18. RMB Custody and Trustee Services

RMB Custody and Trustee Services, a division of FirstRand Bank Limited, provides securities settlement services and banking facilities to local and foreign financial institutions.

RMB Custody and Trustee Services is a Central Securities Depository Participant (CSDP) and a shareholder of Strate — the licensed Central Securities Depository (CSD) for the electronic settlement of financial instruments in South Africa.

Our wide range of sub-custody competencies is tailored to service local and foreign institutional investors trading on the Johannesburg Stock Exchange (JSE).

Trustee Services provides investment and accounting compliance services to management companies. This offering is complemented by a state-of-the-art accounting, reporting and reconciliation package to meet the trustee duties and responsibilities, as prescribed by legislation.

Basics done well for you

- Safekeeping and trade settlement of local equity, bond and money market instruments
- Registration (custody share registers of listed companies)
- Asset servicing (including corporate actions administration, collection of interest, allotments, redemption proceeds, distributions and payments), income collection and proxy voting
- Management information reporting
- Trustee services

The Custody Online platform gives clients the ability to access information on their custody accounts:

- Information in your custody accounts over the Internet
- Single window interface to service all your custody needs
- User-friendly interface and intuitive navigation
- Online initiation of securities transactions and corporate action responses
- Real-time transaction status and custody positions

How to allocate Custody Online permissions

1. Select the **Profiles** tab.
2. Select the **Maintain** button directly from the **User Dashboard** or click on **Menu** for more options and select **Maintain**.
3. Select the user you want to maintain by clicking on the user name hyperlink.
4. Select the **User Permissions** sub tab and click on the **Request Custody Online Permission** hyperlink.
5. Select the **check box** to grant user access to Custody Online and select the relevant user permissions for the required **Custody Online functionality** you want to allocate for the user.

You can give a user the following access:

- View Only Access
- Create Trade Settlement
- Authorise Trade Settlement

- Create and Authorise Trade Settlement
- Create Corporate Actions
- Authorise Corporate Actions
- Create and Authorise Corporate Actions

Note. You can also select to Grant this access to **All accoun**ts (Custody Accounts) or **Specify selected accounts** to apply these account permissions to. If you wish to grant access to specific accounts, you can add the account numbers or import a file with these numbers. You are able to add up to 10 accounts manually and up to 50 accounts on an import.

For importing, you can use a csv format which will list the account numbers. Please note that if you have manually captured account numbers and then selected to import, the import file will override the captured accounts.

6. Click on **Save & Exit** to save the User with a status of Work in Progress.
7. You will now need to Authorise the User by visiting the Authorise tab and following the standard authorisation process with your Digital Certificate or PSK device. Once the Administrator(s) have fully authorised the new user permissions, the request will be sent to Custody services who will process and activate your request within 24 hours.

Accessing Custody Online

Once the request has been activated by Custody Services, your user will be able to access the new Custody tab which contains marketing information as well as 2 link out options:

- A link out to the Custody Online platform.
- A link to eLearning, an online learning centre for Custody services.

1. Click on the **Custody tab**.
2. Click on the **Custody Online button** at the bottom of the page.
3. The Custody Online system will now open in a separate tab/window on your browser.

You can also click the eLearning button to access eLearning demos on how to use Custody Online. To view the eLearning demo, simply select a relevant channel you want to view from the tabs above and then select the function you want to view a demo of.

19. DocTrail™

Doctrail™ is a simple and innovative record management solution that will change the way Business clients organise, manage and store their financial and audit records.

With DocTrail™, you no longer need to pay for and /or maintain multiple different systems and processes that requires you to keep invoices as well as any other important documentation relating to your transaction on several different sources, systems or locations.

Simply store all your required documentation matched to your financial transactions effortlessly by uploading it at the time of creating the payment or transfer on Online Banking Enterprise™. Your users also have the optional ability to view, change or remove any documents added.

Why you should use DocTrail™:

- Save time and improve your operational efficiency.
- Eliminate any costs and duplication of record management systems and/or other internal document sources used for record management.

How to add a document

1. Select the line item in the relevant Payment/Transfer batch
2. Click on the '**More'** button next to the item you want to add documents to.
3. Select '**Add to DocTrail™'**.
4. Click on **'Browse'** to search for the Document you want to upload for the transaction. Double click on the relevant document to upload it.
5. Click on **'Attach'** to complete the process.
6. Click on **'Submit'** to submit the payment/transfer for authorisation to an Authoriser. Once Submitted, the payment/transfer will change to the status of Authorisation Requested and cannot be modified unless rejected by an Authoriser.

Please note documents need to be TIF or PDF and not exceed 2MB.

Once a document has been uploaded you will see an '**Attachment icon**' next to the batch item. If you click on the batch item you can then **view**, **change**, **remove** or **download** the attached document.

20. Cash Services

Our Cash Services functionality enables you to order cash online.

Business clients need to apply for this functionality and can contact the Cash Service Desk on 087 736 7069 or send an email to 'fnbcashsolutions@fnb.co.za for assistance.

Once approved, and they have a Cash in Transit (CIT) contract in place, they can submit an order request online and have the cash delivered to their business premises.

Functionality

The following functionality is available on the Cash Services tab:

- Add a Cash Order Request
- View and Search Cash Order History
- Repeat a Cash Order Request
- Maintain a Pending Cash Order Request
- Cancel a Pending Cash Order Request

Business Rules

Important information about the Cash Services functionality

- Administrators must assign the relevant Capture and/or Authorise Permission for their users on each qualifying account. In addition, they will also need to apply the required Authorisation Limits applicable per qualifying Account.
- The Cash Services tab will only be displayed if you have the applicable Business account and/a valid Cash in Transit (CIT) contract in place.
- Cash Ordering Limits are set and maintained at the Cash Service Desk and cannot be maintained on your Online Banking profile.
- Any orders or clearance requests placed after 11h00 will be processed as part of the next business day's batch.

Denominations

The following note and coin denominations can be ordered:

Notes	Coins
R200	R5.00
R100	R2.00
R50	R1.00
R20	R0.50
R10	R0.20
	R0.10
	R0.05

Cash Ordering Cut-Off and Processing Times

Please take note of the cut-off and processing times below.

Cash Services Cut-Off Times			
Day	**Cut-Off Time**	**Processing Date**	**Delivery Date**
Monday – Saturday	11h00	Same Day (Any order requests placed after 11h00 will be processed as part of the next business day's batch.)	As per the frequency stipulated in your CIT Contract. If you miss the cut-off time, your order will only be delivered on your next CIT delivery date.
Sunday	N/A	Next Business Day	
Public Holidays	N/A	Next Business Day	

How to Order Cash

1. Click on the Cash Services tab.
2. Click on the +Add button and select Create.
3. Select the Business delivery option. Note! You will only be able to order cash to be delivered to your business if you have a Cash in Transit contact in place.
4. Complete the relevant details and click on Continue.
5. A new screen will be displayed allowing you to enter the Notes and Coin denominations for your order.
6. A confirmation screen will be displayed.
7. Click on Save and Exit to save the order request in a Work In Progress status or click on Submit to submit the cash order request for authorisation to an Authoriser.

Authorise the Cash Order request

1. The Order will be displayed on the Cash Services tab.
2. Authorisers can select the relevant pending order.
3. Click on Authorise to proceed with the authorisation process.
4. Once completed, an authorisation result page will be displayed.
5. Click on Finish.

Note: If there are multiple Authorisers, all Authorisers must complete the authorisation process.

View Cash Order requests

You can view your orders as well as their current statuses.

A Cash Order for Business Delivery may display one of the following statuses:

- Ordered
- Processing
- Failed
- Cancelled
- Ready to Process
- Insufficient funds
- Completed

Cancel an Order

You can cancel an order prior to the relevant cut-off time.

1. Click on the Cash Services tab.
2. A list of all your orders will be displayed on the page.
3. Click on the Cancel button next to the item you want to cancel.

Edit an Order

You can edit an order prior to the relevant cut-off time.

1. Click on the Cash Services tab.
2. A list of all your orders will be displayed on the page.
3. Click on the Maintain button next to the item you want to edit.

Repeat Orders

You may select to repeat one of your previous orders. This function makes routine ordering so quick and easy.

1. Click on the Cash Services tab.
2. A list of all your orders will be displayed on the page.
3. Click on the Repeat Order button next to the item you want to use again.
